Every motorist who owns a garage

Every motorist in your town whose garage is equipped with swinging doors is a live prospect for our No. 810 Garage Door Holder. It is strong enough to hold any door, operates automatically, has no complicated mechanism to get out of order, is easy to install, and effectively prevents damage to a car from swinging doors.

Put a few into stock, show them to your motorist customers and see how they take to them.

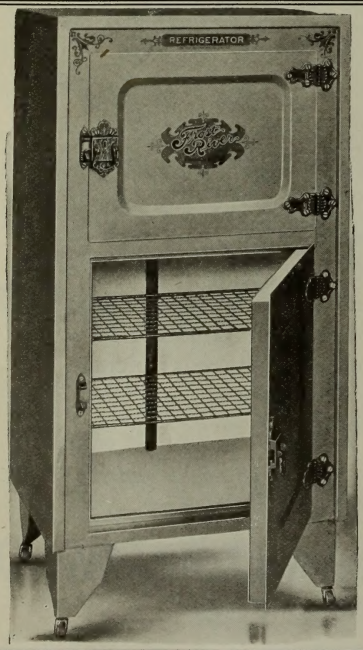
Why the Stack Heater gives a quick service

In the Stack Heater the gas flame circles about the almost perpendicular copper tubes. The whole surface of these tubes is exposed to the heat—a vastly greater heating surface than is found in any other heater.

It will be easy for you to explain this to your customer and to convince him that a number of small columns of water exposed to the flame on all sides will heat much more quickly and economically than one large column heated from one point only.

The James Morrison Brass Mfg. Co., Ltd.
93-97 Adelaide Street West - TORONTO



Davidson's Well Known FROST RIVER

Refrigerator shown herewith

Made entirely of Sheet Steel Galvanized

The exterior is Japanned White, beautifully finished with neatly decorated panels and corner scrolls.

The Food Chamber is coated with white enamel, thoroughly hardened and baked on in an oven of high temperature.

All inside parts are removable for cleaning purposes.

The drip pipe for the waste water has been carried outside the body, and does not run through the Food Chamber—as usual in other refrigerators.

Made in three sizes, the largest with double doors.

NOW is the time to get your Orders in for these goods and ensure prompt shipment.

Order Yours Now
Be Prepared

Each of the three Freezers, LIGHTNING, GEM or BLIZZARD, has served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible—their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running mate with either the Lightning or Gem. They sell themselves and stay sold! No comebacks or complaints.

This means easy, net profits for you. Your jobber will supply you.

Include the Lightning Ice Chipper. It helps the sale of Freezers.

Inspection

that really inspects.

Every "Famous Five" File that leaves our works is mechanically perfect.

The steel itself is carefully inspected when it comes to us from the mills.

Every file is inspected after each process. Special care is given to the shape of the teeth. After hardening, every file is tested on a piece of hardened steel; and if a file shows the slightest defect, at any stage, it is rejected.

That is why every file is mechanically perfect when it leaves our works.

And that's why it pays you to specify "Famous Five" files when ordering from your jobber.

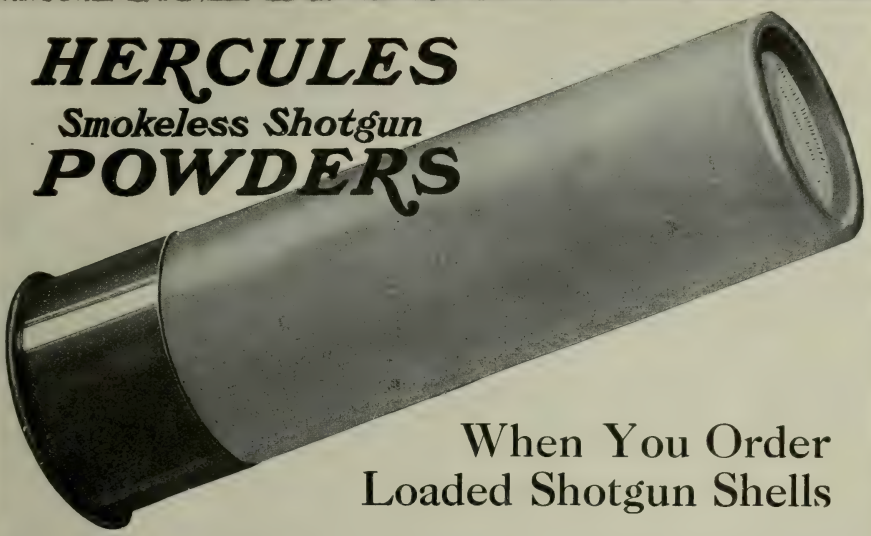
HERCULES
Smokeless Shotgun
POWDERS



When You Order Loaded Shotgun Shells

THE fact that you carry in stock some particular make, or makes, of loaded shotgun shells need in no way prevent you from supplying your customers with the justly popular Infallible Powder, one of the Hercules Smokeless Shotgun Powders.

These splendid powders, which are widely advertised and widely used, may be obtained in any standard make of shell.

Undoubtedly the shells you carry in stock are named in the list at the left. The next time you order, specify a Hercules Powder. The cost of the shells will be the same and you will make sure that you are selling your customers as good powders as can be made, in their favorite brand of shells.

If you are not familiar with the advertising service which we give to retail hardware and sporting goods houses it will pay you to drop us a postal asking about it.

Specify Infallible when ordering any of the following makes of shotgun shells:

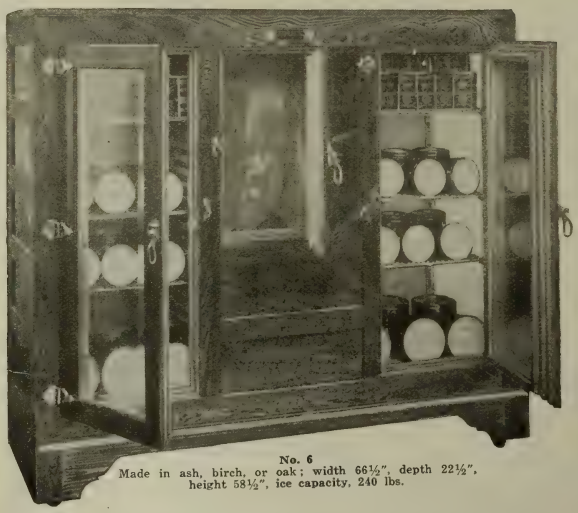
A Winner All Along the Line

Put the Barnet in your show rooms and watch sales grow. In the Barnet you can show your customer every modern feature worth having. The Barnet's patented syphon and air circulating systems insure perfect refrigeration.

Write to-day for full particulars and attractive selling proposition.

THE BARNET

Made in Canada



No. 6
Made in ash, birch, or oak; width 66½", depth 22½", height 58½", ice capacity, 240 lbs.

Insulation

No less than eleven protecting walls —flax fibre—correct dead air space— chemically prepared papers.

Circulation

Improved syphon principle; foods preserved sweet, fresh and cool, in unbroken current of pure, dry air.

No Moisture

As an experiment, matches can be lighted on the walls of the ice chamber after being enclosed in the refrigerator many days.

Drainage

No drainage pipe—simply an opening in refrigerator floor. This avoids accumulation of slimy matter and odors.

Ventilation

The Barnet system is exclusive and is protected by our patents. Prevents contamination and commingling of odors.

Vitreous Porcelain Linings

A great attraction to women—easy-to-keep-clean; will not check or peel. The Barnet carries a hard and fast guarantee.

The Barnet syphon system is the highest achievement in effective refrigeration. It appeals to the best trade. To provide a complete line, we also manufacture a low-priced refrigerator that is good value for the money.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 15 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

Cleveland Grindstones Sharpen

IT'S IN THE GRIT

80% of all edge farm tools used in America are sharpened by the manufacturer on "Cleveland Grindstones," the natural abrasive stone that best preserves the temper of the steel.

Profit by the maker's experience—give your trade an opportunity to keep their tools at their best with "Cleveland Grindstones"—the recognized standard.

Catalog and prices on request.

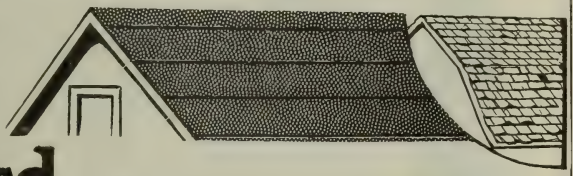
VISES *A Type and Size for Every Service*

If interested, tear out this page and keep with letters to be answered.

The hard winter was hard on roofs.

Prospects are for a big lot of material required for re-roofing

There were more leaky roofs during the past winter than for many years. Live dealers will find this a great opportunity to sell



Brantford Asphalt Roofing

for re-roofing purposes. Most building materials have increased far and away more in cost since the war than has Brantford Roofing, which gives this roofing a great advantage when comparing values.

Another advantage is the ease and speed with which Brantford Asphalt Roofing may be laid. This is a big selling point when labor is so high.

Brantford Asphalt Roofing is a material of exceptional endurance. It is fire-resistant, non-absorbent and frost-proof.

Make a list of the re-roofing prospects in your locality and you will be surprised at the number which could use Brantford Asphalt Roofing to advantage.

TRADE MARK

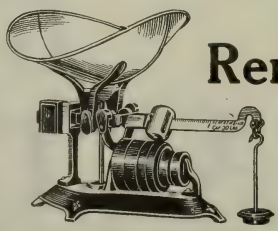
Kills The Losses

Why should housewives take all the risk in regard to honest mistakes in weighing? It certainly is easy to convince her she shouldn't, and that a Renfrew scale will save not only risk but many actual losses. That builds up sales for you.

An ordinary, doubtful scale would only add useless disputes. The Renfrew is accurate for every weight from ½ oz. to 30 lbs., and its owner can prove her weights every time by means of the Government Inspector's Certificate which goes with every Renfrew.

The Renfrew is made in black finish, or in all-nickel finish suitable for candy stores or homes desiring something a little bit better. Write for literature and attractive selling proposition.



The

The Life of the Ad

THE retailers who are securing best results from their newspaper advertising are those who are using illustrations in their advertisements. Just as a mail order catalog would be dead without illustrations, so is the average consumer advertisement when illustrations are omitted.

Canadian retail hardware merchants can secure attractive illustrations through HARDWARE AND METAL'S Electro Service. Mounted electros are supplied at a cost of 20c each. Booklet showing 365 electros will be supplied on request. Address below.

RUBBER SYSTEM
AND ASSOCIATED COMPANIES

For more than half a century our Canadian Rubber Factory has been manufacturing Rubber products. That experience has taught us how to produce qualities that will stand the test of wear.

Every detail in manufacturing is carefully supervised and the greatest care is exercised in the choice of materials. Our facilities for buying, manufacturing and distribution make it possible to produce Mechanical Rubber Goods that represent the best possible values.

As a result, the Dominion Rubber System products are recognized throughout Canada as the standard by which to judge Rubber qualities and Rubber values.

You can easily prove our claims by writing direct to our nearest branch for any need in Rubber. Prompt attention is given to all enquiries.

More Paint Should Be Used--and Sold

National and Industrial Necessity For Larger Use of Paint — New Methods For Paint Selling Which Will Bring About Decided National Benefit to Property Owners With Benefits to All Branches of the Trade

The accompanying article has been contributed to HARDWARE AND METAL with a view to opening up a discussion on how paint manufacturers, wholesalers, retailers, trade papers and others can take steps to increase the sale and use of ready mixed paints in Canada. This is the first installment of a series of articles on the subject. Correspondence from branches of the trade will be welcomed.—Editor.

JIM ROGERS, star salesman of the Spreadit Paint Company, leaned expectantly over his order pad, blew out another smoke ring which struggled languidly into the already over-loaded atmosphere of the Acme's back office, and waited for the last odds-and-ends items of Charley Wright's spring paint order.

"Anything else, Charley?" he questioned, "this spring order of yours makes me feel pretty good—it just winds up the biggest week's business I've written this year."

"Here's your duplicates," he added. "Look them over and see if everything is O.K."

"That'll be about all I can handle next spring, Jim," replied the proprietor of the Acme Hardware Co. "While I have always felt that this community could use more paint and I'm prepared to handle all they can use, it would be poor business to stock up more than will move off my shelves."

"I don't see that you've anything to complain about, Charley, I've always known that if anyone could push paint sales you could do it, there isn't anyone on my territory that gives the house better orders considering the size of your town and your chances for selling."

"That's all right," slowly replied Charley, "I'm pretty well satisfied that the Acme is selling its share of what this community will buy, but they're not buying and using all that they should and could. The limit of my stock and those of the other dealers in this town is exactly what the people buy and use. Somehow or other their demand just about remains the same year in and year out. I'm increasing a little perhaps, because I've been a little more aggressive and have won over a good deal of my trade by sticking to your quality goods. But I figure that the town as a whole is not buying any more now that it has averaged for some time past—and that just about sets the limit for me,—besides I've got the feeling in my bones that my account and those of the other fellows shouldn't be limited in this way."

"What's the answer?" asked Rogers.

"Increase the use of paints and varnishes by more co-operative effort in the trade and better advertising," retorted Wright. "If everyone in the trade from the manufacturer to the painter would get together they could break this limit and better conditions all round."

"You're out to crack a pretty hard nut," remarked Rogers.

"Granted," admitted Charley. "Everybody that I've run up against in the trade admits a wide open opportunity, but nobody has dared to tackle it; you'll admit without argument that more paints and varnishes could and should be used?"

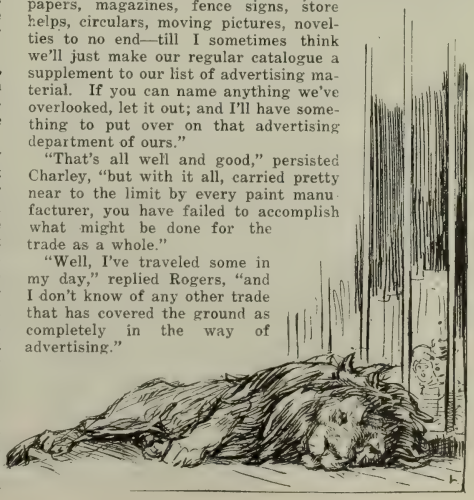
"Haven't any comeback there from me," mused Rogers. "Perhaps you're going to whack me again about our advertising," with an effort to locate the source of his customer's criticism. "Didn't we co-operate with you in every way, shape and form you proposed last spring?—seemed to me you were pretty well satisfied when I was around sorting up in May."

"Your advertising and that of every other paint house is all right so far as it goes—but it doesn't go far enough—isn't broad enough—hasn't the vision it ought to have in view of the opportunity before the trade," quietly remarked Charley, noting with satisfaction that for once he had Rogers guessing as to the motive of his "grouch."

"Lord Harry!" exclaimed Jim, "doesn't go far enough, you'll have to raise the ante! What's the limit?—If you'd hear our advertising man talk you'd realize that there isn't a trick in the whole advertising deck that we haven't turned:—painted signs, bill boards, trade papers, farm papers, magazines, fence signs, store helps, circulars, moving pictures, novelties to no end—till I sometimes think we'll just make our regular catalogue a supplement to our list of advertising material. If you can name anything we've overlooked, let it out; and I'll have something to put over on that advertising department of ours."

"That's all well and good," persisted Charley, "but with it all, carried pretty near to the limit by every paint manufacturer, you have failed to accomplish what might be done for the trade as a whole."

"Well, I've traveled some in my day," replied Rogers, "and I don't know of any other trade that has covered the ground as completely in the way of advertising."



"Nor failed to hit the bull's eye as completely in the face of the chances before it," reaffirmed Charley.

"What's the answer?" asked Rogers, resigning himself to the position this wide-awake hardware and paint dealer had placed him in.

Jim Rogers tilted his chair farther back, re-lighted his neglected cigar and waited for the proprietor of the Acme to answer his own riddle. He had been so long in the paint trade that about him was evidenced the growth of a self-satisfaction that there were no more new angles from which he might look at his own business. Everything that was to be solved, had been solved; for every conundrum he had an answer, perhaps he had one for Charley's attitude if he worked his listening faculties keenly enough. Charley was a perfectly silent listener until he found the vulnerable point in the other fellow's argument.

As to his own conduct, he felt that his duty to himself and his house was fulfilled when he remained wide-awake, kept an eye on the good-will of his customers and let nothing interfere with his top-notch record. Tacitly he admitted to himself, however, that when Charley Wright had something up his sleeve it was worth while laying over till another train to be on hand when the revelation came.

"I'm only one small man in a very small neck of the woods," began Charley slowly, "and I don't very often get a chance to put my ideas up against the other fellow's, but what I lack through such associations perhaps I more than make up for in reflections of my own."

Wright drew several sheets of paper from his desk and, sharpening his lead pencil, remarked that he could talk easier with them than anything else.

"In the first place," he continued, "we have to work on in Canada, a population approximating 8,000,000 people in round numbers. Figuring on an average of five people to the family, we have 1,600,000 families with approximately the same number of dwellings to house them. So far as I can find out when conditions were normal, Canadian paint and varnish factories manufactured annually $8,500,000 worth of paints, varnishes, colors and other finishing materials of all kinds. We imported another $1,500,000 worth making a total of $10,000,000."

"That looks pretty good to me," remarked Rogers.

"You're in for a nice little education in comparisons and averages if those figures satisfy you," replied Charley, "for they plainly tell you that only $1.25 worth of paints and varnishes is manufactured and imported for every man, woman and child in Canada; this includes finishing materials of every class. Of course these figures are factory selling prices, but at that they are too low to my way of thinking. What's more these figures mean each home in Canada only averages $5 yearly in paints and varnishes for their protection, preservation and general upkeep."

"What's that?" exclaimed Rogers, letting his chair come from its tilt with a bang.

"Now hold on," continued Wright, "this number of homes doesn't take into account schools, churches, public buildings, warehouses, stores, factories, barns and a whole raft of other buildings."

By this time Rogers had his pencil out, too, and could hardly wait to supplement Wright's calculations with the observation that probably anywhere from 60 per cent. to 80 per cent. of that $10,000,000 was used up by manufacturers for finishing their products."

"All right," added Charley, continuing his calculations, "take it that they use, say, 70 per cent., that leaves $3,000,000 for the protection of our 1,600,000 homes, or an average of $1.88 per year."

"Zowie," exclaimed Rogers, "it begins to look as though the paint trade had overlooked a good deal after all."

Wright kept up action with his lead pencil. "What amount of paint and varnish do you think would be required to finish an average 25 ft. x 30 ft. house, with, say, seven rooms?"

"Off hand, I should say $35 would supply all the material required, I put these figures at before-the-war prices since yours are taken from normal conditions," ventured Rogers.

"I think you're low, but to be on the safe side, I'll go still lower, and put it at $30 for the average house. This means that if every house were painted annually inside and out, floors and all, it would require $45,000,000 worth of paints and varnishes. Of course an annual "paint up," would be too much to expect of everybody, so I'm just going to ask every householder to do it once in four years which isn't any too often."

By this time Rogers was also filling a sheet with some sizeable figures. "That means," he exclaimed, "$11,250,000 annually for homes alone,—plus $7,000,000 that the manufacturers use or pretty nearly double what has been manufactured and imported."

"Begin to see what I mean, eh?" countered Wright, "make your annual 'paint up' every three years, as it should be, for Mr. and Mrs. Householder, and you'll come pretty close to getting them to use $15,000,000 annually."

"Got any more figures like that?" asked Rogers.

"Last fall," continued Charley, "I ran up from Sarnia to Toronto on the old main line, and came back through Hamilton and London, and just for the fun of the thing took sections here and there along the line, counting the number of painted and unpainted barns—and how many do you think I found painted?"

"Don't know," said Rogers, who was beginning to wonder what he used his eyes for when traveling.

"Just four per cent," answered Charley.

"I've always said that if they could induce every farmer in Ontario to paint his barns and stock sheds and give me the trade I'd retire early," remarked the salesman, "but I never thought my dream would amount to the luxury that that 96 per cent. of unpainted barns would bring."

"Take in Manitoba, Saskatchewan and Alberta where they use a great deal more barn paint than in Ontario, and you'll find only 20 per cent. of the barns are painted in three years' time," continued Wright, bringing out statistics to back his argument.

"Looks as though you were diagnosing for a nation-wide cure-all," said Rogers.

"Why not?" retorted Wright, "when you look into it, the national waste through lack of paint must be something enormous. We were never brought face to face with the need of preservation and conservation more seriously than at the present time. As a simple instance:—No. 1 hemlock that sold less than two years ago at $17 to $19 per thousand in Ontario is now selling at $40. There's a professor out in a Kansas State agricultural college claims that there is a greater loss in deterioration of property through lack of paint than there is loss by fire. Canada's loss by fire in 1917 was upwards of $23,000,000, which is more than twice the amount of paint and varnish produced in normal times. Suppose we reckon this loss at 10 per cent. above the fire loss, you have then over $25,000,000 going absolutely to waste."

"Looks as though our little old $10,000,000 for paints and varnishes ought to be multiplied a little by that co-operative plan I know you've got tucked away in the back of your head," soberly reflected Rogers.

"Now then do you see what I'm driving at when I say your paint advertising hasn't accomplished what it should in view of the facts presented?" retorted Wright.

Instead of taking his usual argumentative attitude in discussions of this nature, Rogers eagerly endeavored to dig deeper into Wright's fund of facts and figures with questions that sought a clearer understanding from this new viewpoint. "Granted that the paint trade has not accomplished all that it might, you don't mean to imply that it has not made progress or that it has not accomplished a great deal of public good?".

"No! I wouldn't say that by any means, mark you, I'm not a pessimist in this matter, but your question leads us into another phase of the question that no one has ever considered very seriously." Again Wright plunged his hand into another pigeon hole in his desk, brought out

fresh statistics and commenced his calculations on a clean sheet of paper. "It would look to me as though your trade falls far short of the economic position it should occupy especially in view of the figures we've just gone over. Those who are responsible for the manufacture, distribution and use of paint are shortly going to wake up and rub their eyes when they look up the long grade that must be climbed to place them anywhere in the economic prominence that they should occupy. In view of the larger service that paints and varnishes should render to national and individual welfare in conservation, protection, sanitation, beautifying and enhancing the value of property, the trade has not even commenced to lift its head amongst the industries that are unquestionably essential and beneficial to mankind."

"You're not going to call us pikers yet?" asked Rogers with a trace of humor.

"Scarcely that," smiled back Wright, "but at that you're bothered with shortsightedness and lack of sense of the relative merit your trade deserves. In other words the people of Canada have not grasped the significance of what it would mean to all concerned to raise it from the status of a luxury to that of a necessity, and if you can induce the public to get the painting habit from the standpoint of its intrinsic value and the dollar-in-pocket economy it will mean to them in preservation rather than "just painting up,' so that the neighbors won't have anything on them in a 'slick up' way, you'll have accomplished a whole lot towards my contention. You know as well as I do that paint, no matter how much or how little it is used, works out into the numerous other benefits as we have already seen in "Paint up and clean up" campaigns conducted in the United States."

"I don't think there is a man in the trade but what believes that paint is a necessity,' remonstrated Rogers.

"They may believe it all right, but they lack action—concerted action—to bring it to a universal reality," replied Wright. "The householder, property owner and the rest of the public at large do not realize it and it'll be a long time before they do unless you bring home the necessity of its larger use more closely than you have in the past."

"How far down in the scale does the trade stand as a necessity and how far up as a luxury?" questioned Rogers with a renewed curiosity as to Wright's statistical resources.

"I told you you were in for a neat little education in comparative figures," retorted Wright, resuming his calculations, "so here's about how you sized up with other Canadian industries in 1915. Of course the figures I'm going to give you are manufacturers' values and do not include importations, but at that the paint trade in comparison with others is like the boy suspended in the hay loft by his galuses, it's only half way up and half way down but neither up nor down. For comparative purposes I am figuring on a per capita basis of 8,000,000 people in the country. You paint manufacturers and we retailers have been pretty ready in proclaiming paint as a clothing for property, but it's a pretty scanty wardrobe that only provides $1.05 per capita for all buildings in Canada (remembering that out of that 60 or 70 per cent. goes for manufacturers' uses). Fortunately we have provided for our own personal comfort much better and produced $18.08 per capita in textiles of all kinds, $3.72 per capita for men's custom and manufactured clothing, $3.26 per capita for women's clothing, 94c per capita for hats, caps and furs, $4.26 per capita for boots and shoes. Even the women take 26c per capita for corsets, largely for the sake of preserving appearances."

Wright glanced slyly at Rogers to see how his figures were taken, but Rogers sat mum,—there was scarcely anything else to do.

"Now then you want to know how far up in the scale the painting industry stands; compare your trade's $1.05 per capita with $15.42 per capita in timber, lumber and remanufactured timber products, $1.22 per capita for furniture, $48.62 in manufactured foods of all kinds, $15.05 per capita in iron and steel products, $1.71 in rubber goods and $5.92 per capita in goods manufactured from leather."

"Looks as though we had room to come up some," grunted Rogers.

"And still some more compared with a production of $4 per capita in liquors and malts of all kinds, $3.62 per capita for tobacco, $3.04 per capita for automobiles, 35c for soft drinks, and 27c for jewelery."

Rogers' sense of humor prompted him to interrupt with: "Even though we were cut off from soaking in some of these things it won't hurt to let the figures soak in."

"At that," smiled Wright, "the nation has some economic sense of humor in the fitness of things by producing $1.18 per capita in drugs and patent medicines and then turns around and spends 22c per capita in monuments and tombstones to preserve the memory of the dead ones."

"Humph," was Rogers only comment.

"In many ways these comparisons may seem unfair, Jim, and there are numerous considerations to be taken into account but they give some idea of where the trade stands. You can see for yourself that in comparison with articles that are more or less non-essential the paint trade hasn't any great number of haloes to adjust about its head. As for its place amongst the essential industries there is no question that it should and can occupy a larger usefulness in our economic life."

"Whatever our sins of omission and commission may have been, Charley, you cannot deny that the paint trade has certainly made some pretty strong efforts to advocate the necessity of using paints and varnishes for protection and insurance against deterioration," declared Rogers with emphasis.

"I'll admit that there is considerable credit coming to you there, but you fellows are something like the theologians, who ball up themselves and their listeners with hair-splitting theology while the real need for their mission gets the go-by."

"What next are you going to pull off?" was Rogers puzzled question.

"You paint people have all taken a try at proclaiming the use of paints and varnishes as insurance, but somehow or other you can't seem to keep away from mixing in with it an over-indulgent dose of a "holier-than-thou-art" attitude toward each other. I'll grant you that differences exist between the manufacturer of mixed paint and the believer in white lead, and that there are grades and grades in paint—high grades, low grades, and in between grades—but let us get together and pull with united strength for the use of more paint and I haven't a doubt that differences will pretty much settle themselves; especially if the consumer is brought to realize the most important reason for using it. At that I'm not so very much convinced that as advocates and brokers of insurance against decay that you've made any howling success."

"More figures?" questioned Rogers with a puzzled expression.

"Yep," nodded Charley, as he reached for an untouched batch of statistics. "Do you know that as underwriters of deterioration you've made a painfully poor showing compared with the insurance companies?"

"Going to X-ray some weak spots, I suppose," said Rogers, with a resigned sigh, wondering where in the world Wright was going to place his business in comparison with another that it had endeavored to imitate in its advertising appeals.

Wright renewed his calculations with a freshly sharpened pencil. "While the paint people were manufacturing $1.05 worth of goods per capita against our greater loss through decay, Canada protected herself against fire at the rate of $4.41 per capita in annual premiums. This meant that we took out new and renewed policies to the extent of $388.94 per capita. This precaution enabled us to get back $1.77 per capita out of the losses incurred. Now if this professor is right (and I think he is), that our loss through lack of paint amounts to more than by fire, and we are only spending 23½ per cent. on paint protection against that spent on fire you can pretty well see just how much paint is doing along insurance lines."

"You've taken the conceit out of me, Charley," admitted

(Continued on page 41)

Daylight Saving in Effect April 15

Bill Will be Put Through Its Various Stages This Week and Assented to, According to Intimation of Premier—Cities Getting Ready to Utilize Extra Daylight in Production of Foodstuffs.

INTIMATION was made by Sir Robert Borden on Tuesday of the present week that the Daylight Saving Bill for Canada will go into effect on Monday next, April 15. The bill was sent to the Senate early during the present week and the remaining stages in passage of the bill are to be completed during the remaining days of the week. It is expected the necessary proclamation to put the bill into effect will appear in the Canada *Gazette* on Saturday of this week. All clocks are to be advanced an hour at midnight on Sunday.

The passage of this measure will come as welcome news to many who are sincerely interested in the production campaign. Not least among the interested ones are the hardware merchants throughout the length and breadth of this land, for they can with better grace urge the planting of more and larger gardens. They will be interested in this phase of the matter by reason of the increased sale of garden tools that will result. But they will be no less interested because it will give them a real opportunity to press all the more urgently on their customers and prospective customers the greater utilization of vacant garden plots. Hardwaremen are interested in the production campaign not alone because it will mean an opportunity to increase their sales, but they are interested in it because they are patriotic enough to see that a great good will result.

Power Will Also be Saved

The extra hour of daylight in the evening will mean that considerable power will be saved in the shape of electric light. People need still less electric light in their homes in the evening than they ordinarily do during the summer months. Their electric light bills will be down to the minimum charge. The housewife will undoubtedly feel more inclined to use more power for such things as the electric sad iron. The saving effected in light may work out towards increased sales in such lines as toasters and electric irons.

Time for the notification of this change will naturally be short, but the people will undoubtedly be posted long before the time for changing the clocks comes round on Sunday evening. There has been general expectation that the measure would pass, even in spite of the opposition from some isolated sections of the community. Farmers in some districts were evidently opposed to the measure on the ground that it was cutting down their available working time because of the dew on the ground in the early morning which prevented them getting to work.

Cities Taking Advantage of Measure

Cities and towns all over Canada are preparing to take full advantage of the opportunity thus afforded by the way of cultivation of vacant lots. The city of Hamilton is going after production in a systematic way. Toronto council has a by-law under way to compel all holders of vacant land to allow them to be cultivated. Fort William is going stronger than ever after the garden planting idea. These are but instances of cities, the same work is going on all over this broad land.

Toronto's Measure

The measure adopted by the Toronto council giving effect to provincial legislation respecting entry upon vacant lots for the purpose of cultivating them and raising crops is as follows:

"The assessment commissioner, through his servants, workmen and agents, is authorized to enter upon, hold and use for the purposes only of cultivating and raising thereon such crops as may be thought proper, any vacant land in the municipality during the present war, and for selling and disposing of the produce thereof.

"Permits may be granted to any persons to enter upon, hold and use, for the purpose only of cultivating it and raising thereon such crops as may be prescribed, any one or more of such parcels of land for such period not exceeding the duration of the present war as may be thought proper, and regulations as to the use of any such parcel by any person to whom a permit is granted, and the kinds of crops which may be raised on any such land may be prescribed by the assessment commissioner, and any permit issued thereunder may be revoked by the assessment commissioner for failure to comply with the terms and conditions of this by-law or of the regulations.

(Continued on page 43.)

No Doubt This Will Be a Common Scene Now That Daylight Saving Will Give More Hours to Work the Garden.

Harness Accessories a Profitable Line

Harness Manufacturers Busy — Government Taking Quantities of Harness For Returned Soldiers—United States Buyers in Canadian Market For 350,000 Sides of Leather—Could Get Only 110,000 Sides

THERE is an excellent demand for harness at the present time and with that demand naturally comes a demand for harness accessories. All harness manufacturers in Canada are worked to capacity at the present time and could handle more business provided they were able to get sufficient supplies of leather. Now that conditions on the farm are good the farmer is in a mood for buying more heavily than he has ever done before. Some hardwaremen already handle harness and nearly all dealers handle certain lines of accessories such as halters, blankets, snaps, rings and buckles, sweatpads. There are possibilities of increased trade in this line by the addition of such parts as hame straps, lines, pole straps, martingales, traces (leather and web), belly bands, collars.

There will be a big business in these lines for some years to come in Canada by reason of the development of agriculture. Already the returned soldiers are starting to get on the land and with the cessation of hostilities there will undoubtedly be a tremendous rush to the land, both on the part of the returned soldiers and by new settlers who come to Canada in quest of homes and land. Farming has received such an impetus during the past two or three years that will carry it along in a great period of development after the war is over. Such stories that have come from the West of the money to be made in farming are luring people out there. There was one instance of a farmer who farmed on a big scale and cleared $67,000 last year. Such stories and examples as this are even causing manufacturers in the cities to cast longing eyes toward the farm. Furthermore, there will in all probability be a great need for food long after the war has ceased. This will naturally keep prices high and will permit the farmers to continue to get good prices for their commodities. The farmer is ready to spend money at the present time. One of the lines which he is anxious to keep in good repair is his stock of harness. The demand which manufacturers are experiencing at the present time is very good evidence that the farmer is prepared to make expenditures.

All Manufacturers Busy

All harness manufacturers are busy at the present time. In fact the majority of them could get a great deal more business than they are able to handle. "There is an insistent demand for good harness from the farming districts," stated one prominent manufacturer to HARDWARE AND METAL. "The farmers have the money and they are willing to spend it. The biggest problem at the present time is to get the supplies of raw materials. Leather is hard to obtain, not because there is a dearth of the raw hides, but because there is a dearth of the chemicals with which to carry on the tanning process. Many of the chemicals used in the tanning process are vegetable substances which come from South America. With the shortage of tonnage it has been impossible to get these commodities to this continent in sufficient quantities to look after the needs of the industry. To meet this shortage of leather there has already been devised a trace made from cotton fabric which is filling part of the demand."

Outfitting Veterans

The Government has been in the market recently for harness for the purpose of outfitting veterans who desire to go to the land and take up farming. One manufacturer has already received an initial order for one hundred sets of harness. In all probability there will be other orders to follow as the soldiers more generally take to the idea of farming. This business naturally has right of way over other business, as it is Government business and is in the interest of production. Each soldier that goes to the land in Northern Ontario is given a loan of $2,400, interest free, with five years in which to repay it. It is safe to conjecture that under these conditions there will be an increasing number of soldiers who will go to the farms in the new districts. One of the big difficulties toward the rapid settlement of the land in Canada in the past has been the initial investment necessary. Farmers with small capital have often found that the task was too great to finance the proposition with an initial investment of practically nothing. Homesteaders have often gone into promising sections but have later abandoned their holding because of the uphill work in financing the same. But with the necessary financial backing of the Government a start can be made which should put these returned men well along the road to financial independence. They will have the necessary capital to buy harness, implements, stock, seed and to see them through the first year or two. This ready cash is going to be a big factor in the prosperity of the hardwaremen of the district in which these soldiers take up their abode. It is going to give them a good start that will enable them to be good customers in the years to come.

Soldiers as Farmers

These returned soldiers who go to the land are going to be a different type of farmer from those who have always lived on the farm. These men have been out where big things have been going on. They have seen with their own eyes progressive and aggressive methods of doing things. This will undoubtedly have a great influence on their methods of farming. It will mean that they will endeavor to find the best methods and the best tools and instruments with which to carry on their farming operations. They will spend their money when they get it. They will not hoard it and be poor spenders. They will spend their money, first because they will have it to spend, and second because it will appeal to them as being a good business proposition to get good materials with which to carry on their work.

United States After Leather

United States buyers have recently been in the Canadian market with instructions to buy 350,000 sides of leather from Canadian manufacturers. It is understood they have been able to secure only 110,000 sides. That is less than one-third what they were commissioned to buy. This leather is of course being used for war purposes in the United States in the equipping of artillery and also in filling orders for the Allies for the same purpose. This big demand has sent the price of leather up 4c to 5c per pound within the past six weeks. The class of leather used for harness is from heavy hides. There has been an insistent demand for this class of leather from United States manufacturers for some months past. Light leather such as that used in the manufacture of shoes is fairly plentiful and prices of those grades are easier.

Chemicals Are Big Factor

While hides are plentiful at the present time the tanners assert their operations are greatly restricted through their inability to get sufficient supplies of chemicals to carry on the tanning process. One harness manufacturer is authority for the statement that fully 50 per cent. of the chemicals used by tanners come from South America, being certain vegetable extracts which can be obtained only in that section. With the shortage of tonnage, ships which ordinarily ply in the South American trade have been taken off those routes and are being used in trade routes where the need is more urgent. There are some of the chemicals being brought in, of course, but the war requirements for

leather are the first that must be met. The domestic trade gets what is left in the shape of leather. There will undoubtedly be a restriction of tonnage in the South American trade as long as the war continues. With the restriction of the carrying trade of chemicals leather for harness will in all probability be in restricted supply for some time at least—until such time as the war demand begins to fall off.

Snaps and Rings Hard to Get

One of the harness accessory lines that has been hard to secure for the domestic trade within recent months is that of snaps and rings and buckles. There has been a restriction of the amount of steel available for the manufacture of these goods. Any that were manufactured have in large measure been turned to war purposes. In consequence harness manufacturers have found their operations have been restricted by reason of the dearth of these parts. Production of all the factories has been directed to war work and the domestic trade came in for anything that remained. Production of plants for the manufacture of such steel lines has been greatly increased and harness manufacturers anticipate there will be a great keenness for trade as soon as the war demand begins to slacken. In consequence the manufacturers anticipate there will be lower prices in a number of these lines when the war is over. But when the war will be over is still a moot question.

Harness a Coming Line

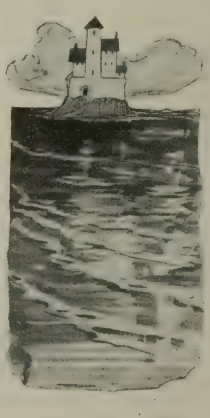
In view of the probable demand for harness after the war is over harness bids fair to be a promising line for the hardware merchant. Just at the present time he would probably find difficulty in getting a stock of harness should he decide to embark on this line. Manufacturers of harness are all busy and are not in a position to take on new business in the immediate future. Still that is a temporary condition and does not prohibit the hardwareman from looking forward to the possibilities of this trade when normal conditions return. The profit in harness transactions is good, usually ranging in the neighborhood of 15 per cent. on investment. As the item of each individual sale amounts to a good round sum the net profit on each sale is considerable. The investment necessary in a harness stock is fairly large, but no larger than some other lines that a hardwareman has been accustomed to handle. With a ready market and sure pay the investment in harness is one which will bring returns. Farmers have been slow pay in many instances, but there is no reason why this condition should exist in time to come. They are getting cash for all their commodities and the prices have been most favorable.

Start With Harness Parts

In the face of the difficulty attending the securing of harness at the present time the hardwaremen might be well advised to confine his attention to the sale of parts for the present. There are numerous lines such as belly bands, halters, lines, hame straps, pole straps, martingales, collars, sweatpads, traces, whips, blankets, snaps, rings and buckles which he could in the meantime handle to advantage. Manufacturers are able to supply these parts and with a complete line he would be well along on the way to capturing the business in harness later on. There will undoubtedly be a big demand for harness parts from this time forward. Farm production is going to go forward at a very rapid pace. There will be a speeding up on the farms and this will mean more wear and tear on the harness. These harness parts are lines which the hardwareman can handle without the necessity of expert knowledge of the harness-making business. Manufacturers will be in a position to supply these goods. There will be a good field for the trade. Hardwaremen should be in a position to take full advantage of the same. It is essential that the opening should be pointed out.

Big After-War Demand

As already indicated in this article the after-war demand for harness and parts will undoubtedly be large. The need for food supplies will drive the people to the land because of the high prices that prevail for these commodities. This farming class will be recruited from two sources, namely, from the returned Canadian soldiers and from those people who will emigrate to Canada to find homes for themselves. Of course, there is the possibility that the Governments of Europe might restrict the emigration of their people to a foreign land in view of their own dire need for men and women to work their industries and till their soil. Should this come about in some countries it is hardly likely that all countries will be agreed on such a method of action. Settlers from the United States will undoubtedly continue to come to Canada in large numbers. It is hardly likely that Great Britain will place restrictions on the movements of her citizens, especially when they are desirous of moving from one part of the Empire to another part. All these facts have a bearing on the after-war trade for harness. The one big fact should be remembered that Canada is an agricultural country and much vacant land still remains to be taken up. With the need for food it is bound to be taken up.



No Jute for Blankets

Blankets is one of the lines which has been greatly restricted in output owing to the difficulty of obtaining raw materials such as jute. This commodity formerly came from India by way of Great Britain, being manufactured in Dundee, Scotland, and transshipped to this continent. An embargo has prevailed on the shipment of this commodity from the British Isles for some time past. There is no immediate possibility of the same being lifted and until further supplies of jute come forward the manufacture of blankets will be greatly curtailed. There is always the possibility that some substitutes for jute may be found, but until that time comes present restricted operations are likely to continue. Wool blankets are practically out of the question at the present time owing to the need for wool for clothing for the armies. This uncertain supply of blankets is likely to continue until such time as the war is over and conditions settle into normal channels again.

MANUFACTURERS ADVANCE PLATE GLASS

Advices from New York state that plate glass prices have again been sharply advanced by the manufacturers and large distributors, who have just announced that the discount off the list price will in future be 86 per cent., as compared with 88 per cent. discount heretofore prevailing. This is equivalent to an increase in price of 16 2-3 per cent. The price of plate glass has been steadily advancing since the war, and the present quotations are 75 per cent. higher than those charged during 1915.

In other words, plate glass of a list price of $100 could be bought during 1915 at $8, whereas now the same glass costs $14. This advance, the manufacturers claim, is due to the higher cost of labor, the scarcity of fuel and other important factors. Glass dealers and distributers are of the opinion that the cost will continue its upward trend, and point out that while standard sizes have been advanced 75 per cent., the larger sized plates are relatively much higher, so that on the whole the increase all around is more than 75 per cent.

On the other hand, the allowances for salvage have not proportionately increased. The salvage allowance, which used to be 94 per cent. off list, has only been reduced to 93 per cent. The cost of setting glass has also been considerably increased by the glaziers.

F. H. Jeffery, Hampton Court, Hamilton, Ont., has resigned his position with the Stanley Mills hardware of that city. Mr. Jeffery has been with the company for the past four years as manager and buyer.

Ready Roofing Costs Less than Shingles

Comparison of Initial Cost Shows Ready Roofing One-half to One-third Below That of Shingles—Cost of Laying Shingles Greater Than Ready Roofing—Life of Painted Ready Roofing Estimated at 25 Years

THERE is a field for ready roofing at the present time which the hardwareman can develop perhaps even more than he has in the past. This commodity has trade-pulling power by reason of the attractiveness of the price as compared with wooden shingles, for instance. With building materials at a high price there is a tendency to forego building operations on this account. In some instances the cost of ready roofing has not advanced over pre-war prices. Again, there are instances where certain makes have advanced approximately thirty-three and one-third per cent. But even with the advances in the cost of the ready roofing there is still a very material advantage in favor of its use as compared with wooden shingles. For instance, the initial cost of cedar shingles at present prices is $4.20 per square of 100 feet. The cost of ready roofing on the other hand ranges in price from $1.75 to $3.10 per square of 100 feet for three-ply grade. This is an initial saving of $1.10 to $2.45 on each 100 square feet.

Various Kinds of Farm Buildings Could be Roofed with Ready Roofing

Comparative Cost of Laying Roofing

After the initial outlay for roofing has been made there immediately enters the comparative cost of placing the same on the building. One does not have to cogitate long to come to the conclusion that there is a great disparity between this cost item. The manager of one large roofing supply house estimates that two or three men would lay between 50 and 60 squares of ready roofing in a day. It is estimated the same number of men would not be able to lay more than 20 to 30 squares of cedar shingles at the most in the same length of time. With the cost of workmen's wages placed at $4 per day in each instance it will be seen that the cost of laying wooden shingles would be at least double that of laying the ready roofing. Taken right down the line the cost of ready roofing is therefore at least one-third to one-half the cost of cedar shingles. A factor which must be taken into consideration, however, is the life of ready roofing as compared with cedar shingles. Here, again, the comparison is not unfavorable to ready roofing.

Durability of Ready Roofing

Manufacturers of ready roofing usually claim their commodity will last at least five years for each single ply. In other words roofing of one-ply would be considered as having a normal life of five years. Two-ply roofing would be considered as giving good satisfaction if the length of life were ten years, while three-ply should normally last at least 15 years. Very often roofing will last much longer than the time indicated. Much depends on the method adopted in laying the roofing. If a coat of roofing paint is put on the ready roofing the length of life will be almost doubled. For instance, three-ply roofing that would normally last 15 years without a coat of paint could be expected to last at least 25 years if a coat of paint were applied. The additional cost of an application of paint would be in the neighborhood of 20c to 30c per square.

A lumberman, on the other hand, estimates the normal life of a red cedar shingle roof would be in the neighborhood of 30 years, if 3X shingles were used and provided galvanized roofing nails or cut shingle nails were used. If the ordinary wire shingle nails were used the lumberman in question estimated the life of the roof would not be over 5 to 10 years. It is asserted the common wire nail will rust out in 5 to 10 years and so cause the destruction of the roof. Much depends on the method of laying the cedar shingles, therefore, as to whether or not it will give maximum duration.

Composition of Ready Roofing

Invariably the composition of ready roofing consists of felt and asphalt pitch. This is in distinction to the regular tar building paper which is saturated with a tar solution. Ready roofing, composed as it is of asphalt pitch and felt, is a slow-burning material. It is to a certain extent fire-resisting. Some of the fire departments in the large cities have tests to which they submit the various kinds of roofing. One of these tests consists in building a fire of certain proportions underneath a sheet of the roofing. A certain number of wooden sticks and a certain amount of excelsior is used to kindle a fire. If the ready roofing takes a certain length of time to consume it is placed in Class A. If the length of time is less than that required for the first-class the roofing is placed in category B. In a city like Toronto, for instance, it is permissible to use these various classifications of ready roofing in certain defined districts of the city. Class A can be used in the construction of buildings in the downtown section, or in other words in any part of the city. Greater care is taken in the kind of materials required for the downtown business section than for any other section of the city. Another test to which ready roofing is sometimes put is the blow torch test. This, again, is a time test, that is, the length of time required for the flame to burn through the roofing is considered.

Time the Only Test of Roofing

Although the fire departments of various cities may require a test of these materials for the purpose of ascertaining the inflammability of the article, there is really no test to which ready roofing can be put in order to ascertain its durability. Roofing manufacturers and experts are quite generally agreed that time is the only test that can be applied to a roofing. It may be a rather slow process to ascertain whether or not it will give satisfaction, but it remains a fact that the actual wearing qualities of ready roofing is the best test. One large dealer went to the expense of having a sample tested thoroughly in a scientific laboratory in order to ascertain if possible what elements it contained. The scientists pursued their investigations as far as possible but finally had to give the problem up on account of the difficulty experienced in analyzing the composition of the felt materials. It became impossible to pursue the investigations beyond that point. While time is the only test of a roofing it is gratifying to know that the various leading manufacturers and dealers in ready roofing assert that they have yet to have a complaint expressed that ready roofing did not give satisfaction from the point of durability.

Price Changes in Ready Roofing

Like every other commodity there has been an advancing cost in connection with the manufacture of ready roofing.

EDITORIAL COMMENT

DO YOUR CLERKS ASSIST YOU?

MERCHANTS should not lose sight of the importance of bringing to the surface the aims and ideas of those who help to make their business a success. This is sometimes neglected. Perhaps all too often the clerks are made to feel that any suggestions they might give are not welcomed in the least.

Such an attitude shows an independent spirit on the part of the merchant which may shut him out from wise development along particular lines. Every clerk has some ideas that are worth while if they are sifted out.

Some of those clerks will some day have businesses of their own. They are not all going to remain in a subordinate capacity behind the counter. The soundness of their judgment will be proven in the success which they make in after years.

But these clerks are now laying the foundation for their future success. If their ideas are headed in the right direction now it would be of material advantage to the merchant to receive suggestions they may make. It should be the function of the keen merchant to discern where these ideas are sound. Encouragement of the clerks to suggest new ideas will result in good to the merchant.

DAYLIGHT SAVING PROJECT A FACT

ANNOUNCEMENT was made by Premier Borden during the week that the Daylight Saving scheme would come into effect on Monday, April 15. Clocks will be moved forward one hour at midnight on Sunday.

This will come as welcome news to the hardware trade in general. For the scheme will not alone help production. It will help trade. It is not in a selfish way that the hardwareman will view the scheme. Great benefit will accrue in a number of ways.

Production will be assisted in a way that cannot be overestimated. Power will be saved in the electric light that is ordinarily burned during the last hour of the working day. There will be a lessening of the number of accidents in industrial plants.

Investigation into the working of the daylight saving scheme in Great Britain led to the conclusion by the committee that the majority of accidents take place in the waning hours of daylight when the workers are somewhat fatigued and when the light is not good.

All these considerations are powerful reasons for the passage of the daylight saving bill. There is, in addition, the health reason. People will spend more time outdoors when they have a longer evening. There will be general approval throughout Canada for this measure.

IS BUSINESS GOOD?

A STORY is told of an old Quaker who laid great stress upon the attitude of mind of the business man to influence his whole business outlook and prospect. While the Quaker stood watering his horse at the village trough a new neighbor paused to ask: "What manner of people live in this village?"

"What manner of people did thee live among before?" asked the Quaker.

"They were mean, narrow, suspicious and ready to take unfair advantage," returned the newcomer.

"I am sorry," said the Quaker, "for thee will find the same sort of people here."

Again the Quaker chanced to be at the trough and another came and asked the nature of the populace. To him the Quaker again put the question: "What manner of people didst thee live among before?"

"There are none finer than the people I left behind. They were neighbors and I loved them. It was hard for me to leave them—I love them all, but I had to journey on."

"Be of good cheer, my neighbor," returned the Quaker, "for thee will find the same people here."

Is there a hardwareman who feels the limits of his present field of operations. Does he consider the people of his town mean, callous, suspicious? If he does he would do well to try and change his attitude of mind. There must be many worth-while people among them. It greatly hinders trade to draw up a sweeping indictment against a whole town or village

FARMERS in some sections of the country were reported as opposed to the Daylight Saving Bill. Their representatives asserted that the farmer's day would be shortened rather than lengthened. Can it be that the farmer is afraid of garden production, which might reduce the market for his commodities to a certain extent?

Current Events in Photograph—No. 15

GAS ATTACK SIGNAL SOUNDS

THE masked figures are not a revival of the Ku Klux Klan, but Canadian soldiers in France, who have been warned of a coming gas attack and have donned their gas masks in preparation. In the rear is seen the dugout, and back of that the shot-scarred ground. Note the soldier in the foreground making the best of the situation by smoking a cigarette through his mask.

Steel Sheets Will Be Available

Manager of Steel Importing Company Thinks Supplies Will be Forthcoming, Although Prices May Incline to Higher Levels—Outlook for Canadian Manufacturer.

"WHAT may the trade expect in the way of steel sheet supplies for the regular trade demands, and as applying also to iron and steel needs of the retail trade?" was asked of John B. Paxton, manager of the structural steel business of Drummond, McCall & Co., Ltd., Montreal.

"They will be able to get their supplies all right, I feel sure, for some time to come. They may have to pay more for them, but this will be a matter that they will have to face as conditions obtain from time to time.

"The price is set, of course, in the United States. This means that the producers will have more interest in the Canadian field—that is, for orders such as they can fill beyond their own country's requirements. Their own Government needs will have to be met and those of the industrial plants wanting supplies there. Aside from these they will take on what Canadian business they can get, and, of course, they will ask the Canadian buyer more for his requirements than the price fixed by their home government."

"What will the industrial situation be, Mr. Paxton?"

"It is not looking very bright for the Canadian manufacturer. The United States requirements are so large and the work there so urgent that the supplies Canada can expect to get will necessarily be uncertain. In view of the fact that the United States shipbuilding output is less than was anticipated, and with the programme for the present year so large, it is only to be expected that the requirements for Canada must be curtailed. The shipbuilding interests will probably be taken care of as well as possible, especially with going concerns that are in a position to carry on their programme upon a solid basis, such as are established concerns."

It was pointed out that considerable desire was being manifested from various points to float large shipbuilding plants, and that there was an element of danger in this. The programme was one that the average individual could not grasp the significance of. That is to say, the building of a ship, from start to finish, involves so much that none but experts can undertake such a contract. "Even in England," pointed out Mr. Paxton, "several boats have been built after one prescribed design, and when they were finally completed each was of a considerably different type. This had been brought about through the changing of standards and the adoption of new ideas that had been decided upon after the ships were laid down."

"Just a few days ago we had an inquiry for many thousand tons of structural steel," said Mr. Paxton, "and after making inquiries it was found that a company was projected for the manufacture of ships by men who had been following a distinctly different class of manufacturing. It was little understood what dabbling in a line of business so vast as this meant. Even at United States Pacific Coast points trouble had been encountered in a similar manner."

Superintendent Wouldn't Be "Greased"

Sales Agent Lost All Chance of Doing Any Business With Toronto Firm When He Offered Secret Commission to Superintendent and Purchasing Agent — Ordered to "Take His Dirty Little Bills and Clear Out"

The facts contained in this article were given to a representative of HARDWARE AND METAL. *An official of a large plant in Toronto outlined the whole thing as it happened. For reasons that are very legitimate he requested this paper to not use the name of his company or the company using the "greasing" method referred to here. However, he was anxious that the facts should be brought out so that this method of doing business should be suppressed.*

FOR the purpose of this story we'll call the salesman Mr. Grease, from the method of his tactics of greasing the hands of those with whom he did business. The superintendent of one of the best-known shops in Toronto can here be called Mr. Blank. Mr. Grease represents a house calling on machine shops and kindred plants. He hails from a city other than Toronto. Not having been able to secure orders from the Toronto plant in question, Mr. Grease kept on persistently, and at last got in an initial order. The order was given more to get rid of the man than because it was considered that his wares had any particular merit.

His "Follow-Up"

Now that he had driven the thin edge of the wedge, Mr. Grease sought to lay hands on the sledge hammer that would open the Toronto house up for his line of goods. He didn't bother about any of the understrappers around the shop. He went straight for the superintendent. If he could tie him up the business was his. He didn't waste much time in the preliminary wind-up. Mr. Grease figured that his snake fund was the most powerful weapon he could bring to bear on the situation. So he got Mr. Blank in his office in the factory and easily at first, and with a great burst of speed as he proceeded, he began to lay the programme.

Lots in On This

"You don't need to be afraid of this," urged Mr. Grease, "almost every person is doing business on this plan now, and none of them who are dealing with me have ever had any trouble. The goods will not cost your company any more on this account. The thing is square enough. I spend money this way instead of advertising. I will pay you one per cent. on every dollar's worth of business you place with me from your company or any of the other concerns that your people are linked up with. I have gone into this matter carefully and I want your business. I am prepared to make it worth while for you. I reckon that I can get for your own pocket, if you can switch your whole plant to my line, at least $1,000 per month."

He Was Doubtful

Mr. Grease left the vision of the thousand per month in thin air for a moment. He reckoned that it would not take long for a four figure harpoon to ride through the skin of Mr. Blank's scruples. But Mr. Blank was not quite certain. If he was going in for the snake fund he wanted to grab a good big fat snake instead of a skinny little garter snake that the hired man can kill with the hoe handle.

"But one per cent. is not much for me to get out of this," argued Mr. Blank, "considering all the money I make for you and the chances I take in doing this kind of work. What's more, I understand that you pay a higher rate than this to some of the other men you deal with."

A Bright Idea

"The rate I offer to pay you," replied Mr. Grease, "is exactly the same as I am allowing to the others who are in on this offer. However, if you want to raise it a little, I believe it can be done. Prices are jumping in all lines just now, and it wouldn't be much of a trick to raise the price to your firm a little. That increase is yours," concluded Mr. Grease with an impressive wave of the hand.

"Looks easy enough," remarked Mr. Blank, "but it would be safer if we could get the purchasing agent in on this, too. The two of us can swing such a proposition much easier than one. We practically have the whole thing in our hands here. When you come again on Friday I'll arrange to have the purchasing agent on hand. By then I can have a favorable report on your line, and we can fix it up to get started at once."

So Mr. Grease left, having made an engagement for a visit with Mr. Blank and the purchasing agent on Friday.

Ready for Him

Mr. Blank at once got into touch with the officials of his company. He had been with them for twenty years, and he knew they trusted him implicitly in everything. He outlined Mr. Grease's plan of campaign, and suggested that he would be a good man to kill off quick. So plans for the killing were arranged. Mr. Blank and the buyer were to meet Mr. Grease, while another official, whose office was contiguous to that of the superintendent was to be an unseen witness to the handing over of the coin, for this was one bit of evidence that they were particularly anxious to hang around Mr. Grease's neck.

They Were Ready

The salesman was on deck at the appointed hour on Friday. When a man's going to swing a big deal he can't afford to sleep in in the morning. Mr. Grease believes in this. Mr. Blank and the purchasing agent believed it too. Introductions followed after the office door had been carefully closed. Mr. Blank assured Mr. Grease that the third party to the deal was O.K. This relieved the element of doubt and brought about the very atmosphere in which big deals are hatched and where millions come to existence.

Mr. Grease led. In fact he played his whole nine innings before the others had a chance to come to the plate. The thing looked good to Blank. Likewise it appeared a pleasant thing for the purchasing agent to gaze upon. Mr. Grease took a pencil, a jacknife and a sheaf of paper. He put it down in black and white, showing how there was a good fat thing in the deal for two on a fifty-fifty basis.

He Had the Cash

"But how about the commission on the first order?" asked Mr. Blank, who was anxious to speed up the game to the point where Mr. Grease would produce the actual cash.

But they couldn't stall Grease. He had apparently not forgotten anything. He was prepared to put salve on the skids right from the start. With a bland smile that comes but few times to few people and often not at all to many, he let his strong right hand glide to his inside pocket. He produced an envelope from a spot close to his heart. Said envelope had five new ten-dollar bills. Grease handed them over with the remark that a procession like that would come in handy. He also suggested that a real order could be accepted right now.

What Happened

Mr. Blank took the snake fund in his hands. It seemed to make an excellent tonic for his vocal cords. It also put some ginger into his make-up that Mr. Grease had not noticed before.

"You poor, miserable cur," snapped Blank. "I have been with this concern for twenty years. I have handled deals that would make you dizzy. The company has been on the level with me and I have been the same to them. This is the first time I have ever been insulted by such a dirty low-down offer. You will never do another cent's worth of business with this or any other concern that I can head you off from." Then, tossing the bills across the table he con-

cluded "you'd better take your dirty little bills and clear out while the way's still open."

Poor Grease gathered up his snake fund, his hat, and cleared out.

Wouldn't Deduct It

The secretary of the Toronto concern was on the point of writing the firm represented by Mr. Grease to the effect that they were sending them cheque for the goods minus one per cent. which they understood they had been overcharged. A better way was suggested. It was found that the goods were still intact. They were shipped back, a letter following stating that owing to the rotten business methods followed by the concern it was not their wish to have any dealings with them at all.

"Do you come in contact with much of this sort of business?" inquired HARDWARE AND METAL.

"Very little that comes to the surface," answered the official. "It is hard

At $5 per hour the Boss was ready for all sorts of eloquence.

to find evidence that you can lay your hands on, although cases have come to the top where the scheme has been tried. The men who follow the graft game generally keep a good distance from the factory. They aim to 'fix' some person in our organization whom they can use to advantage. Fortunately we have an air-tight staff that can't be fixed," he concluded.

From the Legal Point

HARDWARE AND METAL discussed the matter with a gentleman well qualified to speak from the legal point on this question.

"In such a case," he stated, "the man who gives a bribe and a man who takes it are open for a charge. Of course it would be different where the man took it in this case with the knowledge of his company. Not many of these cases are ever followed up. Companies do not like the publicity they get in court. There is also an element of injustice in it for the companies that are proceeded against, for the actions of one dishonest salesman may be taken as the policy of the entire organization, which might be quite honorable and honest. Were there a desire on the part of the company to follow up such a case it could be done," he concluded. "The Crown attorney would have good cause to go ahead and issue the papers."

READY ROOFING COSTS LESS

(Continued from page 37)

In most instances the manufacturers' cost has advanced in the neighborhood of 33 1/3 per cent., which cost has been passed along to the dealer or jobber. In one instance, however, the jobber was able to enter into a contract with the manufacturer which has enabled the former to maintain the pre-war prices on his commodity. This concern in question naturally has had a good trade in their particular line of roofing. During the year 1917 their sales were doubled as compared with 1916. For the present year the demand has started in well and there is every indication they will have an even better year than last year. Shipments are now being made against contracts that call for spring delivery. With a favorable price there is every indication that the concern in question will have a banner year in roofing. But for other concerns who have been compelled to follow the market upward in conformity with the manufacturer's higher cost there is still the very material advantage in favor of ready roofing as compared with wooden shingles. This fact should mean bigger and better trade than heretofore.

Method of Laying Roofing

One of the factors that help greatly to increase the life of a ready roofing is a coat of coal tar paint. Dealers assert that with a small expenditure in that direction the life of the roofing can be almost doubled. For instance, the normal life of three-ply roofing is stated to be fifteen years. One large dealer asserted that with a coat of paint it would probably last 25 years. Paint for this purpose is rather inexpensive. In barrel lots it is quoted at 45c per gallon and in small lots at 75c per gallon. One gallon of this paint will cover approximately two and one-half squares, or about 250 square feet. If the surface of the roofing is not in a receptive condition the paint will go much farther. It is well to have the surface properly prepared for the paint as the paint will thereby penetrate into the surface of the roofing. When the roofing comes from the manufacturer it is prepared with a coating of French talc to keep the surface from sticking when the material is rolled. If the roofing is allowed to remain for a year after being put on the building without painting this talc will have worn off and the surface will be rougher and more susceptible to the paint covering. Some manufacturers even advise that the painting be deferred for upwards of two years.

Kinds of Buildings

There are various classes of buildings on which this kind of roofing can be used to good advantage. Farmers can use it to very good advantage in the construction of barns, sheds and other buildings of a similar nature. It could even be used to good advantage in the cheaper class of dwelling. One of the telling talking points in favor of ready roofing is the generally good satisfaction that has resulted from its use. In a number of years' experience manufacturers and dealers state they have yet to hear of the case where the purchaser has made any complaint about the lasting qualities of the commodity.

Pick Reliable Dealer

The question naturally arises as to how the dealer can feel assured that he is going to get a good quality of roofing when he decides to make his purchase. The best advice would be to pick a reliable wholesale dealer or pick a brand that has stood the test of time and is known to have given satisfaction. There are a number of such roofings on the market.

MORE PAINT SHOULD BE USED

(Continued from page 33)

Rogers. "Doesn't it beat the Dutch how little rows of plain ordinary, every day figures set up against each other put a fellow down to about his actual size? Here, I've been going round all chested up about the big business we've been doing, when every day in the week I've been rubbing shoulders against bigger business and didn't know it. It certainly pays for some fellow like you to put the magnifying glass on facts and just tell how much isn't in our make up as well as how much is."

Wright endeavored to comfort the subdued spirit of Rogers by explaining that he had not worked out these figures for the purpose of showing up his trade, but rather that it should form the basis for building it up for national benefit as well as to further the welfare of all connected with it. "You know, Jim," he continued, "it's a mighty hard thing to see ourselves as others see us, and while I've stood off and made these heartless disinterested observations I've the hunch that everybody down the line—manufacturers of paints and varnishes of all kinds, jobbers, retailers, master painters, decorators, journeymen painters, even the makers of brushes and other painting accessories—would have a pleasant surprise and a fatter pocket book if there was more of a get together spirit amongst them for this purpose."

"Well now, Charley, since you have taken the trouble to diagnose our ailments, how are you going to apply this 'cure all' of yours?"

"Perhaps with a good strong tonic; however that's too long a story for to-day, Jim; the next time you're around to fill that order pad you've dropped, I may have a prescription that'll tone you up."

"It won't be an order pad I open up next time, Charley, but a pretty fair sized note book to fill with suggestions for the house," grinned Rogers as he passed out of the Acme door towards his hotel, where he continued some pretty serious reflecting concerning the business he had imagined he knew so well.

(To be continued.)

EVENTS IN THE TRADE

BUSINESS CHANGES

Veteran, Alta.—R. D. Frazer, hardware, has sold out.

Eston, Sask.—Bleakley, Johnston & Co., hardware, have dissolved.

Pierson, Man.—F. J. Bradley, hardware, has been succeeded by Box Bros.

Speers, Sask.—McRae & Potters, hardware, have dissolved. J. McRae continues.

Lampman, Sask.—Trout Bros., hardware, have been succeeded by Gendreau & Butler.

McCreary, Man.—F. N. Smith, hardware, has been succeeded by Angus & Hawkins.

Elmwood, Ont.—H. Reuber & Son, hardware, have dissolved.

Saskatoon, Sask.—Campbell & Cooper, hardware, have dissolved, J. A. Cooper continuing under same style.

The hardware business of the late S. J. Smith, conducted under the firm name of Smith & Pethick, has been sold to Mr. Fishleigh, of Hagarsville.

The Robert Neilly hardware, of Bradford, Ont., has been sold, H. F. S. Gardner, of Newmarket, being the buyer. He will take possession after taking stock.

Mitchell, Ont.—The firm of McLean & Hawes, hardware merchants, Mitchell, Ont., has dissolved partnership. George McLean has taken over Mr. Hawes' interest in the business, as the latter has reported for military duty.

TRADE NOTES

Success, Sask.—W. S. Mahoney, hardware, is adding furniture stock.

FIRE LOSS

Quebec, Que.—Martineau Co., wholesale and retail hardware, have suffered fire loss.

Kirriemuir, Alta.—R. Spaulding (Est. of), hardware, has sold stock.

The show case works and saw mill of D. H. Gillies Co., London, Ont., were razed by fire on the night of April 7, with a loss of $25,000. The blaze started in the boiler room.

The *Monetary Times'* estimate of Canada's fire loss during March, 1918, is $1,682,286, compared with the February loss of $2,243,762, and $2,050,650 for March, 1917.

For over twenty-four hours fire raged in the oil plant of the Galena Signal Oil Works on Royce Avenue, Toronto. The entire building was a mass of ruins Sunday. Two hundred thousand gallons of oil were destroyed and the loss estimated by the Police and Fire Department was placed at $200,000. Believed to have started from a small grass fire on the side of the railway tracks close by the main building of the Galena building, the entire two-storey brick structure was soon enveloped in flames.

OBITUARY

J. H. Stewart, hardware merchant, Tilbury, Ont., is dead.

Edgar M. McDougall, president Canada Iron Foundries, Ltd., and president Caledonia Iron Works Co., Ltd., Montreal, Que., is dead.

Joseph H. Stewart, for many years manager of Mungo Stewart & Sons, hardware and furniture dealers, of Tilbury, Ont., died on March 28 at his home in that town. Mr. Stewart was practically a lifelong resident of the town, having been born in Tilbury East. The family moved to town, where the father, Mungo Stewart, established the first hardware and tinsmithing business on the present site. A furniture department was added later and the firm has been under the joint management of the two sons, Joseph and Samuel, for several years. Mr. Stewart is survived by a wife and three young daughters, Irene, Frances and Grace. His father, Mungo Stewart, also survives; two brothers, Samuel and James, and two sisters, Misses Margaret and Ella.

PERSONAL

Cecil Stewart, son of D. Stewart, proprietor of the Burtt Hardware Co., Woodstock, N.B., is in Toronto, having joined the Royal Air Forces.

E. E. Lyday, general manager in Canada for the Maytag Co., has left for a business trip to headquarters at Newton, Iowa, and expects to be away about a week.

O. D. Jacob of Winnipeg has taken a position as salesman in the R. L. McNaughton hardware store at Craik, Sask. Mr. Jacobs will assist in the management of the business while Mr. McNaughton is away on military duty.

MONTREAL NEWS NOTES

Among the Montreal visitors this week was J. Bruce Morrow, manufacturers' agent, of Toronto.

Fred J. Pierce, representing Munn's Kalsomine Co., of New York, who has been in the Maritime Provinces, was in Montreal for a few days. Mr. Pierce will cover the Ontario territory as well.

E. A. Williams, with John Lucas & Co., Philadelphia, was a visitor to Montreal on his way to Ontario points.

W. F. McLennan, sales manager for Brandram-Henderson, Montreal, was a Montreal visitor the beginning of the week.

W. G. Harris, Sr., president of the Canada Metal Co., was in Montreal during the present week, visiting the Montreal branch.

P. A. Wuterich, representing the Charles Parker Co., Meriden, Conn., guns and hardware specialties, was a visitor to Montreal in the interests of his firm.

George Robert, of St. Louis de Gonzaques, was a Montreal visitor during the past week.

The Guelph Patent Cast Company, of Port Rouge, Quebec, was represented in Montreal this week by Joseph Julien.

F. B. Leslie, of A. C. Leslie & Co., wholesale metal importers, Montreal, is this week in New York, Philadelphia, and other southern points.

OIL MAN DIES

J. B. McColl, of McColl Brothers, oil merchants, Toronto, passed away at his residence, 49 Jackes Avenue, on April 7. The late Mr. McColl was born in Glasgow in 1841 and came to Canada with his parents in 1844. He entered into partnership with his brother, the late Angus B. McColl, in 1880. He is survived by his wife, two sons and three daughters.

CORRECTION

On page 85 of the March 23 issue of HARDWARE AND METAL, in the advertisement of A. C. Leslie & Co., Ltd., reference was made to steel sheets "Southern Cross," the advertisement stating that these sheets were especially adapted for stool and range manufacturers. The word "stool" was a misprint and should have appeared as "stove." This slight error would undoubtedly be obvious to the manufacturers who would be interested in this announcement.

PLANS FOR NEW BUILDING

Plans are now being completed for the J. H. Ashdown Hardware Co. for the erection of a new building in Saskatoon to replace the warehouse destroyed by fire on March 10. It is stated that this warehouse will be much larger than the old one and will measure 100 x 110 feet, 6 stories and a basement. Temporary

quarters have been secured and a supply of hardware will be secured from the Winnipeg house until manufacturers make delivery.

TO MANUFACTURE HANDLES

Wilfrid Fryfogle, formerly of the Western Foundry Co., Limited, Wingham, has purchased the old evaporator building at Seaforth, and will use it as a factory in which to manufacture handles. Machinery will be installed in it and all kinds of wooden handles will be manufactured. James Hamilton will have charge of this new factory.

APPOINTED TRAVELLING REPRESENTATIVE

A. Lalonde, of Timmins, Ont., has taken the position of travelling representative for Patenaude & Berini, manufacturers of the safety stove pipe, and will travel throughout Canada in the interests of the firm. The business of the firm has grown to such proportions that Messrs. Patenaude & Berini have found it necessary to have their factory in Toronto, states the "Porcupine Advance." Mr. Lalonde is well known and popular in the Camp, having been a resident there for several years. Since 1912 he has been with the J. P. McLaughlin store.

ADDRESS ON THE ALLIES

"Allies—Not a War Topic" is the subject of an address to be given by H. L. Frost, of Hamilton, at the second Board of Trade business men's supper to be held in Barrie on Thursday, April 11. Mr. Frost is president of the Frost Steel and Wire Co., Ltd., and also is president of the Ontario Associated Boards of Trade. He is one of the big men of Hamilton in a business way, and has been prominently identified with Board of Trade work for several years.

INCORPORATIONS

Oil Company Incorporated

The Great Lakes Oil Refining Company, Limited, has been incorporated under the laws of the Province of Ontario to prospect for, open, explore, develop, work, improve, maintain and manage oil wells, oil properties and natural gas wells, and to manufacture and refine the products thereof, whether belonging to the company or not, and to render the same merchantable. The company is capitalized at $1,750,000, with the head office of the company at Toronto. The names of the incorporators are as follows: James Houston Spence and Grant Cooper, barristers-at-law; Howard Addison Hall, student-at-law; Lilian Murray Heal, accountant; and Emma Staples, stenographer.

Hardware Firm Incorporates

The Long & Wilson Hardware Company, Limited, has been incorporated under the laws of the Province of Ontario, with head office at the town of Walkerville. Those constituting the company, as set forth in the memorandum of agreement, are: Albert Long, merchant; Rae Bertha Long, married woman; Alfred Meirs, municipal clerk; Herbert Walter Wilson, contractor; Sidney Albert Wilson, plumber. The objects of the company as set forth are to carry on business as merchants and dealers in hardware and builders' supplies. The capital of the company is to be $40,000.

Automobile and Accessory Company

The Universal Car Company, Limited, has been chartered under the laws of Ontario, with a capitalization of $60,000, to carry on business to manufacture, buy, sell and deal in automobiles and in automobile parts, and to carry on a general garage business. The head office of the company is to be situated in the City of Toronto.

PAINT MEN CO-OPERATE

The erection of a coal tar dye plant, in order to assist in the commercial defeat of Germany, and the manufacture of insectides by the thousands of tons for the conservation of agricultural resources, were two of the instances given by John D. Barker, general superintendent of the Sherwin-Williams Paint Company, speaking at the Kiwanis Club, Montreal, as showing the co-operation that existed between all the paint producing plants at the present time.

Mr. Barker traced the growth of the paint industry and, speaking of co-operation, said that was the lesson which stood out more clearly than anything else in the war, and any failures that the Allied forces had had during the campaign had been through lack of unified action. The same principle of co-operation had to be applied to all classes of society in order to secure success, for it was realized that, when one class of the community suffered, all classes were affected, and when there was unemployment or the purchasing power of the public was diminished, all business suffered. Competition was good, but it should be kept in its place and be fair and above board, and co-operation should have its proper function in all business life.

BIG INCREASE IN AUTOMOBILES IN ALBERTA

The amazing increase in the number of permits issued under the Motor Vehicle Act of Alberta during the year 1917 is the outstanding feature of the annual report of the Provincial Secretary which has been submitted to the Legislature, the figures for last year being 20,624 as compared with 9,707 for 1916, the revenue received being $269,786.90 against $129,212.25.

The record for the twelve years beginning 1905 is astonishing and demonstrates the growing wealth of the agricultural community of the province, the great increase in the number of automobiles in use being in the main attributable to the enhanced purchasing ability of the farmers of Alberta. In 1906 the number of permits issued was 41, and the revenue $123.

The following are the figures for the next succeeding eleven years:—1907-55, $169; 1908-45, $137.50; 1909-275, $499.50; 1910-423, $1,398; 1911-1631, $3,524; 1912-2505, $31,012; 1913-3775, $45,941.50; 1914-4728, $60,604.75; 1915-5832, $86,102.25; 1916-9707, $129,212.25; 1917-20624, $269,786.90.

DAYLIGHT SAVING, APRIL 15

(Continued from page 32.)

Must Have Consent

"Before entering upon, or issuing a permit with respect to any parcel of land, notice of the intention of the assessment commissioner to enter upon or issue a permit and fixing a day for the assessment commissioner to hear any objections which he may desire to make shall be left with the owner or transmitted to him by post to the address of his residence or place of business in the municipality, if he resides or has a place of business there, and, if he is not a resident in the municipality, then to his address, if known.

In Name of City

"No entry shall be made upon, or permit issued therefor, with respect to any parcel of land if the owner of it produces proof to the satisfaction of the assessment commissioner that it will be required by him during the current year for building or manufacturing or other revenue-producing purposes.

"All permits granted under this by-law and all notices to the owners of any parcel of land may be given in the name of the corporation by the assessment commissioner, and a fee of twenty-five cents may be charged for the issue of each permit."

HARDWARE LETTER BOX

Manufacturer of Floor Scrapers

T. P. Calkin & Co.—Kindly give the names of manufacturers of floor scrapers, power machines.

Alderson, Hammond & Ritchey Company, Toronto; Schleuter Company, Chicago, Ill.—Ed.

Manufacturers of Shades

Central Hardware and Paint Store, Montreal.—Kindly give us the names of some concerns manufacturing shades for electric wooden lamps and also sockets for the wooden lamps.

Northern Electric Company, Montreal; Canadian General Electric Co., Toronto; Canadian H. W. Johns-Manville Company, Montreal and Toronto.—Ed.

Asbestos Mats

J. H. Slater, Ridgetown, Ont.—Kindly give the names of manufacturers of asbestos mats.

E. T. Wright Co., Limited, Hamilton, Ont.—Ed.

Electric Light Systems

A. B. Girard, Verner, Ont.—Kindly give the name of manufacturers of electric light plants suitable for private dwelling. Also name of concern where I can secure electric tire pump for private garage.

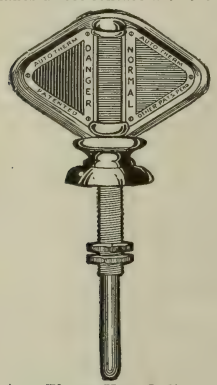
Lighting plant from Delco Products Company, Toronto. Electric tire pump from Hyslop Bros., Toronto; Canadian-Fairbanks-Morse Co., Toronto.—Ed.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

NEW HEAT INDICATOR

Auto-Therm is a new device that is attached to any radiator cap in a few minutes. The lower tube, which is flexible, makes direct contact with the water.



Auto-Therm Heat Indicator

The transparent panels are red and purple in color. When the water is at normal temperature the liquid in the centre tube is red, but when the temperature in the radiator rises above efficiency point, the liquid turns a livid purple, giving an instant warning of danger. As there are no small figures to read, as with other devices, this warning signal may be instantly seen day or night, as at night the reflection from the headlights keeps the colors in plain sight. It is claimed for it that the Auto-Therm thus warns against broken fan belt, open petcock, leaking radiator, seized pistons, lack of oil, clogged radiator, etc. It is being sold in two sizes and is marketed by the Canada Sales Company, 183 Church St., Toronto.

Switch Soot Destroyer

WITCH SOOT DESTROYER

The Canadian Witch Co., Vancouver, B.C., are marketing the Witch Soot Destroyer and Chimney Cleaner. They state this effectively cleans chimneys without taking down pipes, covering up furniture, taking down curtains, etc., and having the air of the rooms laden with sooty particles, besides other numerous annoyances. The manufacturers of this product claim that it will clean chimneys if directions are followed and thus the expense and bother of chimney sweeping is eliminated. Complete details regarding the product, along with prices, etc., will be supplied upon request. The address of the company is Canada Witch Co., 300 Welton Bldg., Vancouver, B. C.

AUTOMOBILE PULL OUT

The Automobile Pull Out is being distributed by P. A. C. McIntyre Company, Scott Block, Winnipeg.

This machine is made for the purpose of pulling an automobile out when stuck from any position. It is also claimed

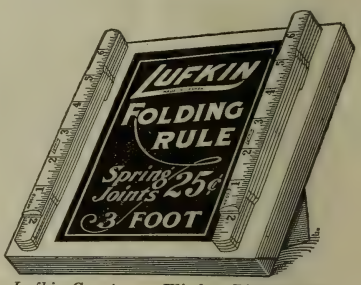
Automobile Pull Out

for it that it is capable of many other uses for lifting or pulling.

It is essentially designed to be of service to one man under any circumstances. The automobile can be pulled forward or backward as the occasion requires.

Directions for operating are as follows: Attach each of the forward ropes that are passed through the roller or drum of the machine to the axle of the automobile. After they are attached then pull the machine, or pull out, to the centre of the rope. With the handle, which is a three-quarter inch pipe, you screw the corkscrew or anchor into the ground, and attach the anchor rope into the eye of the screw. Then by using the handle as a lever in the socket of the rachet, you can wind the ropes on the drum, until the car is removed from the obstruction.

The machine is equipped with forty-five feet of rope, and will move the automobile thirty feet without resetting the anchor screw. The machine is sixteen inches long, eight inches wide, and weighs twenty pounds, and will fit under the seat of any automobile. The screw is made of steel and is sixteen inches long, and is designed to stand a very heavy pull.

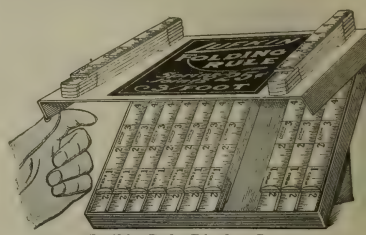


Lufkin Counter or Window Display Box

SPRING JOINT WOOD RULE DISPLAY

A counter or window display box of Lufkin Spring Joint Wood Rules is just out. These boxes are constructed with supporting easel and have, mounted upon the cover of each, two of the rules, the remaining ten rules inside being readily accessible as the cover lifts up, as shown in illustration above. A catchy label in colors on the cover top makes the display very attractive.

The boxes are put out carrying one dozen either 2 ft. or 3 ft. rules as ordered, the rules being the yellow enameled concealed-joint pattern.



Lufkin Rule Display Box

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

REVISED prices on shovels, spades and scoops have been made during the week which reveal an advance of about 10 per cent. all the way through. This is directly attributed to the recent advance provided for in new discounts issued on handles. Another line which has been affected similarly is handled axes, new quotations now ruling at considerably higher levels.

The fact that prices on white lead remain uniformly high and linseed oil has advanced materially since prices were established on ready-mixed paints in February leads to the belief that higher prices on paints would not come as any surprise. Manufacturing costs continue to soar also and it is thought that new prices from 15c to 25c per gallon higher may be named.

Linseed oil supplies are very limited and there are few offering oil in any quantity. Some shipments reached the city during the week which, with others expected, will clean up the back orders which have accumulated in these quarters. Turpentine reveals a firming tendency in the primary market and this is reflected in the Toronto market though Montreal has declined 8c per gallon.

Tin remains in its usual scarce condition in the metal markets and there are no sales reported. Revised prices have been made in solder in some quarters and manufactured products containing tin must necessarily be in an uncertain position. Tin plate stocks are badly broken and heavy grades are practically unobtainable.

Further advances have been made in clay and rock picks, mattocks, grub hoes, crowbars and wrecking bars. This follows a higher level of prices only recently established and indicates the position of steel and how cost of production has increased.

New net prices have been issued on game traps which are about 10 per cent. higher than those formerly ruling. Wood screws have advanced approximately 20 per cent. in the United States and whereas no change has yet been made in Canada, jobbers seem to feel that an advance may follow here. Revisions in prices towards higher levels are revealed in quotations issued on Mrs. Potts' sad irons, cotton gloves, cotton wrapping twine, mop sticks and cloths, oilcloth binding, Nicholson files, Redlich faucets and foot warmers. Business is reported to be good.

MONTREAL MARKETS

MONTREAL, April 11.—There continues to be a firm position on most lines. The only item recording a downward revision this week is that of kraft wrapping paper which is now down to 10c per pound. Revision and advances are made on shovels, scoops, spades, etc., following the new high prices on handles. Mops are also higher as are steel snow shovels, crowbars, claw bars, picks, mattocks and padlocks. Seine twine has again advanced, this time about 3c per pound and cotton twines are firm. It would seem that there is likely to be more difficulty than was anticipated in getting large supplies of tin plates in and an announcement regarding this will soon be available. Trade is reported satisfactory.

New Prices Named On Padlocks

Montreal.

PADLOCKS.—Advances have been made in certain lines of Yale padlocks. These are immediately effective and some of the changes are represented as follows: No. 813, advanced from $14.65 to $16.12 per dozen; No. 823, $16.15 to $17.75 per dozen; No. 843, $20.65 to $22.70 per dozen. Other lines for the present remain unchanged.

Mops, Kraft Paper, Snow Shovels Revised

Montreal.

MOPS, WRAPPING PAPER, SNOW SHOVELS.—New prices are quoted on mops and on the self-wringing these are $4.75; No. 8, $1.90; crank style, $6.90 and No. 10, $2.10. Wrapping paper of the "kraft" variety is selling at 10c a reduction of 1c per pound. Steel snow shovels are now quoted at 5 per cent. off the list.

Shovels, Scoops, Spades On New List

Montreal.

SHOVELS, SPADES, ETC. — Last week it was very definitely predicted that the market on shovels would show an advance, due to the situation on handles. HARDWARE AND METAL'S comments in this respect are fully borne out this week. A new list has been issued covering several of the lines and this will be found elsewhere. From this list the discount is now fixed at 50 per cent. and in a general way the increase is figured to approximate about $1.00 per dozen. The change is immediately effective.

Clay Picks, Crow Bars, Cutters Advance

Montreal.

CLAY PICKS, MATTOCKS, ETC.—Adjusting of prices this week make new quotations for these lines and the changes are varied. Some new levels have been reached and on clay picks there will be found in the current quotations a wider spread than formerly. Grub mattocks, asphalt cutters, crow bars and claw bars have been revised in price, the latter selling at $10 per 100 lbs.

Wood Screws Firm; Advance In U.S.

Montreal.

WOOD SCREWS.—A dispatch from New York has been received that screws were being advanced there and to an amount which would probably equal 20 per cent. The action so made will surely reflect here, say the jobbers, and an announcement to this effect may be made at an early date. Prices locally are firm and unchanged at discounts shown in current quotations.

Active Demand For Ranges; Bookings Made

Montreal.

STOVES, ENAMELWARE. — The range manufacturers state that there has been a fair movement of stoves and par-

ticularly of ranges. The usual spring moving will perhaps stimulate this even more and supplies seem to be well maintained. There have been no price revisions. Some bookings for heaters are now coming to hand from outside points. There is a fairly good volume of trade in the various lines of enamel ware and galvanized ware. For the present there is a very active trade in cheese factory supplies such as milk cans and the outlook is generally speaking good.

Weather Impedes Sales Gasoline; Market Holds

Montreal.

GASOLINE AND COAL OIL.—There is the usual amount of business for coal oil. Trading is naturally somewhat less than it has been with the approach of longer days, but prices are unchanged. The refiners state that there would be a better movement of gasoline were the weather conditions more seasonable, the cold making it unpleasant for many who would otherwise use their cars. Gasoline is still on the basis of 34c; Palacine and Electroline at 22c and Royalite 19c per gallon.

Rope Demand Quiet; Some Twine Business

Montreal.

ROPE, CORDAGE, BINDER TWINE. —Market conditions rule unchanged both as regards price and business. Movement will be small, probably until water routes open. There has been some enquiry for binder twine, that is some orders are now being received. It is expected that shipments may be wanted earlier this season than last, in view of the delays regarding deliveries. Prices are now expected to hold much as they are. Pure Manila rope basis is 39c lb.; British Manila 33c and sisal 27½c. One firm reports a good volume of shipping orders.

Wire Nail Movement Coming; Prices Hold

Montreal.

WIRE AND NAILS.—Some movement of wire nails is already evident and it only remains now for the opening of water routes to speed up business from the many points that will have delivery made over the cheaper transportation lines. Even at the present time there is a fair movement. City business continues backward, but from the country a fair number of orders continue to come in. Wire nails are firm but unchanged at $5.25; cut nails $5.60 and smooth steel wire holds the base price of $6.25 still.

Good Sales Made Of Iron And Bar Steel

Montreal.

IRON AND STEEL.—Considerable business is now being transacted in a wholesale jobbing way. Much of this comes from the country trade and there will be an increased activity, it is expected, in the near future. Prices are maintained fully without change, and stocks are ample for the immediate present.

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80

NET EXTRAS—
For each size larger than No. 2, add 25c dozen net.
Full polished ....$1.00 per dozen net
Half polished .... 50c per dozen net

F.o.b. London, Hamilton, Toronto, Gananoque, Ottawa, Montreal, Quebec, Halifax, St. John, Moncton, and freight may be equalized thereon.

Following are net prices on some of the standard lines: Shovels and spades, Black Cat, polished, $13.00; black, $12.00; Bull Dog, polished, $15.50; black, $14.50; No. 3 D.H.R.P., black, $14.75 per dozen.

Black Cat Scoops—Black are quoted as follows: No. 4, $17.75; No. 6, $18.25; No. 8, $18.75; No. 10, $19.25 per dozen.

Fair Sale For Steel Sheets; Market Steady

Montreal.

SHEETS AND PLATES.—The week has brought very little change in the position on sheets and plates, either for galvanized or black. Trading is fairly well maintained, and from the country orders sift in. Prices are steady and without revision, and as pointed out last week there is evidence that revisions are less likely for some little time. In the matter of tinplates there is an indication of further restrictions than were contemplated a week ago. Further information will probably follow in a subsequent report.

BLACK SHEETS—		100 lbs.

16 ga.	8 70

Solder Rules High; Lead Products Firm

Montreal.

LEAD PRODUCTS.—The position on lead products holds well without change. There is a fairly good trade for certain lines and the jobbers are able to meet this well. The position of solder is naturally a firm one with tin on so high a basis, but quotations as given hold without further revision. Prices are as follows:

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12½	0 13
Lead sheets, 4 to 8 lbs. sq. ft.	0 11½	0 12½

Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.

Solder, commercial, lb.	....	0 48¾
Solder, wiping, lb.	....	0 44¼
Zinc sheets, casks	0 26	0 30
Do., broken lots	0 28	0 32

Old Heavy Cast Iron Strong; Market Quiet

Montreal.

OLD MATERIALS.—The old material market is rather quiet, little movement of some lines being reported. The very strong position of heavy cast iron is the week's feature and this is selling as high as $38 per ton for the better grades. Scrap copper, zinc, rubbers and the other lines are quiet and unchanged. The probability is that more movement will characterize the market in the next few weeks.

Tea lead	$ 0 05	$0 06½

Ingot Tin Licensed; Conditions Quiet

Montreal.

INGOT METALS.—There is a fair amount of business in copper, but as a general thing the ingot metals are quiet.

Price-fixing in the States has not reflected itself very materially here, as yet.

COPPER.—There is some uncertainty expressed as to the future action of the government regarding copper regulations. In the meantime trading is steady at 33c-34c per pound.

LEAD.—Trading is light, but the price ru'es steadily here. The New York market is firmer under light offerings. Prices quoted here hold unchanged at 10c to 10½c.

SPELTER.—With production in the States decreased by about 50 per cent. of the capacity, a steadier situation is likely to reveal itself. Here there is but a limited amount of trading on the unchanged price basis of 10c.

TIN.—Some licenses have already been issued covering limited shipments from Britain. These supplies are much needed, and it is still hoped that other quantities will be forthcoming. The ruling quotation is $1 to $1.05.

ANTIMONY.—Supplies of antimony are rather confined, from a jobbing standpoint. Japanese grade is showing less among the imports. Prices hold at around 17c per pound. The U.S. position is rather easy.

ALUMINUM.—Some strength is evident locally, owing to the fact that the fixing of prices across the line does not affect Canada. Prices have firmed and quotations are up to 55c-60c per pound.

TORONTO MARKETS

TORONTO, April 11.—New prices have again been established on rock picks, mattocks, grub hoes, crowbars and wrecking bars at higher levels than provided for in the recent advance. A revised list and discount has been established on shovels, spades and scoops. The lists have been so arranged that a uniform discount of 50 per cent. applies throughout. Handled axes have undergone revision upward, the new prices being based on the recent big advances in handles. Cotton wrapping twine is up another 3c per pound, 3-ply selling as high as 72c per pound. Cotton gloves and mop cloths have followed other cotton lines and gone higher. Other lines affected during the week include Redlich faucets, mop sticks, hog rings, oil cloth binding, Mrs. Potts' sad irons, door springs, etc., all of which have gone up in price. Business continues good, but the difficulty in getting merchandise is becoming increasingly evident. Warm rains would improve conditions in the country and are urgently needed.

Oil Cloth Binding Up; Hog Rings Too

Toronto.

OIL CLOTH BINDING, HOG RINGS, GARDEN SPADES.—New prices have been established on oil cloth binding, the quotations now prevailing calling for an advance over former prices. The present selling prices range as follows: Brass 4 x 4, $2.20; 5 x 4, $2.75; 6 x 4, $3.30; 8 x 4, $4.40 dozen; zinced 4 x 4, $1.35; 5 x 4, $1.70; 6 x 4, $2.00; 8 x 4, $2.65 dozen.

Hog rings at 60c per M. are higher in some quarters. A new price of $6.00 per dozen has been established on ladies garden spades, this representing an advance.

Cotton Twines Higher; Mop Cloths Advance

Toronto.

COTTON TWINE, GLOVES, CLOTHS, MOP STICKS.—A stronger tone has developed in the cotton market during the week and a further advance of 3c per pound has been made in cotton wrapping twines, 3-ply now selling up to 72c per pound and 4-ply up to 76c per pound. Cotton gloves No. 81B, without cuff, are being quoted at $1.60 and the khaki No. 70K with cuff at $2.90 per dozen pairs. Higher levels are evident in these quotations. Mop cloths No. 1, for self-wringing mops, have gone up to $2.85 and the No. 2, $2.30 per dozen. The self-wringing mop complete sells up to $4.85 and spring mop sticks are being quoted as high as $1.85 per dozen.

Advance in Potts Irons; New Size Clothes Line

Toronto.

POTTS IRONS, CLOTHES LINES, FAUCETS.—Mrs. Potts' sad irons have again come into the limelight and record an advance in some quarters. The No. 50 is now being quoted up to $2.00 set and the No. 55 up to $1.90 set. A new size in hemp clothes lines is now being put on the market, only 20 ft. in length, and is selling at $1.10 per dozen. The idea it is said, is to give the retailer a line which he can retail at 15c. Redlich faucets at the new prices established show advances, the No. 2 selling at $1.35; No. 3 at $1.60; No. 4 at $1.90; No. 6 at $2.40 dozen.

Fasteners Decline; Wood Screws Unchanged

Toronto.

CORRUGATED FASTENERS, WOOD SCREWS, IRON RIVETS.—A decline has been recorded in corrugated fasteners, becoming effective April 9. The new discount on plain edge is given at 35 and 20 per cent. against a former discount of 30 and 10 per cent.; the multiple point or saw edge now sell at 30 and 5 per cent. against a former discount of 15 and 5 per cent.

Wood screws remain firm and unchanged. An advance has been recorded in the United States, but no change has as yet been made in Canda. A uniform discount of 25 per cent. is now ruling on iron rivets; this affects black, tinned and coppered.

Door Springs, Files, Apple Parers All Advance

Toronto.

DOOR SPRINGS, FILES, APPLE PARERS.—New prices have been established on coil door springs, the No. 2 now selling at 60c; No. 3 at 65c, and No. 4 at 70c per dozen. Nicholson files, on which the discount has been 37½ per cent., have advanced in price as is shown by the lower discount now ruling of 30 per cent. Apple parers have gone to higher levels, prices now being quoted on the Rocking Table being $12.50 per dozen and the Little Star $8.90 per dozen.

Advance in Handled Axes; Foot Warmers Higher

Toronto.

HANDLED AXES, FOOT WARMERS.—The recent big advance in all lines of handles is working out in a higher price being established on many "handled" goods. This is shown in a new basis which has been made effective on handled axes, these now ranging from $15.25 per dozen to $21.55 or more.

Foot warmers are also quoted at advanced figures. No. 5B takes a new price of $2.25; No. 7C is up to $2.50, and No. 7D goes to $2.75 each, while the brick is quoted at 75c per dozen.

Picks, Mattocks, Crowbars Go Still Higher

Toronto.

PICKS, MATTOCKS, GRUB HOES, BARS.—Still higher levels have been reached in prices applying to the various lines. This follows advances made only a short time ago. However, it is thought the present basis will remain steady for some little time, but then everything seems uncertain these days and only the future will tell. The quotations now being made are as follows:

	Dozen
Clay picks, 5-6 lb.	$10.75
Clay picks, 6-7 lb.	11.50
Clay picks, 7-8 lb.	12.25
Rock picks, 7-8 lb.	12.25
Mattocks, long cutter	12.50
Mattocks, pick	12.50
Grub hoes	10.00
Wrecking bars, 24-in.	5.50
Wrecking bars, 30-in.	6.00
Wrecking Bars, 36-in.	6.75
Crowbars	$9.50 100 lbs.

Net Prices Available on Game Traps

Toronto.

GAME TRAPS.—As reported in these columns last week a new discount has been established on game traps which provides for a 10 per cent. advance throughout. Net prices have now been figured out and are as follows:

Victor, with chain—No. 0, $1.90; No. 1, $2.20; No. 1½, $3.30; No. 2, $4.60; No. 3, $6.15; No. 4, $7.25; No. 91, $3.10; No. 91½, $4.40 per dozen.

Jump, with chain—No. 0, $2.50; No. 1, $2.95; No. 1½, $4.40; No. 2, $6.45; No. 3, $8.55 per dozen.

Hawley & Norton, with chain—No. 0, $2.95; No. 1, $3.45; No. 1½, $5.15; No. 2, $7.25; No. 3, $9.65; No. 4, $11.35 per dozen.

Newhouse, with chain — No. 0, $4.05 No. 1, $4.70; No. 1½, $7.10; No. 2, $10.45; No. 3, $13.95; No. 4, $16.45; No. 1, $16.45; No. 81, $5.50; No. 91, $5.95 per dozen.

Newhouse bear traps—No. 5, $10.00; No. 50, $7.05 each.

Revision in Shovels, Spades, Scoops is an Advance

Toronto.

SHOVELS, SPADES, SCOOPS.—New prices have been established during the week on shovels, spades and scoops, representing an advance all the way through. This is due principally to the increased cost of handles, new discounts on which were established two or three weeks ago. It is to be noted that lists have been adopted and a uniform discount of 50 per cent. established. This should simplify matters considerably and will aid the retailer materially in determining correct quotations. Lists as shown apply to the No. 2 size and black finish. For each size larger than No. 2 a net extra of 25c per dozen applies. This 25c is added whether manufacturers make all sizes or not; for instance, in quoting scoops, some No. 2 will now sell at $17.25; No. 4 (skipping one size) will be 50c higher or $17.75; No. 5 advances 25c to $18.00, while No. 8 (skipping three sizes) is 75c up or $18.75 per dozen. Some confusion was at first evident but with this explanation it is hoped the extras will be correctly arrived at. The new lists and discounts with extras now applying appear in panel on another page.

Big Demand for Gasoline; Oil Moving Freely

Toronto.

OILS, GASOLINE.—An increasingly heavy consumption of gasoline is in evidence, with the advent of warmer weather and increased use of motor cars, etc. Coal oil is also moving out freely. No change in prices has been made during the week, gasoline holding firm at 33c per gallon, and Royalite and Palacine coal oil at 18c and 21c per gallon respectively. Lubricating oils are steady and unchanged at prices noted in current market quotations.

Increased Activity in Wire Nails

Toronto.

NAILS, WIRE.—There is increased activity apparent in wire nails, orders going forward quite freely and many inquiries being made. Rumors of price cutting are current but the base of $5.20 per 100 pounds is said to be firmly maintained in nearly every quarter. Little interest centres around smooth steel wire, little being shipped out as yet. The base price remains unchanged at $6.25 per 100 pounds. Cut nails maintain a firm base at $5.65 per 100 pounds.

Summer Lines Stoves in Good Demand

Toronto.

STOVES, ENAMELWARE.— The heaviest month in the year for oil stoves in the matter of shipments is being experienced now and reports from all sources indicate heavy sales of all lines of summer goods. The scarcity of steel is pointed to as a factor in a possible shortage of oil stoves at a later date, but the general feeling is hopeful that sufficient will be obtainable to take care of all demands. Enamelware that is available continues to go forward in good volume and prices are being firmly maintained.

Good Movement in Iron and Steel

Toronto.

IRON AND STEEL.—A good movement of iron and steel bars is reported, the volume of business being handled proving quite satisfactory. Stocks are in very good shape and no shortage is at present apparent. Quotations given below show no change.

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25
Common bar steel	....	5 50

Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Plates Decline $1.00; Black Sheets Arriving

Toronto.

SHEETS, PLATES.— Receipts of plates and heavier gauges of black sheets are reported during the week and prices are down over $1.00 per 100 pounds in plates. A decided reduction in 10 and 12-gauge sheets has also been reported. Stocks now in will relieve the shortage existing in some quarters materially. Galvanized sheets which had been arriving in very good volume are again being held back, but stocks locally are in very fair shape. Inquiries for sheets display considerable interest in this product and a fair volume of business is being transacted. Quotations available on black and galvanized sheets are shown below. Cars of Canada plates have arrived in the city, stocks being considerably benefited thereby. Prices held at those shown in current quotation.

BLACK SHEETS—			Per 100 lbs.
10 gauge			$9 50
12 gauge			9 60
14 gauge			8 40
16 gauge			8 50

18 and 20	8 10	8 35	9 60
16	7 95	8 20	9 45
14	7 85	8 10	9 35

Eavetrough Steady; Corrugated Sheets Unchanged

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—No great change in the situation surrounding corrugated sheets is apparent during the week. A fair volume of business is being handled and no change in quotations has been made. Eavetrough and conductor pipe are experiencing a slight improvement in inquiry and business moving. Prices appearing in current market quotations reveal no change. Quotations on corrugated sheets follow:

TORONTO—	Per 100 Sq. Feet Galvanized	Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25
No. 26 gauge	9 00- 9 50	7 75- 8 25

No. 20 gauge	19 00-	16 50
No. 18 gauge	23 00-	20 00

Discount 7½%.

Little Change Wrot. Iron Pipe And Boiler Tubes

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—Little interest is centred around wrought iron pipe, although some improvement in the demand is to be noted. However, the movement is limited as yet and not much improvement is looked for for some little time. Prices remain unchanged at figures shown in current market quotations. Boiler tubes are scarce and until new supplies are available little change in the present quiet conditions is expected. Further stocks are due to arrive early next month and at that time there may be some slight revision in prices necessary. The present basis remains as follows:

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00

3½ inch	77 00	60 00
4 inch	90 00	75 00

Revision In Solder; Future Uncertain

Toronto.

LEAD AND ZINC PRODUCTS.—Revised prices on solder have been made in some quarters, the tendency being toward higher prices. The scarcity of tin is acute and the future on solder and other items containing tin contains an element of uncertainty. Prices established during the week in some cases widen and others narrow the range as shown below. Quotations issued are for guaranteed, 51c to 53c; strictly, 48c to 52c; commercial, 42c to 46c; wiping, 41c to 43c; wire, 50½c per pound. Manufactured lead products remain unchanged with demand limited.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼

Solder, commercial, lb.	0 42	0 50
Solder, wiping, lb.	0 41	0 45¼
Solder, wire, lb.	0 50½	....
Zinc sheets, per lb.	0 26	....

Old Materials Working Under Gov't. Restrictions

Toronto.

OLD MATERIALS.—Business remains within the smaller scope brought about by reason of the embargo remaining in

force. Dealers see no chance of a change in the situation. It may be that the American situation is being reflected in the Canadian trade. In United States centres the complaint is that users of scrap are buying too close. They are using only what they have to and buying accordingly. The dealers, with their customers in this frame of mind, find it a hard matter to properly interpret the future possibilities of the market. Paper is moving along at a steady rate. Licenses from the government are required for shipment of all burlap, canvas, etc., and the trade generally is laboring under governmental restrictions. Prices remain unchanged and the volume of business transacted is light.

Waste May Advance; Oakum Unchanged

Toronto.

WASTE, OAKUM.—Indications point to an advance in all lines of wiping waste in the near future. The demand has been exceedingly brisk of late and new stocks which will be available for the local market are likely to be sold at higher levels. Nothing of interest has developed in respect to oakum. Supplies are limited and not being renewed in sufficient quantities to provide for a surplus. Prices on both waste and oakum as shown in current market quotations reveal no change during the week.

Rope Unchanged; Binder Twine Supplies Assured

Toronto.

TWINE, CORDAGE.—A light demand marks the situation in rope during the week and no change is to be noted in base prices, pure Manila being quoted at 39c; British Manila at 33c and sisal at 27½c per pound. Advices from the United States indicate that supplies of sisal grass imported are ample for all demands that may be made for spring harvests. It was intimated in HARDWARE AND METAL some three or four weeks ago that no shortage of twine was anticipated, and this is borne out in latest figures on imports to the United States just issued. In this statement it is shown that tonnage to bring sisal is available and is at present bringing more than called for in monthly contracts. Plants are working on fall supplies, and in Canada many shipments are now being made to apply on fall requirements. Prices are given in current market quotations.

Roofing Firm; Belting In Good Demand

Toronto.

ROOFING, BELTING.—Business in roofing is said to be normal for the season and under present conditions. Prices remain firm and unchanged at prices given in current market quotations. Belting is in good demand and no change has been made in market prices for the week. Tap soles and heels are in somewhat better demand with prices unchanged.

Spelter Declines ½c; Lead And Antimony Easier

Toronto.

INGOT METALS.—Spelter has declined ½c per pound during the week and lead and antimony are also slightly easier. The relation of spelter and lead, the former usually a fairly high priced metal and the latter the reverse, is interesting in that prices are virtually the same. Spelter is now low and lead high. Tin is practically unobtainable, and though prices are named it is safe to say that were stocks offering considerably higher prices could be secured. No great hope for the future is held out in the matter of supplies.

COPPER.—Nothing of interest is shown in the situation during the week. Reports from the United States indicate that production is being maintained at a sufficiently high rate to take care of government requirements and provide a surplus. Prices locally at 30c to 32c per pound show no change.

TIN.—It would appear that there is a world-wide scarcity of this metal and that Canada is being discriminated against in the matter of supplies from Great Britain is not even hinted at. The future holds out little promise of sufficiently large receipts to take care of all demands. Whereas local prices are named as 95c to $1.00 per pound, there would be little difficulty in those having any to offer securing higher figures. However, the market here is bare of stocks and manufacturing will soon deplete these to the point of exhaustion.

SPELTER.—A decline of ½c per pound to make prices locally 9¼ to 9½c per pound featured an otherwise dull market. The lower prices do not seem to have stimulated interest to any appreciable extent and buying is light.

LEAD.—The market remains in a very easy position and there is nothing of moment to report. Prices range from 9c to 9½c per pound.

ANTIMONY.—A low price has been made on this metal of 16c which widens the range slightly, quotations being as high as 18c per pound. Limited trading is in evidence.

ALUMINUM.—No developments of an interesting character mark the situation this week though in some quarters a price as low as 50c per pound is asked. The range on this basis would be from 50c to 60c per pound.

PIG IRON.—Reports from the United States are encouraging in relation to pig iron production. Increased receipts of coke are reported and a general increase in ovens operating is shown. Similarly improved conditions are being reflected in Canada, and April output is expected to be encouraging. Foundry iron at $49.50 per ton is unchanged.

LONDON MARKETS

LONDON, April 11.—New net prices are available on game traps which show an advance of 10 per cent. Revised lists on shovels, spades and scoops have been established and a uniform discount applies. Prices have advanced about 10 per cent., due to the recent high levels established in handles. Many other items are included in the list of those to reveal an upward trend, namely clay picks, pick and edge mattocks, grub hoes, crow bars, foot warmers and cotton wrapping twine. A decline has been made in prices applying on iron rivets. Business is seasonably good, housecleaning and gardening lines bring in splendid demand.

Net Prices On Game Traps Up 10%

London.

GAME TRAPS.—The revision made in game traps provides for an advance of about 10 per cent. in all lines. Increased cost of steel and production are factors which have brought this about. Net prices established are given herewith:

Victor, with Chain, No. 0, $1.90 doz.; No. 1, $2.20; No. 1½, $3.30; No. 2, $4.60.

Oneida Jump, with Chain: No. 0, $2.50 doz.; No. 1, $2.95; No. 1½, $4.40; No. 2, $6.45.

Newhouse, with Chain: No. 0, $4.05 doz.; No. 1, $4.70; No. 1½, $7.10; No. 2, $10.45.

Hawley and Norton, with Chain: No. 0, $2.95 doz.; No. 1, $3.45; No. 1½, $5.15; No. 2, $7.25.

Shovels, Spades, Scoops In 10% Advance

London.

SHOVELS, SPADES, SCOOPS.—The big increase recently made in wood handles resulted in a revision being made on prices of shovels, spades and scoops, the present being about 10 per cent higher than those formerly ruling. The new lists have been arranged so that a uniform discount of 50 per cent. will apply to all, this simplifying figuring costs considerably. The new lists, with extras, are shown on another page.

Picks, Mattocks, Grub Hoes, Crowbars Up

London.

PICKS, MATTOCKS, GRUB HOES, BARS.—A further advance has been made in picks, mattocks, grub hoes and crowbars. This follows closely on the

heels of increases made a short time ago and indicates the strength of this market. Prices at present ruling are: Clay picks, 5 to 6 lb., $10.75 doz.; 6 to 7 lb., $11.50 doz.; pick and edge mattocks, $12.00 doz.; grub hoes, $9.50 doz.; crowbars, 9½c pound..

Foot Warmers Reach Higher Levels

London.

FOOT WARMERS.—New prices established on footwarmers for present or fall delivery are at higher levels than previously ruling. Steel entering into the construction of these at considerably higher prices combined with production costs have influenced this move. Orders are now being solicited on the basis of $2.40 each for No. 5B and $2.95 each for No. 7D. Coal for same is selling at 80c per dozen.

Cotton Wrapping Twine Advances 3c Pound

London.

COTTON WRAPPING TWINE.—Further evidence of the strength of the cotton market is given in another advance being made in the price of cotton wrapping twine. This latest increase amounts to 3c per pound or about 5 per cent., and follows on the high prices recently established. Quotations now being made on 3-ply are 69c per pound and on 4-ply, 73c per pound.

Iron Rivets Decline; Cistern Pumps Revised

London.

IRON RIVETS, CISTERN PUMPS.—A decline has been registered in iron rivets as shown in the increased discount of 25 per cent. now being quoted against 15 per cent. ruling for the past few months. This affects black, tinned and coppered. Net prices on 5 lb. packages assorted coppered rivets and burrs at the new discount are as follows: No. 8, ¼ lbs., $1.80 for 5 lb. package; No. 8, ½ lbs., $1.65 for 5 lb. package; No. 10, ½ lbs., $1.76 for 5 lb. package.

Prices on cistern pumps have been adjusted and corrected quotations are as given herewith: Open spout, No. 1, $2.13; No. 2, $2.38; No. 3, $2.63 each. Closed spout, No. 1, $2.34; No. 2, $2.62; No. 3, $2.89 each.

Nails And Rope Firm; Wrench Parts Up

London.

NAILS, ROPE, WRENCH PARTS.—The base price of $5.20 per 100 pounds on wire nails and $5.60 per 100 pounds on cut nails remains unchanged locally. The demand for nails shows slight improvement indicating some increase in building activities. Little demand is yet apparent in rope, prices holding firm as follows: Pure Manila, 39c; British Manila, 33c; New Zealand hemp, 33c; sisal, 27½c per pound base. An advance is to be noted in parts for Stillson and Trimo wrenches in the new discount issued of 45 per cent. off list.

Screen Wire, Netting, Clippers Steady

London.

SCREEN WIRE, CLIPPERS.—At the newly established price of $3.50 per 100 square ft. in 100 ft. rolls, and $3.55 in 50 ft. rolls, screen wire cloth shows no further change. Bronze is quoted at 14c square ft.; the demand is fair and booked orders not already shipped are being prepared to go forward. Hexagon poultry netting, 1 inch and 2 inch mesh remains steady at the discount ruling for some time past of 15 per cent. Low-priced toilet and fetlock clippers are reported as having a very good sale. Prices on two of the big sellers are: Chicago toilet clippers, No. A 1, 85c each; Chicago fetlock clipper, No. A 2, 85c each.

Linseed Oil And Turps In Unchanged Market

London.

LINSEED OIL, TURPENTINE.—Prices on linseed oil are being firmly maintained at present high levels and a scarcity of supplies is noticeable. This is necessarily curtailing the movement considerably. Quotations are unchanged as follows:

	Raw	Boiled
1 to 2 barrels, gal.	$2 00	$2 03
3 to 5 barrels, gal.	1 99	2 02
6 to 9 barrels, gal.	1 97	2 00

Less barrels add 10c gal.

The primary market remains in an easy position but there has been no disposition locally to make any further reductions beyond prices established last week. Prevailing prices are: 1 bbl. lots, 67c ; 2 to 4 bbl., 66c; 5 gal, 77, Imp. gal.

White Lead, Putty, Glass Remain Unchanged

London.

WHITE LEAD, PUTTY, GLASS.—There has been no change in prices and little movement is reported in stocks of white lead in oil, putty and glass. Quotations ruling are as follows:

White Lead in Oil: Per 100 lbs., ton lots, Pure, $16.20, less, $16.55; Pure Elephant, $16.70; less, $17.05.

Putty: Standard, 25- 50- 100-lb drums, $5.40 per 100 lbs.; Pure, do., $7.40 per 100 lbs.

Glass: Single diamond, 25%; double diamond, 25%; cut lights, 10%.

WINNIPEG MARKETS

WINNIPEG, April 11. — Price changes again show an upward trend in general with the exception of galvanized sheets, which register a decline of 30c per 100 pounds. Among the lines to advance appear the following items:—Dry batteries, well points, Neverslip calks, bench axes, packing, cotton rope, clothes lines, lamp wick, wrapping twine, sash cord, tinners' tools and steel cable. Business for the past week is again reported as very brisk, due to the exceptionally fine spring weather, which has enabled many of the farmers to commence seeding operations.

Dry Batteries Make Further Advance

Winnipeg.

DRY BATTERIES.—Increased costs on chemicals and other raw materials are given as the reason for another advance being made necessary on North Star batteries. To-day's market prices read as follows:

No. 6: Barrel lots, $33.75 per 100; boxes of 50, $34.75; 25 to 50, $37.75; less than 25, $40.

No. 8: Barrel lots, $87.50 per 100; boxes of 25, $29.50; 12 to 25, $92.50; less than 12, $100.

Drive Well Points Make Big Advance

Winnipeg.

DRIVE WELL POINTS.—A further advance has gone into effect on drive well points, the discount being revised from 45 per cent. to 35 per cent. This makes the increase about 17½ per cent. To-day's net prices, figured at the new discount, are as follows:

No. 90, $23.40; No. 94, $29.90; No. 98, $36.40; No. 140, $39; No. 144, $46.80; No 164, $58.50; No. 168, $68.25; No. 184, $117 doz.

Horse Shoe Calks And Taps Revised Upward

Winnipeg.

HORSESHOE CALKS, TAPS.—A slight revision in prices has just gone into force covering Neverslip calks and taps. The advance, however, is very small, while Neverslip horseshoes remain unchanged. Prices now ruling are given herewith:

Calk's: ⅜ in., $2.30; 7-16 in., $2.46; ½ in., $2.46; 9-16 in., $2.64; ⅝ in., $2.64 per 100.

Taps: ⅜ in., 31½c; 7-16 in., 36c; ½ in., 40½c; 9-16 in., 45c; ⅝ in., 50c each.

Packings Go Higher; Bench Axes Up 17½%

Winnipeg.

PACKING, BENCH AXES.—Prices on packing have practically remained unchanged for the last year. However, as stocks are replenished prices show fairly heavy advances. Among those recently affected appears Canadian spiral and trade sheet packing. Revisions in other lines will no doubt be necessary before long. Prices ruling to-day are as follows:—Canadian spiral, 83c lb.; trade sheet, 1-32 in., 40c lb.; 1-16 in., 26c lb.

Prices on bench axes, which have remained firm for some time past, show a heavy advance, moving up from 15 per cent. off list to net list, or approximately 17½ per cent. To-day's market prices are as follows:—No. 2, $12.50; No. 3, $13.50; No. 4, $14.50; No. 5, $16.50 doz.

Cotton Goods Make Many Advances

Winnipeg.

COTTON GOODS.—At the time of the

last advances in cotton products HARDWARE AND METAL predicted even further advances owing to the strength of the cotton market. This prediction is now fulfilled in prices just effective on cotton rope, cotton wrapping twine, sash cord, lamp wick and clothes lines, the advances being from 5 to 10 per cent. Ruling prices are given below:

Cotton Rope: 3-16 in., 61c lb.; ¼ in. and over, 60c lb.

Wrapping Twine: 3-ply cones or balls, 63c lb.; 4-ply, cones or balls, 67c lb.

Hercules Sash Cord: Hanks or coils: No 6, 73c; No. 7, 70c; No. 8, 69c; No. 9, 69c; No. 10, 69c lb.

Clothes lines: 40-ft., $3 doz.; 48-ft., $3.45 doz.; 60-ft., $4.30 doz.

Lamp Wick: Flat, No. 0, 75c; No. A, 94c; No. B, $1.38; No. D, $2.20 gross.

Rochester, No. 1, 41c; No. 2, 57c; No. 3, $1.95 doz.

Rayo, $1.05 doz.

Stove Wick: Flat, 3 in., 48c; 3½ in., 57c; 4 in., 68c; 4½ in., 76c; 5 in., 87c doz.

Hollow Punches, Rivet Sets, Hand Groovers Up

Winnipeg.

HOLLOW PUNCHES, RIVET SETS, HAND GROOVERS.—New prices have just been issued covering a number of miscellaneous tinners' tools, prices of which are given below:

Hollow Punches: ¼ in., 45c; ⅜ in., 65c; ½ in., 80c; ⅝ in., $1; ¾ in., $1.20; ⅞ in., $1.45; 1 in, $1.65; 1⅛ in., $1.85; 1¼ in., $2.05; 1⅜ in., $2.20; 1½ in., $2.45; 1⅝ in., $2.65; 1¾ in., $2.80; 1⅞ in., $3 each.

Tinners' Rivet Sets: No. 00, 95c; No. 0, 95c; No. 1, 95c; No. 2, 75c; No. 3, 75c; No. 4, 65c; No. 5, 65c; No. 6, 50c; No. 7, 50c; No. 8, 45c each.

Hand Groovers: No. 00, $1.80; No. 0, $1.80; No. 1, $1.15; No. 2, $1.15; No. 3, $1.05; No. 4, $1; No. 5, $1; No. 6, 85c each

Galvanized Sheets Decline 30c; Black Unchanged

Winnipeg.

GALVANIZED AND BLACK SHEETS.—The market on galvanized sheets again shows a small decline of approximately 30c per 100 lbs. This is the third reduction in price during the past few months. Prices now established are expected to stand for some time, and further declines are not looked for. To-day's ruling prices are given herewith:

10¾ oz., $10.90; 28 ga., $10.60; 26 ga., $10.30; 22 ga., $10.15; 20 ga., $10.15; 18 ga., $10; 16 ga., $9.85 per 100 lbs.

The above decline does not affect prices on Black sheets, which remain firm as formerly quoted, namely:

10 ga., $8.50; 12 ga., $8.50; 14 ga., $8.40; 16 ga., $8.50; 18 ga., $8.80; 20 ga., $8.80; 22 ga., $8.85; 24 ga., $8.85; 26 ga., $8.90; 28 ga., $9 per 100 lbs.

Advance In Rubber Belting; Canvas Firm

Winnipeg.

RUBBER AND CANVAS BELTING.—New prices have just been issued by the rubber companies showing advances in rubber belting, rolls and endless. Canvas belts remain firm but unchanged. Prices are given herewith:

Western Rubber Belting, 25-2½%.

Star Rubber Belting, 20%.

Net Prices on Endless Belts.

	Star Rubber	Canvas Each
100 ft. x 7 in. x 5-ply	$ 79 05	$ 61 60
120 ft. x 7 in. x 5-ply	84 85	73 90
150 ft. x 7 in. x 5-ply	118 55	92 40
100 ft. x 8 in x 5-ply	90 45	70 00
120 ft. x 8 in. x 5-ply	108 55	84 00
150 ft. x 8 in. x 5-ply	135 65	105 00
160 ft x 8 in. x 5-ply	144 70	112 00
120 ft. x 9 in. x 5-ply	122 20	94 90
150 ft. x 9 in. x 5-ply	152 75	118 65
160 ft. x 9 in. x. 5-ply	162 95	126 55
150 ft. x 8 in. x 6-ply	164 15	126 00
160 ft. x 8 in. x 6-ply	175 10	134 40

Steel Cable Goes 10 Per Cent. Higher

Winnipeg.

CRUCIBLE STEEL CABLE.—New prices are now effective covering crucible steel cable, which show advances over former prices of approximately 10 per cent. To-day's prices are as follows:—⅜ in., $20.65; 7-16 in., $20.65; ½ in., $21.25; ⅝ in., $27.90; ¾ in., $34.70; ⅞ in., $44.25; 1 in., $57.15; 1¼ in., $71.50 per 100 ft.

Linseed Oil, Turpentine Remain Unchanged

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices continue to hold firm, and no change is recorded over former prices, which are as follows:—Raw, $2.00 gal.; boiled, $2.03 gal., in barrel lots.

Prices on turpentine also hold firm as previously quoted:—Barrels, 80c gal.; half-barrels, 83c gal.; 5-gal. lots, 85c gal.; 1 gal. lots, 85c gal, plus the usual extras for containers.

PITTSBURG MARKETS

PITTSBURG, Pa., April 11.—All the news has suddenly become very favorable as to there being in the near future ample supplies of coke, pig iron and finished steel. The reversal in conditions, that has appeared from theoretical considerations to be likely at some time in the future, is now becoming possible of actual apprehension by the development of concrete facts. These facts are, in brief, heavier shipments of Connellsville coke actually recorded, the nearing completion of many new by-product coke ovens, a large increase in pig iron production actually recorded in March, the completion of three new blast furnaces and the blowing in of several blast furnaces that were kept out of blast during the period of extreme coke shortage.

As to Connellsville coke shipments, which are reported weekly by the *Connellsville Courier*, there were shipments reported for last week of no less than 383,708 net tons, against about 334,000 tons a week in the three weeks preceding, and an average of only 250,000 tons a week in the first five weeks of the year.

As to pig iron production, there was a reflection in the March output not only of the increased supplies from the Connellsville region, but also of better working of beehive ovens in other districts and of practically full operation of the various by-product ovens. Pig iron output during March was at the average rate of 38,250,000 tons a year, while during the latter part of January and the early part of February output was at but little if any over 25,000,000 tons a year.

Railroads Improving

The heavier operations of the past few weeks are a reflection of the better conditions that are gradually coming to obtain on the railroads. While the progress appears to be slow, when there is still congestion and car shortage after two full months of favorable weather, fresh evidence has appeared as to the seriousness of the situation early in the year. A partial report of railroad operations in January, just issued by the Interstate Commerce Commission, shows that the railroads actually had a deficit in January, following their very large earnings in preceding months. It is assured that traffic conditions, as relate to the iron and steel industry, will continue to improve. After the extremely bad weather disappeared, the first week in February, there was for several weeks a particularly heavy movement of foodstuffs to seaboard, at the instance of Washington, and this retarded the improvement in the movement of other commodities.

A general survey of the situation shows that there is capacity for making much more pig iron than was produced, and consumed, in 1916, when the output was 39,400,000 tons, the 1917 output having been 800,000 tons less because while some new furnaces had been completed there was not enough coke to operate all furnaces. Four new blast furnaces were completed in 1916 and 14 in 1917, while last month three additional new stacks were blown in, making a total of 21. On the basis of the actual performance in 1916, the capacity at present, with the additions, is easily 43,000,000 tons.

As to coke making capacity, it is clear that there is an excess over the entire requirements of the existing blast furnaces, and this is in keeping with the fact that the beehive process is rapidly yielding to the by-product process. If there had been full transportation facilities the large excess of coking capacity would have been visible during the past year. The by-product ovens completed in 1917 represented 3,500,000 tons of coking capacity, while by-product ovens now nearing completion, and likely to be put in operation in the next few months, represent 6,500,000 tons in addition, making a total of 10,000,000 tons new capacity over the capacity that was active in 1916, and supplied fully the blast furnaces then in existence. The furnaces since completed, however, would require not more than about 5,000,000 tons of coke a year.

The most important of the by-product plants nearing completion is that at Clairton, near Pittsburgh, 640 ovens. It will probably be making some coke before July 1, and should be producing its full output, some 2,700,000 tons a year, within a short time thereafter. It will receive its coal entirely by water, and will deliver coke to the attendant blast furnaces (of the Carnegie Steel Company) over the interplant railroad, so that the whole operation will be entirely independent of the railroads. It would have meant tens of millions of dollars additional earnings for the Carnegie Steel Company if this plant had been

(Continued on page 56.)

WEEKLY PAINT DEPARTMENT

Get the Farmers to "Paint Up"

There is no Class in the Community From Which a Greater Amount of Paint Trade Could be Secured—Farmers Have Been Notoriously Neglectful—Barns Left Unpainted and Implements go Uncared For

THERE is one class in the community which perhaps more than any other offers a fine field for the development of the paint trade. That class is in the farming community. It has been one of the notorious phases of life in rural communities that farmers have invariably been averse to keeping their buildings and implements in a state of good repair. This may have been due to shortsightedness on the part of the farmer. Or, it may have been due to lack of means in the past. If it has been due to the latter cause it could perhaps be pointed out that such an excuse is largely imaginary. At any rate it could be shown that it is poor economy to forego a small expenditure for this purpose. A barn that has never been painted is the easiest kind of a mark for the disintegrating process caused by wind and weather. Furthermore, with the drying process of summer suns and winds and the inflammable materials that are actually stored in the barn in the shape of hay and straw and grains there is the greatest danger from fire. The farmer may be careful, but his help may not be as careful as he himself. A lantern kicked over or a spark from a threshing machine is very often the only stimulus required to start a conflagration that will wipe out the whole season's income and destroy the savings of a number of years in the destruction of the barn itself. Why the farmer should have been so remiss in the past in taking precautions to preserve his barns from this fire menace is hard to understand. Of course paint will not eliminate the fire menace entirely, but a barn with a coat of paint is less suspectible to fire than one that has only the naked boards that have become as dry as matchwood through the drying process of wind and weather.

IMPLEMENTS SHOULD BE PRESERVED

The farmer has also been very neglectful of his implements. It has been the exception in the past to see a farmer take enough interest in his mowers, binders, wagons, hay rakes, to give them a coat of paint. There is no one factor that will conserve his machinery to better advantage than a liberal use of paint. A wagon that is given a coat of paint each year will stand the wear and tear for an infinitely longer time than one that is allowed to fall to pieces because it lacks paint. Spokes and rims and hubs dry up and become loose. A coat of paint would have kept them as good as new for many years. Whiffletrees and neckyokes and doubletrees are other lines which would last immeasurably longer if they were painted regularly. It is true conservation to call this to the attention of the farmer.

METHODS OF SELLING THE FARMER

There was one hardwareman who always kept a can of barn paint open and on the counter where the farmers could see it. He drew their attention to the paint, and advised them to buy it as a means of conserving their property. His sales were very large in this one particular line alone. A demonstration of the covering qualities of implement paint could easily be made, and showcards drawing attention to the necessity of painting implements and machinery of various kinds would appeal to the farmer. When a farmer makes a visit to the hardware store he very often likes to take time to "nose around" for a time just to see what the hardwareman has in his stock. He is very often looking for something new. If he is appealed to on the lines of economy and conservation it will undoubtedly mean trade to the hardwareman. It may take some talking—salesmanship—in addition to the demonstration, but there is a fine field for trade with the farming community, and it should not be neglected.

FARMERS HAVE THE MONEY

If there has been any justification for failure to paint in past years by reason of lack of means there assuredly cannot be any such excuse this year. There is no class in the community that is better off financially, because the farmer has been able to get excellent prices for his commodities. He has the means wherewith to do the painting. All that remains to be done is to give him the inclination. That is where the hardwareman should throw his powers of salesmanship in the balance.

"MURESCO"

The Best Wall Finish

Leads All Other Finishes

The Best Wall-Finish

Its ease of application

Next to beauty and sanitation, ease of application is the strong factor in sales of "Muresco." It is well to lay stress on this feature. The tint card with samples of the sixteen delicate tints is evidence of beauty, and anyone can readily understand that clean, tinted plaster is more sanitary than wall paper. So once you have convinced your customer that "Muresco" is easy to apply and easy to renew, a sale invariably results.

Always draw attention to the "Directions for Use" on the "Muresco" carton which show how easy it is to mix and apply.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, April 11. — The feature of the paint markets this week is the very strong undertone in mixed paint. This is reflected from all quarters and upward tendencies are suggested. Turpentine, in accordance with the very definite tendencies pointed out in last week's HARDWARE AND METAL has declined and the reduction totals eight cents per gallon. Some enquiry is made on repeat business for shelf goods and putty; white lead in oil and specialties are beginning to show evidences of an active movement in the immediate future. Linseed oil is unchanged but with a strong undertone still maintained.

No Cheap Linseed Oil For Some Time To Come

Montreal.

LINSEED OIL.—All indications point to a continued high oil market. The situation holds much as it was a week ago. Delivery of seed has not improved but the crushers are able to maintain operations fairly well. While there has been some fluctuation in the seed market the prices of oil have held unchanged, and all sources are agreed that any considerable change downward is decidedly improbable. Stocks still are light, the accumulated orders making it improbable that these will much improve just now. Opening of navigation would facilitate the movement of seed.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.86	$1.88½

Turpentine Tumbles Eight Cents Gallon

Montreal.

TURPENTINE.—As was very definitely forecast in last week's issue of HARDWARE AND METAL the price of turpentine has sharply declined. The new prices show a reduction of 8 cents per gallon. Thus, single barrel lots are quoted at 57c-60c, while for 5-barrel lots a price of 55c-56c in quoted. Thus the tendencies for the past week or two have developed into definite form and trading will probably improve as a result.

Turpentine—	Per Imp. gallon	
1 to 4 barrels	$0 57	$0 60
5 bbls. and over	0 55	0 56
Small quantities		

Putty Trading On Fairly Good Basis

Montreal.

PUTTY.—There is a firm undertone to the putty market, but the same is held without change. There is quite a decided improvement in the condition of business for this line and every likelihood of a continued strong market, with oil and whiting ruling so firmly. There seems to be no difficulty in meeting the demands from both city and country account, and sorting business is beginning to manifest itself as a factor in sales.

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

NEW PAINT PRICES POSSIBLE

It is very probable that higher prices will prevail for paint and some kindred lines. These may become effective within a few days. HARDWARE AND METAL was definitely informed that the increased cost of oil and the strong position it is likely to occupy for some time, higher costs for containers, packing, labor, etc., made this a very probable forecast. It will be remembered that the special announcement appearing exclusively in HARDWARE AND METAL on February 2 stated that orders would be taken on the old basis up to April 1, and the general tendencies indicated that even higher prices might be later considered. It is probable now that on mixed paint an advance of 15c to 25c per gallon may be made.

Normal Sales Made Of White Lead In Oil

Montreal.

WHITE LEAD IN OIL.—There is nothing of a changed nature to report in this market. Prices rule with a strong undertone, a fair amount of business obtains and deliveries are going forward in normal bulk. Some repeat business will be expected as soon as the weather permits activity in outdoor painting operations. Five ton lots are selling at $15.50 per 100 lbs.; ton lots $16 and smaller quantities $16.35.

Mixed Paint Sales Good; Higher Prices Possible

Montreal.

MIXED PAINT, ETC.—The feature of the week is the strong position which mixed paint holds. There is a very strong undertone, and while prices hold unchanged there is no guarantee that these will continue unchanged long. The oil situation gives promise of holding its high position and in view of the actual market to-day, paint men say that existing prices are in no wise inflated. Orders are still moving out in completion of spring bookings and some repeat business is reported to have come forward.

TORONTO

TORONTO, April 11.—No change in prices has marked the linseed oil and turpentine market during the week and conditions remain practically unchanged. A scarcity of oil exists and there is very little offering. The primary market on turpentine shows some strength during the week and a factor in holding prices firm locally has been the heavy rate of exchange on payments of United States bills. Spring orders for mixed paints have been practically completed but repeat orders are reported as coming along in splendid volume in some quarters. White lead in oil is moving out fairly well and some sources indicate a shortage of supplies. Business generally may be termed good.

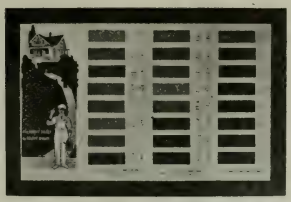
Scarcity Linseed Oil Holds; Market Firm

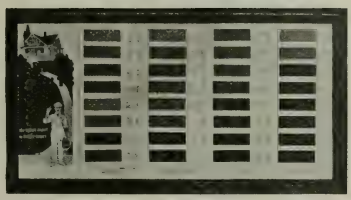
Toronto.

LINSEED OIL.—Linseed oil is very scarce and there are few offering stocks on the spot. Some shipments have reached the city during the week but it will take considerably more to take care of orders already booked and orders are not being accepted by many on any basis of delivery. The movement of seed is very light, and whereas the opening of navigation is looked upon as a possible means of relief this is some time away and in the meantime conditions are very bad. A drop of from 10c to 15c in grain at Winnipeg would not, it is thought, have any effect on oil prices as the shortage is too pronounced. For the week from Wednesday to Wednesday a drop of ¼c per bushel is the only change in the price of seed. Prices remain unchanged at following range:

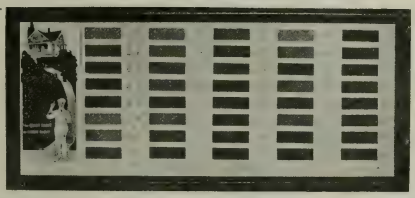
	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.88-$2.00	$1.90½-$2.03
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

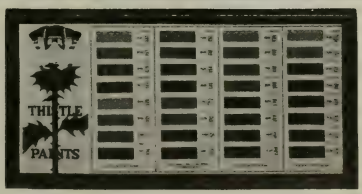




These framed Color Cards demonstrate how we are equipped to stock your shelves with Ramsay's Pure Ready Mixed Paints with just the right selection of colors to meet the demands in your vicinity.



With this selection to buy from, it is not necessary for you to show or carry 48 shades in stock if a 24, 32, or 40-tint card meets the requirements of the vicinity in which you are located. Consider this, because you will have more capital to invest in our other profit-producing lines.



Our aim is to equip you with a paint stock that will meet your demands whether located in large cities or small towns. Proof of this is shown above.

Turpentine Reveals Firming Tendency

Toronto.

TURPENTINE.—The primary market shows an advance over low points reached last week and at present basis is developing firmness. Another factor which has entered into the position locally is the matter of exchange on payments made in United States currency. The heavy rate of exchange between Canada and the United States adds ½c gallon to the cost and this has to be considered in the situation here. Supplies are in fair condition and some improvement in the demand, which has been considerably restricted, is expected to develop during the next week or two. The range of prices is unchanged as follows:

	Imp. Gal.
1 barrel	$0.62 -$0.67
2 to 4 barrels	0.60½- 0.66
5 gallon lots	0.67 - 0.77..

Demand For White Lead In Oil Improving

Toronto.

WHITE LEAD IN OIL.—Interest is apparent in an increased demand for white lead in oil and a very good movement is reported. Stocks generally are reported in very good shape though from one source it was intimated that a real shortage existed and orders were piling up pending arrival of supplies. Considering conditions in respect to oil and the labor shortage throughout the country, the demand on white lead in oil is felt to be heavy. Pure, in ton lots is selling at $16.20 per 100 pounds; smaller quantities $16.55 per 100 pounds.

Good Volume Orders For Mixed Paints

Toronto.

MIXED PAINTS.—Paint manufacturers generally are enjoying a good volume of business and the outlook is very encouraging. It would appear from the orders for big quantities being received that the retailer is getting out after business and instead of letting it go away from him is holding this trade for himself. Repeat orders from the travellers and a heavy mail order business are featuring what usually is a quiet period following the completion of spring orders. On all sides optimism prevails and that this is felt by retailers as well can be determined from the fact that orders for fall shipment are already being placed. No change in prices has been made during the week.

Putty Dull; Glass In Similar Position

Toronto.

GLASS, PUTTY.—Nothing of great interest marks the position of putty during the week and orders are very light. Prices have been firmly maintained during the week as follows: Standard bulk in casks is quoted at $4.55; 100 lb. drums at $5.30-$5.40; and bladders in bbls. $5.45-$5.65 per 100 pounds. Prices on pure putty range $2.00 per 100 pounds higher than above. Little movement of glass is reported and discounts of 25 per cent. in full boxes on single and double are firmly held. Plate glass is in small demand and prices though firm remain unchanged.

Shingle Stain, Floor Wax, Wall Paper Cleaner Up

Toronto.

SHINGLE STAIN, FLOOR WAX, PAPER CLEANER.—Revisions have been found necessary in some lines of sundries, new prices established providing for an advance in each instance. Shingle stain in 1 gallon cans is selling at $1.25 and in 5 gallon cans at $1.20 per gallon. Linola floor wax is being sold in three sizes at $1, $2.70 and $5.40 per dozen tins. Cleveland wall paper cleaner registered at 20 per cent. advance and the new price is $6 case.

Brushes Going Forward Freely; Unchanged

Toronto.

BRUSHES.—The good demand continues for brushes and orders are going forward very freely. Prices remain unchanged and on a fairly steady basis. The outlook for brooms is very serious as outlined in these columns last week and the future really holds out little promise of anything good in this business.

GELATINE, GLUE AND SIZE WORKS FOR AUSTRALIA

Having recently acquired 17 acres of land at Botany, a company is completing arrangements for the immediate erection there of large works for the manufacture of gelatine, glue, and size. The estimated expenditure includes £15,000 (roughly $75,000) for the factory buildings and approximately £20,000 ($100,000) for plant and machinery. It is anticipated that the factory will be in working order by April and its products upon the local market by the following month.

The average quantity of gelatines and glues of all kinds imported into Australia, says the Board of Trade Journal, is about 1,400,000 pounds, and the capacity of the new works at Botany will be adequate to supply the whole of this business. At the present time the company has two factories for the production of gelatines and glue in New Zealand, whence it is exporting a portion of its output to Canada.

PITTSBURG MARKET LETTER

(Continued from page 57.)

completed on schedule time, six months ago.

Dull Market

The markets are extremely dull, in pig iron and practically all finished products. This is a reflection of the fact that there are no new projects coming up except in connection with the war, and the trade does not consider allotments for the war as part of the market. The requirements of jobbers and manufacturing consumers, in connection with commercial or peace work, are fully covered, in many cases more than covered, by engagements already on books. The steel mills have more than 12,000,000 tons of obligations on books, entirely apart from the war. How much of this is to be real business remains to be seen. At the rate at which shipments have been made in the past two or three weeks it will not be long until customers assure mills they are well supplied, ending the steel scarcity that has now prevailed for two years and a half.

Ship and Car Requirements

Actual facts as to shipbuilding, not shipbuilding plans or prospects, are now beginning to come out. It appears that a monthly statement of ship deliveries and launchings has been inaugurated. Such a statement for March was given out early in the week, showing 27 steel vessels launched, with 201,286 tons deadweight capacity, but next day a conflicting statement was made, referring to 30 vessels of 219,586 tons deadweight. About one-half gross ton, or a trifle more, of finished rolled steel is required per deadweight ton of vessel. Thus the steel involved in the March launchings was not over 125,000 gross tons, not much against a total productive capacity of 3,000,000 gross tons a month of all forms of finished rolled steel, but the steel now being shipped, representing launchings in future months, is presumably at a considerably heavier monthly rate.

Orders for the 100,000 freight cars involved in the Railroad Administration's program have not been allotted, but probably will be soon, covering about 50,000 box cars, wooden superstructure, 25,000 gondolas and 25,000 hoppers, the gondolas and hoppers being all-steel construction. The 100,000 cars represent about 1,000,000 gross tons of finished rolled steel, and this may involve deliveries at the rate of 175,000 or 200,000 tons a month while the cars are being built. Ships and cars together, however, do not promise to take nearly as much steel as many observers have seemed to expect.

SOME AUTOMOBILES DUTY FREE

The question has been raised by a concern in the United States as to the kinds of automobiles that may enter Canada duty free. There was a rumor current in some of the large cities in the United States to the effect that the duty had been removed on pleasure cars coming into Canada. This, however, is erroneous. The only automobiles which are admitted free into Canada are those brought in for the Munitions Board, and the certificate for which is signed by either one of the three following men: W. A. Russell, H. C. McDonald, W. C. Payne. Some time in February a regulation was made by the Customs Department to the effect that automobiles which were being brought into Canada by settlers and which had been in their possession at least six months prior to their removal to Canada would also be allowed in duty free. These are the only classes of automobiles which are allowed in duty free.

MILBRADT LADDERS

will pay for themselves in a short time by enabling you to wait on more trade, save the wear and tear on your fixtures and goods, as well as bring the appearance of your store up to date.

MONEY AS A MUNITION OF WAR

Charles H. Sabin, Head of the largest Trust Company in the World, Advocates Credit Expansion.

"Business men and wage-earners cannot lend money to the Government unless they can make money. And business must earn more money this year than last year.

"Increase in prices resulting from expansion of credit gives industry a stimulus. Extra demands of government finance and increased industrial needs absolutely require expansion of credit."

Thrift — Production — Expansion

The two quotations, and the three words above are points from "the most forceful and constructive article on business in war time that has been written since the beginning of the conflict." The article is by Charles H. Sabin, president of the Guaranty Trust Co. of New York, and you can read it in THE FINANCIAL POST this week. It is very much worth your attention. Not only is Mr. Sabin head of the greatest Trust Company in the world, but his understanding and knowledge of the fundamentals of business in relation to finance mark him out as an authority on whose words you can rely. Read this article. Act on its advice. Improve your business by the knowledge you gain.

A Live Line It Pays to Push

Every owner of one of the four million motor cars now in use is a possible buyer of

Berry Brothers'
AutoColor Varnishes

They are made especially for the unskilled varnisher, and are so easily applied that any man can refinish his car in his own garage just the way he wants it and save finishing shop charges and delay.

It is a live line to push, becanse by adopting the *"Berry way"* any owner can restore the spick and span appearance of his car at a merely nominal expense.

We furnish an attractive cutout counter sign in colors, and a descriptive folder telling the amateur everything he needs to know about finishing his car, just how much varnish it will take, and giving colored illustrations showing how cars look when refinished. A real selling help.

Ready to Ship Assortments

We have already put up, well selected assortments of colors that we can ship promptly. Order one to-day and get in the field early. You will sell it quickly and want more. Write for further particulars anyway.

BERRY BROTHERS
(INCORPORATED)
World's Largest Varnish Makers
Established 1858
Walkerville, Ont. (659)

15 cents VOLPEEK

MENDS POTS & PANS

Tell your customers how easily they can repair leaky kitchen utensils with VOL-PEEK. They require no tools. VOL-PEEK can be applied with the fingers and the mended article will be ready for use as good as new—in two minutes or less.
VOL-PEEK is wanted in every home. Show it in your store and get a share of the demand. Put up in attractive display stands. Order from us direct or ask your wholesaler.

Success and Your Associates

ALWAYS associate with men who are earning more money than you are. Such is the advice given by a man whose name is known the world over for his own success and the business which he created. It is good advice of a certainty, but we are not urging that it is the best advice. At the same time it is wise to associate with better or bigger men than you are yourself, because you are likely to be lifted up to their levels.

Most of us would probably like to be the intimates of J. P. Morgan, or of John D, or of Charlie Schwab, or Canny Andrew. If we had a speaking acquaintance with John Wanamaker, or Lord Beaverbrook, or Lord Shaughnessy, and with other distinguished and successful men, we would take comfort from the fact.

And most of us would feel rather small and uncomfortable if we were placed beside President Woodrow Wilson at a dinner table, or beside Sir Robert Borden, Sir Herbert Holt or Sir Wm. Mackenzie. And the reason would probably be that we know so little of the knowledge that really counts. If these successful business men engaged us in conversation we would probably find ourselves knowing very little about the things that matter.

This will illustrate the point:

Here's a true story. A Toronto manufacturer found himself on a train going to Albany in company with a number of distinguished Americans about to attend the inaugural ceremonies of a State Governor. A washout led to a delay, and the Canadian was thrown into close association with senators and congressmen and prominent lawyers. They bantered the little Canadian about Canada. He had the pluck of a bigger man. He had been a constant reader of THE FINANCIAL POST, and had absorbed many facts about Canada. He surprised his American traveling companions with his positive, well-informed and wide knowledge of Canada. When the company reached Albany, the Canadian was persuaded to attend the ceremonies, and was introduced as the man who knew all about Canada. The Governor was interested in Canada, and said so, and the little Canadian found himself telling the story of Canada very ardently to a very attentive listener, much to the amusement of his friends who introduced him.

This man made a hit on that journey, and many friends. One of the company gave him a stock market tip worth a fortune.

The point of this story is: You, as a Canadian, can make yourself informed very fully and intelligently if you become a regular reader of THE FINANCIAL POST. You can make yourself a worthy companion and intimate of presidents and magnates. The world likes to listen to men who know something well, and who can talk interestingly and informingly on the subject of their study.

You can become worth listening to if you know your Canada well. And you can get the kind and amount of knowledge concerning Canada which will make you interesting to others if you will read THE FINANCIAL POST regularly each week.

IF you read THE FINANCIAL POST REGULARLY you will find yourself keeping company with the highest paid staff of editors engaged on any publication in Canada—trained men who know how to make others know what they know and learn.

You will find yourself living in a most interesting world—the great, throbbing world of business. You will have your thoughts tremendously stimulated and helpfully directed. You will find yourself becoming a fit table companion for big men — this because you will have knowledge of a quality that will keep you from shame.

What is it that keeps you and THE POST separated? It cannot be its subscription price of $3. Probably it is because you are not very well acquainted with this paper.

We are going to put it to you this way: If you have the desire to be worthy of association with big men, then prepare yourself for such association by reading THE POST, and to make acquaintance easy, we provide the coupon below. It offers you THE POST for four months for a dollar bill.

The MacLean Publishing Company, Limited,
143-153 University Avenue, Toronto.

Send $\frac{\text{me}}{\text{us}}$ THE FINANCIAL POST for four months for One Dollar. Money $\frac{\text{enclosed}}{\text{to be remitted}}$

Running Water for Rural Homes

There is big profit as well as opportunity for making new friends in furnishing Empire Water Supply Systems to homes not served by a municipal system. At very moderate cost water can be kept under pressure in kitchen, bathroom, barn or wherever desired. An Empire System can be readily installed by any plumber, is very simple in operation and seldom gets out of order. All parts are of high grade material and all workmanship of the best.

The modern rural home must have running water under pressure, and you're the man who should sell the system.

Empire Water Systems can be supplied with Hand Pump, Gasoline Engine or Electric Pump. We carry in stock all lines of plumbing material. Write for our Catalogue on Rural Plumbing.

Empire Manufacturing Company, Limited

LONDON TORONTO

Buy Now

The copper situation is acute, and we strongly advise stocking up.

Our coppers are made from the finest grade of Lake Superior copper.

Insist on the "B-B" on every copper. Your jobber handles them in all sizes.

What will Spring mean to *your* Paint Sales

?

To Stephens' Agents everywhere each succeeding Spring means a greater paint turnover than ever before.

That's the way Stephens' Paints benefit the dealer—the good effect of supplying these paints that live up to their guarantee is cumulative.

Stephens

Year after year sales increase in volume. Customers perfectly satisfied the previous season come again to ask for Stephens' Paints. They're settled on the paint question—perfectly assured by experience that Stephens' Paints are every whit as perfect as they're guaranteed to be.

If you are not satisfied with your paint prospects for this Spring, if you feel that your increase will not be as great as you deserve, get in touch with us without delay. Let us explain our proposition and tell you what it is doing for other Dealers.

A Correction

In our advertisement on page 70, March 23 issue of HARDWARE AND METAL, a cut appeared in error over the name "Sturdy Ash Sifter." The accompanying illustration is the one that should have appeared, and shows our "Sturdy" ash sifter, on which we quote a price of $2.40 doz.

IVANHOE

There's Real Profit in C.C.M. Bicycles

The purchaser of a bicycle, even of a cheap one, looks to you to make good any trouble that develops.

On a poor machine this soon eats a big hole in your profits or loses a lot of good-will, or does both.

It pays in the end to sell only first-class bicycles, such as Red Bird, Massey, Perfect, Cleveland, Columbia and the other C.C.M. nameplates.

Desirable Agencies are still open in many districts. Write for particulars to

Ready-to-Ship
PUMPS

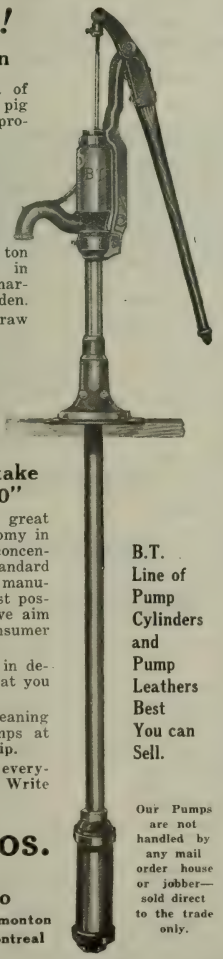
Order Now!

There's a Reason

Importation into Canada of raw materials, such as pig iron, etc., is at present prohibited.

Canada is thus thrown upon her own resources. This can't help but result in boosting the price of raw material far above normal. In fact, pig iron is now about $15 per ton more in Canada than in United States, and the margin of difference may widen.

This condition of the raw material situation of course affects the marketing of Iron Pumps, as Iron Pumps increase in price in like proportion to raw materials. Thus the reason for ordering NOW.



"7 Pumps that take the place of 700"

Standardization is a great means for effecting economy in production. We have concentrated upon seven standard designs and are able to manufacture them at the lowest possible cost—and in turn we aim to give the dealer and consumer the benefit of the saving.

B.T. Pumps are the best in design, quality and price that you can buy.

READY TO SHIP—meaning that you get better pumps at better prices Ready to Ship.

Our catalogue explains everything about our pumps. Write for it.

B.T. Line of Pump Cylinders and Pump Leathers Best You can Sell.

Our Pumps are not handled by any mail order house or jobber—sold direct to the trade only.

St. John, N.B. **Montreal**

Scorching Summer Sun, sharp, destructive Winter Frosts, rain, wind, the salt of the sea — these cannot harm Dougall's Transparent Spar Varnish.

As a permanent, pleasing finish for Front Doors, Verandah Furniture and Motor Boats it is simply ideal.

Let us tell you how you can sell it in your locality.

The Dougall Varnish Co., Limited

For New Roofs and Old

Our comprehensive stock gives you choice of a wide range of ready roofings to suit any style of building. Whether you are to supply for repair work or for an entire new roof, we can help to make it most profitable and satisfactory.

COLLINGWOOD Rubber Roofing is an economical, long-wearing, rubber-surfaced covering, entirely water and fireproof, and unaffected by changes in temperature or by Chemicals; 108 sq. feet to the roll.

Red Star Ready Roofing, a prepared felt especially suitable for flat roofs; 108 sq. feet to the roll.
Panamoid Roofing has a coating of crushed granite, giving a hard, impervious surface on a perfectly flexible foundation.

By turning to pages 101 and 102 of our catalogue you can get further information on these lines, as well as on Building Papers, Roofing Felt, Roof Coating, Stop-a-Leke Styke, Coal Tar, Roofing Pitch, Roofing Nails and Carpet Felt.

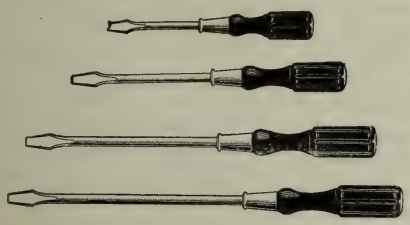
COLLINGWOOD - - ONTARIO

Stanley Tools



"HURDWOOD" SCREW DRIVERS

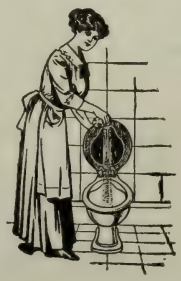
Unsurpassed for **strength** and **durability.**
Blade, Shank and Head are of one piece of steel.
The Blades are finely tempered and well finished.
The Handles are polished and stained black.
Many styles and sizes from which to select your stock.
"HURWOOD" SCREW DRIVERS ARE MADE IN OUR CANADIAN WORKS

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

The First Trial Means a Constant User

All the unpleasant features of cleaning toilet bowls are eliminated by

Sani-Flush



A small amount of this chemical powder shaken into the bowl and left standing long enough to dissolve the incrustation, produces a clean, sanitary, odorless condition.

All you need do is to sell the first tin to a customer. After that **Sani-Flush** sells itself.

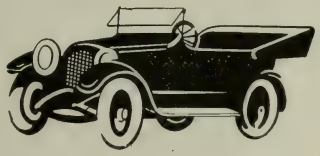
AUTOMOBILE FINISHES

Your Customers Own Cars

Be prepared to meet their demands and help them save money by doing the varnishing and painting themselves.



Beautiful Lasting Results Easy to Obtain
No Expert Knowledge Required

C.P. Automobile finishes are made in such a way that the most inexperienced person can produce satisfactory results.

In this year of conservation, everyone is trying to save money and consequently, a large number of car owners are anxious to do the painting and varnishing of their machines themselves.

Every dealer should handle a good supply of C.P. Automobile Finishes, and place them on a conspicuous part of his counter. Dealers will find a ready sale for this material, which will bring in nice profits, as well as producing satisfied customers, which will mean sales in the other C.P. paints and varnishes you carry.

If you have not a stock of C.P. Automobile Finishes on hand, send in your order now for what you will require.

The Line of Least Resistance

The Dowswell, Lees & Co. line of washers and wringers is the line of least resistance for the dealer.

The "Dowswell" name on a washer or wringer has stood for thirty years, as it stands to-day, as the hall-mark of sterling quality.

The buyer, therefore, is already convinced on one point---viz: the absolute reliability of the Dowswell, Lees & Co. goods. If she is shown how this firm has also led the way in modern improvements, the argument is complete.

It takes the minimum of time and energy to sell the Dowswell line, and it is, therefore, the line of least resistance.

Dowswell, Lees & Company, Limited

PEERLESS ORNAMENTAL FENCING

A Big Trade Is Waiting for You.

YOUR business will jump to the front the minute you display Peerless Fencing. In price, quality, designs and actual worth you can guarantee every foot of it. We stand back of you.

Open hearth steel wire, crimped springy horizontal wires combine to make the Peerless fence outlast ordinary kinds of fencing. Defies rust, holds unruly animals, can't sag, can't break down and is the last word in economy.

Made in Canada

Conservation of Food

DOMESTIC ECONOMY is impossible without FRUIT JARS.

This is fully recognised by all Authorities interested in FOOD CONSERVATION and their PUBLICITY CAMPAIGN will undoubtedly stimulate the use of JARS this year and create a demand far above normal. RETAILERS should be ready to do their part by having JARS on hand when required.

REQUIREMENTS should be carefully considered and orders placed with WHOLESALERS as early as possible.

LATE ORDERS may not ensure delivery in time to meet the requirements of the PUBLIC.

NO FRUIT or vegetables should be wasted this year for want of JARS.

Ask your Wholesaler for JARS "MADE IN CANADA" and guaranteed by a reliable manufacturer.

Adv. of Dominion Glass Company, Limited

Made in Canada

Wanted

SITUATIONS VACANT

WANTED—FOR WHOLESALE HARDWARE—one experienced cost clerk, one experienced stock keeper, one experienced travelling salesman. State age, experience, salary expected and give refrences. Apply sales manager, Western Canada Agency, Limited, Lethbridge, Alberta.

HARDWARE CLERK WITH 2 OR 3 YEARS' experience for Toronto store. Box 402 Hardware and Metal.

SITUATIONS WANTED

HARDWARE MAN WANTS POSITION WITH good possibilities on selling end, with live manufacturer. Successful manager and buyer for seven years in progressive town and four years large city store. Best references. Box 404 Hardware and Metal.

WANTED—POSITION AS HARDWARE MANager or head salesman by discharged soldier. Was in business in town in Western Ontario before enlisting. Excellent references. Box 395 Hardware and Metal.

MISCELLANEOUS

WANTED — BY RELIABLE MANUFACturer's Agent, one good line selling to wholesale hardware trade. Address "Hardware," Box 1934, Montreal.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

FOR SALE

FOR SALE—FIRST CLASS STOCK OF HARDware, south-west Saskatchewan; A1 farming district; reasons for selling ill-health. Box No. 403 Hardware and Metal.

HARDWARE STOCK AND BUSINESS FOR sale in live town of 800. First-class farmers' trade. Hydro just coming in. Apply Box 360, Hardware and Metal.

FOR SALE — HARDWARE BUSINESS IN large Eastern Ontario city; stock about $8,000.00. Price right for quick sale. Box 361, Hardware and Metal.

FOR SALE—BUILDING AND HARDWARE stock in good live Saskatchewan village. Stock on hand about $6,000. Living rooms above. Good opportunity and terms for right man. Box 726, Hardware and Metal.

HARDWARE BUSINESS FOR SALE. STOCK about $25,000; right on the main street; buildings 25 x 120, two-story; owner retiring. Apply P.O. Box 275, Sudbury, Ont.

ANY ONE WISHING TO SECURE A GOOD tinsmith, stove and furnace business in best town in New Brunswick; a small outlay for spot cash. For particulars apply Box 399, Hardware and Metal.

For Quick Sales

Recently a hardware dealer in Western Canada became overstocked with shotguns. He placed a want ad. in Hardware & Metal. We learned eventually that he not only disposed of his stock, but received several orders that he could not fill. If this man had kept this stock away, it would not only have deteriorated in value, but he would have had to pay taxes, insurance, etc. on it. If you have anything on hand which you wish to dispose of quickly advertise it in our want column. The quick results will make the first cost negligible.

Business Houses by the Hundred Buy "Confidential Circulars" for Dollars When Cents Would Buy Far More Facts

Waldon Fawcett, Washington Correspondent, writes as follows in *The Fourth Estate:*

> "Hundreds and thousands of business houses in all lines of trade are to-day paying fees of $25.00 and $50.00 and upwards to 'business correspondents,' 'information bureaus,' etc., located in Washington, which do not supply in their weekly printed or mimeographed 'confidential' letters a tithe of the information obtainable through TRADE PAPERS at a fraction of the price."

THE MACLEAN PUBLISHING COMPANY own and publish the most comprehensive group of Trade and Business Newspapers in Canada. The paper you are reading now is one of the group. The complete list with their subscription cost per year is as follows:

MACLEAN'S MAGAZINE (Monthly)	2.00 " "
	$26.00

Any single issue of any one of the above newspapers most certainly contains far more information for the business man concerned than could possibly be put into the most voluminous circular ever mimeographed or printed. To subscribe to the whole list would cost you only $26.00 a year. And yet, as Waldon Fawcett intimates, thousands of business houses are still paying $50.00 and upwards for weekly mimeographed circulars containing not a tithe of the business news given in any single issue of any one of THE MACLEAN BUSINESS NEWSPAPERS.

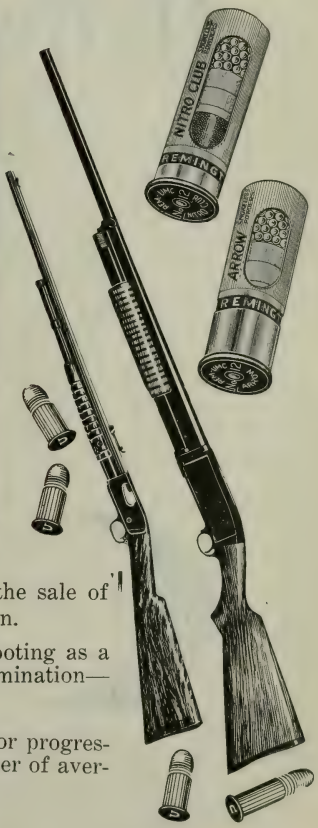
Vol. XXX PUBLISHED EVERY SATURDAY SINCE 1888 April 20

No. 16 THE MACLEAN PUBLISHING COMPANY, LIMITED 1918

PUBLICATION OFFICE: TORONTO, CANADA



THIS is going to be a decidedly Remington U.M.C. year in the sale of Sporting Rifles of all calibres, Pump Guns and Ammunition.

More and more men are turning to gallery, trap and field shooting as a sound, healthy diversion—the "better class" of men—of discrimination—with money to spend.

To such men, the 100-year-old Remington U.M.C. reputation for progressiveness, quality and fine performance in the hands of the shooter of average ability, makes an irresistible appeal.

Remington U. M. C.—"the line complete"—all jobbers.

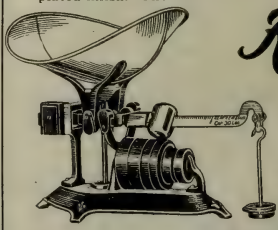
Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying every Renfrew. Scales supplied in black or all nickel-plated finish. The



Renfrew

HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs.
Government Inspector's Certificate accompanies every scale.

Method of Packing Strap and "T" Hinges and Hinge Hasps with screws.

Individually packed, each pair with its own screws

All the smaller sizes of National Strap and "T" Hinges are packed one pair in a box with screws. Larger sizes are packed one pair in a box with screws. All cartons containing one-half and one dozen pairs are sealed with gummed tape, and those containing one pair are tied six in a bundle. When a shipment reaches you you can tell at a glance whether it is complete or not.

But it's in re-selling that the big advantage of National packing shows best. No screws to count, no loss from careless or hurried counting, no waste of time. You just hand your customer his pair or pairs of hinges in a sealed package and collect your profit.

National packing simplifies selling and ensures satisfaction.

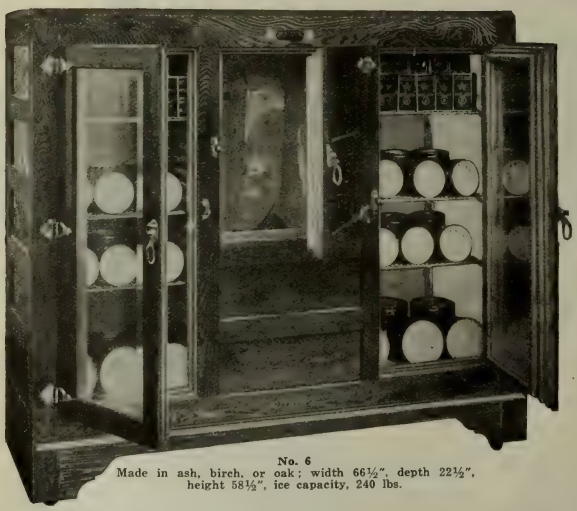
A Winner All Along the Line

Put the Barnet in your show rooms and watch sales grow. In the Barnet you can show your customer every modern feature worth having. The Barnet's patented syphon and air circulating systems insure perfect refrigeration.

Write to-day for full particulars and attractive selling proposition.

THE BARNET

Made in Canada



No. 6
Made in ash, birch, or oak; width 66½", depth 22½", height 58½", ice capacity, 240 lbs.

Insulation

No less than eleven protecting walls—flax fibre—correct dead air space—chemically prepared papers.

Circulation

Improved syphon principle; foods preserved sweet, fresh and cool, in unbroken current of pure, dry air.

No Moisture

As an experiment, matches can be lighted on the walls of the ice chamber after being enclosed in the refrigerator many days.

Drainage

No drainage pipe—simply an opening in refrigerator floor. This avoids accumulation of slimy matter and odors.

Ventilation

The Barnet system is exclusive and is protected by our patents. Prevents contamination and commingling of odors.

Vitreous Porcelain Linings

A great attraction to women—easy-to-keep-clean; will not check or peel. The Barnet carries a hard and fast guarantee.

The Barnet syphon system is the highest achievement in effective refrigeration. It appeals to the best trade. To provide a complete line, we also manufacture a low-priced refrigerator that is good value for the money.

LITTLE WORDS WITH BIG MEANING

Quality

According to "Webster," Quality is "an excellence of character; natural superiority."

Service

Webster's definition of "Service" is; "The performance of labor for the benefit of another."

We use these words advisedly—fully understanding their definitions—and realizing the obligation we place upon ourselves by their continued use in connection with our products of Iron and Steel, and our attitude to the people we serve.

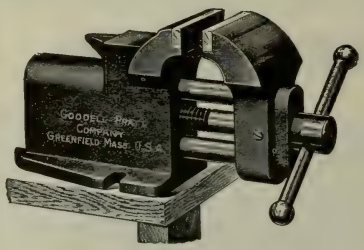
GOODELL-PRATT

1500 GOOD TOOLS



BENCH VISES

STRONG, RIGID, DEPENDABLE.

For the Factory, Home Workshop or Garage, a good, strong, rigid, dependable vise is a necessity. Goodell-Pratt Vises are built to endure, and they do. That they are good is not an accident. When we found, from experience, that we could not buy a vise that would measure up to our standard, we made it.

The peculiar shape of the Jaws, the Steel Guide Rods and the large steel Feed Screws with a special squared thread, give the vital parts of the vise great strength and rigidity; after the work is clamped in, it stays.

There are five sizes in our line of vises, and from the smallest to the largest, they are of the same high quality and finish.

Partial List of Tools

Hand and Breast Drills,
Bench Grinders,
Screw Drivers, Hack Saws,
Bench Drills,
Bit Braces, Tool Sets.
Automobile Tools.

Those Dealers who are fortunate enough to be handling the Goodell-Pratt Advertised line of 1,500 Good Tools are enjoying quick turnovers and good profits. Are you one of them?

Why One Customer Prefers Plymouth

The Woodstock Lumber Company of Beebe River, N.H., are large users of Plymouth products in their lumber operations. They say:

"While (Plymouth) costs more than other brands, we find it goes farther, so that it is the most economical one for us to buy."

Right here is a proof of our contention that there is more profit in selling Plymouth Rope on the foot basis than in selling other ropes in the old way. Plymouth invariably contains more feet to the pound than other brands, and after all it is rope yardage that is purchased, not rope weight. This increased yardage more than offsets any difference in the pound prices.

Some dealers have increased their profit 15% to 20% by selling Plymouth on this basis.

Butterfield

Carbon and High Speed Twist Drills

Accuracy and Speed

In these days when the mechanic is speeded up to increased production, when all his work is subject to careful inspection it is a great comfort to him to know that he still can have the services of such tools as Butterfield's Twist Drills. He knows that he can work Butterfield's Drills "to the limit" without interfering with their accuracy. He knows they'll stand up under heavy usage with a minimum of grinding and practically no breakage. That's why he likes Butterfield Drills and the store that sells them.
Do the real mechanics come to your store for Drills?

The Economy of a Stack Gas Water Heater

There is no gas waste in a Stack Heater. The small perpendicular Copper tubes present their entire surface to the flame and the heat that rises from it. The consequence is that the water heats quickly at small gas cost — hot water can be obtained in one minute.

The perpendicular tubes offering no obstruction to the rising hot water make for a rapid circulation.

The water moves too quickly to allow the depositing of sediment, which in coil heaters, coats the pipes and renders them inefficient conductors of heat. Stack heaters with several years' service have proven as effective as a new one.

"ZIG-ZAG" RULES

The term "ZIG-ZAG" as applied to folding rules made of flexible wood is a trade-mark belonging to this Company. This trade-mark is stamped on the rules, either at full length or in its abbreviated form "ZZ."

The Joints used in "ZIG-ZAG" rules are made in two distinct styles, the Concealed Joint, in which there is no hole through the wood, and the Rivet Joint, in which the rivet is carried through both wood and joint. Both styles contain a stiff spring which holds the rule rigid when open, even in the longest lengths.

Several other patented features add special value to the Stanley and Victor rules.

Made in all standard lengths and finishes.

Be sure your stock of Folding Rules all bear the name "ZIG-ZAG" or "ZZ."

MEHASCO

ANOTHER MEHASCO MESSAGE

2 With very little practice you can pronounce Me-has-co correctly, but only by experience can you know what it means. It means dealer satisfaction—certain and absolute. It means the very best goods shipped promptly and carefully. It means goods guaranteed to sell.

You can prove these facts in the way that many other dealers have proven them—by ordering from any of these lines: Wagons, spark plugs, Easyon chains, Cannon Ball and 20th Century barn door hangers, hay carrier equipment, litter carrier equipment, Maytag and Mehasco washers, aluminum ware, gasoline and electric irons, wire stretchers and hoists, complete line of tool grinders including power, sickle and hand, the Will plunger oiler, New Standard food choppers and presses, dazey glass and steel churns, automobile funnels and filler cans, Mehasco pocket cutlery and household cutlery, Genco razors, Mehasco watches and clocks, Kwiklites, Neverfail oil cans, Round Oak ranges, heaters and furnaces, children's sleds, stock tank heaters, wrenches, pliers, screw drivers, etc., tinned and galvanized ware.

MERCHANTS' HARDWARE SPECIALTIES LIMITED, CALGARY

The Most Popular Ratchet Combination

The "Keystone" Reversible Ratchet combination No. 200 has been proven by many hardware dealers to be the best seller in their localities. It consists of ratchet for taper shank drills, sleeve for square shank drills, and short boiler socket for square shank drills, sockets are interchangeable. All working parts are enclosed preventing dust and grit from clogging up mechanism.

Sales of Keystone Ratchets open the way to sales of Keystone drilling posts the time-saving brace.

"Keystone" tools are known the world over for high quality. Sell them for profit and prestige. Let us know if your jobber can't supply you.

The Keystone Manufacturing Co., Postal Station B, Buffalo, N.Y.

A "Reliable" would be easy for "Soldiers of the Soil"

Many of your Farmer customers will be employing city lads this summer under the new "Soldiers of the Soil" scheme for greater production. These boys, unused to the heavy work of the farm, will give better results to the farmer if given the help of modern labor-saving machinery.

Many a city youth who would hardly get half through a churning with an ordinary churn will find it a simple matter to complete the job where a "Reliable" Patent Dash Churn is used.

These city boys are going to do what they can to help the farmer produce more. Let the farmer help these boys to do their best.

Get after your farmer friends to put in this quicker and better churn that produces better butter in a shorter time.

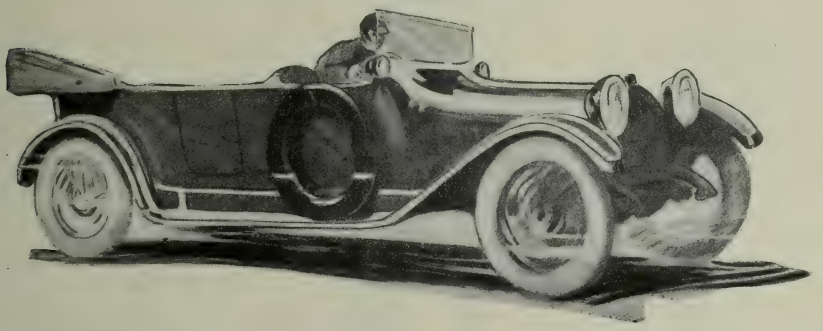
$12,000,000 for Accessories in 1918

With 200,000 Car Owners Big Trade in Prospect—So Asserts Sales Manager of Accessory House—Better Profit Than in Car Sales Lines—Should Anticipate Needs



AUTOMOBILE accessory business will assume gigantic proportions in the years to come. A view of the situation at present is afforded in the opinion of C. Dixon, sales manager of Hyslop Brothers, Toronto, given to HARDWARE AND METAL:

"It is generally conceded by those in authority and position to know that the average car owner will spend at least 10% of the purchase price of his car each year in accessories or a minimum of $60 for each owner. Working on this basis with 200,000 car owners in Canada to-day there is a potential accessory business for 1918 aggregating over $12,000,000, figuring this very conservatively by taking the average price of the car at $600 and that each and every car owner will buy $60 worth of accessories. This estimate of $60 minimum is, I believe, quite reasonable. For Ontario with a total of approximately 100,000 car owners the likely volume of business in accessories on this basis would be $6,000,000. To find out how much business there is in your locality, count the number of cars and multiply by $60 each, also add additional quantity for summer tourists. These figures would not include tires, gasoline and cylinder oil nor take into consideration the number of cars through new sales this spring. If you do not plan to get this business in 1918 someone else in your town will do so.

Lines in Demand

"Somebody said, The secret of success lies in careful study of yourself and your opportunities.' Surely this is the opportunity for automobile dealers to get their portion of accessory business. The buying public's demands are pretty well confined to three features—cost, usefulness and attractiveness of the accessories—and I think you are well advised in compassing these three features in order to serve the popular demand. Your easiest profits are those made through keen, judicious buying of the standard articles at fair prices and selling on the same basis and not from the big red headlines 'Bargains.' To decide the lines of accessories to put in stock, the best guide is to stock accessories for cars that require additional equipment in order to obtain more comfort and ease in operating them. Such lines as tire chains, brake lining, bumpers, spark plugs, lamp bulbs, tire carriers, jacks, horns, clocks, tool boxes and tools are always good stock. Seat covers are much in demand this season and my own concern have sold more seat covers to date than any other season which would indicate to me that many car owners are dressing up their old cars in lieu of exchanging them for new ones as is customary with many owners.

Helps to Get Trade

"It is just possible there may be a shortage of new cars and an increase in the use of second-hand cars would mean that there is a larger proportion of motor cars in use which will need new equipment. Many of these cars will be overhauled and many new accessories or attachments of some kind added. For these reasons we believe that the sale of accessories will be exceptionally brisk this season.

"In the handling of automobile accessories it is absolutely essential that the store be kept in a clean, tidy, up-to-date and well ventilated condition. If your store is not in this condition it should be put in shape at once.

"The quantity of stock should be in proportion to the number of each article you sold during the past year providing you kept such a record or can get it from your invoices. By keeping a simple stock record of the quantities of accessories used during the season you can readily form a basis for the following season and know exactly the quantities to buy at the right time during the touring months. This suggestion, if followed, will prove of much benefit in gauging the quantity to buy at any time. When buying your stock, due consideration should be given to the prospects for selling such an article in your locality and limited to the extent of your ability to make quick turnovers. Buy for normal requirements only—do not speculate. It is advisable to carry an assorted or complete line of accessories but avoid an over stock which costs money in the way of interest and discounts and increases the expenses. A very good gross profit may be obtained from the sale of accessories if the dealer maintains the resale prices and in almost every case the goods are worth the price that has been fixed and should not be sold at any other. If the price is cut on an article it is difficult to re-establish it and not only is the profit on that article lost but the profit on other articles as well. Get your profit now and create a reserve for possible lean years. Don't let your customer pick you for a few here and there on purchase of his supplies.

Anticipate Needs

"Present conditions demand that you anticipate your needs at least two or three weeks in advance owing to railroads being so overburdened in handling materials for Government use, and factories handicapped in manufacture and transportation.

"The automobile accessory business is staple and not subject to serious fluctuations as is sometimes the case with cars. I have known cases where car contracts were cancelled with little or no notice and had it not been for the dealer having a nice volume of business in accessories it would probably have forced him to close or caused a very serious loss. There is one feature to which I would call your particular attention and that is the danger of special salesmen or manufacturers' agents painting such a rosy picture about

some one isolated article that you may over buy and over stock. While some of these articles may have merit, the quantity you buy should be gauged entirely on the number that you can sell to the car owners in your immediate locality. Buying a greater quantity than you can turn over in a reasonable time will tie up capital and act as an anchor on the other lines of accessories.

Profit Better Than on Cars

"The volume of business in automobile accessories is best built up and increased by stocking standard lines of well advertised goods and on which there is a reasonable margin of profit. A good many articles that carry so-called 'long profit' cannot be moved in large quantities and the result is increased costs and decreased volume as, if it costs 20% to do business one month and the following month with the same personnel you reduce your volume of half, you will find the overhead is increased by half and your cost increased. I would repeat that volume can best be obtained by selling standard lines of accessories known to the average car owner through advertising and recommended by reputable jobbers.

"In conclusion, I believe the profit on accessories compares more favorably than on cars. I understand some cars are sold on 15% to 20% whereas you can get an average of 30% on accessories and turn over the capital invested very many more times. You could safely give considerable time and a portion of your working capital to handling accessories and earn a very respectable profit on the line.

Need for Starting and Lighting Systems

Dealers Should be in a Position to Give Their Customers Information on the Matter —Study of Causes of Lighting and Starting Troubles is Essential—Some of Various Causes of Trouble Outlined

THERE is a growing need for starting and lighting systems for automobiles, according to A. F. Edgar, manager of the fixture department of the Canadian General Electric Company, who gave an address at the convention of the Retail Automobile and Accessory Dealers held in Toronto. Mr. Edgar made a plea for a better understanding of the causes of troubles which arise in these systems. He said:

AUTOMOBILE STARTING AND LIGHTING SYSTEMS.

In selecting this subject the speaker feels that it is one in which every merchant of automobile accessories is vitally interested, or at least they should be, inasmuch as the electrical starting and lighting equipment on any car performs such an important function that it is imperative that every one should be well versed in the operation, construction, etc., of these equipments, and, in fact, they should have such a knowledge that would put them in a position to intelligently inform car owners as to the best methods of overcoming any troubles which may develop.

In reselling starting and lighting equipments to automobile owners, the Ford owner naturally is most interested, inasmuch as there is no starting equipment, and, in the opinion of most Ford owners, there is not a satisfactory lighting equipment on these cars as they come from the factory.

The Ford dealer, more than anyone else, should be thoroughly familiar with starting and lighting systems for Ford cars, in view of the large field there is for a satisfactory starting and lighting system for Ford motor cars.

Development.—The process of development of any piece of mechanical or electrical apparatus marks an epoch in history. The first telephone—the first automobile—and, in fact, every device known to the scientific world has passed through a series of stages marked by much experimentation and test until it resolved itself into the perfected machine first conceived in the mind of its originator. The starting and lighting equipment for Ford cars has passed through many of these various stages, and to-day I think that a reliable and efficient starting and lighting system has been produced which can be installed on Ford cars without any appreciable loss of power; in fact, this loss is so small with the present starting systems as to be negligible.

A great deal of trouble has been experienced in the past due to some slight adjustment being necessary in the starting equipment, and unfortunately the dealer has not been sufficiently versed with these starting and lighting systems to quickly

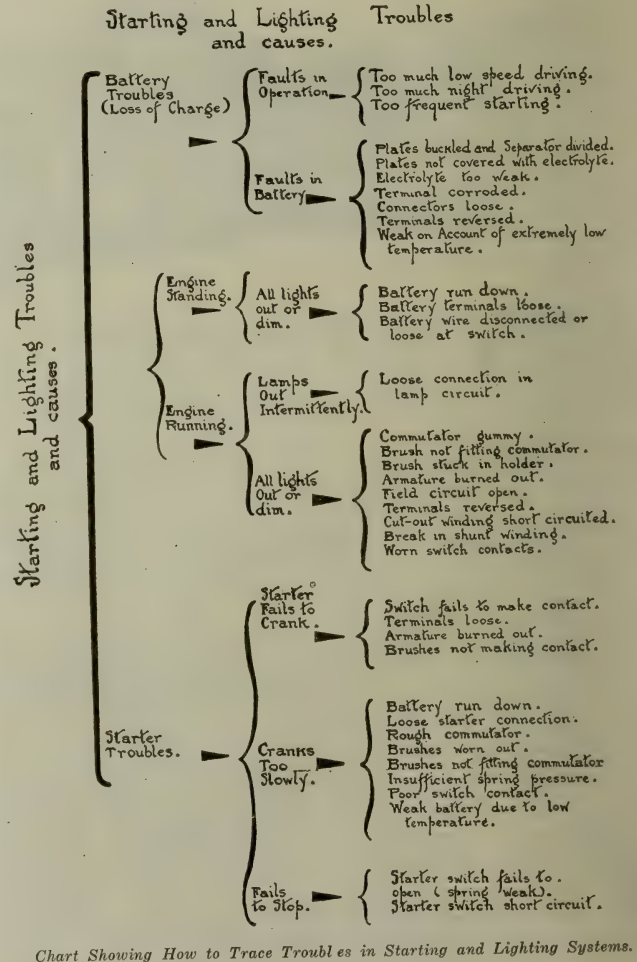


Chart Showing How to Trace Troubles in Starting and Lighting Systems.

render the small service necessary, and for that reason some of the small troubles have been enlarged upon by the car owner and a dissatisfied user was the result, whereas a small adjustment would have entirely eliminated the small trouble which had developed and which will naturally develop in any piece of apparatus.

Starting and Lighting Troubles

There are a number of things which may go wrong with any electrical starting and lighting equipment, the same as there are an almost endless number of diseases which may befall the human body, but, as in the case of the latter, any particular equipment will not likely suffer from anywhere near all of the troubles in the course of its life. It is well, however, for the repair man, and, in fact, the merchant himself, to be thoroughly familiar with the different possible derangements of these equipments as it will aid him in locating and rectifying any particular trouble, moreover of advancing advice to car owners which will all tend to bring him in closer contact with the purchasers of automobile accessories.

I will attempt to describe briefly some of the various troubles—their causes and effects:—

1st. There is a "ground," by which is meant the metallic connection to some part in metallic contact with the car frame. With the "ground return" or single wire wiring system one side of every current-producing or consuming device is purposely grounded, the current then returning through the metal frame of the car instead of through a separate wire.

2nd. "Short circuit." We all know of the usual "short circuit" trouble in connection with any starting and lighting system, and there is probably as much or more trouble from this cause as from any other. By "short circuit" is meant metallic contact between the wires by which the current is intended to flow to and return from a given consuming device, so that the current need not flow through the consuming device but takes a short path and is, as a result, wasted. With a "ground return" wiring system, a "ground" anywhere on the insulated line causes a short circuit.

In locating faults an ammeter is of considerable assistance, especially if something of the characteristics of the particular system is known. For instance, if the charging current at a given engine speed is known, the engine can be run at that speed and the current entering the battery measured by connecting the ammeter between one battery terminal and its connector. If the ammeter shows the proper amperage it proves that the generator and its regulating device are alright. Similarly, if normal "lamp load" is known the current consumed by the lamps can be measured, which will show whether or not the lamps and their circuits are right.

To briefly summarize starting and lighting troubles, causes and effects, I have had prepared a chart showing a number of these possible troubles, and have grouped them according to their effects. Each of the different derangements producing any particular effect can be investigated separately. Many of the more common faults are of such a nature that a glance suffices to show whether they exist or not. I have a few copies of this chart on hand which may be had on application, and, while it has reference more particularly to our own starting and lighting system, the troubles, causes and effects are common in practically all starting and lighting systems. I have had a zinc cut made of this chart, and if a number of copies are required I shall be very glad to arrange for the printing of these charts in sufficient quantities to take care of any one interested.

The various starting and lighting systems are more or less liable to common troubles with which the operator becomes familiar after some experience, and with this chart most of the troubles can be readily located and quickly remedied. The main thing seems to be the education of the repair man to know how and where to look for these troubles, and there have been many cases where the wiring has been pulled out and the owner put to the expense of re-wiring when a simple adjustment would have taken care of the trouble with little expense and inconvenience to either car owner or the repair man.

Credit Men Approve New Bankruptcy Bill

Canada Has No Bankruptcy Act at Present Time, and Need for Such Measure Pointed Out When Bill Was Introduced at Present Session of Parliament

THERE is now before the Dominion Parliament a bill which aims at providing a measure to deal with bankruptcy. This bill has gone through its preliminary stages and was recently the subject of discussion on the part of the Canadian Credit Men's Association at a meeting held in the Board of Trade rooms in Toronto. The meeting was addressed by Henry Detchon, general manager of the Canadian Credit Men's Association, and H. P. Grundy, K.C., Winnipeg, who drafted the bill. After discussing the matter thoroughly the association went on record as favoring the bill.

The bill was introduced into Parliament on March 27, 1918, by S. W. Jacobs, member for George-Etienne Cartier, who stated that Canada differs from practically every other civilized country in that she has no Bankruptcy Act. In introducing the measure the member said:

"As hon. members are aware, there is no Bankruptcy Act in Canada. In that respect Canada differs from practically every other civilized country; and it is proposed by this Bill to put Canada in line with other countries. As the House is aware, bankruptcy is within the purview of the Federal authority. No province can legislate with regard to bankruptcy, because of the fact that that subject is particularly declared in the British North America Act to be—like banking railways, and so on,—within the purview of the Federal authority. Of course, in the absence of any Bankruptcy Act, provided by the Federal authority, the provincial authority has done what it could to correct the anomaly which now exists.

"The main purpose of a Bankruptcy Act, as I understand it, is to see to it that a debtor in certain cases obtains a discharge from his creditors. Now, we have not since 1880 had anything of the kind in this country, and it is high time that a measure of this kind should be passed. It is usual in these days for hon. gentlemen in introducing bills to state that they are merely introduced as war measures. That seems to cover a multitude of sins—anything which you can declare to be a war measure receives the attention of this House. I think I can claim for this Bill that it is essentially a war measure at this particular time. We must be prepared when the war comes to a close to be able to handle the situation which is bound to arise in this country as a result of the long-continued struggle and of the readjustments that will have to be made. Our legislation will have to be sufficiently elastic to take care of the situation. Many people will find at the end of the war that it will be necessary for them to reconsider their position; and it is only right, I submit, that the necessary legislation should be provided for that purpose.

"At present no distinction whatever is made as between the honest and the dishonest debtor in the matter of obtaining a discharge; they are all thrown into the discard. By this measure it is proposed that the courts shall carefully scrutinize the business dealings and the business relations of traders, and shall make a distinction—shall separate the sheep from the goats. When the court is of the opinion that a debtor has been obliged to assign through misfortune, he should be given the necessary relief. If, on the other hand, it should be found, in scrutinizing his affairs, that he wrecked his own business wilfully, then, of course, he should receive no relief whatever. That is the crux of every bankruptcy law, and it is for that reason that I have introduced this Bill for the consideration of hon. members."

Credit Men Approve of Bill

In giving endorsation to the Bill the Canadian Credit Men's Association passed the following resolution:

"That this general meeting of the members of the Canadian Credit Men's Association, Limited, representing the wholesale trade of Ontario, recognizes the necessity for bankruptcy legislation, in order to bring about uniformity throughout Canada in our insolvency laws, and to provide that an insolvent debtor may be required to turn over to a trustee his property for equitable distribution among his creditors; with provisions whereby a debtor, whether he makes a voluntary assignment or is adjudged bankrupt, may apply to the court for a discharge from his debts. The meeting also realizes that the administration provided by any such legislation should be inexpensive and free from unnecessary delay.

"That having heard H. P. Grundy's explanation of the provisions contained in the Act prepared by him under the instructions of the Canadian Credit Men's Association, Limited, and recently introduced into the House of Commons, Ottawa, by Mr. S. W. Jacobs, K.C., of Montreal;

"Now therefore be it resolved that this meeting unanimously approves of the said Act and humbly petitions the Government of the Dominion of Canada to pass the same at the present session of Parliament, and hereby instructs the secretary of the meeting to forward a copy of this resolution to the Rt. Hon. Sir Robt. Borden, Premier of Canada."

Tire Sales Increased by Keeping Records

Automobile and Accessory Dealer Tells Method He Uses in Furthering His Business —Personal Letters Are Powerful Factor—Records of Equipment Kept on All Cars of District

THE development of business in accessories and automobiles is a new line to many hardwaremen and they are naturally interested in the methods employed by those who have been longer in the selling business. O. R. McDonald tells in "Auto Links," the house organ of the Canadian Fairbanks-Morse Company, his way of conducting a garage business. Among other things he says:

Methods of Getting Business.

Now I come up to the question of "How shall I get the business along the various lines upon which I have decided to operate?"

It is manifestly cheaper to call on an individual by mail than in person, although the value of this call depends very largely upon the ability of the writer of the letter, or the kind of mail matter that is sent. To this end I would be very careful indeed in the preparation of letters to go to prospects, and see that they contain all the elements of a personal letter. I don't believe that on car prospects it is ever advisable to use a form letter. The sale involved is of such a size that it is worth while to dictate a special letter in every case, and I would have my stenographer use all of her fill-in-time on this kind of work, either bringing car prospects up to the point where they were ready for an interview, or in working out prospects for other goods or service that I had to sell.

In this connection it might be well for me to explain what I call the paragraph system of dictation, because this relieves the man who looks after the sales of a great deal of detail relative to the preparation of letters to go to the various prospects. This system involves the preparation of separate paragraphs covering various phases of the thing that you have to sell, and which will answer practically any question that may be brought up by the prospect or which may occur in his mind.

We will say, for instance, that this particular prospect, to whom we are writing a letter at this time, has a light car, and we want to sell him a heavier one. Paragraph No. 27 covers this particular phase of the sales argument, and that will be included in this letter. We also have paragraphs covering the comfort and luxury of the car we have to sell. This would be paragraph No. 22, perhaps. We would have a paragraph covering the difference in wheel base—this might be paragraph No. 17—and another paragraph covering the standard equipment of the car we had to sell as compared with the standard equipment of other cars on the market—this might be paragraph No. 2. We would then have a paragraph covering an opening, or an introduction to a letter, something that was worked out with the idea of getting the prospect interested. This might be paragraph No. 1.

In dictating a letter to John Smith, who was a prospect for a Cadillac car, we would say, "Give him paragraphs Nos. 1, 17, 22, 28, 6 and 4." This would be all that it would be necessary to tell the stenographer in order that she might write a letter to John Smith that would meet with our requirements. This system may be followed out on any line of goods, and on all lines of goods. It takes a little time to develop paragraphs that are suitable to meet all requirements, but this is very easily done if a third copy is kept of every letter you dictate. These are sorted and amplified and corrected from the third copies, and after they have been perfected, the girl can make up a book which will consist of all these various paragraphs and which becomes a permanent part of her outfit for your sales promotion work.

Tire Sales

The way we go after the tire business will be a little different from the way the majority of dealers do it. Most dealers depend upon the people who come into their garage to buy tires. We, in our garage, would not be satisfied with this. We would have on our card index a list of the sizes of tires used by every car owner in our locality, and inasmuch as there wouldn't be over 1,500 possibly in the county, we would be in a position to quote them just exactly what a new set of tires of our make would cost them on their car. At the same time we would be able to tell them the superiority of our tires over the tires which were used as standard equipment of their cars.

It is very easy to flatter a prospective customer by showing him that you know his car and equipment and know just exactly what he wants. It is a good deal like going into a hotel that you visit very rarely and have the clerk say, "How do you do, Mr. Smith? I am glad to see you here again." It makes you feel good. It makes you think that he has an interest in you that is exceptional and you are very anxious after that to say a good word for that hotel. The same thing applies to the car owner when you take enough interest in his car or equipment to be able to tell him something about it that he cannot remember.

Accessory Sales

The accessory business in our garage would be handled by some young fellow who has shown an aptitude for selling. He would devote all of his time to it. I, as the proprietor, would not make any particular attempt to sell accessories, any more than I would to sell cars, or tires, or storage batteries, or anything else. My business would be chiefly to see that all departments and all lines got sufficient business, so that each department paid a profit. Each should be let live on its own responsibility entirely. But this live young fellow would be on the job. It is his business to see that the accessories that we have in stock are properly displayed. It would be his business to see that the window displays were changed at least twice a week, that the windows were never dirty and the floors were always kept clean, and that a lady could come into our store and feel just as comfortable as she would if she stepped into the nicest department store or confectionery store in the town. He would make his windows of such attractiveness that those who came down town in the evening "just to look around," would never think of going home without stopping to see what he had in his windows, and to compare it with the window displays that were made by other merchants. At the holiday season he would come in for his share of the Christmas trade.

He would inaugurate a birthday party for the car. On our card index we would know the date of purchase of every car in the locality, at least of those we sold. We would know just when the car's birthday was, and so we would write to the car owner or the car owner's wife, about thirty days previous to the car's birthday, and we would say to them: "Your Overland '83' has a birthday on the 24th of next month, and don't you think it would be nice to have a birthday party for the car? Don't you think that if you bought some top dressing and had the top redressed, that if you got some new seat covers, a spotlight, or a new set of tires, or whatever might suggest itself, that it would be a fine thing, and that you could have a celebration, that you could put this new equipment on the car, and go to the country and have a fine time and celebrate the birthday of your model '83'?"

Don't you think that would have a human interest appeal to the car owner? Don't you think he would remember it as long as he lived, no matter whether he bought any equipment at that particular time or not? Don't you think he would come to you because of the interest that you had taken in him, in case he did want something?

These human things are worth doing. They are worth while. They make life worth living and they make business worth doing, because they make business profitable.

Winter Business

The fall is the time of year when I

should begin to think about what I am going to do for winter business—how I am going to maintain my sales up to the point that will take care of my overhead expenses and show me a profit on my winter business.

Automobile dealers throughout the country have been prone to let down in the winter time, thinking it was impossible to get enough business to justify their keeping their organization up to its usual efficiency. This is far from true. At the present time a large majority of the automobile dealers are now doing almost as much business in the winter time as they do in the summer. This can be done by means of pushing seasonable goods.

We find listed in jobbers' catalogues a large number of items which are especially seasonable in winter.

Take the one item of winter tops. There is sufficient profit to be deprived from the sale of winter tops to render pushing them profitable to any dealer.

Customers will not come to see you on these things, but you get out after them, and show them the advantage of having a winter top for their car; a large number of sales may be made. In order to do this effectively, it is necessary for you to have a sample. You should have one on one of your demonstrators, so that you can show your customer just exactly what he is going to get. Show him by comparison with riding in an open car just what it means to have an enclosed car for the winter.

I would have a card index of my customers which would show date of the last overhauling of the car of every customer on my books. It would also show what was done at that time, and all work that has been done on the car during the season. In this way, I am able to go to my card index and make an intelligent estimate of what should be done to the customer's car during the winter season. Then when business is slack I would get in touch with the owner, and tell him just exactly what the condition of his car is, thus showing him that I have an interest in him and his car.

AUTO LICENSES INCREASE 10,000

The war is not discouraging the purchase of automobiles in Ontario. The figures for the first three months of the year show an increase of 10,000 in the number of licenses taken out compared with the corresponding period of last year. The total number of licenses issued for motor cars to March 31 was 48,500 in addition to 2,000 licenses for motorcycles. There are 4,616 licensed chauffeurs in Ontario, according to the same return.

A Costly Fire--Destruction of Ashdown Saskatoon Warehouse

Stock Valued at $500,000, and Building at $100,000, Were Completely Destroyed — Spring Stocks Ready for Shipment — Plans Under Way for New Building

Above photographs show views of the fire which recently destroyed the Saskatoon branch of the J. H. Ashdown Hardware Company at Saskatoon. (1) Fire well started (2) Fire rapidly gaining headway (3) Obviously doomed (4) Building and stock a total loss. The stock was valued at $500,000 and the building at $100,000. An item telling of this fire appeared in HARDWARE AND METAL *of recent date. The loss is felt more keenly coming as it does in the spring of the year when goods were in store ready for shipment, and when deliveries are slow. Plans are already being considered for the rebuilding of the warehouse.*

Catering for Sporting Goods Trade

Time Now Opportune to Push These Lines — Value of Window Display — Price of Every Article Should be Marked—Look After the Boy's Trade and You Secure the Man

By C. J. Morris

"HI, MISTER, I'll be in for a pair of those dollar-and-a-quarter skates on Saturday." Such was the greeting shouted to the proprietor of a Toronto hardware store at the beginning of the week by a husky youngster who pushed his head in at the doorway.

Nothing much in that to make a sermon about you might think! Perhaps not! And yet to the live hardwareman it should form a text from which two profitable lessons can be learned.

First of all it reminds us that the very best season of the year for the sale of sporting goods is at hand. That love of sport so characteristic of the British temperament which has been handed down to us from our forefathers and has become almost part of our nature will soon be given full play, and the hardwareman who wishes to hold his own must not be backward in catering to it.

True we have a war on, the greatest war in the world's history, and that war is now at its supreme crisis, but there is no reason why that should interfere with the love of sport which is innate in every Canadian boy's heart. It is a part of our psychological make-up that has astonished the Hun more than anything else to see how our soldiers have for the last three seasons entered enthusiastically into their game of football behind the battle lines, even within range of the enemy's guns.

The Duke of Wellington is reported to have said that the battle of Waterloo was won upon the playing fields at Eton, and it may well be that Vimy Ridge was but the development of many a hard-fought struggle on the diamond. Be that as it may, the field sports' season is at hand and every hardwareman should see to it that he obtains his full share of the trade which is its natural outcome.

Now what is the first lesson to be learned from our improvised text above quoted? Is it not that every merchant should use, to the fullest extent possible, his show windows for the display of the sporting goods which will be in demand for the next few weeks?

Many merchants fail to realize that their show window is one of their greatest assets and one of the best salesmen they have. If they will only supply it with the proper material and give it the necessary encouragement it will work for them all the time.

Show the Actual Goods

Occasionally we see a hardware window containing a display of general goods of no special interest, and in addition, perhaps, in view of the approach of the sporting season, there will be a couple of cards, one with the word "Roller Skates," and another inscribed, "Baseball Goods," but no sign of any such goods in the window. Such a condition of affairs gives evidence of an utter lack of appreciation of the value and selling power of a window display.

If you wish to attract the attention of the passerby you must show the actual goods themselves, and the bigger display you can make the more likely you are to attract attention. This does not mean that you should neglect other lines which are now becoming seasonable, but you might well consider the advisability of devoting just one day a week for the next few weeks to exhibiting nothing else but sporting goods—tennis, baseball, roller skates, golf clubs, and any other goods you stock, not forgetting fishing tackle a little later on.

The boy especially will be attracted by a display, and the desire of possession will be engendered within him. Think of the difference to him of a simple card in the window bearing the words roller skates and a row of the skates themselves! Which of the two would be most likely to draw his custom?

And now for the second lesson to be learned from the text—and it is perhaps more necessary to labor this point than the first—if you want to get full value from the display you must show the prices of your goods. It is no exaggeration to say that if you fail to price your goods you are probably losing 50 per cent. if not 75 per cent. of your window's value as a sales agent.

The small boy will be attracted by the sight of the goods in any case, but the first thing he wants to know is the cost, and if no price is marked he is apt to come to the conclusion that it is higher than he can afford and he probably passes on until he comes to another store where the prices are shown.

Too much cannot be said in favor of marking the prices of goods displayed. There is every argument in favor of it and practically no valid argument against it. A boy, more even than a grown-up person, is naturally of a somewhat proud disposition where money is concerned, and would hate to have it thought that the price of an article on which he has set his mind is beyond his purse. In nine cases out of ten he would probably pass on without enquiring the price of an article rather than run the risk of having to admit it was more than he could pay.

Besides, the article which is unpriced does not leave the same impression on his mind as that on which the price is marked. A ball or a pair of skates of which he knows the price, and knows that it is or will be shortly within the range of his pocket, becomes fixed in his mind as the one he is going to buy.

Let the hardwareman then on no account fail to mark in plain figures the price of everything he displays in his window in connection with sport. Cater for the boy's trade, give the boy the same courtesy and attention as you would the man and you will secure for yourself a future customer in other lines besides that of sporting goods.

Trade Acceptance New Idea in Business

First Adopted in United States—It Has Been Put in Use by Some Canadian Wholesale Houses—Considered Better Than Notes, Drafts and Bills of Exchange.

ONE of the new forms of negotiable paper that has recently been adopted by various business houses in Canada is the Trade Acceptance. Hardware merchants will no doubt be called upon to accept them from time to time. The advantage of the new form is explained by F. E. Page, credit manager for Hyslop Bros., Limited, Toronto, in *The Credit Men's Journal.*

"Another form has been added to the many forms of notes, drafts and bills of exchange already in use in this country, and this last one seems to be the best. This new form is known as the **Trade Acceptance**, and the definition is as follows: "A Trade Acceptance is a bill that has arisen out of an actual commercial transaction, domestic or foreign." The form is similar to the ordinary draft now in use but goes one step farther and states that the draft has been drawn for goods sold and in accordance with the terms of original purchase. It cannot therefore be used in connection with overdue accounts or for transactions where goods have not been actually sold and delivered. It is an acknowledgement of a debt by the buyer in favor of the seller for merchandise that the seller has placed in the hands of the buyer. The buyer agrees in writing across the face of this acceptance his name, the name and location of his own bank and the date, to pay the amount of this stated indebtedness at a stated time at his own bank.

"At first, business men in this country will feel that this form of acceptance has no advantage over the ordinary draft that is so commonly used by all wholesale and jobbing houses, but after consideration it will be found that its advantages are many and distinct.

"The acceptance should not be used in the same way as the ordinary draft, which is drawn usually after an account becomes due and placed with a bank for collection. The acceptance is sent direct to the buyer as soon as the invoice or statement is rendered with a request to accept and return as soon as goods have been received and checked. As soon as the acceptance is received by the seller the account is in liquid negotiable condition and can be turned over to the bank at its face value. All current accounts may be covered by acceptance in this way and the acceptances held by the seller until due or discounted as he wishes.

"This method of handling accounts will improve the standing of the buyer with the seller because he definitely obligates himself to pay the account at a specified time and place. It improves the standing of the seller with his creditors and with his bank because he has his accounts in negotiable condition at all times, and if he discounts paper, his banker knows he is dealing with current bills when Trade Acceptances are handed to him for discount, and not drafts covering long past due accounts, or perhaps accounts that do not exist at all.

"The seller holding Trade Acceptances feels more confident that his accounts will be paid at maturity and undoubtedly has the advantage over the merchant who, selling the same trade, does so on the open account basis.

"At this time, when many firms with small capital are carrying very heavy stocks and doing business away beyond the amount their capital warrants, great benefit will be derived from the use of the Trade Acceptance. Unaccepted drafts as collateral security are considered worth, when presented at a bank, about 50 per cent. of their face value, and that would be about as much as any banker would be warranted in advancing, whereas with the Trade Acceptances a much higher percentage can be obtained if not the full face value.

"If an account becomes risky after an acceptance has been given and suit is necessary, there is no need of any further proof of claim. This is another way in which the merchant holding the Trade Acceptance has the advantage over the merchant doing business on the open account plan.

"The Trade Acceptance, when given, is an acknowledgement of the receipt of goods and will be the means of buyers who accept them checking their goods in carefully and quickly, and also checking their invoices.

"It can be used in any class of business where merchandise is sold, and all manufacturers, wholesalers and jobbers should at once put this form into use and educate their customers to its uses and advantages. It will help to put business credits on a more negotiable basis and make it possible for those who use them to obtain freer and more substantial credit from their banks.

CANADA HELPED UNITED STATES WITH CHROMITE SUPPLIES

The United States Geological Survey issues the following:

The mineral chromite is the source of the metal chromium, which, as an alloy in chrome steel and in several chemical compounds, occupies an important place on our battle front on both land and sea. The compounds furnish the strong and durable yet subdued and protective colors that are used to dye the soldiers' khaki clothes and tan the upper leather of his shoes. Chromite readily forms alloys with iron and gives hardness to the steel that is used for armor plate on our war vessels and for the armor-piercing projectiles which they hurl at the enemy. It is one of the essential elements in stellite, which is now so largely employed in making high-speed tools for cutting steel in the manufacture of munitions.

Unfortunately for the United States the present domestic output of chromite is scarcely one-fourth of the quantity needed for war and domestic uses, so that the other three-fourths must be imported. Hitherto most of our imported chromite has come from Rhodesia and New Caledonia, and, notwithstanding the scarcity of ships, much of it still comes from those distant lands. In response to our call for chromite Canada has rendered us most efficient help. In 1916 she sent us 10,930 long tons and in 1917 she more than doubled her shipments of chromite to the United States.

The domestic production of chromite in 1916 was about 47,000 long tons, and last spring the prediction was made by Government geologists that in 1917 it would reach 48,000 long tons. According to J. S. Diller, of the United States Geological Survey, the latest returns indicate that this prophecy has been fulfilled.

Beds Far From Transportation Lines

Most of the known bodies of chromite are small, and those that lie far from lines of transportation are not available for exploitation by the ordinary miner because of the difficulty and expense of getting the ore to the market.

Much of the chromite on the Pacific Coast is of low grade, averaging about 40 per cent. of chromic oxide, and on that account is of less value than the imported ore, which generally contains 50 per cent. or more of chromic oxide.

Nicaragua is shipping a small quantity of ore to this country. At Antioquia, Colombia, chromite is reported to be so abundant that it has been used to build the walls of houses. Brazil has valuable deposits several hundred miles north-west of Bahia, and may yet become a contributor to our needed supply.

KINDERSLEY, SASK., ADOPTS CO-OPERATIVE DELIVERY

Kindersley merchants have launched a war-time delivery plan, which came into effect on April 1. Four or five men have been engaged in delivering goods in the town, and after April 1 this work will be handled by but one man, the others being released for other callings, preferably that of production. A meeting of the retailers was held recently and a contract for delivering and draying was made with Darragh and Taylor. There will be a special charge of five cents for each delivery, large or small, deliveries being made in the morning on all orders received up to 10 a.m. In the afternoon orders received up to 4 o'clock will be delivered, and a special delivery has been arranged for Saturdays for orders received up to 8 p.m.

From the butcher shop of J. Richardson, there will be a daily delivery at 8 a.m., and no other deliveries will be made.

The Kindersley firms who have joined hands in this co-operative enterprise are J. Richardson, C. W. Baker Co., Ltd., Robins & Reid and T. M. McEwan.

EDITORIAL COMMENT

KEEP GARDENING IDEA TO FORE

NOW that daylight saving has become an accomplished fact the hardwareman has every opportunity to greatly increase his trade during the coming season. With one hour more of daylight each day there is going to be a greater desire to spend the time in the open. And especially is this so this year when the call is for production.

Garden tools and garden seeds should have a record sale in hardware stores this spring. Encouragement should be made to help the idea along to the greatest possible extent. The hardwareman will do his part by fostering enthusiasm for the gardening idea. He can best do this by making displays and advertising his wares.

He should consider himself a missionary in this work. Once he is convinced that much depends on his efforts to help the cause of the Allies along he should go forward in the strength of his might and urge more and more the purchase and use of these commodities.

BICYCLES MORE POPULAR THAN EVER

THE fact that bicycle week will be held this year from May 4 to 11 is eloquent evidence that the bicycle will be more popular this season than ever before. Manufacturers and dealers have taken steps to assist the retailer in bringing the bicycle prominently before prospective customers during that week. In a sense, it is intended that this movement will start the ball rolling in the matter of sales.

Hardware dealers throughout the country will no doubt take advantage of such a time and co-operate in every way to bring the bicycle prominently before the people. In almost every town of any size great preparations are being made. In some cities there will be a big bicycle meet for the first time in many years.

This renewed interest in the bicycle is genuine. Wholesalers assert their sales already give indication of an excellent season. The bicycle has come back to stay because its worth as a means of transportation has been recognized.

DO NOT TALK DOWN A COMPETITOR

SOME merchants have conceived the idea that the way to win trade is to criticize their competitor and his goods. "You sold me the other fellow's car because you knocked it," said the manager of an Ontario corporation in explaining why he had not purchased a certain make of automobile.

A hardware merchant recently made the assertion that he had captured the oil stove business of the town because of the tactics which his competitor used in running down his particular make of stove. "We sell three stoves for every one our competitor sells, we feel sure," stated the merchant in question. "Every time he knocked our goods he apparently sent us a customer."

Humans are funny creatures in this respect. They do not like to see unfair advantage taken of a merchant when he is unable to defend himself. It is poor business to run down the other man or his goods.

TRIFLES THAT HELP BUSINESS

A NOTED business man once said that "business consists of nothing more than a series of trifles." Some of the trifles which successful business men have used in developing trade can be more generally employed than they are. The confidence of customers is an important trifle. Care taken that confidence thus given is not violated is no less important. The rendering of best service and fairness in dealing are also two cornerstones of business building.

Confidence is necessary in order that trade attracted to a store may be retained. Through advertising it is often possible to gain much additional transient trade. Once this trade is started it requires that confidence be engendered in order that it may keep on coming.

Service will win trade in spite of greater obstacles. The case of a small hardware merchant could be instanced who wins out in competition with large competitors in securing trade of a large number of manufacturers because he gives those manufacturers service. The unwieldy nature of the large concern has worked out to its detriment. The retail merchant is nearer the manufacturers, he canvasses them for their orders and he sees that they get their orders promptly.

The importance of trifles and apparently small matters in the light of these facts really become a matter of moment. If merchants would look upon them as matters of vital importance they would be greatly benefited.

Current Events in Photograph—No. 16

THE AMBULANCE TRAIN

WHEN the heat and excitement of battle is over then comes the ambulance train. The spirit of science that has set itself to kill is changed to a gentler spirit of gentleness and healing. In this photo two American officers are seen examining one of the ambulance cars of a long ambulance train that is to-day easing the suffering of the wounded men in France.

Plenty of Shipping for Canada's Needs

President of Steamship Company Discusses the Present Situation With Regard to Internal Shipping for the Coming Season—No Need for Alarm—Crops Can be Handled

"THE most encouraging feature of the transportation problem is that of the Government's proposal to create a merchant marine," stated James Carruthers, president of the Canada Steamship Lines, Limited, Montreal, to HARDWARE AND METAL this week. "This is a big problem, but it can be handled and the matter developed so that it will mean much to Canada generally. It needs to be handled in a big way by big men who know the needs of the country, and the Government has been wise in selecting as some of its ministers business men of the first type—men with a large outlook. The only difficulty is that of there being too few of them."

Mr. Carruthers stated that there would be plenty of shipping to carry all the crop that might be grown this year. "This will be best brought from the head of the lakes to Georgian Bay ports and transhipped from there to Montreal, and thence to Europe. This has been found a very prompt route and good time is made by the boats. Take our largest boats. These will be able to carry around 400,000 bushels of wheat and they can made the round trip from the loading point to the delivering ports on Georgian Bay in six days. There are several of these large capacity boats, and with the others that we have to take care of the business there will be ample."

"What about the ability of the other transportation facilities to take care of the grain that your company delivers to it at these ports?"

"There will be no difficulty in this respect, as I view the matter, and we have been able to make more prompt delivery in this way than the transportation companies at other points across the line. The unloading and loading arrangements at Montreal are such that boats are very quickly given their cargoes. In fact these facilities could not well be better, it being possible to unload and load one million bushels from the large elevators inside 24 hours."

"How much shipping do you estimate has been diverted for seaborne purposes, Mr. Carruthers?"

"That is very hard to say. A great deal has been taken, and as a matter of fact nearly all the boats that were of such proportions that they could be taken through the canals have been taken over. The large boats on the lakes which we still have are of such width that it was impossible to take them through. We, therefore, have ample left to meet the needs that may be developed. If necessary, I think we could handle twice the amount of grain that will be grown this year."

"Will Montreal ever become a winter port?" was asked.

"That is a big question and it is rather likely, I should say, that it will.

"There are many difficulties and these would be hard to solve. But Montreal has a good port—one of the best on the continent. The work that has been done here by the Government through the Harbor Commission is one of the best and most important business propositions ever undertaken.

"It has been suggested that the coun-

try take over and operate the shipping on our water routes. This would probably be unwise. It is a large business and the men who operate these lines have spent many years in mastering this business. The difficulty of a government handling this kind of a proposal would be that of its not having the men with a practical grasp of the needs to undertake the work," added Mr. Carruthers.

"What about the labor situation as affecting shipping?"

"This is a serious problem with us, but we shall be able to meet it, although we have to take some labor that is rather crude. I do not think we shall have any great trouble in this respect during the present season. Operating costs have, of course, greatly increased."

Mr. Carruthers thought that the present situation called for a government of business men and at the present time there were many good men of this type who had proven themselves equal to the tasks assigned them.

"Cannot more men be persuaded to enter into the affairs of their country who have had a wide and extended experience in business on a large scale?" was asked.

"There is room for more of them and if the people would support them they would probably give their time to undertake work they are fitted for. The present needs of the country is for a business government made up of business men who know how to deal with problems in a practical business way," was Mr. Carruthers' summing up of this matter.

"You have recently been away, Mr. Carruthers, what is your impression of the crop prospect?"

"It would seem that, between spring wheat and fall wheat the United States may have a yield of 1,000,000,000 bushels. If Canada has a good crop, of which there is now much promise, there should be a greater yield than ever.

"It has been proposed that the great areas of land adjacent to railways, much of which is in the hands of speculators, should be broken up by the large contractors that have been doing railway construction work," said Mr. Carruthers. "This might be a good plan and it is, but there are many difficulties as to how this would be arranged, and the matter of labor is a problem that would prove a real one." It was pointed out, notwithstanding, that this would be a great benefit if the details could be worked out to eliminate the evils that might accompany its adoption.

Time is Opportune to Reduce Accounts

So Asserts Credit Man for Wholesale Hardware House—Getting in Standing Accounts Means an Increased Earning Power—Stocks Should be Kept Turning.

"THE strenuous times we have been passing through, and those which in all probability we will in the future be called upon to face, even to a greater degree, necessitate co-operation, and credit men should take every opportunity of becoming acquainted with their customers," asserts W. H. Lamont, president of the Canadian Credit Men's Association, Limited, Ontario Division, in the April issue of *The Credit Men's Journal*. Mr. Lamont is connected with H. S. Howland, Sons & Co., Toronto. "By using diplomacy they can educate the retail merchant to adopt aggressive policies that will prove profitable, and go a long way in helping him on the road to prosperity.

"There are many ways in which credit men can approach the retailer in educating him to become a successful merchant; these ways must be left to the judgment and ingenuity of the men themselves, but the subjects to be dwelt upon of greatest importance appear to me to be: profitable merchandising, prompt collecting, and protection against loss from fire.

"In purchasing goods the worthy debtor should be educated to take every precaution so that a snug position can be maintained. This will be most essential when the terrible war is over and a declining market is with us. Many difficulties will have to be overcome, consequently the greatest of care in buying goods will be an absolute necessity.

"The retailer should be advised of the importance of turning the stock over a sufficient number of times to produce the proper returns for the energy that is put into the business, and this can only be achieved by adopting and adhering closely to the policy of keeping purchases with a few jobbers and not having a long list of creditors. Being a good fellow and buying from numerous wholesale houses leads to carrying more stock than his capital will warrant, with the result that a number of lines are in stock but not a complete assortment of sizes of any one line, and with the probability of a good portion of capital tied up in dead stock.

"Financial statements of retail merchants that are submitted frequently show large amounts tied up in accounts receivable. The merchant should only carry on his books an investment in proportion to his capital and even in extending this credit it should be distinctly understood that the money should come back to him in time to take care of his obligations, to enable him to keep his credit good; that the credit man can lend a very necessary hand in organizing the collection department of a retail merchant is quite apparent.

"For a long time past the consuming public has failed to properly recognize its obligations to the retail merchant to such an extent that the retailer is inclined to be timid in asking for settlements, being afraid that the customer will take his trade elsewhere. The growing use of the automobile has made it possible for the farmers to travel beyond the nearby town if he is under the impression that credit can be more easily obtained; consequently the necessity of the credit men using every opportunity to educate merchants generally and in all sections how important it is to collect book accounts, and to be careful in granting credits, particularly to people residing outside their own immediate districts.

"There never was a better time for the retailer to reduce his accounts receivable than the present. The bountiful harvest and high prices has brought a condition that should be taken advantage of, and a strenuous effort made to turn these accounts, particularly those of long standing, into a liquid asset. The result of this vigorous treatment will not only enable the merchant to pay his bills promptly, but will give him the opportunity of increasing his earning power by taking advantage of any cash discounts offered. On the other hand, if he continues in his own way extending unlimited credit, he will tie up in open accounts more capital than he can afford, with the result that accommodation will be required from the jobber, for which he would be called upon to pay interest while the debts to him are eating their heads off because of his fear of losing customers if a charge for carrying overdue accounts is made.

"Another opportunity for the credit men to help the retail merchant is to constantly bring to his attention the necessity of fire insurance protection. Educate him to carry sufficient insurance and to look over his policies to see that they are worded properly and concurrently, so that any misunderstanding will be avoided if a fire should occur, suggesting and encouraging him to take every care in decorating his store, to avoid the use of anything of a flimsy nature, make regular inspection of wiring, have proper metal receptacles for keeping ashes, to be cautious, neat and cleanly generally in the care of his place, and thus eliminate the danger of a fire.

If one merchant in a neighborhood can be induced to adopt preventative methods his influence is very likely to be felt by others, and lead to many taking similar precautions with eventual saving in cost of insurance.

"In closing this short article, I would suggest to credit men the importance of getting away from routine; try and arrange your work so that you have time to think and develop your ideas, always keeping to the fore your duty as it appears to me of doing good by teaching and helping the retail merchant along the lines that have been slightly touched upon, resulting in better credits, reduced bad debts, fewer bankrupt stocks, and the upbuilding of solvency generally in the commercial world."

Second-Hand Car Presents Big Problem

Automobile Dealers Quite Generally Agreed That Only Smaller Cars Can be Taken With Safety—Need For Central Organization to Handle Problem of Big Cars

A DISCUSSION on the problem of the second-hand car took place at the convention of the Automobile and Accessory Dealers, held in Toronto this week, which brought out some valuable and interesting information. Mayor Duffus, of Peterborough, was one of the speakers to join in the discussion. He stated that he was disappointed at the number of dealers present at the convention. From what he had been able to gather he judged that fully 50 per cent. of those present represented wholesale houses and manufacturers' representatives. He stated that they had refused to take any second-hand car in exchange except the Ford. With parts and repairs easily obtainable for this car they were able to rebuild and dispose of this class of car to advantage. Mayor Duffus stated that in the nine years he had been selling cars they had increased their sales from nine cars in the first year to three hundred cars last year. During that time he had tried numerous systems in keeping track of the old car sales. He said that he had finally adopted the card system of keeping track of each old car from the time it is bought and the price paid for it, together with the amount of repairs placed thereon, until it was again disposed of. Each part of the business had been departmentized and made to stand on its own feet. If it could not show a fair return at the end of the year the reason was found. If there was no remedy for the situation of a loss in a department it was cut out entirely. "You are groping in the dark unless you do so. Organization and system are the methods through which you can find out whether a department is paying," stated the speaker. He thought an organization of dealers was very essential. He advised that the meeting be held in the winter months, as the spring season, when every dealer was busy, was not a good one in which to call such a meeting. He thought many dealers stayed away from the present meeting on this account.

J. Rose, of London, an automobile dealer, did not agree with the previous speaker that fully 50 per cent. of those present were manufacturers and wholesalers. There was a live interest in organization in Western Ontario, and they had a strong deputation from London that was anxious to see the work of organization carried through to completion and made a real benefit to the dealers. They had a local organization in London, and had obtained much good therefrom. Mr. Rose said there was a real problem in handling the big second-hand car, as people will not pay $500 or $600 for a second-hand car when they can buy a small new car for those figures. They handled only rebuilt cars. They endeavored to make each deal stand on its own merits. If it did not show a profit it was considered bad business. He thought the organization could result in much good by going to the tire manufacturer and insisting that all tires be sold on such a basis that the margin for profit would be the same for all dealers.

J. E. Hawkes, London, said he thought one of the mistakes on the part of the automobile dealer is to allow the prospective customer to sell his car to the dealer rather than that the dealer should sell the new car. It was never good business to refer to them as second-hand cars. It was better to call them rebuilt cars. It would add at least $50 to the price for which they could be sold.

J. C. Beemer, London, thought it was advisable to stay away from the second-hand car as much as possible. He had not found it a profitable business so far. When he took in a car he wanted to be reasonably sure that he had a prospective buyer for it.

F. W. Evans, Toronto, thought there should be some definite way of arriving at the amount of depreciation of a car each year. Their own concern depreciated their cars in mark-down to the extent of one-third each. They had no trouble in disposing of their old ones on that basis.

C. E. Norris suggested that there should be some central organization to handle the big second-hand car. Such an organization would require to have an expert appraiser, who could say what the old car was worth, and the organization could then dispose of it.

Need for Brake Inspection Law

Many Accidents Are Caused Through Failure of Brakes to Respond—Movement for Inspection Under Way in United States and Will No Doubt Extend to Canada

ALMOST every day an emergency arises which demands quick, sure action of brakes of automobiles and trucks. If they respond promptly it is nothing more than a passing incident; if they fail, it may mean damage and possibly death. The price of neglected brakes comes exceedingly high. That price need not be paid.

Defective brakes are a menace not only to the lives of the driver and those in his car but are also a danger to pedestrians and every other car on the road.

The object of the brake inspection movement is to decrease the number of preventable accidents due to defective brakes.

In one year the brakes on a car are used from 20,000 to 30,000 times. Just one single slip may mean disaster.

The tremendous increase each year in the number of motor cars makes it imperative that increased attention be paid to brakes. In cities in particular the demands of traffic make efficient brakes urgently needed.

Traffic records show that 65 per cent. of all accidents occur when the car is going 12 miles an hour or less. In the great majority of these cases neglect of the brakes and brake lining is wholly responsible for the accidents.

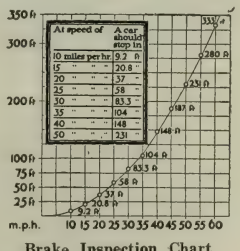
Brakes are out of sight, and for that reason are frequently neglected. The brake inspection movement is preventing this neglect by calling strongly to the motorist's attention, the vital and compelling need of good brakes.

He is shown that in many cases a simple tightening of brake rods or an adjustment of brake equalizers will substitute safety for chance.

Test for Brakes

Automobile engineers have proved that when brake mechanism is right and road conditions average, any car should stop at distances and speeds given by the chart.

V^2 means the square of the velocity or speed of your car, 10.8 is the proved factor of retardation under average road conditions. This factor decreases on smooth, slippery roads to 6.7, and increases as high as 17.4 on rough, worn roads. The chart represents the average condition, and other conditions can readily be figured by changing the factor within the given limits.



Brake Inspection Chart

TO UTILIZE OLD TIN CANS

Application has been made to the Board of Control, Winnipeg, for a four years' franchise to utilize the old tin cans accumulated in the city dumps. The project contemplates the separation of the solder, tin and iron in the cans, and the melting of the last-mentioned into bars.

EVENTS IN THE TRADE

BUSINESS CHANGES

Toronto, Ont.—G. McLean, hardware, has sold to Towers Hardware Co.

D'Arcy, Sask.—W. L. Keil, hardware, has been succeeded by G. D. Hiberlee.

Winnipeg, Man.——P. Bider, hardware, has been succeeded by A. Posner.

Hawkesbury, Ont.—J. A. Chevrier, hardware, has removed to Montreal, Que.

Kingsville, Ont.—Scratch & McDonald, hardware, Kingsville, Ont., have sold to K. Rae.

McCreary, Man.—F. N. Smith, hardware, has been succeeded by Angus & Hawkins.

Toronto, Ont.—F. J. Tolchard, hardware, has been succeeded by Hyman Rovner.

Prelate, Sask.—Harris & McNaughton, hardware, have dissolved, E. M. Harris continuing.

Toronto, Ont.—S. E. Jeffrey, hardware, Toronto, Ont., has sold to French Bailey Company.

Riverhurst, Sask.—Stewart, Leavens & Co., hardware, have been succeeded by A. R. Lyne & Co.

FIRE LOSS

Hamilton, Ont.—Meakins & Sons, Ltd., brush manufacturers, have suffered fire loss.

Montreal, Que.—C. A. Lacroix, hardware, suffered fire loss.

NEW FIRM

Clark & Strotten, of Arner, Ont., have started a hardware store.

IRON MAN DIES

Edgar M. McDougall, president of the Canada Iron Corporation, Fort William, died recently in California, where he was spending some time for the benefit of his health.

The late Mr. McDougall was one of the prominent iron manufacturers of the country, being not only president and managing director of the Canada Iron Corporation, but practically sole owner of the Caledonian Iron Works Company, which was founded by his father, John McDougall. He was a man about 53 years of age.

PERSONAL

Ross McKinnon, formerly manager of the Pease Foundry Company, Toronto, and latterly with the Page Hersey Company, Guelph, Ont., has been transferred to Cohoes, N.Y., to take charge of the Cohoes Rolling Mills.

MONTREAL PERSONALS

Wm. Hyman, of Wm. Hyman and Son, Gaspe, Quebec, made a business trip to Montreal last week.

J. A. Paquin, hardware merchant of Sate. Eustache, Quebec, was in Montreal on business for his firm.

GEORGE J. MORRISON

President of New Wholesale Hardware Company of Morrison-Blackwood Hardware, Limited, Moose Jaw, Sask.

Jesse H. Stanton, representing The Turner & Stanton Co., of Norwich, Conn., is a visitor to Montreal this week.

Robert Miller of Starke-Seybold, Ltd., has enlisted with the "Tank" Battalion and is already with the the King's forces.

Among those enlisting with the forces of the Empire this week in Alex. .B. Williamson, city traveller for Starke-Seybold, Ltd., Montreal.

Uncle Sam will have an addition to his forces within the next week in the person of Henry Guenet, shipper for Starke-Seybold, Ltd.

F. E. Howland, with the Cortland Carriage Goods Co. of Cortland, N.Y., will call on the Montreal trade within the next few days.

John R .Anderson, manufacturers' agent of Montreal has returned from a trip to the Maritime Provinces. He went through as far as Prince Edward Island and reports a growing interest there in the automobile industry. Business conditions, in a general way are satisfactory and the outlook indicates a busy season. Halifax in particular, is a busy place, with much building and repairing in progress.

John Millen & Son, Limited, Montreal and Toronto, have just issued a new catalogue of 267 pages on automobile and gas engine supplies. This is fully illustrated and has been brought down to date. The illustrations on auto accessory lines are profuse, and full descriptive matter accompanies these. In a foreword they draw attention to the fact that they have changed their policy by confining their activities to Ontario, Quebec and the Maritime Provinces. A complete index is supplied at the back of this catalogue.

BIG GARAGE FIRE

The Ontario Garage at London, Ont., was completely destroyed by fire on Saturday evening last with a loss in cars and buildings of approximately $100,000. The company's loss of $60,000 is fully covered by insurance. The stock included thirty-five brand new cars belonging to the firm and fifteen autos belonging to local doctors and business houses. The fire started when a tourist after refilling his gasoline tank on the rear of the car swerved a little in backing out and hit the door. The tank burst and the gasoline poured over the floor and ran down the register and furnace pipes, which caused an immediate conflagration.

WINS PROMOTION

News has recently been received from France of the promotion to the position of captain in command of a company of C. M. Ackland, formerly a member of the firm of D. Ackland & Sons, Winnipeg, manufacturers of carriage hardware. Captain Ackland went overseas as major and second in command of the 222nd Battalion, and reverted to the rank of lieutenant in order to proceed to France in July, 1917. He has been attached to the 46th Battalion. Captain Ackland was officer commanding the 106th Militia Battalion at Winnipeg at the time of joining the overseas forces.

STEEL MAN KILLED IN FRANCE

Capt. W. R. Hutchison, nephew of J. T. McCall, of Drummond, McCall & Co., Montreal and Toronto, iron and steel merchants, has been reported as killed in action while serving in the Royal Scots Fusiliers. Prior to the outbreak of the war Capt. Hutchison was employed for three years with Drummond, McCall & Co., at Montreal. Capt. Hutchison was 28 years of age and the youngest son of Dr. Hutchison, former rector of the High School, Glasgow. He was a well-known Rugby football player, forming one of the team that represented Scotland against England in the international contests. He was in Glasgow on a visit when war broke out and enlisted in the ranks of the Fusiliers, proceeding to Salonika. He was wounded in the arm and sent home to Scotland, and on recovering gained his commission and proceeded to France in command of a company of his old regiment. Two brothers are also on active service, Lieut. R. J. Hutchison, of the 42nd Royal Highlanders of the Imperial Army—the famous "Black Watch"—and Major H. F. Hutchison, of the Indian Medical Service. Two other brothers, Alexander Hutchison and Thomas Hutchison, are in Montreal, associated with the firm of Messrs. Drummond, McCall & Co.

TWO HARDWARE STORES WIPED OUT

Two hardware stores in the town of Vermilion, Alta., were destroyed by fire on April 11, following an explosion of a gas tank in a garage. Several blocks were destroyed, including the Town Hall, post office, Royal Bank branch. One of the hardware stores destroyed was the Northern Hardware and the other Nellis & Law. The damage to the town is estimated at $500,000.

LOWE BROS. CO. SUFFER IN KANSAS CITY FIRE

In the $2,500,000 fire that swept the West Bottoms district of Kansas City, recently, the local branches of the Lowe Bros. Paint Co. and of the Illinois Glass Co. were among those of the 18 business houses reported by the authorities as completely destroyed. The fire apparently started simultaneously on several floors of a building in the heart of the wholesale district, and destroyed three blocks of buildings before it was got under control.

CANADIAN NATIONAL CARBON EXPANDS

License has been granted the Canadian National Carbon Company under the laws of the Province of Ontario to increase the capitalization of the company to $1,200,000. The company was formerly organized with a capitalization of $200,000, but during the past year the plant and interests of the Canadian Carbon Company and the Interstate Electric Novelty Company were acquired and the larger capitalization was necessitated as a result of this amalgamation. The plants of the Canadian Carbon Company and the Interstate Electric Novelty Company will still be operated. The Canadian National Carbon Company contemplates a considerable addition to their plant at Paton Road, Toronto, but will in all probability defer the erection of these additions until after the war.

CHANGE IN OWNERSHIP

Ralph and Simpson have acquired the hardware business of G. L. Forester at Neepawa, Man. The new partners in the firm are both from Neepawa. Clarence Ralph had been employed in the Foerster store for some years, while Stuart G. Simpson has been a partner with his father in the furniture business in that town. Both are young men.

VARNISH CASES INDEFINITELY POSTPONED

A formal hearing was to have been held in Washington on April 8 by the Federal Trade Commission in connection with the paint and varnish complaints that have been filed by the commiscion, mention of which was recently made in HARDWARE AND METAL.

A large number of the firms have written the commission, within the past few weeks, asking for an extension of time in their case for various reasons. The commission, therefore, has postponed the formal hearing. At this time no definite future date has been set by the commission for hearing this case.

New Wholesale Hardware Starts June 1.

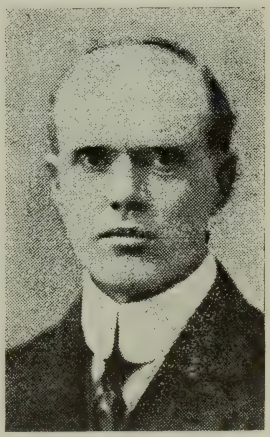
Morrison-Blackwood Hardware, Limited, Expects to be Ready for Business in About Month's Time—Will Cater to Saskatchewan Trade Exclusively

A CHARTER has recently been granted to Morrison-Blackwood Hardware, Limited, wholesale hardware merchants, Moose Jaw, according to a recent announcement made in HARDWARE AND METAL. This is a new firm of jobbers, but the men who are behind it are well known to the trade throughout Western Canada. George A. Morrison, president of the new company, has been in the retail business in Moose Jaw for the past twelve years, and is now president of the Moose Jaw Hardware Company, one of the best known retail establishments in southern Saskatchewan.

Mr. Morrison is a young man who has worked his way up from the bottom, first as a clerk, secondly as manager of a very successful retail store, and finally as president of the new wholesale concern. He went to Moose Jaw from London, Ont., his object at first being merely to see Western Canada of which he had heard so much. He was so taken up with Moose Jaw that he hired as a clerk to John Hawke, who was then running the Moose Jaw Hardware. As years went by he became more proficient in the business, and eventually was appointed president of the company. L. A. Blackwood, general manager of this new jobbing house, needs no introduction to the trade of Western Canada. His experience in the hardware business extends over thirty years.

While George Morrison, of the Moose Jaw Hardware Company, will be one of the members of the new firm, he will still continue as head of that concern. The entire management of the new company is to be in the hands of Mr. Blackwood.

Mr. Blackwood is a Nova Scotia man, born in Halifax, and first entered the hardware business in that city nearly 28 years ago, in the firm of A. M. Bell & Co., with whom he remained for some 12 years. For the past 16 years he has been connected with the Merrick Anderson Co.



L. A. BLACKWOOD

Manager of New Wholesale Hardware Company of Morrison-Blackwood Hardware, Limited, Moose Jaw, Sask.

and the Miller Morse Co., Ltd., in both cases holding the position of manager. He has traveled almost all of the country which the new firm proposes serving and is therefore well acquainted with the men with whom he will be doing business.

The office and showroom of the new company will be in the Central Chambers while the warehouse will be on the spur track on High Street West, where the company proposes to build an up-to-date warehouse in the near future. Stock is now being purchased and orders are being placed so that it is expected that the firm will be in a position to receive orders by June 1.

WAKYTE CO. ADD ATHLETIC GOODS

The Wakyte Manufacturing Company, Limited., 259-261 Stanley street, Winnipeg, have taken over the entire line of athletic and sporting goods as manufactured by Thos. E. Wilson & Co., Chicago. In order to handle this line to the best advantage, the Wakyte company have opened up a special sample room in their building, where these goods are now on display. The stock as shown in the Wakyte sample room covers every line of tennis, croquet, baseball. skating, hockey, bathing, golf, soccer and gymnasium supplies.

SASKATCHEWAN R. M. A. WILL HOLD CONVENTION

The Saskatchewan branch of the Retail Merchants' Association will hold its annual convention in Saskatoon on May 14-15-16. Arrangements are yet to be made for a building in which to meet, but program for the three days has been practically agreed on. E. B. Moon, director of the Department of Community Building and Trade Betterment of the *Farmers' Review*, Chicago, is expected to deliver a number of addresses at the convention.

F. E. Raymond, secretary of the association, expects a large attendance and arrangements will be made for a bigger convention than in previous years.

OPENING UP SALESROOM

Moxley & Olson are opening up office and sample rooms at 789 King street west, Toronto, and are carrying the lines of the Dominion Whip Company, Hamilton, and Burlington Windsor Blanket Company, L. C. Chase & Co., plush robes and auto accessories.

WESTERN FIRM EXTENDS BUSINESS

Box Bros., hardware merchants at Belmont, Man., have recently taken over the business of F. J. Bradley at Pierson, Man. This now makes three retail stores controlled by this firm, the third being at Souris, Man. The headquarters at Belmont is devoted to hardware and furniture, while the store at Souris carries hardware and tinsmithing. The firm of Box Bros. was organized in 1910 to succeed F. F. Sparks at Belmont. In 1915 the business of Currie & Mitchell at Souris was acquired.

BICYCLE WEEK MAY 4 TO 11

Big preparations are being made in some centres for the celebration of bicycle week. It is the purpose of this display week to bring the bicycle prominently before the consumers and so start the sale of bicycles in an enthusiastic manner. Manufacturers, wholesalers and retailers are co-operating to make the event a big success this year. In some cities bicycle meets will be conducted, parades will be carried out, windows and stores will be attractively decorated and displays arranged. Manufacturers and wholesalers are furnishing advertising material, posters, cut-outs and similar material to assist the retailer. The Canadian Cycle Association is putting forth every effort to make it a big success in Canada, the same as it is expected to be a big success in the United States. Bicycle dealers who have not yet received advertising material from their wholesale bicycle dealer will be able to link up with this movement by making a request for same.

APPOINTED SALES MANAGER OF IMPERIAL OIL

A. J. Wolcott, who has been manager of Manitoba branch of the Imperial Oil, Limited, at Winnipeg for a number of years has been appointed to the position of general sales manager for Canada and Newfoundland for the company. He was succeeded in the Winnipeg field by J. A. Boyd, who has been assistant manager of the Alberta branch of the company with headquarters at Edmonton.

CATALOGUES TO BE STANDARDIZED

All catalogues intended for preservation by purchasing agents are to be limited to one size hereafter, according to plans laid by the National Association of Purchasing Agents of the United States. A committee of that association has called a conference to discuss the matter of standardization of catalogues, to be held in the La Salle Hotel, Chicago, on May 22, 1918.

At the Pittsburgh Convention of Purchasing Agents the size 8½ x 11 was tentatively adopted with the proviso that it should be adhered to unless good reasons appeared for changing it. The committee has had the matter up with 575 associations representing various industries and trades and 287 trade paper publications.

HARDWARE LETTER BOX

Manufacturers of Hand Cultivators

John Fennell & Son, Kitchener, Ont.—Kindly give the name of manufacturers of Buco hand cultivator.

Wellandvale Manufacturing Co., St. Catharines, Ont.—Editor.

Manufacturers of Fire Escapes

R. T. Holman, Summerside, P.E.I. — Kindly give us the names of manufacturers of fire escapes in Canada.

Canadian Ornamental Iron Co., Toronto, Ont.; Canada Foundry Company, Ltd., Toronto; Dennis Wire & Iron Works Co., Ltd., London, Ont.; Hutchinson & Spicht, Montreal; John Watson & Son, Montreal; the George Meadows Wire, Iron and Brass Works Company, Ltd., Toronto.—Editor.

R. T. Holman, Summerside, P. E. I.—Could you supply us with the names of manufacturers of oil burners for attachment to coal burning range?

Canadian Fairbanks-Morse Company, Toronto, Montreal, St. John.—Editor.

COL. SAM McROBERTS

(Continued from page 43.)

"How much capital did you have at the time?" the inquisitor inquired, perhaps impertinently.

"I hadn't any but my reporter friends were confident and passed my cards among their acquaintances and I caught a little of their enthusiasm. My first case? Oh, it was a sordid matter, a collection, no doubt, and left no impression on my memory.

"Some business came to my office but in bad times and worse I never departed from my standards. I wouldn't defend criminals, I said to myself, or take divorce cases. Soon I saw that a long struggle was ahead of me, not that I objected to hard work, or was unwilling to wait, but that I was ambitious to obtain a solid and desirable class of clients.

Scotch Blood Seeks Out "the Siller"

"When an unnamed corporation advertised for a lawyer, I answered with the thought that I could obtain in a few months the experience I needed and which I could not get for several years if I practised for myself.

"The advertisers proved to be Armour and Company, the packers. They gave me employment. After being in the legal department of that corporation for five years, I just drifted into the financial department."

Drifted naturally because the practical blood of the Scotch father mastered the romantic blood of the Scotch-Irish mother, who, born in Ohio, saw in oratory and statesmanship the one sure highway to honor. Such, at any rate, is Mr. Morrow's diagnosis.

At Forty in Charge of Millions

At the age of thirty-five, Samuel McRoberts was the treasurer of Armour and Company and the custodian of millions of money. When he was forty, he was invited to be a vice-president and the executive manager of the National City Bank of New York, whose deposits at the last report, amounted to $723,000,000.

For nine years Colonel McRoberts has been a banker and a director in many of America's greatest corporations—in Armour and Company, in the American Sugar and Refining Company, in the Baldwin Locomotive Works, in the St. Paul Railroad and so on and so forth.

Foreign exchange and finance has been one of his specialties. He has done much to give form to the banking laws of the country and to extend American trade in Europe and South America.

"Seven Figure" Thinking Material

As a Colonel in the army, on a leave of absence from his duties in New York, he is Chief of the Procurement Division, Bureau of Ordinance and is negotiating all orders and contracts for artillery, small arms and ammunition for the national government. He gives counsel to the government in the matter of credits to the manufacturers of rifles, pistols and ammunition.

Vanderlip of the same bank is managing the selling campaign of the war savings certificates. Two hundred and thirty officers and employees of the bank are under the colors, at home, on the ocean or in France.

THE CLERKS DEPARTMENT

COL. SAM McROBERTS SEVEN FIGURE THINKER

Growth of a Generalissimo of Finance from a Five Dollar a Week Law Clerk—The Life-Story of the Vice-President and Executive Manager of the National City Bank of New York

YOU hear often enough the phrase "The canny Scot," but there is something absolutely uncanny about the way the Scotch blood in Samuel McRoberts ruled his American life in the direction of finance, and tremendous efficiency as a financier. Samuel McRoberts is "the man who can think in seven figures." Men of might in America's mightiest business—the war business of to-day—know him by that appellation. From thinking $5.00 a week and glad to earn it some little time ago in Chicago, Samuel McRoberts has won his way magnificently towards his captaincy in the mightily marshalled army of finance. Captaincy, did we write? Samuel McRoberts is more than a captain of finance. He is generalissimo. He is the man who can think in seven figures.

When He Won His Spurs

It was in a time as like the present hour almost as can be that Samuel McRoberts revealed himself as peer of the powers that be in American and world-finance on the seven-figure scale and beyond. It was when the Prussian hordes were battering their bloody way over the plains of Picardy full of high hopes that they would soon be knocking imperiously at the gates of Paris. By the time the Kaiser's hosts had been halted at the Marne, and Generalissimo Joffre was just holding them there, the hour for Generalissimo Samuel McRoberts had almost arrived. There was a call for silver bullets for France—for sorely-tried, desperately-attacked France. The forces of finance were being rallied. The days of the "seven figure" men were dawning. James B. Morrow tells about it in *The Nation's Business*. The story instantly involves the outstanding personality of Samuel McRoberts, then vice-president and executive manager of the National City Bank of New York, whose deposits at the last report amounted to the nine figure total of $723,000,000. Samuel McRoberts, you see, was already a seven-figure man and more. But he was on the way to the business of thinking in seven figures as a matter of every day occurrence.

The National City Bank of New York was approached for a loan on behalf of France. It was the first call for silver bullets from America. As the French themselves say with inimitable brevity—"It is but the first step that counts." On Samuel McRoberts and another mighty financier fell the task of making the first step financially on a seven figure scale in favor of France. This is how it was done:

"What France asks," said Frank A. Vanderlip, president of the bank, "is impossible—but we are going to get it."

"And he did it," testifies the friend of France—Maurice Leon, the New York lawyer, who had approached the banks for the loan.

That very day in their office, Vanderlip, once of Illinois, and Samuel McRoberts, vice-president and executive manager, formerly of Missouri, sat at a table and worked out the details of the loan together. Farm boys not long before, plowing for corn and planting it, cultivating it, and cutting it, shocking and husking it, and then reporters in Chicago, they helped to turn the Prussians back and to save Paris from defilement.

The Hour and the Man

Since then the silver bullet battalions have mustered thicker, thicker, thicker. They wear no seven league boots, and it takes a generalissimo who can think in seven figures to keep pace with time. Washington soon became aware of the fact.

"I want some one," a high military officer said, "who can think in seven figures."

"Then send for Samuel McRoberts," recommended a hearer at his elbow.

The man who can "think in seven figures" came to Washington. There were military reasons for giving him a commission. And so there is an eagle on each of his shoulders and he is Colonel McRoberts and no longer Mister. Nor is there a more military looking soldier in the army, regular or national.

Six feet, or an inch less, in stature, straight, slender and trim as a poplar, his clipped hair almost white, he would fit the infantry or the artillery and on horseback, were he cut in granite or poured in bronze, could be a dashing model for the cavalry.

The Gladness of Success

"The world has been good to me," he says out of his cheerful, brown eyes, and by his manner. Success is proclaimed in his face; success in money and in all other adventures. The countenance is either a flag of defeat or a banner of victory. Let dour-visaged persons take notice.

Undoubtedly Samuel McRoberts would have made his mark in politics. Naturally, he is personally attractive. Naturally, I say, because many politicians and some others strive to be attractive by force or art and make a botch of it. There is no more pathetic sight in the world than an empty and dreary man engaged in the task of trying to have himself loved by the electorate.

He Comes From Missouri

Young Samuel McRoberts, out near Malta Bend, in Missouri, which village now contains about 400 inhabitants, was probably drawn more toward politics than he is willing to admit offhand and at present. He did confess to Mr. Morrow that the characters he admired were public—Governors and Senators. Their histories he read in the newspapers and all of them were lawyers.

The McRoberts family originated in Scotland and, taking a century or longer for their journey, arrived in Missouri by way of Virginia and Ohio. They were farmers and men of doctrine.

"There were some characteristics of my family," the Colonel said, "that I never understood until I travelled in Scotland."

The reader of intelligence and imagination need be told no more than just to see the McRoberts household and the McRoberts farm out in the rich bottom lands of the Missouri.

Started With "Very Little Money"

When Samuel McRoberts left the district school and entered Baker University, at Baldwin, Kansas, he meant to study law and talk himself into the legislature and afterwards into Congress.

Graduated at Baldwin, financed by his father, he took the law course at Ann Arbor. Then what? he was asked.

'I got on the cars, intending to return to Missouri," he answered. "Plans I had none, or, if I had, they have passed from my recollection. And very little money. That is the reason I stopped in Chicago. I would look around, I thought, get temporary employment and continue my journey.

Eight Months For $5.00 a Week

"At Ann Arbor I had done some local work for city newspapers. The World's Fair opened a way for me to write advertisements and articles of news and description. But I was a lawyer and never meant to be a reporter. At last I found a place in a law office and worked eight months for $5 a week. Then I bought a desk and a chair and went into practice for myself."

(Continued on page 42.)

NEW HARDWARE GOODS

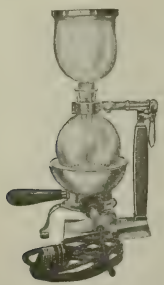
OFFERED TO CANADIAN HARDWAREMEN

NEW SILVERWARE DISPLAY CASE

The Oneida Community, Limited, Niagara Falls, Ont., have recently put out a new counter or window display case for their Par Plate silverware in attractive green leatherette. The case is capable of holding one and one-half dozen teaspoons, one dozen dessert forks, one butter knife, one-half dozen dessert spoons, one dozen dessert knives, one sugar shell. The case is designed as an effective selling counter display. It is claimed for it that it is a salesman and a stock clerk all in one. The case is furnished in four different patterns and is being distributed through the various wholesale houses. One of the most practical features is the method of showing prices for the goods in each compartment of the case. Prices are quoted on spoons, forks, knives, etc., each as well as in sets of six.

GLASS COFFEE FILTER

The Silex Company, 45 High Street, Boston, Mass., is placing on the market a new model, No. 20 pouring electric coffee filter. It is claimed for this device that it makes perfect coffee since it is filtered—not boiled or percolated. It is asserted the filtration insures flavor without putting the tannin into the coffee. One of the points claimed in its favor is the quickness with which coffee can be made, namely, in three minutes. It uses pulverized coffe, and it is claimed saves nearly one-half the coffee ordinarily used. It is made entirely of glass and is therefore claimed to be sanitary and healthful.



No. 20 Electric Coffee Filter

STANLEY WINDOW DISPLAY

The Stanley garage hardware window display cutout proved to be so successful last year, especially from the point of view of the builders' hardware dealers who used it, that the Stanley Works, New Britain, Conn., have gotten up a new display for the coming season.

It is handsomely lithographed in nine colors on heavy cardboard. As it stands

Stanley Garage Hardware Display

up in a dealer's window it will be 36 inches high and 50 inches wide. As can be seen from the accompanying illustration this cutout is composed of three parts, a centre panel to which are hinged two side panels.

The new Stanley garage hardware cutout was made only after a careful study of suggestions which were received from customers who used last year's display.

The display illustrates the application of Stanley garage hinges No. 1457—10 and 24-inch, Stanley garage door holder No. 1774, Stanley garage door latch, No.

Standard Bicycle Horn

1264, Stanley garage door pull No. 1266, Stanley chain bolt No. 1055—10-inch and Stanley foot bolt No. 1056—10 inches. These items taken together comprise Stanley Garage Hardware Set "D."

This display will be distributed in time for dealers to set it up in their window during the first week of May. It will be sent on written request only to builders' hardware dealers who carry in stock the items illustrated on the display or who order them between now and the end of April.

FIRELESS COOKER

The Royal Fireless Cooker, 124 Montcalm Street, Hull, Que., is placing on the market their "Royal Fireless Cooker." This cooker is encased in solid oak or steel, and it is claimed for it by the manufacturers that it is practically indestructible. It is claimed for it that it roasts nicely and bakes cakes and bread to perfection. By its use it is asserted the gas bill is greatly reduced, that the kitchen does not get heated up, and that there are no objectionable cooking odors in the kitchen. The company is prepared to give full details respecting this cooker and also as to the dealer's proposition on request.

DISPLAY CARD FOR CARBORUNDUM

The Carborundum Company, Niagara Falls, N.Y., is sending out a new two-color display card which is designed to help push the sale of the Carborundum mounted kitchen knife stone. The card is about 14 inches high, is done in heavy cardboard, has an easel back and shows a photographic reproduction of a housewife using the stone. Across the lower centre of the card appears an actual sample of the stone. The card is sent free to dealers.

NEW BICYCLE HORN

The Standard Metal Manufacturing Company, Newark, N.J., is manufacturing the "Standard" bicycle horn. It is asserted by the manufacturers that the horn is identical with the larger size of hand-operated automobile horn except that it is considerably smaller. It is 4½ inches in length and weighs less than fourteen ounces. The manufacturers claim for it that it is strong and well built. It is supplied with a combination bracket fitting either the frame or handle bars.

CUT-OUT FOR FORD CARS

The Adamson Manufacturing Company of Hamilton, Ont., is placing before the trade a new cut-out, No. 100, suitable for use on Ford cars. It is claimed for this product that it is a high-grade, extra heavy, well machined cut-out. It is sold

Cut-out for Ford Cars

complete with pedal, cable, four nuts and bolts and the necessary clamps for attachment. Furthermore, it is asserted by the manufacturers that a perfect fit is assured by reason of the fact that every cut-out is carefully put together and inspected before leaving the factory.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THE scarcity of ingot tin grows more apparent every week and advices from some sources are to the effect that unless further supplies are available within the next couple of weeks production of some of their manufactured lines will automatically cease. Permits for shipments from England are not being granted freely and there is no indication that supplies there are equal to present needs. Cable advices indicate another advance of £5 in London market.

Spelter and lead are easier in tone and declines in each have been made, ½c per pound on spelter and ¼c on lead. Supplies are available in large quantities but the heavy war demand of the past year has been greatly curtailed although a larger movement of lead to Great Britain is now reported.

Linseed oil has registered a decline of 4c per gallon in some quarters. The seed market has undergone a considerable drop for the week but with the scarcity of supplies in the East and the uncertainty as to when further shipments of flax may be expected the tendency has largely been to maintain previous prices.

Turpentine has also gone 3c lower per gallon in some sources. The matter of transportation and the uncertainty as to when further shipments will reach destination are factors in upholding prices in others. The primary markets are firm and though little change over last week is apparent the undertone is comparatively strong.

Another change in cotton goods has been made and revised prices at considerably higher levels are now being quoted. The lines affected include cotton rope, sash cord, awning cord, clothes lines, seine twine and candlewick. Cotton rope is between 3c and 4c per pound and sash cord 3c per pound with other items proportionately higher.

A big advance has been registered in many lines of Joseph Rodgers & Sons' cutlery, new prices established ranging from 20 to 25 per cent. above former quotations. The lines affected include butcher knives, skinning knives, sticking knives, table cutlery, carvers in pairs and steels. Business generally is reported very good with booked orders on many lines now moving forward freely.

MONTREAL MARKETS

MONTREAL, April 18.—Changes for the week are more numerous, and these include sash weights, cotton rope, post hole spoons, socket firmer chisels, file brushes, clay picks, drive-well points, ball pein hammers, knife handle wrenches and sash cord. For the immediate present there is a lull in the trade for some lines, while for others a good trade is experienced. The demand for nails and other staples is expected to be good, and there are already evidences of this season being a reasonably good one. The one difficulty is that of getting stock. A few changes have been made in the price of ingot metals, prices being marked somewhat lower. Commercial and wiping solder are down to 44c per pound.

Chisels, File Brushes, Post Hole Spoons Up

Montreal.

WOOD CHISELS, POST HOLE SPOONS, ETC.—Among the week's advances are standard S.F. chisels, which are quoted at 60 per cent. off the list. The former discount was 62½ per cent. File brushes, which are in big demand now, have been advanced from $10 per dozen to $12.50. Post hole spoons in the 6-foot size are selling at $19.80 per dozen, and 8-foot at $22. The 10-foot are very scarce, and one firm has cancelled these for the present.

Clay Picks Again Up; Also Drive Well Points

Montreal.

CLAY PICKS, DRIVE-WELL POINTS. —Clay and rock picks have again been advanced, and these new prices apply. For 5-6 pound sizes, $11.80; 6-7, $12.60; 7-8, $13.50; 8-9, $14.30 per dozen. Drive-well point prices have also been revised, and the 1¼-inch, selling previously at $18, are now $20.50 per dozen, and the 1½-inch, with a former price of $30, are now $32.50 per dozen.

Sash Cord, Wrenches, Ball-Pein Hammers Up

Montreal.

SASH CORD, HAMMERS AND WRENCHES.—Sash cord is again advanced, and the prices are as follows:— No. 6, per lb., 72c; No. 7, 71c, and Nos. 8 to 12, 70c. This is up 3c per pound all around. Ball pein hammers of W. & B. make are selling now as follows:—Half-pound size, 87½c per lb.; ¾-lb., 62½c lb.; 1-lb., 50c lb., and over this 37½c lb. This is an advance of 2½c to 12½c per pound. Knife handle wrenches of the same make are up about 10 per cent.

Sash Weights, Mangles And Cotton Rope Up

Montreal.

SASH WEIGHTS, MANGLES, ROPE. —Mangles, for use in smoothing linen, are up in one or two sizes, and this is as much in one instance as 25 per cent. Cotton rope is again advanced, and the 3/16 inch size is quoted at 65c per pound, and the quarter and up at 64c. Sash weights are also somewhat higher, the sectional selling at $4.75 per cwt., and the solid at $3.40. Some of the prices on private brands of roofing also have been readjusted.

Stove Business Fair; Wares In Good Demand

Montreal.

STOVES, ENAMELLED WARE, ETC. —Trading is fairly well maintained this week, and there is a firm market all around. Sales of stoves are not of large volume, but a fair sorting trade is being done. The makers seem to have ample material for their needs. For enamelled ware and galvanized goods a fair demand exists. There seems to be a more stringent position now with regard to the licenses for getting tin supplies over, but

in the meantime manufacturers appear to have what they need for the near future requirements of their trade.

Gasoline Sales Better; Lubricants To Go Up

Montreal.

GASOLINE, COAL OIL, ETC.—There is a better demand for gasoline this week and the sale has been increased through the greater use of cars. Prices have been maintained without change, both on gasoline and coal oil. There is a strong undertone in the lubricating oil markets, and there will probably be a revision of prices on various lines in the immediate future. This will perhaps approximate two or three cents a gallon. Royalite coal oil is selling at 19c per gallon; Palacine and Electroline at 22c, and motor gasoline 34c.

Rope Conditions Firm; Sales Rather Light

Montreal.

ROPE, CORDAGE.—Locally the situation is one of firmness for rope. There are no changes in conditions or quotations, business being rather light. There will undoubtedly be some activity from shipping interests in the near future, this being the usual condition around this season of the year. The situation in the States is unchanged, but a larger demand for hemp is evident. Prices here are as follows:—Pure Manila rope, base, 39c; British Manila, 33c; and sisal, 27½c per pound.

Lots Of Wire Nails Moving; Prices Held

Montreal.

WIRE AND NAILS.—That there must be a need for replenishing nail stocks is borne out in the considerable activity in the demand for this commodity. Many shipments are being sent out now, and with the opening of water routes in the next week or ten days the demand is expected to improve. Prices are maintained without change, wire nails selling on the base price of $5.25 per 100 pounds; cut nails, $5.60 per 100 pounds, and standard steel wire at $6.25 per 100 pounds.

Steel And Bar Iron In Fair Demand

Montreal.

BAR IRON AND STEEL.—Some little improvement is reported in the iron and steel market, although this is not great as yet. With the opening of the water routes soon it is stated that there will be a freer movement to outside points. The market is unchanged, and there is no difficulty reported in securing such supplies as are needed for the regular purposes of the trade, excepting in the case of odd sizes.

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs	4 80

Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Some Price Revisions On Black Sheets

Montreal.

SHEETS AND PLATES.—The volume of trade in black and galvanized sheets is without any decided change. Orders from the country are probably more in evidence than those from the city buyers. Some revisions have been made in the prices of black sheets, and there is less spread than was shown during the past few weeks. The ruling quotations on galvanized sheets hold without revision of any kind.

BLACK SHEETS—		100 lbs.
10 gauge	$8 00	$8 75

18 ga.	8 85
16 ga.	8 70

Lead Sheets Easier; Also Commercial Solder

Montreal.

SOLDER, LEAD PRODUCTS.—There have been a few adjustments in the prices of lead products. Sheets are a little easier, and the market is rather quiet. There is a fair amount of trade for lead bends and solder. The latter has changed for the commercial and wiping grades, and prices are reduced to 44c. This has been arrived at through the somewhat easier tone of the ingot lead market, and from the basing of the tin price on a slightly readjusted lower level. Otherwise the market is unchanged.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....

Old Material Markets Rule On Held Basis

Montreal.

OLD MATERIAL.—The markets are still without much stimulating feature. For iron scrap there is naturally more demand than for some of the other lines, and prices are fully held on the recent revisions. In a general way there ought soon to be a certain stir, but it is very difficult to say that this will be the case. One large dealer said that business would be better were ocean freight available to a greater extent. Prices rule without change as follows:

Tea lead	$ 0 05	$0 06½
Heavy lead pipe	0 06¼	0 06½
Yellow brass	0 13½	0 14
Red brass	0 22½	....

Bicycle tires	0 04¼	....
Auto tires	0 04½	0 05½
No. 2 busheling	13 00	14 00

Ingot Markets Quiet; Lead And Copper Easier

Montreal.

INGOT METALS.—The week has brought out little change with regard to the amount of trade. This is limited. Price revisions are made on lead and copper, which are a little easier. Tin is firm, with the outlook still uncertain, but sales are made at 95c.

COPPER.—Trading operations are light and the tendency is easier. More stock is available, and the price at which the same can be bought is reduced to 32c per pound.

TIN.—Even though the situation is still somewhat uncertain, the trading continues to be done on a light demand and limited stock at 95c to $1 per lb.

LEAD.—Not a great deal of demand. The price is somewhat lower and trading is being effected at 9c to 9½c per pound.

SPELTER.—As in other items of the list trading is light; 9½c is quoted. The United States market is rather firmer under light deliveries.

ANTIMONY.—The easy tone of antimony in outside markets is reflected here, as quotations are made as low as 14c and up to 17c lb.

ALUMINUM.—With government prices set across the line, there is little change here. Sales are made from 55c to 60c lb.

TORONTO MARKETS

TORONTO, April 18—Price changes during the week have been on a somewhat smaller scale than usual, though featured again during the week are cotton goods, including rope, sash cord, clothes lines, awning cord and seine twine in which further high levels have been reached. Jute rope and packings are also higher during the week, the former going up 2c per pound and the latter lines as much as 4c per pound. A decline in oakum has been recorded during the week of from ½ to 2c per pound. Black sheets have declined in some quarters 25c per 100 pounds. Business in spring and summer lines is very good, shipments of screen wire cloth, poultry netting, harvest tools, etc., having been delivered to the jobbers and booked orders for these lines are now being prepared for shipment to the retailer.

Rodgers Cutlery Up 20-25 Per Cent.

Toronto.

RODGERS CUTLERY.—Odd shipments of English cutlery continue to reach Canadian markets and as each arrives the additional charges in handling, insurance, etc., usually mean an advance in the selling price. The latest prices issued on many lines of Joseph Rodgers & Sons' manufacture are at levels from 20 to 25 per cent. higher than those previously ruling. The position of English cutlery manufacturers is an extremely difficult one and they are experiencing all kinds of trouble in getting necessary supplies of steel to take care of their cutlery orders. This with the great increase in cost of production, added to ocean freight rates and insurance to Canada, is given as justification of new prices. The lines affected include butcher knives, table cutlery, carvers in pairs and steels. No change is made in pocket cutlery at the present time.

Cotton Goods Made Further Advances

Toronto.

COTTON GOODS.—Further advances have been made in quotations locally on cotton rope, sash cord, clothes lines, awning cord, seine twine and candlewick during the week. The markets to the South on cotton show some weakness during the past few days but manufacturers here intimate that prices named below do not represent to-day's market even yet. The present quotations mark new high levels for all items listed.

	Per lb.

CORRECTION ON SCOOP PRICES

In naming prices on scoops in last week's issue as provided for by the new lists and discounts issued by manufacturers last week, the net on Black Cat scoops was figured out on the basis of 1st grade instead of 4th grade. The lists and discounts throughout were correct and only net prices shown in panel incorrect. The net prices on Black Cat scoops as provided for by the new list and discounts are as follows: No. 2, $16.00; No. 4, $16.50; No. 6, $17.00; No. 8, $17.50; No. 10, $18.00 per dozen.

Lawn Rakes Higher; Babbitt Metals

Toronto.

WIRE LAWN RAKES, BABBITT METALS.—An advance in quotations applying on wire lawn rakes has been made during the week, 20 teeth now being quoted at $9.00 per dozen and 24 teeth at $9.75 per dozen.

Two lines of babbitt metals to undergo revision are given below. The strength of the tin market and scarcity of supplies generally may affect prices to an even greater extent at a little later period. Quotations on Harris Heavy Pressure Babbitt are being made at 35c per pound and on Magnolia at 37c per pound.

Jute Rope Up 2c; Packings Also Higher

Toronto.

JUTE ROPE, PACKINGS.—The base price on jute rope has recorded an advance during the week of 2c per pound, ⅝ in. diam. and larger now being quoted at 18c per pound, while bell rope ¼ and 5-16 in. diam. now goes to 19½c per pound. Prices on Italian rope have been withdrawn altogether and will only be given on application.

The upward tendency of packings is revealed in new quotations ranging from 1c to 4c higher per pound than formerly ruling. Fine jute yarn, tarred or untarred, is now 14c against old price of 12c per pound; coarse jute sewer, tarred or untarred, is up 1c at new price of 12c per pound; the other lines following are each 4c higher than previous quotations, hemp now selling at 34c; Italian No. 1 at 44c; Italian No. 2 at 36c; square braided at 38c per pound.

"The Doughty Scot—Over the Top".
—From *MacLean's Magazine*

Oakum Registers Decline; Waste Very Firm

Toronto.

WASTE, OAKUM.—The position of oakum has eased considerably during the week and indications are that the manufacturing end is in a much better position with respect to taking care of new business. The heavy rush of orders which has kept manufacturers and distributors busy during the past week shows signs of letting up somewhat and manufacturers are now accepting orders with an immediate shipping date. Quotations now being made are: American best, $21.00; clipper, spun, $21.00; clipper unspun, $19.50; plumbers', $8.00 per 100 pounds. English oakum is practically off the market owing to difficulty in procuring and there is no U. S. Navy being handled. Waste is in a very firm position at the present time and forecasts made last week in HARDWARE AND METAL as to a probable advance seem nearer fulfilment. In some quarters it was intimated that another week would see new prices at higher levels issued. The new prices will range from 1c to 1¾c per pound above present figures, which will be found in current market quotations.

Refined Oils Very Firm; Free Movement

Toronto.

OILS, GASOLINE.—The increase in crude supply prices has been an added factor in firming the position of refined oils, and whereas an advance in coal oil and gasoline occurred a couple of weeks ago, further advances may be found necessary. Business continues at a high point of activity, gasoline consumption showing a marked increase. The demand for coal oil remains good. Prices for the week are unchanged, Royalite and Palacine coal oil selling at 18c and 21c per gallon respectively and gasoline at 33c per gallon.

Good Demand For All Lines Stoves

Toronto.

STOVES, ENAMELWARE.—Business in stoves and ranges which has been somewhat quiet during the past couple of weeks shows increased activity, and great interest in summer trade is being manifested. Fall business is not yet being solicited. Summer lines of stoves, including coal oil, gasoline, gas and electric, are moving out in large quantities and indications are that a big sale will result as the season advances. Enamelware and tinware move out in

very good volume and prices have remained firm.

Wire Nails Firm; Very Good Sale

Toronto.

NAILS, WIRE.—The demand existing for nails would indicate that there must be considerable building going on and orders have been moving out in very good quantities. Prices are firmly maintained on the basis of $5.20 per 100 pounds for wire, while cut are unchanged at $5.65 per 100 pounds. There is not a very heavy movement of wire as yet although fencing wires show a somewhat increased activity. Smooth steel wire remains steady at a base price of $6.25 100 pounds.

Iron And Steel Steady; Good Demand Continues

Toronto.

IRON AND STEEL.—Prices on all lines of iron and steel remain firm at figures shown below. The volume of business being handled continues at a very good figure and reports as to the number and size of orders going forward are proving satisfactory. No scarcity has been admitted although stocks are by no means heavy.

TORONTO—		Per 100 lbs.

Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Corrugated Sheets Firm; Eavetrough Steady

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—Greater interest is manifest edin corrugated sheets during the week, indicating some revival in building operations. The demand is by no means heavy but manufacturers state orders are being received in larger number. The same conditions may be said to apply to eavetrough and conductor pipe which would indicate that the opening up of real spring weather has proved beneficial to these lines. Prices on corrugated sheets are unchanged as shown below and eavetrough and conductor pipe have been firmly held at figures shown in current market quotations.

Discount 7½%.

Black Sheets Register Decline Of 25c

Toronto.

SHEETS, PLATES.—A decline of 25c per 100 pounds in black sheets has been recorded in some quarters, this serving to narrow the range somewhat. Increased receipts are reported and stocks generally are now in fair shape. Galvanized sheets remain unchanged for the week. A good demand exists and orders are going forward in very fair quantities. Stocks are equal to present demands. Prices now ruling on both black and galvanized sheets are as follows:

BLACK SHEETS—		Per 100 lbs.
10 gauge	....	$9 50
12 gauge	$7 55	9 60

Wrot. Iron Pipe Moving Freely; Boiler Tubes

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—The movement of wrought iron pipe is reported good in some quarters. Manufacturers state they are experiencing great difficulty in getting through sufficient supplies of raw materials to maintain operations at a high enough point to take care of the demand. Stocks at present are in fair condition though by no means heavy. Prices remain firm at figures shown in current market quotations. Boiler tubes are in an uninteresting position at present. Stocks are practically exhausted and little demand exists. The time when further supplies may be expected is not far off. Quotations are as follows:

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00

3½ inch	77 00	60 00
4 inch	90 00	75 00

Solder Holds Firm; Movement Good

Toronto.

LEAD AND ZINC PRODUCTS.—The position of solder remains extremely firm and a marked scarcity of tin is developing in some quarters which may mean the closing down of some plants unless further supplies are available. Other sources indicate that tin stocks are still very fair and anticipate no immediate cessation of manufacturing activities. Manufactured lead products show little movement as yet, and whereas the lead market at primary points is somewhat easier no change in the manufactured article has been made.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....

Old Materials In Unsettled State

Toronto.

OLD MATERIALS.—The position of old materials generally is one of uncertainty, and little action in either buying or selling is being taken by dealers. The atttitude is more one of sitting back to await developments rather than going ahead on a basis which may prove absolutely futile. The future cannot be determined and conjectures are not even hazarded. Scrap metals, however, seem to show some activity and advances have been made in some lines. Car wheel scrap at $30.00 is $5.00 higher, and No. 1 machine scrap at $30.00 is also $5.00 up over previous quotations. There is an indication on the part of dealers in scrap metals to buy and business is reported fairly brisk.

Cordage Business Light; Prices Steady

Toronto.

TWINE, CORDAGE.—Cordage business generally is still at a comparatively low level, little movement being apparent in either twine or rope. The basis of pure Manila rope remains unchanged at 39c per pound, British Manila 33c per pound; sisal, 27½c per pound; binder twine at 23½c per pound, 500 ft basis, remains unchanged. Some orders are being shipped out.

Cement, Plaster Of Paris, Roofing Hold Firm

Toronto.

CEMENT, PLASTER OF PARIS, ROOFING.—The outlook in regard to cement is little different from that prevailing last week. Some orders are being shipped, but the volume of business has not yet assumed large proportions. Supplies of plaster of Paris have reached the city and orders which have been held up awaiting arrival of shipments are being completed. Prices have remained firm and unchanged. Roofing business is increasing, orders coming to hand providing for a fair movement of this commodity. Present quotations are being held firmly.

Spelter Very Weak; Lead Lower; Tin Scarce

Toronto.

INGOT METALS.—Weakness marks the position of spelter during the week

and further declines have been registered. Lead is also in easier tone. Production which was greatly accelerated to take care of war demands is now more than equal to the lessened demand existing, which explains the present weakness in both of the above metals. Tin remains scarce locally and there is no indication that were permits available for shipments from Great Britain that supplies would meet requirements.

COPPER.—The effort, backed by strong interests in United States, that is now being made to increase copper prices after June 1 is being watched by the Canadian trade, although local dealers are inclined to think that the present government price will stand. The price locally remains at 30c-31c per pound.

TIN.—No improvement has been noted in the tin situation whatever. Stocks are reaching a very low level locally and reports from England indicate supplies there are light. Cable advices state that another advance of £5 has been made in prices in the Old Country but efforts are being made by large dealers here to keep prices down. Nominal quotations range from 95c to $1.00 per pound on the local market.

SPELTER.—A decidedly weak tone is noticeable in respect to spelter. A further decline of ½c has been made, prices now ranging from 8¾c to 9c per pound. Supplies are available in practically any quantity desired.

LEAD.—The market is somewhat easier again during the week, prices now being named at 8¾c to 9¼c per pound. The demand has shown a falling off from the large war business that has been handled, although advices from the States are to the effect that exports to England are in somewhat better volume.

ANTIMONY.—Dullness continues to mark the situation in respect to this metal. Little trading is being done and prices have held unchanged, showing a range of from 16c to 18c per pound.

ALUMINUM. — Government orders continue to absorb practically all surplus offerings of this metal for airplane construction, and commercial transactions are within a pretty narrow scope. The range of prices locally is wide, 50c to 60c per pound being asked.

PIG IRON.—The scarcity of pig iron in Canada has not been relieved to the extent it had been hoped would prevail, nor is there anything in sight that would lead to the belief that better things are likely to come to pass in the immediate future. It is said the trade is turning to scrap in larger quantities, and as a result there is a brisk trade in this line of metals. Foundry iron remains unchanged at $49.50 per ton.

LONDON MARKETS

LONDON, April 18.—Cotton goods are again to the fore this week with revisions in a wide range of lines, sash cord, cotton rope, seine twine, clothes lines, awning cord and candle wick all being advanced in price. Fibre wash tubs and wood wash tubs are higher, and bamboo fish poles are also at new levels. Electric fans and carpet beaters have also followed the upward trend. Business in London and surrounding district continues good. Garden tools and supplies are having a good sale. Auto accessories, bicycles, coaster wagons, roller skates, fishing tackle, etc., are in good demand. Collections continue good.

Fibre And Wood Wash Tubs Advance

London.

FIBRE, WOOD WASH TUBS.—New prices have been named on fibre and wood wash tubs at considerably higher levels than those formerly ruling. All lines of woodenware are under difficulties as regards supplies and production, and manufacturing costs have increased so rapidly that it is intimated new prices are more than justified. Quotations now being made are:

Fibre Wash Tubs—No. 0, $20.70; No 1, $17.25; No. 2, $14.75; No. 3, $12.75 per dozen.

Wood Wash Tubs—No. 0, $19.80; No. 1, $17.60; No. 2, $15.40; No. 3, $13.20 per dozen.

Lines Of Cotton Goods Go Higher

London.

COTTON GOODS.—Further advances have been recorded in manufactured cotton products, following a period of activity in the cotton market at primary points, which has kept gradually advancing prices. New high levels have been established, and a record decline recorded during the past few days; but the decline has been largely overcome, so the tenor of the market may be gauged to some extent. Lines to be affected are: sash cord, cotton rope, candle wick, seine twine, clothes lines, awning cord and bag twine. Prices now established follow:

Sash Cord—No. 6, 72c lb.; No. 7, 71c; Nos. 8 to 12, 70c.

Cotton Rope — 3-16 in., 69c lb.; ¼ in. and larger, 68c.

Candlewick—69c lb.

Seine Twine—18 and larger in 1 lbs., 81c lb., 18 and larger in ¼ lbs., 82c; 15 and smaller in 1 lbs., 82c; 15 and smaller in ¼ lbs., 83c.

Cotton Bag Twine—78c lb.

Twisted Cotton Clothes Lines—30 ft., $2.50 doz.; 48 ft., $3.65; 60 ft., $4.60.

Braided Cotton Clothes Lines—50 ft., $4.25 doz.

Braided Awning Cord—No. 3, $1.85 doz.; No. 3½, $2.10; No. 4, $3.30; No. 4½, $4.50.

Carpet Beaters Higher; Sweepers Moving Freely

London.

CARPET BEATERS, SWEEPERS.—New prices have been named on carpet beaters, which represent advances over former quotations. Quotations now being made are: For No. 1, single loop, 80c dozen; No. 143, double loop, $1.35 dozen.

An active demand is manifest for carpet sweepers and vacuum sweepers during the past few days. Prices remain unchanged as follows:—Carpet sweepers—Grand Rapids, japanned, $32; N.P., $36; Universal, japanned, $30; N.P., $34; Princess, N.P., $37; Parlor Queen, N.P., $42 per dozen.

Vacuum Sweepers—Household, $67; Grand Rapids, $81; Superba, $96 per doz.

Fish Poles Higher; Electric Fans Up

London.

FISH POLES, ELECTRIC FANS.—Higher prices have again been named on bamboo fish poles, the difficulty in securing supplies from Japan, along with an increase in freight rates, being offered as reasons. Present quotations for 12-ft. are $1.15 dozen; 14-ft., $1.30 dozen; 16-ft., $1.65 dozen.

Electric fans have registered an advance in price, the Polar Cub, model C x 6-inch, now being quoted at $6.25 each, and in lots of 12, $5.95 each. Business in these is showing some improvement, and is expected to reach a splendid volume during the next few months.

Nails, Screen Wire, Netting Firm; Fair Movement

London.

NAILS, SCREEN WIRE, NETTING.—The demand for wire nails shows some improvement, indicating increased activity in respect to building, which will be greatly welcomed. Prices have remained firm and unchanged; wire at $5.20 base and cut at $5.70 base per 100 pounds.

Orders for screen wire cloth are going forward in very good numbers, and prices show no variation from new levels recently established, viz.:—Painted black, 100-ft. rolls, $3.50 per 100 sq. ft.; 50-ft., $3.55; bronze, 14c sq. ft.

Poultry netting orders are being prepared for shipment, and will be moving forward freely in another week or two. Canadian hexagon remains at 15 per cent. discount.

Rope Is Firm; Lawn Hose Steady

London.

ROPE, LAWN HOSE.—Little of interest marks the situation in rope during the week. Booked orders have been largely shipped out, and the demand now existing is rather limited. Prices are firm and unchanged for pure Manila, 39c base per pound; British Manila, 33c; New Zealand hemp, 33c; sisal, 27½c.

Some improvement is soon expected to become apparent in the movement of lawn hose, which at present is rather limited. Prices are steady as follows for the corrugated; ½ in., 15¾c; ⅝ in., 18¾c; ¾ in., 21½c; 1 in., 31½c per ft. Less 5 per cent. in full reels of 500 ft.

Oil Stoves Selling Freely; Hand Cultivators, Too

London.

OIL STOVES, HAND CULTIVA-

TORS.—Two items at least, the use of which has had governmental sanction, are going forward to the retail trade in good quantities, which indicates a good, prospective consuming demand. Oil stoves are enjoying a splendid sale and indications point to a big business during the next few months. Prices remain steady, the New Perfection being quoted at $12.75 each for the 2-burner, $16.50 for the 3-burner, $21 for the 4-burner.

That the garden plots are to be numerous would seem evident from the heavy demand for all gardening tools. Hand cultivators are moving out freely, prices remaining firm as follows:—Buco, 5-prg., $11.25; Pull Easy, $18; Pull Easy Junior, $7.20 per dozen.

Linseed Oil Unchanged; Turpentine Steady

LINSEED OIL, TURPENTINE.—Prices on linseed oil have been firmly held locally during the week. Supplies are limited and with little movement of seed reported, the tendency has been to maintain the present basis although the seed market itself shows some tendency to decline. Prices locally are as follows:

	Raw, per gal.	Boiled, per gal.
1 to 2 barrels	$2 00	$2 03
3 to 5 barrels	1 99	2 02
6 to 9 barrels	1 97	2 00

Less than barrels, add 10c gal.

Turpentine remains firm in primary markets and the same situation is reflected here, no change in quotations given herewith being apparent:

	Imp. gal.
1 barrel lots	67c.
2 to 4 barrel lots	66c
5 gal.	77c

White Lead, Putty, Glass Unchanged, Uninteresting

WHITE LEAD, PUTTY, GLASS.—There has been no marked change in the situations in respect to white lead in oil, putty or glass. Some slight improvement in demand is reported but not sufficient to make any appreciable difference as yet. Prices are unchanged as follows:

White Lead in Oil (no change)—Pure, $16.20 per 100 lbs in ton lots; $16.55 less. Pure Elephant, $16.70; less, $17.05.

Glass—Single diamond, 25%; double diamond, 25½; cut lights, 10%.

Putty—Standard, 25, 50, 100-lb. drums, $5.40 per 100 lbs. Pure, 25, 50, 100-lb. drums, $7.40.

WINNIPEG MARKETS

WINNIPEG, April 18.—Numerous changes are recorded this week on heavy goods and include advances in clay picks, mattocks, grub hoes, crow bars and horse shoes. Declines in bar iron, galvanized iron, mild steel and band steel are provided for in new quotations issued. Among the general lines to advance are shown window screen cloth, cotton rope, harvest tool handles, rope clips and thimbles, flue cleaners, sad irons, stove polish, carriage heaters and batteries, while a reduction has been registered in annealed and tinners' wire.

Business for the week has again been very heavy and shows signs of continuing for some time.

Annealed And Tinners' Wire Register Decline

Winnipeg.

ANNEALED TINNERS' WIRE.—Prices on annealed wire and tinners' wire show a slight reduction over former prices which have remained very firm for some time past. Prices now ruling are as follows:

Annealed wire—9 ga., $6.75; 10 ga., $6.80; 11 ga., $6.85; 12 ga., $6.95; 14 ga., $7.15; 15 ga., $7.25; 16 ga., $7.40 per 100 pounds.

Bright tinners' wire—0-9 ga., $6.95; 10 ga., $7.00; 11 ga., $7.05; 12 ga., $7.15; 13 ga., $7.25; 14 ga., $7.35; 15 ga., $7.45; 16 ga., $7.60 per 100 pounds.

Bale ties and galvanized wire show no change over former quotations.

Screen Wire Cloth Goes Higher

Winnipeg.

SCREEN WIRE CLOTH.—New price list just to hand covering window screen cloth shows an advance over last year's quotations of 50c per 100 sq. feet. The price now ruling is $3.50 per 100 sq. feet. The demand for screen cloth continues good while stocks in general are only fair as factory shipments are very uncertain.

Handled Axes Higher; Harvest Tool Handles Up

Winnipeg.

HANDLED AXES, HARVEST TOOL HANDLES.—Due to the embargoes on hickory billets and scarcity of labor all axe handles have shown heavy advances, causing manufacturers of axes to advance handled axes $2.00 per doz. for No. 1 handles and $1.50 per doz. for No. 2 handles. Prices for unhandled axes remain unchanged. Harvest tool handles are also affected by the scarcity of hickory and to-day's selling price F.O.B. Winnipeg is 20% off list. Net prices on a few of the regular lines are herewith quoted:

Hay fork handles—4 ft., $3.25; 4½ ft., $3.60; 5 ft., $4.15; 5½ ft., $4.65 dozen.

Manure fork handles—4 ft., $3.85 doz.

Manure fork handles—D Top, $6.55 doz.

Straw fork handles—4½ ft., $4.15; 5 ft., $4.70 dozen.

For strapped and capped add $2.50 dozen to above prices.

Picks, Mattocks, Grub Hoes, Crow Bars Advance

Winnipeg.

PICKS, MATTOCKS, GRUB HOES, CROW BARS.—New prices just issued by manufacturers show revisions on clay picks, grub hoes, mattocks and crow bars and represent a general advance of about 10 per cent. The following are to-day's ruling prices:

Clay and rock picks—5-6 lbs., $11.35; 6-7 lbs., $12.25; 7-8 lbs., $13.00 dozen.

Long cutter mattocks—5½ lbs., $12.60 dozen.

Grub hoes—3½ lbs., $9.90 dozen.

Crow bars, chisel point or wedge point —$10.25 per 100 pounds.

Horseshoes Up 10c; Iron And Steel Decline

Winnipeg.

HORSE SHOES, IRON AND STEEL.—Horse shoes have moved up in price, the advance, however, being very small, totalling only 10c per 100 lbs., making to-day's quotations read as follows:

Iron, No. 1, $7.35; No. 2 and larger, $7.10 per 100 lbs.

Snowshoes, No. 0-1, $2.60; No. 2 and larger, $7.25 per 100 lbs.

Steel, No. 0-1, $7.80; No. 2 and larger, $7.55 per 100 lbs.

Featherweight, $8.95 per 100 lbs.

After remaining firm for some time, bar iron, mild steel and band steel this week show declines and are quoted to-day at figures given herewith:

Bar iron, $5.25 base; mild steel, $5.75 base; band steel, $5.75 base, per 100 lbs.

Galvanized Sheets Decline Another 30c

Winnipeg.

GALVANIZED SHEETS—The market on galvanized sheets has taken a further drop of approximately 30c per 100 pounds though new prices just established are expected to hold firm for some time. To-day's market prices are given herewith:

10¾ oz., $10.90; 28 ga., $10.60; 26 ga., $10.30; 24 ga., $10.15; 22 ga., $10.15; 20 ga., $10.00; 18 ga., $10.00; 16 ga., $9.85 per 100 pounds.

Cotton Rope Up; Dry Batteries Go Higher

Winnipeg.

COTTON ROPE, DRY BATTERIES—As predicted in a recent issue of HARDWARE AND METAL a further advance on cotton products was to be expected. This is shown in new prices which have just become effective on cotton rope. To-day's quotations are:

3-16 in., 66c lb.; ¼ in. and over, 65c lb.

Owing to continued increases in the costs of chemicals, zinc and other products, new advanced prices have been found necessary covering North Star Batteries. To-day's prices are given below:

No. 6, barrel lots of 125—$33.75; boxes of 50—$34.75; lots 12 to 50—$37.75; less than 12—$40.00 per 100.

No. 8, barrel lots of 50—$87.50; boxes of 25—$89.50; lots 12 to 25—$92.50; less than 12—$100.00 per 100.

Clips, Thimbles Advance; Flue Cleaners, Too

Winnipeg.

CLIPS, THIMBLES, FLUE CLEANERS.—Higher manufacturing costs have

again forced up prices on wire rope clips and thimbles. New prices just issued show an increase of approximately 10 per cent., as follows:

Wire Rope Clips—¼ in., $8.00; ⅜ in., $10,00; ½ in., $14.00; ⅝ in., $17.00; ¾ in., $22.00; ⅞ in., $28.00; 1 in., $32.00 per 100.

Wire Rope Thimbles—¼ in., $10; ⅜ in., $12; ½ in., $15.00; ⅝ in., $18.00; ¾ in., $22.00; ⅞, in., $25.00; 1 in., $28.00 per 100.

Prices on Favorite and Elliptic flue cleaners have undergone revision due to increasing costs, and new prices now effective are quoted herewith:

Elliptic—1½ in., $1.35; 1¾ in., $1.35; 2 in., $1.35; 2¼ in., $1.70; 2½ in., $1.70; 3 in., $2.00 each.

Favorite—1½ in., $1.10; 1¾ in., $1.10; 2 in., $1.10; 2¼ in., $1.35; 2½ in., $1.35; 3 in., $1.60 each.

Carriage Heaters Advance; Decline In Coal

Winnipeg.

CARRIAGE HEATERS, COAL.—Advice has just been received from the manufacturers of Clark's carriage heaters and coal of a further advance on heaters and a reduction in the price of coal. The reduction on coal is made possible owing to the fact that they have discontinued the manufacture of ABC brand coal, thereby increasing the output of Clark's coal and at the same time lowering manufacturing costs. Bookings are now being accepted for fall shipment at the following prices:

Heaters—No. 3D, $2.45; No. 5B, $2.15; No. 7C, $2.45; No. 7D, $2.70 each.

Clark's coal—80c doz.

Potts' Sad Irons, Stove Polish Go Higher

Winnipeg.

SAD IRONS, STOVE POLISH—Prices on Mrs. Potts' sad irons continue on the upward trend, this being the third advance by manufacturers during the past few months. To-day's prices, however, are expected to hold firm for some time. Ruling prices to-day are as follows:

No. 55, polished, $1.95 set; No. 50, nickel-plated, $2.05 set.

Prices on Black Knight stove polish and Nonsuch stove polish which are established by the manufacturers show further increases in quotations just issued. Present prices are $1.20 doz. and $1.50 doz. respectively.

Linseed Oil Firm; Turps Unchanged

Winnipeg.

LINSEED OIL, TURPENTINE. — Linseed oil continues firm although flax seed has shown a slight decline in price. To-day's quotations read $2.00 gal. for raw and $2.03 gal. for boiled. The usual spring demand exists.

No change is recorded on turpentine which remains firm at the following prices: Barrels, 80c gal.; ½ barrels, 83c gal.; 5 gal. lots, 85c gal.; 1 gal. lots, 85c gal., plus the usual extras for containers.

PITTSBURG MARKETS

PITTSBURGH, Pa., April 18.—The American Iron and Steel Institute reports that twenty-nine steel companies, which in 1916 made 88.14 per cent. of the total output of steel ingots, produced 3,110,381 tons in March, against 2,273,741 tons in February and 2,203,845 tons in January. Allowing for production by companies not reporting, and taking account of the number of working days, it appears that during March the industry was producing steel ingots at the rate of about 42,000,000 tons a year, against rates of about 33,500,000 tons in February and 28,500,000 tons in January. The March rate corresponds with the average rate of 1917. Production in March was nevertheless at less than 90 per cent. of capacity, which is at least 47,000,000 tons, some estimates placing the capacity as high as 50,000,000 tons.

Production of finished rolled steel is about 75 per cent. of the ingot production, the difference being scrap produced in rolling, which goes into the openhearth furnace and is weighed again as ingots, and mill scale, which is charged to the blast furnace and comes out as pig iron.

Thus the output of finished rolled steel in March was about 2,600,000 gross tons. The shipments were materially larger, probably between 2,700,000 and 2,800,000 tons, as on account of better car supplies the mills were able to move a considerable part of the steel accumulated in yards and warehouses during January and February. If the mills operated at capacity, and it is a distinct possibility that eventually they will be able to do so, they would produce about 3,000,000 tons a month.

War and Commercial Requirements

The importance of these figures lies in the comparisons they make with war requirements, as stated in some cases specifically and in other cases only very loosely. As to shell steel, the minimum estimate for the second half of the year has been 2,500,000 tons for the United States and 500,000 tons for its Allies, the maximum estimates running a million tons more. The estimate for the United States includes, of course, the steel that will be produced here and shipped to Canadian shell factories to fill orders of the United States. Thus there is in prospect about 300,000 tons of shell steel a month. When the shipbuilding program reaches the stage of producing 500,000 tons deadweight a month, the March launchings having been somewhat less than half of this, about 250,000 tons of steel will be involved. If steel deliveries for the 100,000 freight cars it is now contemplated to let are delivered over a period of five or six months, it will represent 200,000 tons a month, this including plates, bars, rivets, axles and everything in the steel line involved.

The three items mentioned will probably involve 750,000 gross tons of rolled steel a month. There are many other items, but all will involve individually relatively small tonnages, and the total, whatever it may be, is to be viewed in the light of the fact that production in March was about 2,600,000 tons, while capacity is about 3,000,000 tons. It seems quite obvious that there will be a large tonnage of steel left for ordinary consumptive requirements, after all war requirements, direct and indirect, have been met. Nevertheless statements continue to be made that the war will absorb practically all the steel. Washington dispatches would indicate that this is the view of Government officials, but perhaps it is a case not of its being their opinion but of its being their policy thus to regard the matter, in the interest of safety, for it is much better to assume that the war will take all the steel, and then if there really is a surplus, let somebody have it. The effect upon the market, however, is to make consumers indisposed to formulate plans for the consumption of steel.

Plates and Shipbuilding

The reason that some of the shipyards have found themselves not fully supplied with plates, considering the tonnage that has been produced, is that some of the shipyards have not in the past made their requirements fully known, and plates have been improperly distributed. The War Industries Board understands this fully and has been taking steps to force the shipyards to specify precisely what they need, and not to overspecify. Some of the plate mills long ago recognized that the system of distribution of specifications was faulty, and that they were being left largely in the dark as to which sizes of plates were most urgently needed. Accordingly some of them have had men travelling about the shipyards taking stock in detail of plates on hand, so that shipments could be made to bring all stocks to the same level. Other plate mills did not do this. Furthermore, it is probable that some of the present difficulty arises from a misunderstanding between the mills and the yards, the mills feeling that close connection could and should be made between receipts of plates and consumption, whereas the yards claim they need large stocks of every size. However, unfortunate the condition may be, the mills are strenuously engaged in rectifying it, and are now working on the programme of stocking up every yard with a supply equal to 30 to 60 days' consumption of every size involved. This is to be accomplished within a few weeks. Meanwhile plates are scarcer, for other requirements, than they will be later.

Shell Steel for Canada

Various and conflicting statements are made as to the amount of shell steel that is to be shipped to Canadian shell factories having shell orders from the United States. In addition to whatever movement there is now, and was planned against shell steel orders placed some

(Continued on page 56.)

WEEKLY PAINT DEPARTMENT

Enlist the Women in "Paint Up" Idea

They Are the Ones Who Naturally Start the Clean-up Campaign Around Their Own Home—They Also Make First Move For Interior Painting—Their Good Offices Are Invaluable to Help Along Exterior Painting

THE women of the household are the easiest to approach and to enlist their sympathies in the annual spring clean-up and paint-up. They have lived in their homes more closely than have the men, for the men have been at busines during the day. But the women have been in their homes from morning till night, day in and day out. They get tired of seeing the same walls without any change whatever. They like to get the interior of their homes looking spick and span after the accumulations of the year or the winter months. Furthermore, it is as good as a mental bath to have the interior of their homes made clean and new looking in appearance. Every woman owes it to herself and to her family to see that her mental outlook is brightened by this touch of interior rejuvenation each spring. She will feel happier in mind and more contented in spirit when the interior of her home has been made bright with a fresh coat of paint. She deserves to have this from the head of the household if he would keep his wife happy in her outlook and cheerful in all her home activities. The happiness of the home depends largely on the mental attitude of those who dwell therein. That mental attitude is influenced in large measure by the surroundings which the housewife has to enjoy.

SHOULD ENCOURAGE WOMEN

The hardwareman who is looking after the best interests of his trade will not fail to encourage this interior decoration of homes. He should not be slow in making an energetic campaign for the interior paint-up, for perhaps he may have a finer understanding of the real benefits than even the dwellers in the homes themselves. The hardwareman who is convinced of the very tangible result to be obtained in any household through the keeping of the interiors bright and cheerful should consider himself a missionary to spread this propaganda. He will do a good work for his community in that greater contentment will thereby be brought into the homes. It will benefit him in no inconsiderable way in that his paint sales should be greatly increased.

The women of a household naturally turn to the spring cleaning idea so far as scrubbing interiors and cleaning windows. They usually see to it that the accumulated rubbish in the cellars is cleaned out. They are the first to make a move to have the back yard cleaned up. While they are in a mood for cleaning, the hardwareman can further the sale of his paints if he will but spend a little time in interesting the women in the interior painting and decoration of their homes.

THEN EXTERIOR PAINTING COMES

Once the interior of the home has been made more livable and likable through the cleaning and painting, it is but along the line of logical development to get the householder himself to see that the exterior of his home is provided with a coat of paint. The woman of the household will be a silent ally in this work from the standpoint of the looks of her home. But the men can be appealed to through the more practical argument of conservation and protection. But the arguments of the women in inducing their husbands to undertake this exterior painting cannot be over-estimated. When the hardwareman has had a chance to sell some cleaning materials and perhaps painting materials to the housewife for interior use in her household he has an opportunity to talk the advantages of exterior painting as well. This will undoubtedly get to the husband later and start a train of thought that may lead to action in the way of exterior painting. It usually costs more to paint the exterior of a home, and it is an expenditure that the householder usually concerns himself with. The women of a household can give valuable aid to the hardwaremen in getting the men folks interested. The opportunity should not be lost.

He'll do a good job with that Brush

The good effect of the paint you sell is often nullified by the poor brush with which the paint is laid. With Boeckh's Steel Grip Rubber Set Brushes the veriest amateur can do a good job.

Boeckh's Brushes **have selected bristles of unusual elasticity and resiliency** that are held firmly and can't come out; brushes are perfectly chiseled, and the paint goes on evenly, giving a good-wearing, satisfactory job.

You can make sure that the paint you sell is going to get full chance to make good by selling Boeckh's Brushes to your paint customers.

The Boeckh Bros. Company, Ltd.
TORONTO

"The Bristles can't come out"

He gets First-Class Results with Moore's House Colors

The pride your customer will take in a painting job on which he has used Moore's House Colors is one of the results which make these good paints so profitable to the Dealer. When he can get a real "First-Class" effect with Moore's it's certain he is not going to take a chance and switch to some other brand on his next painting job. He'll stick to "Moore's for good reasons, and he'll stick to you for Moore's."

Benjamin Moore & Co., Limited
West Toronto, Canada

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, April 18.—In a general way the paint markets hold without definite changes for the week. There is a very decided inclination to higher prices for mixed paint and white lead in oil is also ruling with a firm undertone. From several sources it seems evident that increasing costs to manufacturers may make a readjustment of prices necessary in the immediate future. There is some activity here and there indicating that outdoor painting operations are already under way. The oil markets still rule strong and deliveries of seed are about as they were reported last week. Putty is firm. The demand for insecticides is good and there will probably be a sufficient supply to meet the season's needs. A heavy demand for these is expected.

Oil Holds Firmly With Strong Undertone

Montreal.

LINSEED OIL.—With the situation as strong as a week ago oil holds its position firmly. Prices are somewhat changed in accordance with the seed quotations from day to day but the prices in a general sense are just as firm as ever. It is hoped that the opening of lake and rail routes in the course of ten days or so may serve to ease the shortage by permitting freer delivery of seed. As matters now stand there is not a great deal of improvement in receipts of flax.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.82-$1.86	$1.84½-$1.88½

Turpentine Easy On Recent Declines

Montreal.

TURPENTINE.—The situation is still an easy one and the interest shown in buying without much stimulating feature as yet. The weather conditions seem to have made a certain stir toward outdoor painting and this will mean that more turpentine will soon be asked for from the city and country trade. When this condition obtains it is just a question as to whether prices may not advance again somewhat. At this writing the outside markets are stronger and this is an immediate result of greater activity among buyers.

Turpentine—	Per Imp. gallon	
1 to 4 barerls	$0 57	$0 60
5 bbls. and over	0 55	0 56
Small quantities		

Very Good Sales Of Standard Putty

Montreal.

PUTTY.—The putty trade is very good, all things considered. Prices are maintained without change and these are firmly held. The usual spring activity will soon be evident and with it a fairly large call for putty comes. Standard putty in the various quantities and containers is selling at the prices following:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Signs Of Activity In Outside Painting

Montreal.

MIXED PAINTS, ETC.—There is still some stir among the paint makers in dispatching spring orders. Some retailers have put off their buying until late dates and in addition to this there is a certain amount of demand for sorting stock. In a few cases even the express routes have been used to make speedy shipments, showing that the goods were to be used for immediate purposes. It is thought that this weather will have a stimulating effect on sales through the country. Prices are fully maintained and there is every indication that the market will see an advance at any time. Manufacturers' costs have so increased that the present margin is said to be inadequate to yield a fair profit on many lines.

White Lead In Oil Has Firm Undertone

Montreal.

WHITE LEAD IN OIL.—The market has held without change during the week. Maintained high prices for oil and container costs make the undertone a strong one and from some sources it was indicated that an advance would not be altogether surprising. Five-ton lots of standard are selling on the basis of $15.50 per cwt.; ton lots at $16, and less quantities $16.35 per 100 lbs. Trade is fairly well maintained.

TORONTO

TORONTO, April 18.—Declines in prices applying on linseed oil and turpentine have been made in some quarters during the week. With the scarcity prevailing on oil and the uncertainty of when further supplies will be available, other sources have maintained prices on basis ruling last week. The question of transportation enters into the situation in regard to turpentine largely and the matter of supplies must depend on the despatch with which orders from the south come forward. The demand for ready-mixed paint is in splendid volume, repeat business coming along nicely, which would indicate an aggressive selling campaign on the part of retailers. White lead in oil and putty have held firm with light demand being experienced.

Spread In Linseed Oil Widens; Down 4c

Toronto.

LINSEED OIL.—Declines of 4c per gallon have been registered in some quarters in the price of linseed oil. The seed market in Winnipeg for the week shows a decline of about 10c per gallon for flax, cash prices on No. 1 N.W.C. on Wednesday of last week being $3.89 per bushel and on Wednesday of present week $3.78⅞c. Receipts of seed are not yet reported heavy and generally speaking a scarcity of oil is still evident. What the future may be when lake transportation opens is not yet certain, but hopes are expressed that seed will come forward in greater quantities. Prices have been held firmly by some at last week's figures which means a wider range in quotations now being made.

	Raw, Imp.gal.	Boiled, Imp. gal.
1 to 2 bbls.	$1.84-$2.00	$1.86½-$2.03
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Declines 3c; Receipts Light

Toronto.

TURPENTINE.—Prices have declined 3c gallon over low quotations of last week, which provides for a wider range in values, as in many sources last week's figures have been maintained. The primary market continues firm on about same basis established a few days ago but the matter of supplies as far as Canada is concerned is said to be re-

THE ONLY PAINT FOR YOU TO SELL
IS
THE RIGHT PAINT TO PAINT RIGHT

A. RAMSAY & SON COMPANY

Makers of Paints and Varnishes since 1842

TORONTO MONTREAL VANCOUVER

If interested, tear out this page and keep with letters to be answered.

solving itself into a question of transportation. Buyers intimate they are unable to get any assurance whatever as to when orders may be delivered and where, as stocks at the present time are in very fair shape, the outlook for future supplies contains just an element of uncertainty. Quotations now range as follows:

	Imp. Gal.
1 barrel	$0.59-$0.67
2 to 4 barrels	0 58- 0 66
5 gallon lots	0 66- 0 77

Fair Movement In White Lead In Oil

Toronto.

WHITE LEAD IN OIL.—There is a fair movement apparent during the week and although by no means heavy, indicates some interest in this market. Supplies generally are more than ample to take care of demands. No change in prices has been made though quotations are being firmly maintained throughout. The market is very steady at quotations as follows: Pure, in ton lots, $16.20 per 100 pounds; smaller quantities, $16.55 per 100 pounds.

Mixed Paint Having Good Demand

Toronto.

MIXED PAINT.—Orders continue to come along in good numbers and the outlook for mixed paint business is very bright. Spring orders have all been shipped out and a splendid volume of repeat business is manifesting itself which is unusual at this time of year. The early break to fine weather has speeded up the demand and retailers are evidently taking advantage of opportunities to increase their trade. Manufacturers are greatly encouraged over the prospects and are bending every effort to keep sales moving along at a good figure.

Glass Stocks Lighter; Putty Of Little Interest

Toronto.

GLASS, PUTTY.—There is little movement of glass at the present time but every order means that stocks are that much lighter. Supplies are not coming through in sufficient quantities to warrant any too encouraging an outlook, but until a real shortage does prevail dealers are not looking down in the mouth. It has been known for some time that glass would be hard to get but everyone has worried through quite well so far and are hopeful for the future. Plate remains firm and unchanged. Putty is in light demand and there is very little of interest to report. Some slight improvement may be expected in demand in another two or three weeks' time but this is not the big season for sales. Prices have been firmly maintained during the week as follows: Standard bulk in casks is quoted at $4.55; 100 lb. drums at $5.30-$5.40; and bladders in bbls. $5.45-$5.65 per 100 pounds. Prices on pure putty range $2.00 per 100 pounds higher than above.

Shellacs Show Change; Hard To Get

Toronto.

SHELLACS.—The position to the south would indicate that all shellacs are scarce, the disposition now being to sell from sample goods to arrive. Supplies are coming by way of the Pacific just now which means delay in getting through promptly. The tendency in prices has been upward and quotations now range as follows: Gum shellac, T N, 74c-76c per pound; finest orange 79c-95c per pound; bone dry white, 82c-85c per pound.

PITTSBURG MARKET LETTER

(Continued from page 51.)

time ago, there is a fresh tonnage apparently, for it is stated an arrangement has been made whereby Canadian railroads withdraw enquiries for 285,000 tons of rails in the United States, these rails to be found in Canada, while the United States will make more shell steel for consumption in Canada.

The Markets

The markets continue extremely dull, as to pig iron, unfinished steel and finished steel. The greatly increased output of pig iron has not resulted in an easier situation, as the needs of consumers appear to have increased as rapidly as the production, and the output is going on old contracts. In unfinished steel there is more enquiry but no more offerings. One large steel interest has bought both ingots and billets in the open market and will buy more if offered. Finished steel shipments have been much heavier, but are readily absorbed. The Steel Corporation's unfilled obligations were 9,056,404 tons at the end of March, showing a decrease of 233,049 tons during the month. This decrease was equal to 18 per cent. of the capacity, and estimating shipments at 90 per cent. the bookings were about 72 per cent., or much more than in February and slightly more than in January. The bookings were chiefly of war material.

ALUMINUM, BRASS AND COPPER NOT INCLUDED IN EMBARGO

The War Trade Board authorizes the following:

Particular attention is directed to the fact that in accordance with the provisions of this Revised Export Conservation List individual export licenses will not be required on shipments to Canada and Newfoundland of the following commodities:

Aluminum and all articles containing aluminum.

Brass and all articles containing brass, excepting brass pipes, brass plates, brass sheets, brass tubes.

Copper and all articles containing copper excepting copper pipes, copper plates, copper sheets, copper tubes, copper sulphate, chemical compounds of copper.

Nickel and all articles containing nickel, excepting chemical compounds thereof and nickel alloys, articles manufactured of rubber.

CATALOGUES and BOOKLETS

Booklet for Bicycle Merchant

The United Cycle Trade Directorate, 377 Broadway, New York, has issued the first of a series of booklets for the use of the bicycle merchant entitled "The One Hundred Per Cent. Bicycle Merchant." This is the first of a series to deal with accounting, window display, advertising, special sales plans, racing, association. Copies of this booklet can be obtained from above association on request.

Catalogue of Automobile Supplies

Wood, Alexander & James, wholesale hardware dealers, Hamilton, have just issued their third annual catalogue on automobile supplies. The catalogue comprises eighty large-sized pages and shows a very complete line of accessories, including tires, accelerators, anti-rattlers, cut-outs, enamels, gaskets, goggles, greases, lamps, bumpers, jacks, mirrors, tire chains, and numerous other lines. The catalogue is well printed and illustrated. It is for distribution to the accessory trade.

Catalogue on Pipe Tools

The Greenfield Tap & Die Corporation, Greenfield, Mass., has issued a neat catalogue No. 38, showing the complete line of pipe tools made by the various divisions of the corporation. The catalogue is well illustrated and contains minute descriptions of various articles. The catalogue will be forwarded on request to the company.

Book on Advertising

"Making Advertising Pay," is the title of a new book published by Harold F. Eldridge, Columbia, S.C. The book is a compilation of methods and experience records drawn from many sources, with comment on the various phases of advertising by recognized authorities. Some of the headings under which the topic is treated are: "The Economic and Social Side of Advertising," "Advertising for the Wholesaler and Manufacturer," "How Successful Retailers Get Results from Advertising," "Analysis of the Psychological Task of Advertising."

Stock List on Brass Goods

The Tallman Brass & Metal Company, Hamilton, Ont., has issued a stock list for distribution to the trade of the various lines which they have ready for immediate shipment. The list is in neat booklet form, well illustrated and printed on calendered paper, with blue cover. The list of articles comprises brass and copper rod, Tobin bronze rod, phosphor bronze rod, brass and copper sheet, tubing, cast phosphor bronze, cored and solid bars. The booklet also contains a list of some of the other lines which they manufacture, such as machine screw parts, brass checks, pumps, electric fixtures, ferrules, plugs, solder wire, pig lead, etc.

U.S. IMPORTS NOT TO BE CUT OFF

"Late advices to THE FINANCIAL POST from Ottawa indicate that the recommendations of the War Trade Board for restricting imports from the United States into Canada will be held up indefinitely. There is strong opposition from certain members of the Cabinet, it is understood."

Above is a quotation from a brief article which appears on the first page of THE FINANCIAL POST of April 13th. Its importance to merchants and manufacturers in Canada makes this one of the outstanding articles in this week's issue. THE FINANCIAL POST has from the first followed closely every aspect of the exchange situation, and can be relied upon to give the first and most accurate news on this and other important matters affecting Canadian business.

LACK OF WHEAT MAY SHUT MILLS

In the same issue of THE FINANCIAL POST, on the front page also, appear two tremendously important articles. Under the heading "Lack of Wheat May Force Mills to Shut Down" the information is given that unless the Kansas crop can help out, Canadian mills may be idle for a considerable period this Summer for want of wheat. Side by side with this, however, appears the encouraging news that Canada is sowing three million acres of wheat more for 1918 than were sown for 1917 harvest. This is one of the articles contributed every week to THE FINANCIAL POST by the editor of "Farmers' Magazine." THE POST has the benefit of the specialized skill of the editors of twelve other business papers each with a distinct field of its own, in the MacLean Business Newspapers, and THE POST'S own editorial staff is expert and represented at strategic centres for securing all important business news.

BUSINESS NEWS OF THE WEEK

The following headings from this week's issue of THE POST indicate the scope of POST service, though not by any means representing the whole contents of THE POST—

Valuable London Utilities Wrecked.
Strong Protest Entered Against B.C. Legislation.
News of Securities—Markets Firm.
Government to Pay More for Fish.
New Shipbuilding Plant for Port Hope.
Great New Gun Works for States.
Big Decline in Exports to United States.
Bank Clearings Show Increase on "Short" Week.
Encouraging Farmers to Keep Books.
Price Fixing Will Not Attain Desired Ends.

To get the business benefit of the important articles in THE FINANCIAL POST each week just sign and send this coupon:

The MacLean Publishing Co.,
153 University Ave., Toronto.

Send me THE FINANCIAL POST each week till further ordered. I will send subscription price ($3.00 per year) on receipt of bill, or you may draw on me for this.

JAMIESON'S

Crown and Anchor Brand

PREPARED PAINTS

Ready for Use

Proving Their Selling Power

You have to show the buyers of your goods attractive values these days; War and high prices have taught the consumer many lessons in thrift.

The demand for JAMIESON'S PAINTS AND VARNISHES continues stronger than ever, proving that the consumer appreciates the GOOD VALUE found in these old and reliable products.

Quality and good value may attract a lot of paint business, but benefit the dealer only so far as bringing custom to his store. But with Jamieson's Paints and Varnishes the dealer is assured of good returns on every sale. When you write and get our dealer's proposition you'll be convinced that there is something unusually profitable handling this line.

If you are a JAMIESON dealer it will pay you to put our lines to the front, where they will be seen, then push them for the spring painting and varnishing. If you are not a dealer in our lines get in touch with us without delay.

In the Day of Thrift People Want Jamieson's Paints and Varnishes

Lucas

Imperial French Greens in Oil and Dry Colors Now Made in Canada

McArthur, Irwin, Limited, of Montreal, has secured the Canadian Rights to make Lucas Dry Colors and to grind Imperial French Greens in oil on the Lucas formulae, and are now manufacturing under the same conditions as obtain at the Lucas factories at Gibbsboro and Chicago.

The McArthur, Irwin, Limited, Dry Color Plant (formerly the Allan Munro Plant), has been entirely remodeled according to the Lucas plan, and the latest and most improved equipment has been added, making it the most modern Color Plant in the country.

The manufacturing is carried out in this plant in the most natural way, involving the least handling of products, freedom from contamination, together with every modern device for the safety and well being of the workmen.

The production is in charge of practical color chemist, who was with the Lucas Company for years. He is thoroughly familiar with the Lucas process of manufacture, which means the Lucas standard of high quality will be maintained.

A most important feature of the plant is the completely fitted laboratory devoted to the chemical control of the raw materials entering into the production of the colors, and the analytical work in connection with the matching and duplication of colors.

For over 60 years Lucas has been making Colors which have become world renowned for their brilliancy and purity of tone. This extensive experience, combined with McArthur, Irwin, Limited's, 75 years as manufacturers of paint in Canada, and such excellent facilities assure the users of paint, in Canada, the best that the market affords.

Established 1842

McARTHUR, IRWIN, LIMITED

MONTREAL

Lucas Imperial French Greens in oil and Lucas Dry Colors are sold by all paint and hardware jobbers.

WHY BUY THE STUDENTS COPIES WHEN THE ORIGINALS COST NO MORE?

TRADE SIMMS SET IN RUBBER MARK

BRUSHES are recognized as the **QUALITY STANDARD** by the brush trade in practically every quarter of the Globe, and the brush trade KNOW BRUSHES. If they are good enough to be copied and used as quality standards by the brush trade, should they not be good enough to satisfy the other fellow who knows good brushes, namely,

THE MAN WHO USES THEM?

We like comparison. Lay our brush, be it paint, varnish, shaving or any other, alongside the other make. If it is not better stocked, better rubberized, better ferruled, better finished, better nickelled, better cleaned, and in fact, A BETTER BRUSH in every way, why buy the other brush.

"BETTER BRUSHES"

This is Silkstone's Season'

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Spring is always a good selling time for Silkstone Flat Wall Colors, and this season should be even better than usual. Added to the appeal that Silkstone makes on the score of beautiful finish, cleanliness and ease of application, is the great appeal of economy. The public are willing to listen to economy reasons to-day, because they are waking to the necessity of saving. The great economical advantage that Silkstone holds over wall papers should be used to increase sales by all Stephen Paint Agents.

Urge the economy of Silkstone—and urge it at every opportunity.

If you would like to have all the advantages pertaining to a Stephen Paint Agency, write us to-day!

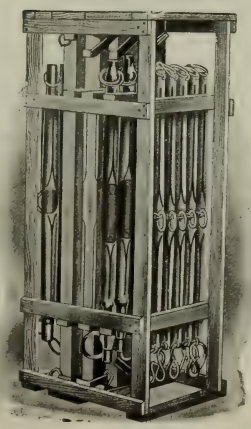
Protected by the Westwo Guarantee

Selling Westwo Painted Waggon, Implement and Plow Sets is satisfactory and profitable. They are made from selected No. 1 quality Oak and Hickory, are carefully painted (2 coats), striped and varnished, and are absolutely guaranteed against defects in material and workmanship.

The best way to order Westwo Painted Sets is in crates of six sets. Then you're sure of getting them in perfect condition. —no bruised woods—no marred finish.



Guarantee

All Westwo Sets are guaranteed, and any defective part will be replaced free.

Send to-day for the Westwo folder that describes the various Westwo lines.

SPRING BUSINESS

Your Painter Wants SWP

It Insures Perfect Results

Your Customer Wants SWP

It Always Produces Satisfaction

It's SWP

Be in a position to supply the demand for S.W.P. and S.W. products that is being created by our Spring national advertising.

Your customers are now talking the matter over, and your painters are looking for the business. Satisfy both by being able to supply them with S.W.P., the best paint to produce satisfactory results.

Your customers know that true conservation is not putting off painting and allowing their property to rot, but using paint and preserving their property from decay.

Paint must be used, and S.W.P. will be in demand. See that your shelves are well filled before this big demand is on.

CARTER'S

QUALITY THE BEST

Your customers will need Red Lead to protect the iron work around their homes.

The Painters want a Genuine Red Lead for their work. Are you prepared for this demand? If not, put in a good stock of

Carter's Genuine Dry Red Lead
and
Carter's Genuine Powdered Litharge

They are the best quality you can buy. Made in Canada from the best grade of Canadian Pig Lead.

Do you know the quality of these goods? Your customers know it and will insist on using Carter's Brands. Look over your requirements and order now.

Manufactured by
The Carter White Lead Company
of Canada Limited
91 Delorimier Ave. Montreal

Everybody will be Gardening this Spring

No. 21 Liberty Adjustable Cultivator-Weeder

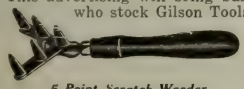
Patent Applied for

The High Cost of Living will combine this Spring with Government Back - Yard Garden Campaigns to make many new gardeners.

These inexperienced as well as the experienced tillers of the soil will be particularly pleased with the labor-saving features of Gilson Garden Tools and will buy them in preference to the ordinary kind. You will in particular sell many Liberty Adjustable Cultivator-Weeders because this double-efficiency tool is just the one to keep garden soil in perfect condition with the least labor.

If you want to carry the best line of efficiency garden tools ask your jobber about Gilson Tools. If he can't tell you, write us direct.

Through our advertising space in these publications readers of MacLean's Magazine and of Farmers' Magazine are learning why these tools are best. This advertising will bring business only to dealers who stock Gilson Tools. Stock quickly.



5 Point Scratch Weeder Patent Applied For.

Dougall's White Enamel never cracks or chips

A practically indestructible enamel retaining its original beauty indefinitely. Never marred by cracking or chipping off. It is the finish par excellence for indoors or outdoors.

A pure white but can be tinted to any color desired.

The information we can give you on White Enamel is very interesting. Shall we send it?

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

T-F Quality Spring Hinges

A Line that always makes good with the trade

Spring hinges will be in big demand as soon as the warm weather sets in. Now is the time to order from your jobber.

When you buy T-F Spring Hinges you are buying a line that will sell easily and give every satisfaction.

We take pride in producing a high quality article.

A Satisfied Customer the Best Advertisement

We are pleased to inform you that we are simply delighted with your CANADIAN GROCER.

It is certainly most interesting, and your market reports are about as reliable as they can be. In fact, we do not see how we could do without it now, and the best proof we can give you that we really appreciate your paper is in subscribing to another one of your trade papers, HARDWARE AND METAL, *which you will please send along with* CANADIAN GROCER.

P. PAUL & CO.,
Duncan Station, Que.

"I've Noticed this Pratt & Lambert Full-Page Advertisement in this Week's Saturday Evening Post, and I want some of their "61" Floor Varnish."

THERE are three classes of your customers who are influenced by Pratt & Lambert advertising. First is the type shown above. This scene has occurred in the stores of thousands of P&L dealers — so often in fact, that many dealers look on these cases alone as their share of the benefits derived from the national advertising of Pratt & Lambert Varnish Products, and are perfectly satisfied.

But this is only *one* of three types.

The second class is that very large class who read the advertising and ask for "61" Floor Varnish without mentioning the fact that their purchase is the result of the advertising — perhaps without even realizing themselves that such is the case.

But the third class is the largest of all — and one which you can cultivate enormously. These are the folks who come to you asking for "varnish," but smile in pleased recognition when you offer them "61" Floor Varnish.

All of the classes are reached by the big magazine advertising typified by the

FULL-PAGE PRATT & LAMBERT ADVERTISEMENTS IN THE SATURDAY EVENING POST ISSUES OF APRIL 27TH AND MAY 25TH

And this is not the end! The full-page spring campaign in the Post is not yet completed; big page advertisements in the American, Country Life and the others are still to appear; and when this series is over there'll be another huge campaign in the fall, followed by others, in the same steady, consistent fashion that has been characteristic of P&L advertising for the last *ten years*. The piled-up consumer influence of this decade in the limelight is waiting your call to shower its benefits on *your store* — on *YOU*.

Write today for the Pratt & Lambert Dealer Proposition.

PEERLESS PERFECTION

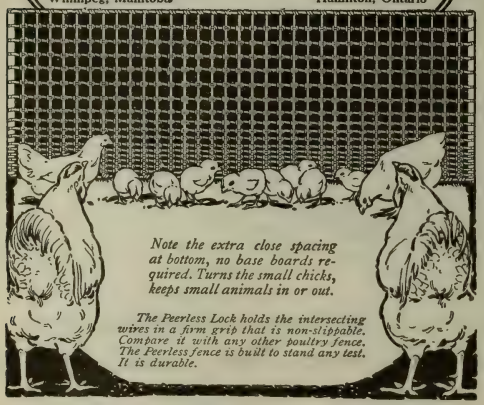
The fencing upon which you can **build a reputation** and hold the fence trade of your territory. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Write for Dealer's Proposition

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes.

THE BANWELL-HOXIE WIRE FENCE CO., Ltd.
Winnipeg, Manitoba Hamilton, Ontario



Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.

The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

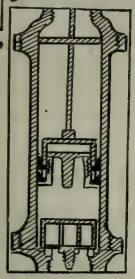
BT



BT

Ready-to-Ship Pumps, Pump Cylinders and Pump Leathers

BT PUMPS—Our "7 Pumps that take the place of 700" cover the field. They are low in price and high in quality because we specialize on our "7." They are easy to handle because they are Ready-to-ship, Ready-to-sell and practically Ready to install.

BT PUMP CYLINDERS— Here's another instance where BT concentration and specialization results in higher quality and better price. Where we once made over ten million styles we now make 67 and these 67 meet all demands perfectly.

BT PUMP LEATHERS—Made to give longer and better service than any other pump leathers. You can keep them in stock for years and they will not deteriorate.

Best way to learn of BT products and their selling features is to write for catalog.

BT

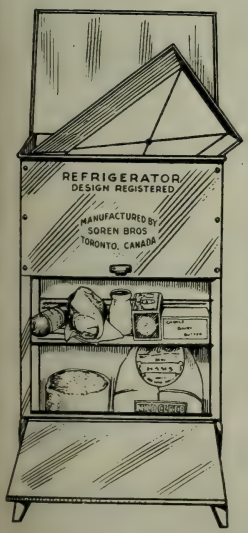
Order Without Delay

Raw materials are scarce and pump manufacturing may be affected. You should order now to be sure of deliveries in time for summer selling.

Beatty Bros., Limited, Fergus, Ont.

St. John, N.B., Montreal, Que., Winnipeg, Man., Edmonton, Alta.

This Little Food Conserver



should be on your floor right now. The Frost King All-Metal Refrigerator has just the size and price to appeal to the great number of "ordinary people" to whom a refrigerator will appear as a necessity this summer. Cheap, light, compact, attractive, strong, sanitary—the ideal food saver for the small home — big refrigerator service in small space. Get yours while you can.

Soren Bros. 545-7-9 King St. W. TORONTO

"White"

MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.

Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

"the ability of Gargoyle Mobiloils to bring new customers"

Read the following letter from a well known Canadian Hardware Dealer. It contains business-building facts for you.

"Regarding the sale of Gargoyle Mobiloils, we are pleased to say that we had splendid success in selling these oils in connection with our retail automobile accessories during the past year.

"We have been handling Gargoyle Mobiloils for twelve months and they have proved a valuable asset to our business. *The chief reason that we are so strong for Mobiloils is the Chart of Recommendations.* By having this hanging on the wall, we know that our clerks cannot make any mistake. They simply ask the motorist that desires oil, the make of his car and they are able to give him the proper lubricants, which makes a satisfied customer.

"To the hardware merchant we highly recommend Gargoyle Mobiloils not only from the standpoint of profits, but also from the ability of Gargoyle Mobiloils to bring new customers to his store.

"Under separate cover we have mailed you a photograph of a Gargoyle Mobiloils window displayed by us for two weeks. This window display was a complete success, not only increasing our sales of Mobiloils considerably, but we feel that it was also the means of increasing our sales of accessories, as the motorist, when buying oil, would frequently buy other things he needed.

"We are very glad that we followed the suggestion of your representative and added Gargoyle Mobiloils to our line, and cannot recommend them too highly to other dealers in the hardware and accessory business."

GARGOYLE Mobiloils
A grade for each type of motor

Write us at Room 704, Imperial Oil Building, Toronto, for new 64-page booklet, "Correct Lubrication," containing Charts of Recommendations for all makes of automobiles, tractors, motorcycles and motorboat engines, and for full information regarding our offer to dealers.

Genolite—The new lighting system for Ford Cars
Fyrfyters

Summer will begin with many more cars in the Dominion than there were a year ago.

This means that you must be prepared to supply an increased demand.

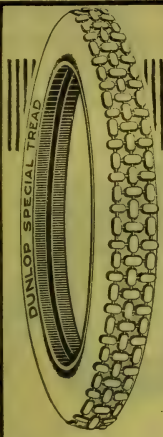
Fairbanks-Morse lines of automobile accessories have been selected on excellence. They will give good dealer profits.

Heavy stocks in seven warehouses all over the Dominion assure you prompt service.

The Canadian Fairbanks-Morse Co., Limited

"Canada's Departmental House for Mechanical Goods"

St. John, Quebec, Montreal, Ottawa, Toronto, Hamilton, Windsor, Winnipeg, Saskatoon, Calgary, Vancouver, Victoria



DUNLOP TIRES
SEAL OF QUALITY
AUTOMOBILE

Are You Seriously in the Tire-Selling Business?

Every tire dealer in every part of Canada will find food for thought in our next sentence:—

"No other rubber company in Canada can compare with Dunlop in length of auto tire manufacture or experience in co-operating with the dealer for successful tire-selling."

Our auto tire business alone to-day is greater than our total business in all lines two years ago. That surely indicates two things:—

That we have obtained a goodly measure of the new business, and **retained a goodly measure of the old.**

We need not point out to you that the automobile is now a mammoth industry; but it is important that you realize that the first automobile tires ever made in Canada were made by us. The auto tire to-day, with all its perfection, is the enlargement or outcome of our original patented bicycle tire.

Because we were successfully manufacturing bicycle tires and other rubber products when the automobile first came, we feel we have been in closer touch with every angle of the industry than any other tire-maker. All the more reason, we should think, why every dealer should know all about the Dunlop Line and the Dunlop Plans. Our men are competent to talk to you about tire-selling, and they'll be perfectly frank with you, too.

DUNLOP TIRE & RUBBER GOODS CO., LIMITED

HEAD OFFICE AND FACTORIES: TORONTO

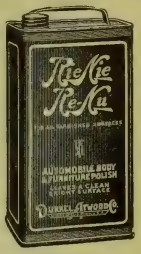
Branches: Victoria, Vancouver, Edmonton, Calgary, Saskatoon, Regina, Winnipeg, London, Hamilton, Toronto, Ottawa, Montreal, St. John, Halifax.

Makers of High-Grade Tires for Automobiles, Motor Trucks, Bicycles, Motorcyles and Carriages; and High-Grade Rubber Belting, Packing, Fire Hose and General Hose, Dredge Sleeves, Military Equipment, Mats, Tiling, Heels and Soles, Cements, Horse Shoe Pads and General Rubber Specialties.

Renovating Supplies *(The kind that every motorist will require)*

Rie Nie products are too well known to need demonstration; both Dealers and Car Owners have demonstrated their usefulness and reliability again and again. The articles here listed will be in great demand at this time. This is, therefore, just a reminder to put in your supplies now before our present stock is depleted. Many other lines equally useful will be found in our current catalogue.

"RE-NU" BODY POLISH



No. 7482

Requires very little rubbing. Leaves a clean, bright surface.

For cleaning and polishing all parts of an automobile, including the metal, woodwork and leather. Rie-Nie Re-Nu is made especially for the cleaning and polishing of those surfaces like Auto Bodies, where high-grade, sensitive varnishes were used. It removes the mud and water spots and puts new life into the finish, bringing out the beautiful lustre, and sets the varnish so it will not crack.

No. 7482—Price, Quart Can $0.90
(Mailing weight, 3 lbs.)

MOHAIR DRESSING AND WATERPROOFING

Gives Perfect Satisfaction

No. 7483

An excellent preparation that brings out the original Silky Mohair effect and water-proofs the material, in one application.

Rie-Nie Mohair Water-proofing is guaranteed not to stiffen the material or cause the mohair to crust or crack when folded. Any auto top made of mohair, duck or canvas can be re-finished very satisfactorily, and with little effort.

No. 7483—Price, Pint Can $1.00
(Mailing weight, 2 lbs.)

LINING TOP DYE

No. 7485

Rie-Nie Lining Top Dye is a blue black dye which will give to a faded or spotted top lining a clean and beautiful new appearance. One application with a sponge is sufficient and it is not necessary to remove the top to make this application. For use on Mohair or Pantasote Lining.

It spreads easily and evenly, and a small amount will cover a large area. This dye will not wash out or rub off when the top is wet, and will not fade.

No. 7485—Price, Pint Can $0.70
(Mailing weight, 2 lbs.)

RADIATOR COMPOUND

Every Motorist Should Be Prepared

Mends a Leak in an Automobile Radiator Quickly and Permanently

No. 7474

Just a tablespoonful to make a quick and permanent repair. Radiator Compound dissolves in the warm water in the Radiator and solidifies when passing through the leak to the air. It sets hard and solid, making a permanent mend in any part of the cooling system, including the water jackets. Repairs leaks satisfactorily in any hot water heating system.

No. 7474—Price, per Can $0.65
(Mailing weight, 7 oz.)

LEATHER DRESSING

Renews Top and Cushions. Renews Pantasote and Rubber Goods

No. 7486

A liquid Dressing which penetrates, softens, preserves and water-proofs auto cushions, tops and all pantasote leather and rubber goods, leaving a rich enamel finish, which is lasting; it does not form a crust and crack; sun, heat or dampness do not affect it. A few hours after application, cushions can be used safely, and the dressing will not rub off or discolor garments.

All car owners will find this the best preparation for their tops and leather upholstery.

No. 7486—Price, Pint Can $0.55
(Mailing weight, 2 lbs.)

IMPERIAL CARBON REMOVER

No. 7475

Engine "knocks," loss of power, heating up of motor and allied ailments can almost invariably be traced to excess carbon accumulated on tops of pistons. Imperial liquid carbon remover will soften the carbon and blow it out through the exhaust while the engine is in use. It is the most reliable and efficient carbon solvent on the market. It is also the most economical, as a much smaller quantity is required than with other preparations.

Full directions are printed on each can.

No. 7475—Price, per Tin $1.00
(Mailing weight, 2½ lbs.)

Why You Should Be A Michelin Dealer

No. 1

Michelin Is The World's Oldest Tire Maker

When you join forces with Michelin you are lining up with the world's oldest, most experienced tire organization.

No other tire maker has an equal record of sustained achievement—for it was Michelin who invented the pneumatic automobile casing and inner tube, the demountable rim, the valve spreader, the dual or twin wheel, besides many minor improvements.

To-day Michelin factories and factory branches are located in every country where cars are known.

The age, the scope and the proved soundness of Michelin's business make Michelin a good house to tie up to—as is evidenced by the fact that Michelin Dealers stick to Michelin year after year.

Write to-day for Michelin's dealer proposition.

Niagara Falls **Canada**

THE new Brake Inspection Movement has obtained the unqualified endorsement of motorists all over the country. Police Commissioners, Presidents of automobile clubs and other prominent officials and motorists have assisted in giving the movement the most widespread publicity.

The car owners in your vicinity are interested in this new movement for the periodical inspection of brakes on motor vehicles, because it means greater safety to themselves and to their cars. This interest can be turned into profit for you. Tie up your business with this movement. It offers a wonderful opportunity for you to obtain general overhauling jobs before the touring season opens. Don't let a motorist go past your window without reminding him of it, at least by a sign.

Scientific tests prove Thermoid superiority

When your customers come in for brake lining give them the best. Thermoid Brake Lining is superior to any other brake lining on the market for three reasons:

More material, greater service

1. There is 40% more material and 60% more labor used in the manufacture of Thermoid Hydraulic Compressed Brake Lining than in any woven brake lining. This abundance of material and labor means longer wear.

Grapnalized

2. Thermoid Hydraulic Compressed Brake Lining is Grapnalized, an exclusive process which resists moisture, oil and gasoline. Moisture causes brake lining to swell, making it grab or slip.

Hydraulic compressed, uniform throughout

3. Every square inch of Thermoid is hydraulic compressed at a pressure of 2000 pounds. Thermoid is uniform all the way through. It cannot compress in service. There are no soft spots to wear out quickly. It will give uniform service until worn cardboard-thin.

Endorsed by automobile manufacturers

The engineers of fifty-one leading car manufacturers, ten of the most prominent axle-makers, all leading jobbers and thousands of dealers have selected Thermoid Brake Lining because of its dependability.

We are co-operating with jobbers and dealers to make this season the biggest ever, not only in Thermoid Brake Lining but in all branches of their business.

Advertising campaign in your city

Our new book, "The Brake Inspection Movement and What it Means to Dealers" tells in detail how we have planned to advertise your store direct to the car owners of your city, over your name. It is jammed with interesting and profitable ideas for increasing your business.

If you have not received your copy of this book write for it to-day.

Our guarantee: Thermoid will make good or—WE WILL.

$\frac{V^2}{10.8}$ **Will your car do this?**

Automobile engineers have proven that when brake mechanism is right and road conditions average, any car should stop at distances and speeds given by the chart.

V^2 means the square of the velocity or speed of your car. 10.8 is the proven factor of retardation under average road conditions. This factor decreases on smooth slippery roads to 6.7 and increases as high as 17.4 on rough worn roads. The chart represents the average condition and other conditions can readily be figured by changing the factor within the given limits.

Remember that your brake mechanism is not "right" unless its brake lining has the ideal co-efficient of friction. The better the brake lining the quicker your stop.

Thermoid Brake Inspection Chart

At speed of	A car should stop in

Deliveries by Ford One-Ton Truck

THE commercial car is looked upon today as a necessity by progressive business firms who have hauling and delivering problems to consider.

Wholesale or retail merchants who must deliver quantities of merchandise have found the horse-drawn delivery to be too slow, expensive, and entirely inadequate.

The Ford truck, with a single driver, will do more work and cover more ground than two teams and two drivers, for it travels in half the time. This truck will reduce your hauling costs. It eliminates one driver's salary and the care which horses always require. It will make your delivery service more efficient. It will widen your area of distribution. It will be constantly ready for work—day or night. It will show a profit on your investment.

There has been a popular demand for a Ford truck as is shown by the many uses, for commercial purposes, to which our standard chassis has been put. Now, after most careful designing and exacting tests, we are able to offer the Ford One-Ton truck to meet this demand.

The Ford truck is supplied as a chassis only. This permits the purchaser to mount any one of the many body styles specially designed for the Ford truck, and already on the market, and he can select it to meet the individual needs of his business.

Price $750 f.o.b. Ford, Ont.

See any Ford Dealer in Canada, or write for a catalog

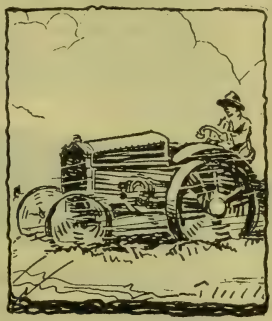
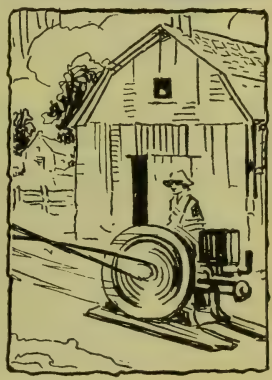
The Market for Champion





Dependable Spark Plugs is Big and Profitable

At the end of 1917 there were in Canada approximately 205,000 motor cars with a minimum of 6 spark plugs to a car—1,230,000 plugs.

125,000 farm engines with a minimum of 2 spark plugs to each engine—250,000 plugs.

14,000 tractors with a minimum of 6 spark plugs to a tractor—84,000 plugs.

70,000 motor boats with a minimum of 2 spark plugs to each engine—140,000 plugs.

These figures show a minimum total of 1,704,000 and the possibilities are growing by leaps and bounds. Motor car registrations alone increased more than 75 per cent. over the 1916 total.

The great, overwhelming majority of the spark plugs in these motors and engines were Champions.

When these plugs are replaced the call will be for Champions, because users have learned to know their absolute dependability for a completely satisfactory service under ordinary or emergency conditions.

Our promotion this year will make Champion sales volume greater and easier than ever and if you would capitalize this promotion to your own profit you should link up your store with our advertising by carrying an assortment of the Champion full line shown below and by using the advertising features that we supply to all Champion dealers.

Champions are guaranteed to give "Absolute satisfaction to the user, or free repair or replacement will be made."

Send in your order now to any jobber in auto supplies.

FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

You can sell the Garage Man and the Car Owner
THESE CARBORUNDUM PRODUCTS

Carborundum Valve Grinding Compound

A quick, clean-cutting compound that lightens the work of valve grinding—leaves a true, unscored valve seat—saves time—saves effort. It's a mixture of Carborundum—the hardest, sharpest, fastest cutting of all materials—with a high-grade grease.

Carborundum Compound Cuts

Put up in one- and five-pound tins and handy combination cans.

Aloxite Cloth

A clean-cutting cloth that cuts faster; lasts longer, does better work than the ordinary "emery" cloth. Coated with Aloxite—harder, sharper, tougher than emery.

Aloxite Cloth comes in fifty-yard Economy Rolls—six widths—any grit.

Carborundum Grinders

Handy, serviceable machines for grinding any of the edge tools of the garage.—Every machine fitted with genuine Carborundum wheel.

The No. 4 Niagara Grinder or the No. 28, grinder stand are for general garage work.

THE CARBORUNDUM COMPANY
NIAGARA FALLS, N. Y.

Zizz-z-z-z-z!

—the sound of Spark Plug efficiency. CHAMPION SPARK PLUGS deliver that vital spark whether you are travelling 10 miles or 75 miles an hour, to the greatest degree of accuracy; maximum efficiency at a minimum cost.

If you have never used CHAMPION SPARK PLUGS consult any CHAMPION ACCESSORY Dealer; he best knows the type of Plug most suitable for your Automobile, Motorcycle or Motor Boat.

CHAMPION SPARK PLUGS

For Maxwell Cars

A44, ⅞-18, price $1—For "Maxwell" cars. The Maxwell factory equipment plug. Has the well-known patented copper asbestos gasket construction which does not allow any metal to touch the shoulders of the porcelain.

For Studebaker Cars

AA13, ½-inch, A43, ⅞-18. Price $1.00. Recommended for: Studebaker, Allen, Auburn, Dort, Elgin, Grant, Jordan, Liberty, Mitchell, Paige-Detroit, Saxon, Spaulding, Stewart. And tractors, farm, stationary and marine engines where a standard ⅞-18 plug is used.

FOR FORD CARS

Champion "X"—Adopted by the Ford Motor Co. as standard equipment on Ford cars since 1911. A15, ½-inch, price $0.75.

The following is quoted from the instruction book in each Ford car: "There is nothing to be gained by experimenting with different makes of plugs. The make of plugs with which Ford engines are equipped when they leave the factory are best adapted to the requirements of our motor."

For McLaughlin-Buick Cars

A53, Lond, ⅞-18. Price $1.00. Has long shell, conical porcelain. The long shell allows the spark to ignite within the cylinder instead of in a pocket, as occurs when the ordinary type of plug is used.

For Overland Cars

J13 "O," ½-inch. Price $1.00. "Overland." The Overland factory equipment plug. Especially recommended to meet the requirements of the Overland motor. Also recommended for tractors, farm, stationary, marine engines and all automobiles where a standard ½-inch plug is used.

There's a CHAMPION for every make of car.

There's a CHAMPION for every make of car.

For Packard Cars

JA43, ⅞-18. Price $1.00. Recommended for use in: Packard, Pierce Arrow, Peerless, Mercer, Cadillac, Chalmers, Chandler, Marmon, Cole, Dorris, Haynes, Oldsmobile, Hudson, Kissel-Kar, Velie.

Champion Priming

H13, ½-inch, H43, ⅞-18, H63, Metric. Price $1.25. Champion priming. Will start any motor on the first quarter turn. Brings gasoline right to the sparking point. A good winter seller.

Insist that your dealer supply lines which we advertise, or write our nearest house for descriptive literature.

NUMBER THREE

IN the year 1853, Cyrus W. Field believed that by means of a cable people could talk across an ocean three thousand miles wide. For thirteen years he concentrated on perfecting his means of communication. He made fifty voyages across the Atlantic. Many of his cables broke in mid-ocean. In August, 1866, the first message was successfully transmitted from New York to England. This grand achievement was the result of a man with an idea concentrating on one thing. The story is one of the noblest records of American enterprise.

The secret of Cyrus W. Field's success was

CONCENTRATION

No man ever achieved a worth while victory by accident. Fine achievments are always the result of exhaustive experiments, hard work and concentration. One of the greatest men who ever lived, whose influence has lasted for centuries, took this for his motto: "This one thing I do."

Victor Hack Saws have achieved their position of dominance because we make nothing but hack saws. For many years we have concentrated all our energies and resources on perfecting this one tool. As a result, the Victor Hack Saw Blade is recognized by good mechanics and foremost technicians in all parts of the world as the most efficient hack saw for every metal-cutting purpose.

Who uses mixed metals in your town?

The wide variety of mixed metals made by the Hoyt Metal Co. gives you, Mr. Dealer, a big field for sales. Hoyt Metals should be in use by your local newspaper, the tinsmith, the plumber, the machine shop, the factory, the waterworks, the electric plant.

If you do not number all these among your mixed metal customers write and ask us to suggest a means of lining them up.

HOYT METAL CO., Toronto

NEW YORK, N.Y. LONDON, ENG. ST. LOUIS, MO.

Wanted

SITUATIONS VACANT

WANTED—FOR WHOLESALE HARDWARE—one experienced coat clerk, one experienced stock keeper, one experienced travelling salesman. State age, experience, salary expected and give refrences. Apply sales manager, Western Canada Agency, Limited, Lethbridge, Alberta.

HARDWARE CLERK WITH 2 OR 3 YEARS' experience for Toronto store. Box 402 Hardware and Metal.

WANTED—A HARDWAREMAN AT ONCE; three to five years' experience. With references. Apply to C. E. Hadden, Picton, Ontario.

WANTED—HIGH CLASS SALESMAN TO REpresent large paint manufacturing concern in Central Ontario. Must be a hustler and able to sell goods. Good prospects for right party. Box 777, Hardware and Metal.

WANTED—RELIABLE YOUNG MAN FOR retail hardware; 2 or 3 years' experience. Good chance for advancement. G. A. Binns, Newmarket, Ont.

WANTED BY WINNIPEG GLASS JOBBER—Man to learn the business with object of going on the road. Apply with full particulars as to former experience, if any, and what military classification. Apply Box 405, Hardware and Metal.

SITUATIONS WANTED

MARRIED MAN, AGE 32, WITH TWELVE years' hardware experience, desires position as manager or partner in a live business. Good references. Box 778, Hardware and Metal.

MISCELLANEOUS

WANTED — BY RELIABLE MANUFACturer's Agent, one good line selling to wholesale hardware trade. Address "Hardware," Box 1934, Montreal.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

For Quick Sales

Recently a hardware dealer in Western Canada became overstocked with shotguns. He placed a want ad. in Hardware & Metal. We learned eventually that he not only disposed of his stock, but received several orders that he could not fill. If this man had kept this stock away, it would not only have deteriorated in value, but he would have had to pay taxes, insurance, etc. on it. If you have anything on hand which you wish to dispose of quickly advertise it in our want column. The quick results will make the first cost negligible.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

FOR SALE

FOR SALE—FIRST CLASS STOCK OF HARDware, south-west Saskatchewan; A1 farming district; reasons for selling ill-health. Box No. 403 Hardware and Metal.

HARDWARE STOCK AND BUSINESS FOR sale in live town of 800. First-class farmers' trade. Hydro just coming in. Apply Box 860, Hardware and Metal.

FOR SALE — HARDWARE BUSINESS IN large Eastern Ontario city; stock about $8,000.00. Price right for quick sale. Box 861, Hardware and Metal.

FOR SALE—BUILDING AND HARDWARE stock in good live Saskatchewan village. Stock on hand about $6,000. Living rooms above. Good opportunity and terms for right man. Box 726, Hardware and Metal.

HARDWARE BUSINESS FOR SALE. STOCK about $25,000; right on the main street; buildings 25 x 120, two-story; owner retiring. Apply P.O. Box 275, Sudbury, Ont.

ANY ONE WISHING TO SECURE A GOOD tinsmith, stove and furnace business in best town in New Brunswick; a small outlay for spot cash. For particulars apply Box 399, Hardware and Metal.

TINKER TOM'S TALKS.

Talk Number One Hundred and Forty-Five

En route West Edmonton.

Saskatchewan and Alberta are fairly excited at the situation—more Fall plowing done—heavy snows to create moisture reserves—best prospects ever. They make hundreds of grain picklers from "PREMIER" GALVANIZED SHEETS, thus killing the "smut" germs and assuring a record yield. The Western Sheet Metal Workers are a wise bunch, believe me!

Look out for Talk No. 146 next week. TINKER TOM.

NO. 28 "WASHBURNE" SLIDING DOOR LATCH

Allows the door to open full width

The upper illustration shows a cross-section of door with the "Washburne" Latch attached. Notice that there are no projecting parts on the inside of the door. The pin by which latch is operated from the inside is flush with the door. This permits of the door being opened full width, there is nothing on the inside to catch.

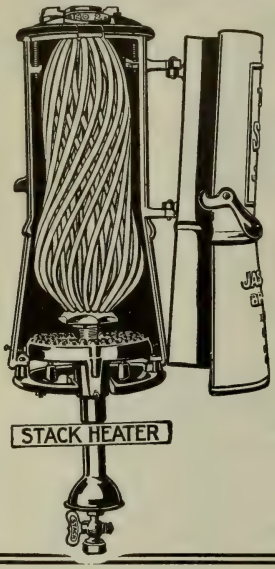
This latch is entirely of steel and is adapted for use on either right or left hand sliding doors. A new style of plate staple is used which permits placing the latch so that bar extends only ¾ inch beyond edge of door.

Envelope with screws is attached to each latch, and half-a-dozen packed in a box. Six dozen in a case, weight 10 lbs. per dozen.

NATIONAL MANUFACTURING COMPANY

STERLING, ILLINOIS

Your customer can readily understand

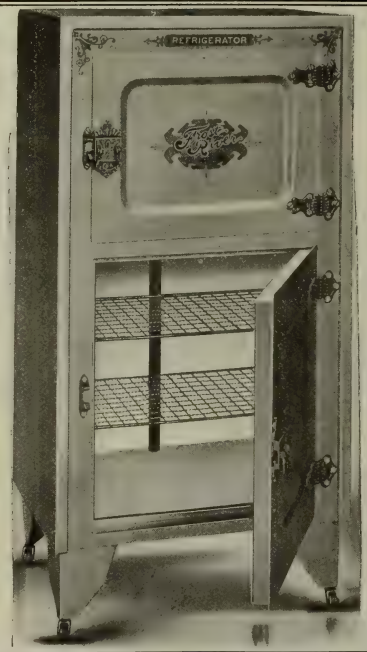


When you tell your customer that a Stack Heater will give him hot water one minute after the gas is lighted he will not hesitate to believe. He will at once grasp the possibilities of a heater having so much copper heating surface. He will readily understand that the number of small perpendicular columns will heat much more quickly than one large coil.

In selling the Stack Heater you have the great advantage of a device with real selling points that can be readily understood.

The James Morrison Brass Mfg. Co., Ltd.

93-97 Adelaide Street West - TORONTO



Davidson's Well Known FROST RIVER

Refrigerator shown herewith

Made entirely of Sheet Steel Galvanized

The exterior is Japanned French Grey, beautifully finished with neatly decorated panels and corner scrolls.

The Food Chamber is coated with white enamel, thoroughly hardened and baked on in an oven of high temperature.

All inside parts are removable for cleaning purposes.

The drip pipe for the waste water has been carried outside the body, and does not run through the Food Chamber—as usual in other refrigerators.

Made in three sizes, the largest with double doors.

NOW is the time to get your Orders in for these goods and ensure prompt shipment.

In This Armour Plant

Toncan Metal was used for outside metal work—Flashings, Door Coverings, Eaves Trough, Conductor Pipe, Roofing, etc., and it was also used for the pans and troughs in the interior.

The corrosive action of fumes from fertilizer manufacture and, in the case of the interior work, actual contact with corrosive influences made the use of anti-corrosive metal a necessity.

Users of sheet metal everywhere are realizing that the ***best way to meet modern corrosive conditions is to use modern anti-corrosive sheet metal.***

TONCAN METAL

has been fortified against all the causes of corrosion. It is dense, even, and nearly 100% pure iron. Careful annealing has removed all strains, and slow, careful manufacture, from beginning to end preserves its uniformity and high quality. No sheet metal, made from iron ore can be more durable or more economical.

Our book "Corrosion—The Cause---The Effect---The Remedy" is a veritable hand-book for dealers and workers in sheet metal. If you have not received your copy, send for it at once.

NOW THAT LABOUR COSTS ARE HIGH

Shop Superintedents are seeing to it that their men don't waste time and labour with inefficient tools.

They find it much cheaper to give a mechanic a new file than to have him waste time working with a file that has passed its "efficient point."

They find it pays to buy Standard quality tools because they give the best results for the longest period of time.

They recognize "Famous Five" as the standard quality files.

Consequently the dealer who sells "Famous Five" files gets their trade.

That's why you should specify "Famous Five" when ordering from your jobber.

They are:

AUTOMATIC SELLERS

NO effort required to move RELIABLE Colored Enameled Metal Tubular Searchlights. Just display them in your window. That's enough to make every passerby want one.

Now look the searchlight situation straight in the face. All fibre searchlight lines are pretty much alike as are the nickeled lines.

Here's a line of **Colored** searchlights — of METAL. Nothing else in the world like them. They're in a class by themselves as a line—absolutely alone and above everything else as sellers. They're a novelty—now—but it won't be long before they're staple. Here's why: In factories each man can have a special color for his searchlight; every member of the family has his own searchlight and knows it by color.

We want you to see these searchlights. So write for a line of samples. Then put them alongside the searchlights you now carry. Decide for yourself their selling qualities. Don't forget to write TO-DAY for samples and prices.

Get our prices on RELIABLE Searchlight Batteries and RELIABLE Dry Cells.

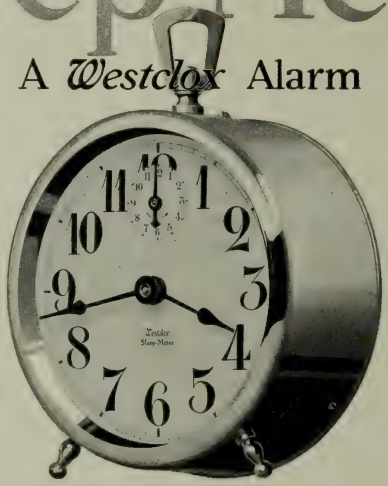
Sleep-Meter

A *Westclox* Alarm



To be Advertised

SLEEP-METER, a popular priced *Westclox* alarm, has made good in a big way without the aid of national advertising.

You know from your own experience in your own store how your customers have favored this sturdy, handsome, back-bell alarm.

Now Sleep-Meter is to be nationally advertised. The publicity will begin next month in a strong list of widely read national publications.

Sleep-Meter advertising is a part of the new 1918 publicity campaign of the Western Clock Co. which will benefit directly every clock in Big Ben's family.

You will naturally look forward to unusual results from Sleep-Meter advertising; a clock which went to the front so quickly *without advertising* will feel very definitely the impetus of strong national publicity.

Watch for this advertising in the April magazines. And be prepared to work hand in hand with it. It will benefit you in a very direct way.

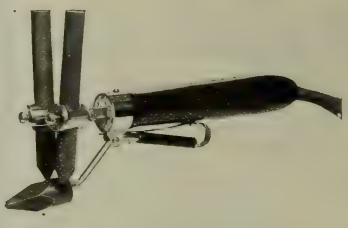
The New Electric Soldering Iron



A new Era of Economy and Efficiency in rapid and thorough Soldering has been opened with the advent of the J. C. Electric Soldering Irons.

The J. C. Electric Soldering Tools give instant, continuous conducted Heat, and give it faster than it can be taken away by the metal on which it is used.

Instantaneous Heat and Stay Hot.

Runs the Solder in 30 Seconds or less.

Save Time. Are saving from 40 per cent. to 70 per cent. time in plants where these Irons are in use.

Save Labor. Do not require skilled help.

Increase Production. Lessen the Cost.

They Can't Burn out, because there is Nothing to Burn out, and the only Maintenance Cost is for Carbons.

These are the Fastest, most Efficient, and most Economical Electric Soldering Irons on the Market.

Light in weight, Rugged in construction.

Easy to Manipulate. Low Cost of Operation.

Soft Roll Khaki Set No. 19

New Gillette Sets

for the Boys in Khaki

Ever since the beginning of the war the Gillette Safety Razor in civilian dress—has served our Canadian troops with distinction overseas. The Gillette "Standard," "Pocket Edition" and "Combination Sets" have played their parts so well that they have been mentioned in thousands of "dispatches," no less sincere because they are private and personal. They have made such a record that each and every American soldier is being equipped with a Safety Razor.

But some of our fighting men have never yet owned a Gillette—and others have lost the Gillette they had. For them we have designed the new and distinctly Military Sets here illustrated —two Khaki Sets and the handsome "Canadian Service Set."

Each of these Military Gillette Sets has its special advantages and selling points. No. 18 is particularly suited for officers' use. The soft roll principle adopted in No. 19 is a favorite with soldiers everywhere. No. 20 (ready for delivery May 25th) is the last word in sturdy, compact convenience.

Canadian Service Set No. 20

Combination Khaki Set No. 18

These Gillette Sets open up a new selling opportunity for you—and the Store Cards and Booklets we have sent you provide the means of taking advantage of it! Put a Gillette Military Window to work for more business! The Gillette is an essential in the equipment of every soldier.

Williams' Superior Drop-Forged Wrenches

Wrenches are not wrenches simply because they seem to be alike.

There are more "persnickety" things about drop-forged wrenches than a majority of men know.

Williams' ◇ product incorporates:

1. Chemically selected and physically tested steels.
2. Designs that stand for greatest utility; proper opening-angles, contact faces and balances.
3. Unsurpassed hardening—leaving tools tough but with hard wearing surfaces—cyanide hardening never resorted to.
4. Selections of classes covering widest range of standard openings in least number of wrenches. Get catalog and stop buying 10 wrenches when you need but "Six."
5. The greatest line of drop-forged wrenches ever offered. Anything in size and weight for bolts from 1/8 to 5" diameter. More than 40 different patterns and 1000 assorted sizes.

"AUTO-COP"

FORD LOCK

Without exception the most effective and most attractive lock ever produced.

PRICE $4.00

The "Auto-Cop" Sells on Sight

Without Fail Stops Theft, and Constantly Performs the Duties of a Policeman.

ALL SORTS OF LOCKS AND IMITATION LOCKS

for every movable part of a Ford car are being offered to the public, but few, if any, of these various devices give real security or satisfaction, and the use of some is very dangerous.

FORD DEALERS AND OWNERS

all over the country quickly endorse the "Auto-Cop." No other lock is so practical, none so easily operated, nor so readily accessible. The engine stops running and can not be started while the key is withdrawn. Every "Auto-Cop" is equipped with a small patented device that grounds the entire electrical system, making it absolutely impossible to start the car without the proper key, of which there are many patterns used with the "Auto-Cop."

DEA

Write or Wire for Our Lib counts to the Trade

No Ford lock ever produced offers the many attractive features, or gives the universal satisfaction to the owner. Many thousands of Ford cars are being annually stolen, every section of the country is suffering from organized gangs engaged in this business.

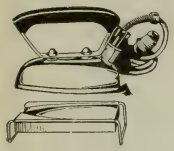
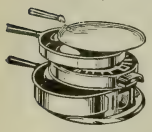
Here's the line you've been waiting for—made by men who have grown with the industry



"Now You've Hit It—"

That's a remark we frequently hear in introducing the "Premier" line of appliances. For the sterling goodness of "Premier" products needs no talk. The sturdiness, neat design, and superb finish are visible at a glance.

And behind the "Premier" line is an organization known throughout the trade as progressive. Already strong advertising campaigns are under way. Folders and window displays of a new, striking character are ready.



They are made by men who have served years in the business; men who know what you want; men who know how to build appliances with a merit that makes them easy to sell, worth the price paid, and a basis of customer-satisfaction.

All dealers who have seen "Premier" appliances are boosters. Distribution is coming fast—faster even than we anticipated. There's room for you in the "Premier" dealer organization if you get in quickly — before your territory is handed over to another live man.

Why You Should Be A Michelin Dealer

No. 2

Michelin Dealers Help in Cause of National Economy

Some dealers are always complaining about business being dull, while other dealers who are better business men are making as much money as ever.

These successful dealers are the men whose business is built on the solid basis of giving their customers more for their money than competitors do.

The Michelin Dealer belongs to this class. He sells a tire that is not only widely advertised, but that gives more service for the money than any other. He finds that in periods of national economy his business does not suffer—because people must then make their money go further and so turn to tires that carry out the national spirit.

Michelin Dealers reap the rewards of building solidly for permanent success. Write to-day for Michelin's Dealer Proposition.

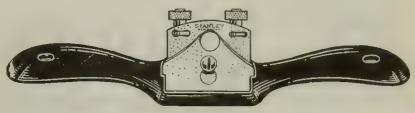
Stanley Tools



Stanley Adjustable Spoke Shaves
Nos. 151 and 152

These new and improved Spoke Shaves have a Lever Cap fastening the cutter in such a manner as to bring an even pressure on the cutting edge.

The important feature is that the cutter can be quickly adjusted both endwise and sidewise by means of the adjusting screws which engage the slots near the end.

The Cutters are made from a high grade of steel, well tempered and sharpened ready for use.

The handles are japanned and through each a hole is made to enable the owner to hang the tool up out of the way.

Made in two styles—one with raised and the other with straight handles.

10 in. long, 2⅛ in. Cutters.

Over the Top for 1918

THIS IS ONE OF THE REASONS!

Extensive advertising in the largest magazines and dominating space in the boys' papers have made Gilbert Toys popular with boys everywhere.

In 1918 we will continue to advertise them in the same impressive way. We are going to tell the boy customers in your town of their "Genuineness"—of their "Individuality."

We are going to tell them of the improvements we have made in a number of the toys—of the additions to the line—about the way all the smaller sets are packed in the new Gilbert Toy sealed carton. And we will try to make our story more attractive than ever.

You should profit by this advertising if your stock of Gilbert Toys is complete.

A postal will bring our new catalogue.

GILBERT

WAR TOYS FOR SUMMER BUSINESS

Here's the biggest opportunity you ever had to do a profitable summer business on toys. Boys and girls everywhere want practical toys with which they can **play war.** And Gilbert War Toys meet this demand. Your customers are going to want them this summer.

We have improved and perfected these Gilbert War Toys—Gilbert Machine Gun, and Nurses' Outfit (for the little girl). They represent the best values possible—they are genuine in their realistic uses—and they are ideal for summer play.

We have planned an advertising campaign in the boys' publications to appear during June and July in line with the rapidly gaining movement of a "Safe and Sane Fourth"—and have a particularly attractive proposition to offer you in conjunction with it. It is a new idea in Toy marketing and will enable you to make your Toy Department pay you a profit during its usually dull season.

Our representatives are now on the road and will be glad to call on you—or we will give you complete information direct.

The Value of a Name

There are two points to be covered in selling a washer or wringer.

First, you must convince the prospective buyer that she should have a machine; that it will save its cost many times over in time and labor.

Second, that the particular machine you sell is well made and convenient to operate.

The first point is up to you, but in the second, the name "Dowswell" carries conviction. For thirty years it has been on the best washers and wringers made in Canada or elsewhere. Just say "Dowswell," your customer will know the rest.

Why You Should Sell Polarine Motor Oils

YOUR store is as logical a medium for automobile supplies as a garage or supply house. Tires, spark plugs, automobile parts, tools, gasoline and lubricating oils and greases are a legitimate part of your stock. If this were not so, each year would not find several hundred more hardware dealers profitably pushing automobile supplies.

Polarine
FRICTION REDUCING MOTOR OIL

A New Department that will Pay Good Profits.

In stocking Polarine you will be joining the army of Hardware dealers throughout the country who have found in them the basis of a new department that can be made productive the year round. Polarine Motor Oils have behind them the reputation of Imperial Oil Limited, the acknowledged leader in the lubricating oil industry in Canada.

Increased Sales Prove Merits of Polarine Oils

The best proof of their merit is in their increasing and widespread use. If their merit had not been established thousands more motorists every year would not decide that Polarine Motor Oils give the best protection to their motors. Since 1914 the average yearly increase in the number of automobiles in Canada has been 62%, but remarkable as this increase has been the increase in Polarine sales has been even greater.

Extensive Advertising Making Bigger Demand

Continuous and sound advertising throughout the Dominion is keeping Polarine Oils before the motorist and every day creating a bigger demand for them.

Selling Polarine Brings More Customers and Larger Profits

For you there are liberal discounts. You can turn over your stock quickly and arrive at your profits surely.

Besides, in stocking Polarine for which there is such an extensive demand, you bring a desirable class of trade to your store whose needs in other hardware lines you can supply. You stimulate your entire business.

Put Up in Packages Convenient to Handle

Polarine is supplied in two grades for cylinder lubrication, Polarine and Polarine Heavy. There are also Polarine Oils and Greases for effective transmission and differential lubrication. Polarine is put up in attractive lithographed sealed cans in half gallon, one gallon and four-gallon sizes. Also sold in 12½-gallon steel kegs, half barrels and barrels.

Build Up Your Business on
O-Cedar Polish

O-Cedar Products sell all the year round. Like most specialties, however, there are seasons in which their sale is especially lively.
Housecleaning Time is O-Cedar Time. Your customers need the O-Cedar Polish Mop, particularly in the cleaning season.
An O-Cedar Polish Mop is an essential to modern housekeeping. Its long 54-in. handle eliminates stooping and bending, or getting on step-ladders and chairs to dust high places.
It is treated with O-Cedar Polish and packed in a tin container which may be used later for re-treating the mop. Two styles, round and triangular in shape, price $1.50.
By putting in an O-Cedar window **now** you can build up some extra good business. The prominent O-Cedar advertising campaign is in full swing now, so that people will be influenced in favor of O-Cedar Products. All they need is a reminder that you have O-Cedar in stock—and the best reminder you have is your windows. Let us help you decorate them. Send for our window trimming material. It will make your windows show up wonderfully well.
Your jobber has some special O-Cedar Assortments. Ask his salesman about yours.

Stoves, Ranges and Heaters Advance 10%

Reason Given is Increased Cost of Operating Stove Plants — Conscription Measure Will Further Affect Manufacturers—Advance Did Not Come as Surprise —Raw Material Situation Uncertain

AN advance of 10 per cent. on the selling price of stoves, ranges and heaters was made effective on Monday of this week. Manufacturers furthermore will not book for delivery beyond August 31 and reserve the right of cancelling any or all orders that remain unfilled at that time if they feel so disposed. The present prices on furnaces will be maintained to June 30, at which time an advance of 10 per cent. on this line will also apply.

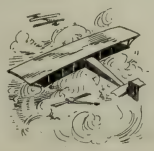
This advance in the price of stoves and ranges did not come as a surprise to the trade as it has been generally expected for some time. Some weeks ago the price for stoves on forward booking, delivery to be taken July 1 to August 31, carried an advance of 10 per cent. over recent prices. Stoves and ranges for immediate delivery were previous to the present advance sold on the basis of recent prices, which was 10 per cent. below prices for July 1 to August 31 shipment. Such action on the part of manufacturers in advancing forward booking prices seemed to presage higher prices for spot sales in the not distant future. Now that the advance of spot sales to the level with the forwarding booking prices has been made there has been confirmation of this expectation.

One of the main reasons given for this advance has been the increased cost of operating the various stove foundries. Many of the manufacturers have had an uncertain supply of raw materials. At times they have been low on coke supplies and again at others low on the supply of pig iron. In some instances they have had to close down for short periods until additional supplies reached them. This all increased the overhead charges. The cost of labor has been steadily mounting upward and with the prospect of more complete conscription the manufacturers have to look forward to a dislocation of their force to a certain extent. One of the large manufacturers of stoves will lose quite a number of young men between the ages of 20 and 23 years who had previously been exempted and placed in Class B. There had been heavy drains on the factory staffs through previous enlistments and the new draft will deplete the operating forces still more. It was a matter of common agreement on the part of manufacturers that the cost of operating their plants had steadily risen owing to the loss of the younger and more efficient workmen. The new call will drain the factories almost entirely of the young and energetic workmen.

Raw Material Situation

Some of the manufacturers have been in better position than others with respect to supplies of raw materials. While supplies of pig iron have been somewhat uncertain, as yet there has apparently been no actual hardship, although there may have been inconvenience at times through failure of supplies to arrive when they were needed. Canadian smelters of pig iron at Port Colborne and Hamilton have been able to keep the Canadian trade fairly well supplied. Some of the manufacturers, however, bring part of their supplies of pig iron from the southern United States because of the necessity for having a softer grade of iron to mix with the harder pig iron produced in Ontario. Shipments of this pig iron from the South have often been delayed and this has caused a certain amount of uneasiness at times. Manufacturers have endeavored to anticipate their needs as far in advance as possible and have bent every effort to get deliveries of raw materials well before the time they were actually required.

"Manufacturing conditions have entirely changed from what they were before the war," stated M. F. Irwin, Toronto manager of the McClary Manufacturing Company. "There was a time when we could order pig iron and other raw materials and could have delivery within a very short time. But those conditions have changed now. It is only the manufacturer who anticipates his needs well in advance that is able to keep his plant running in these abnormal times. Steel sheets have recently been in somewhat light supply, which has interfered with the manufacture of oil heaters and oil stoves. For a time we were unable to manufacture these lines through the failure of sheet stocks to arrive in time. Within recent days, however, arrivals of sheets from the United States have placed the factory in a position to again start operations on the manufacture of this class of stove."



Another manufacturer stated their firm was low in certain gauges of sheets used in ovens. If sheet stocks did not soon arrive they might be compelled to use a heavier gauge for this work.

Stove Business Excellent

"The stove business for the first three months of the present year has been excellent from coast to coast," said Mr. Irwin to HARDWARE AND METAL. "The first three months of the present year show an increase of fully 30 per cent. as compared with the corresponding months of last year. Some of this increase is accounted for in the slightly higher prices that prevail for stoves now as compared with the first three months of last year. There has been free buying of stoves in certain districts this year. Railroad centres and places where munition plants are located have shown a good trade in stoves. The people in those centres have had the money and they have not had any hesitancy about spending it. Electric stoves and ranges have been in very good demand and it is somewhat surprising to note the class of citizen that is doing the purchasing. It is the people in the humbler walks of life who give evidence of their interest in the use of electric stoves and ranges.

"Some of the buying has no doubt been induced through the prospect that higher prices were likely to prevail, but the greater part of the trade undoubtedly

came because people were ready to buy stoves."

Prospects for Year Uncertain

As to the prospect for stove manufacture during the balance of the year there is more or less uncertainty. One concern at Hamilton has been successful in getting sufficient supplies of coke in advance to see them through until about July 1. It is probable in the interim they may be able to get additional supplies. It had not been the custom to anticipate their requirements in coke for any considerable distance in the future as it was always possible to get supplies when needed. What the future holds out in the way of supplies of pig iron remains to be seen.

It would seem that any supplies that come from the United States may be in still more restricted field owing to the desire of the Government to see that the steel manufacturers devote their attention primarily to war requirements. One large producer of iron and steel in that country has recently been requested to give fully 100 per cent. of the output to Government needs. With other manufacturers giving as much as 50 per cent. of their output to Government needs the amount for domestic trade requirements bids fair to be in very restricted compass. This is based on the contingency that the war will last through the present year. If the war does not last through the present year there will be an entirely changed set of conditions. However, with the present prospect on the western front there does not seem much likelihood of an early finish to the war.

The Canadian manufacturing situation has been greatly facilitated during the past year or two through the home production of raw materials such as pig iron and sheet steel. The Steel Company at Hamilton has recently started the operation of a sheet rolling mill which is meeting the requirements to a certain extent for sheets on the part of the Canadian manufacturers. As already stated supplies of pig iron from Canadian mills have been available in fairly good supplies.

Used Spare Time to Increase Paint Sales

Curtailed Train Service Worked to Advantage of Dealer — Big Opportunity to Sell Paint in Larger Quantities—Government Business Has Perhaps Increased Paint Sales in Canada From 30 to 40 Per Cent.

A PAINT salesman making his rounds throughout the country not so long ago called at a certain town and on reaching his customer's store was greeted by the proprietor whose dejected attitude suggested the expression "what's the use?" It was the story of outside competition again to which the salesman listened—this merchant sold his paint at $1 per quart and had competition of $2.50 per gallon to meet. In an interview with HARDWARE AND METAL the general manager of one large paint manufacturing establishment gave out the details which follow. The merchant told of a case where he had just recently lost a big order, and in telling, the story ran something like this, with a few interruptions by the visiting salesman:

$1.00 a Quart Against $2.50 a Gallon

"John Jones came into my store the other day and asked for a quotation on paint. I gave him a price of $1 a quart and he told me he could buy paint at $2.50 per gallon. I then tried to convince him that at the price of $2.50 per gallon the paint he would get would not stand up. He then stated he had bought some the previous year, it had proved satisfactory and he wouldn't pay me any $1 a quart. What's the use trying to meet competition like that? Paint is too high, we can't sell it.

"How much paint did your customer want" asked the paint salesman.

"Oh! he bought 40 gallons," wailed the merchant.

"Well, is it any wonder that he bought at $2.50 per gallon against your price of $1 a quart," asked the salesman. "Why didn't you wire the house and see what they could do on a barrel of paint for you? To meet competition of that sort we have a line which will stay where it is put that you could buy and make money on, and there would have been no need for you to touch the order at all. We could have shipped direct, the customer would have paid the freight and cartage and all you need do would be to collect your money."

Curtailed Train Service and Spare Time

The executive of the paint house to whom the salesman repeated this story listened carefully throughout. When the salesman had finished he mused a moment, then shot out this question: "What do you do with your spare time in those different towns you visit? You claim train service is bad, that you can't make the number of calls you used to make—are you making full use of your time in these small towns?" The salesman didn't know what was coming so he sat back and waited for enlightenment as to what his boss was driving at.

Giving the Merchant Information

It wasn't long in coming—a new idea was working in this busy executive's mind. He continued "You have just told me about this merchant who was trying to overcome $2.50 gallon competition with $1 quart paint. Did this merchant know, had he been given any reason to believe that we were in a position to help him in meeting this competition? Had you ever told him that you could sell him paint at this low figure in case he should ever need it? Was he in a position to know that in barrel shipments he would save a matter of 15c gallon over orders for cans? You have a price book, you know our goods, are you making use of your knowledge to keep the merchant informed? Don't assume that the merchant knows—he is a busy man who sells other lines than paint and it should be your duty to inform him not only in respect to the line he stocks but what he can get to meet competition which is continually cropping up.

"You suggested to the merchant that he made a mistake in quoting quarts before even finding out that the man was a gallon buyer. That is probably true but ask yourself fairly whether this man would have known from the information you have supplied on your many calls how to meet this 'gallon' competition had he secured that angle of it at the start.

"You indicate and I admit it's often true that many retail merchants talk paint in terms of quarts when they should be discussing gallons. I believe the merchant has a big field of business to develop right at his own door and he doesn't realize it. But all this preamble is preliminary to my new idea which I shall try to develop by first asking a couple of questions; this remember is a spare time proposition, a cure for those wasted hours that you now bemoan.

The Spare Time Idea

"Have you ever tried to sell a bill of paint for any of your retail friends? Have you ever suggested that there might be prospects which the two of you could work on or to whom you would go yourself and see if you could effect a sale? Did it ever occur to you that the reason some people buy away from home is often because the business is solicited by the manufacturer's representative and not because of any great saving in dollars and cents? Do you think that in an hour or two hours' time you could sell a hotelman, a factory man, a householder, five, ten, or twenty gallons of paint or varnish were the retailer to give you a lead?"

Light suddenly dawned in the salesman's mind but he was careful nevertheless not to commit himself too quickly or too enthusiastically to the new scheme. However, he saw possibilities and resolved at the first opportunity to try it out. He felt that he was equal to securing paint business were any to be had and he made a mental resolve that he would show the boss something very shortly and incidentally get his retail friends into the habit of making use of his spare hours waiting on trains.

How its Worked Out

It was a couple of weeks later before the salesman again was at headquarters and as usual he made it a point to discuss

with this executive the past couple of weeks' trip and outline his plans for the coming week's activities. When he was practically through, the salesman remarked in a casual way. "I had rather an unusual experience the other day which I must tell you about. In discussing prospects with Mr. ——— at ——— he told me that one of the hotel men was talking of doing some painting. I got the man's name, where I would be likely to find him and went out to see him. I was thinking of that "spare time" chat that we had a few days ago and was wondering whether I could do a little missionary work for my customer and incidentally sell our line of paint. When I had finished with this hotel man my order book contained an order to the value of $72 for paint and varnish.

"That wasn't too bad, was it? but the best of it as far as that merchant was concerned was that he never saw the goods at all. I took the order, sent it in to be shipped direct, the hotel man paid the freight and cartage, and all that our customer had to do was to collect the money."

Merchants Going After Sales

In relating the foregoing to a representative of HARDWARE AND METAL, this executive indicated that retail merchants seemed to be developing their paint business more rapidly and going after orders which in former years had evidently slipped through their fingers. This was noticeable in individual orders coming along from retailers for twenty, thirty and even forty gallons of paint to be shipped direct to consumers in their community. It would seem to foreshadow the day of better things and the realization on the part of the retailer of how much business right in his own community there is to develop.

Some Government Figures

During the past year increased paint business in the United States principally on government account has reached an amount as great in volume as the total turnover of preceding years—in short, there has been about a 100 per cent. increase in paint business in the United States, probably 30 to 40 per cent. increase in business in Canada. This, be it noted, is represented practically altogether by government work and should prove enlightening to merchants and to the individuals in each country.

Government Big User of Paint

Why does the government use so much paint, spend so much money on this product if the value is purely decorative? Surely government buildings and government ships need not absorb so much money when guns, ammunition, and food are needed unless there is something back of the appearance to be considered? And there is something, a real value in paint which every individual property owner should know to a sufficient extent that he will realize it is to his best interests to use paint regularly and often to preserve his property.

The Dealer a Go-Get-It Type?

How then to help the retailer increase his paint sales—how to bring home to the merchant the opportunities which exist all around him for selling this preservative—how to reach the indivdual property owner so that he will want to save, rather than beautify his buildings by the use of paint? It is undoubtedly a big problem which presents itself but by no means an impossible one.

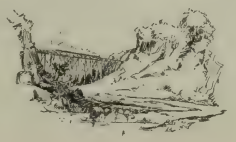
What is the retailer doing to sell paint—is he sitting down waiting for the business to come or is he the go-get-it type? This paint executive told HARDWARE AND METAL'S representative that the beginning of this year they sent out a letter to all their customers asking them to sit down and make up a list of prospects to whom they, the manufacturers, could send out letters urging the use of paint. They wanted the retailers to go even further than merely sending in the names they could cull from the telephone directory—they wanted to know whether John Jones was a hotel man whose verandah needed painting—whether James Smith ran a picture show whose entrance was getting shabby—whether Bill Brown's house needed re-decorating. This manufacturer wanted a hint as to the type of man Jones, Smith or Brown might be. Supplied with this information they were going to write individual letters to these prospects—not a sterotyped letter but a real honest-to-goodness individual letter to Jones telling him why he should paint his verandah, to Smith on the value of an attractive entrance to his picture show, pointing out to Brown that $100 worth of painting would increase the value of his property anywhere from $500.00 to $1,000,00. And they were willing to follow up the first letter with two or three more.

Less Than Twelve in This Class

How many replies do you think were received from the retailers? Here one would say was a real, helpful offer, an opportunity for the retailer to call on the experience of a specialist in the paint business. *And less than one dozen—less than 12—sent in lists.* What would you have done, Mr. Retailer, had you been on this firm's list—more to the point and classifying this firm's customers, what did you do? Are you, Mr. Retailer, employing every means to increase your paint business, are you the go-get-it type after business or are you waiting for customers to come and only serving those who do come?

Other Dealer Helps

This is only one means employed to help the retailer. Others in common use are the supplying of color cards, window display material, newspaper electros, moving picture slides, etc. There is greater co-operation to-day between the retailer and his jobber or manufacturer than at any other time in the history of the paint business. But are the results all that they should be? Are they reaching beyond the retailer's store to the property owner, to the man who buys the paint?



A Little Investigation a Good Thing

In a recent article in HARDWARE AND METAL, figures were given which showed that for the protection of our 1,600,000 homes in Canada an average of about $1.88 per year was spent. That is pretty small and when one looks around him it isn't long before opportunities begin to present themselves for increased sales.

Let those merchants who serve a farming community take a half day's trip over a certain section of the territory they serve and what do they find? They will not find much more than the author of the above mentioned article found, 4 per cent. of the barns painted. Grant even that it should run to 10 or 20 per cent. It takes mighty little figuring to determine where opportunities for sales exist.

Opportunities Not Far to Seek

Coming back to town again, let this merchant spend the balance of the day investigating what his townspeople are doing. The opportunities for paint sales will far exceed his most sanguine expectations and the hardware merchant who opens his eyes to the possibilities of trade around him is going to keep pretty busy drumming up sales. It is often said far-away fields look greenest and many merchants in the smaller towns think the city merchants have the big field for sales. Investigation does not prove this, however, and the town merchant will often find on looking over his territory that he has plenty of opportunities to increase his sales.

The Property Owners—The Buyer

This brings the question to the point where the buyer has to be interested—where the property owner must be made to realise the real value of paint and here is the hardest problem of all. However, it is not an impossible task and a suggestion made by this paint manufacturer is one which could be worked out in a great number of towns to advantage.

The Speaker—How He May be Used

The spring clean-up and paint-up campaigns will soon be starting and it is often the case that a public meeting is called to arouse public interest in beautifying the town. Did you ever attend one when a speaker devoted his allotted time to outlining the story of paint—isn't it a possibility for a feature on the program that paint be made the subject for enlightenment to the property owner? It is not necessary that any particular brand of paint be upheld from the platform, but a talk on the value of good paint from the standpoint of insurance will set people thinking and you, Mr. Merchant, will reap your share of the benefit to the extent that you follow it up.

The written word is splendid but the spoken word carries conviction. Take the matter of religion as an example. Which has gained the greater number of converts—the speaker who outlines the value of the good life or the sermon printed in the

(Continued on page 49.)

Water Systems Not Difficult to Install

Shipped in Assembled Form Ready to Connect Service Pipe and Suction Pipe—Any Mechanic Able to Install a Pump Can Put in Pneumatic Water System—Demonstrating System Will Help Sales

A POINT that has been raised in connection with the handling of pneumatic water systems by the hardware dealer is whether or not those systems can be easily installed. HARDWARE AND METAL sought an opinion on this point from one of the manufacturers of pneumatic water systems. "Any man who can instal an ordinary pump can instal a pneumatic water system," declared the sales manager of the manufacturing concern in question. "All that it requires is to connect the service pipe to the tank, then in turn connect the suction pipe leading from the well to the pump and the installation is complete. Of course it is necessary to have the sink and bathroom fixtures installed previously, and it is necessary to have the well completed in order to get the supply of water. These are steps in the installation which are obvious. But the actual work of installing the tank and pump is one which is easily accomplished. So far as our company is concerned the tanks and pumps are all set up and tested before being shipped out. It only remains for the dealer to have the connections made at the two points indicated and the job is completely installed. If the hardwareman has not a plumber in his employ he could secure the services of a man for this simple operation of making two connections."

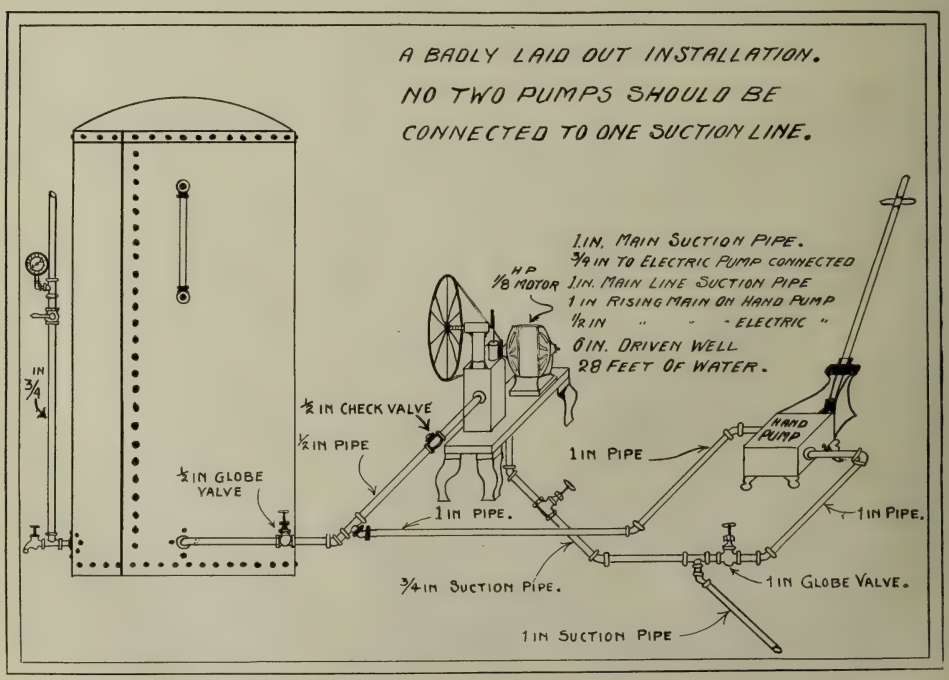
Good Sales Methods

One dealer in pneumatic water systems has been able to secure good business through an arrangement with a local implement agent to be on the lookout for probable prospects among the farming community. A satisfactory arrangement was reached as to the commission to be had by the agent. The dealer in question made a good profit on the plumbing goods which it was necessary to sell in connection with the installation of the system.

One of the most effective ways of getting the system before prospective customers, however, is to have a system installed in the hardware store where the farmers will be able to see it in operation and examine it for themselves. With the farmer, perhaps more than with any other class, seeing is believing. In other words, the farmer wants to know what the system will do before he invests his money in it. It is perfectly feasible to have both a hand pumping system and a power system installed for the purposes of demonstration without taking up a great deal of room. This demonstration of the actual working of the system constitutes good sales methods. The hardware store is the frequent port of call for the farmers of the community because they find there so many of the commodities they need in farming operations. A talk to the farmer about the desirability of installing a pneumatic water system in his home will without doubt get him interested to the extent that he will examine the system. This personal canvass is quite necessary in order to get the best results. In the case of the implement agent a personal canvass is made, and when the farmer comes to the store it is advisable to make a personal canvass. It is a trade that may take some little time to work up but it will repay for the time spent on it

Profits Are Good

The profits are good on the systems in themselves and the additional profits to be secured from the sale of bathroom fittings give an extra source of revenue. For instance one type of pump and tank costs the dealer in the neighborhood of



$130 and usually sells in the neighborhood of $160. It will be seen that the profit on the initial investment was slightly over 20 per cent., if the above figures are adhered to in selling the article. Some dealers, however, actually get larger profits. To the cost of the tank and pump is usually added a fee for installation varying in amount from $5 to $10.

Problems of Installation

Occasionally in the past pneumatic water systems have failed to give entire satisfaction because of faulty installation. There has been no fault in the system itself but because of some little defect in installation the work of the manufacturers has been turned to naught. There was the instance of one dealer who was called in to examine a pneumatic water system that had been installed for about three years but which had never given satisfaction. The whole outfit was of a popular make and he himself had installed quite a number in the neighborhood and had never had any trouble with them. In the case in question a hand pump and power pump had been connected to the one suction line. When the dealer was first called in to see this system he advised separating the suction line and running a separate ¾-inch line to the electric pump. On account of the pipe having to run under the cellar floor the owner did not care to have this done. The owner managed to get along with the use of the hand pump, but the electric pump when requisitioned would invariably fail to give satisfaction. The dealer who was called in to examine the system had succeeded in getting the electric power pump to work splendidly for short periods, but the failure to work was pronounced. The valves and packing were examined thoroughly and everything was found in perfect order in this respect. The dealer in question did not instal the job in the first place. He had always made it a principle never to hitch two pumps to one suction pipe.

Leaks Affect Operation of Pump

An authority on the question of installation of water systems was consulted in the matter and he expressed the opinion that coincided with that of the dealer, namely, that two pumps should never be placed on one suction line because of the fact that the very slightest leak at either pump is bound to interfere with the suction of the pump in operation. The course of procedure advised in the above instance was either one of two. First, the hand pump could be disconnected altogether, with the additional precaution to make sure that the pipe ends going to and from the hand pump be made perfectly airtight. There would then be no reason whatever why the electric power pump should not perform the work perfectly, except perhaps in the height to which the pump was expected to lift water by the suction method. It is expecting almost too much to anticipate that a suction pump would raise water a vertical distance of 28 feet. It is usually considered by experts that the limit to which water can be raised by the suction method is 25 feet. However, in the above instance where the water had to be raised 28 feet and where the installation was already made it was advised by the expert to see that all valves were tight and the plunger packing kept in good order. With these precautions it was hoped the system might be found to do very good work.

But the method of correct installation of suction pumps for use in shallow wells as opposed to power head and cylinder installation for deep wells is a subject in itself. It is sufficient for our present purpose, however, to state that it is a well recognized principle that atmospheric pressure will not with ease and surety raise water to a greater height than 25 feet. When an installation is being made it would be well to bear this rule in mind. Much trouble and annoyance to the customer and to the dealer may thereby be obviated. These are points which all bear on the successful handling of pneumatic water systems. There is a big field for them in the rural communities and in small towns and villages, and the dealer who goes after the trade in an energetic manner will no doubt meet with good success.

All Branches of Mint Can Now Assay

Government Measure Introduced in Dominion Parliament Provides That Certificate of Branch Assay Office in Vancouver is Equal to Certificate of Branch Mint at Ottawa

DURING the present session of the Dominion Parliament Sir George E. Foster introduced a bill to amend the Gold and Silver Marking Act, 1913. The change that is made according to the explanation of the Minister of Trade and Commerce is as follows: The section as it at present exists in the Act provides that in cases of analyses of ingredients the evidence shall be the assay at the Branch of the Royal Mint at Ottawa. The amendment is designed to add to that branch the Assay Office of the Royal Mint in British Columbia, so that the assay of that branch shall be evidence as to the ingredients the same as is the assay of the Ottawa branch of the Royal Mint.

At the present time there are just two assay offices in Canada, one at Ottawa and one at Vancouver. The section relating thereto was amended by adding after the word "by" on the fourth line the words "the Ottawa Branch of the Royal Mint or by." The section as amended will now read:

An official certificate by the Otawa Branch of the Royal Mint, or by any Dominion Government Assay Office in Canada that any article to which this Act applies has been assayed by such office shall be prima facie evidence that the ingredients and quantities stated by the certificates to be contained in the article are contained therein, and in all legal proceedings had in pursuance of this Act shall be receivable as evidence of the facts set forth in the certificate.

This is a measure which will meet with the approval of the people of Canada generally, and particularly of the citizens of British Columbia. It will mean that the branch assay office at Vancouver will be raised to the same dignity as the one at Ottawa. Any article assayed by the branch at Vancouver will henceforth be prima facie evidence after the certificate has been granted that the said article contains the ingredients and quantities stated. Since the province of British Columbia is rich in minerals it is only just that an assay office should have been established there. It follows that it should not be necessary for people in British Columbia to go to Ottawa to get an official assay since they already have a branch in that province.

CURTAIL ENAMELWARE OUTPUT

Further restrictions of the country's less essential industries, which will drastically limit non-war building operations for the duration of the war, was announced recently by the Fuel Administration of the United States, in the issuance of orders curtailing the manufacture of ten principal clay products from fifteen to as high as fifty per cent. Simultaneously the manufacturing program of this industry was ordered rearranged and divided, placing it on the basis of war industry.

Face brick, common and paving brick, terra cotta, roofing tile, floor and wall tile and sanitary ware were ordered curtailed fifty per cent.; hollow tile, sewer pipe and drain tile twenty-five per cent., and stoneware, with the exception of chemical stoneware, is curtailed fifteen per cent. Another new order curtails the output of enamelware fifty per cent.

AMERICANS IN RUSSIA ASK FOR HELP

Here is a hint to publishers of Canadian trade and technical papers and business men generally.

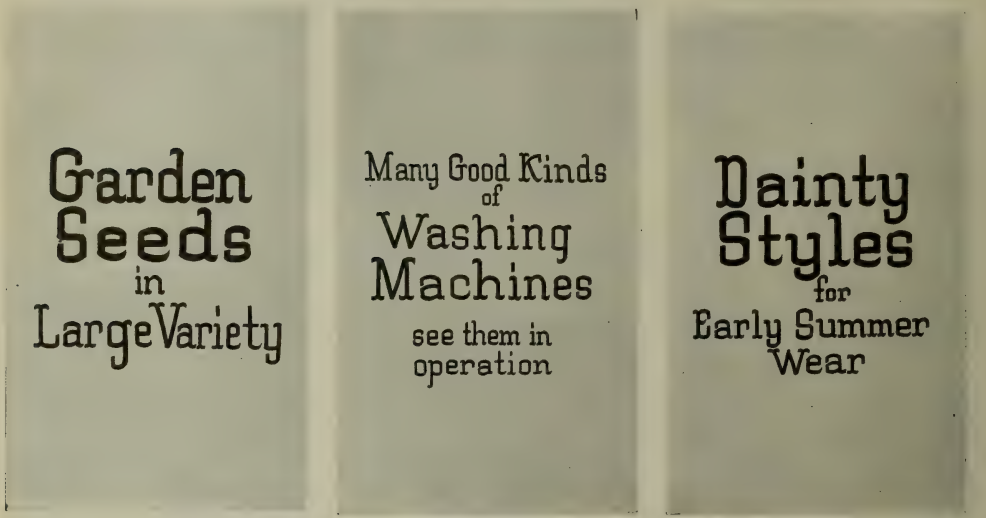
In the vicinity of Moscow and Petrograd are several hundred American business men who are valiantly striving to impress the Russians with the size and importance of American industry. They need, so the American Ambassador reports, copies of good trade and technical papers. If agreeable, you are asked to mail two representative copies of your paper to Miss E. T. Weeks, Reference Division, Committee on Public Information, 6 Jackson Pl., Washington, D.C.

These papers will be forwarded in State Department pouches to Moscow and Petrograd. The Russians are literally hungry for this kind of information and the Committee on Public Information tells me that our papers will have an important political effect as well as help pave the way for American trade relations.

Brush Stroke Formation in Cardwriting

Each and Every Stroke Completed With One Sweep of Brush—Very Readable Series by Reason of Clearness—Plenty of Background Shown Between Letters

By Robt. T. D. Edwards



Styles of Window Cards that may be Designed from Type of Letter Described in this Article.

TORONTO is one of the best, if not the best, city in Canada for good showcards. By good show cards we mean good in every department: good in layout, good in color scheme and good in letter formation. Besides all these we may add originality in design. But don't think for a moment that we wish to give the impression that Toronto is the only place that has good show cards. Other large cities turn out excellent work, but on the whole Toronto has an exceptionally good showing of well executed show cards.

The part that impresses one most is the excellent styles and originality of formation of the lettering. This original lettering has been a great feature in the last year and gives a certain zest to the show cards which other features cannot.

It is along this line of original lettering that we are conducting the present series of show card articles. It has been our endeavor to pick out certain good types used by various cardwriters and explain their formation, step by step, right to the last stage of using them on a completed show card.

This is the third lesson in this series. The first published was a heavy stroke letter with all ends of the letters finished round, instead of square, as is usual. The shading, in various styles both for high-lighting and for use behind the letters, was shown. This type is used by various cardwriters and makes a very effective card when completed in good color combinations. The second alphabet of this series was shown last month and was of brush stroke formation made with a small brush. The strokes were somewhat narrower than this month's alphabet. This was an excellent type because it was original in formation and could be easily read. This type is being used at present by various cardwriters.

The type we are showing this month is something that has never been shown in this magazine and should be a valuable addition to the cardwriters who follow these lessons.

As usual it is our endeavor to show as practical a letter formation as possible and whenever we can it is of brush stroke formation. And so it is with this month's alphabet. It is entirely a brush stroke alphabet. That is, each and every stroke is completed with one stroke of the brush, a second stroke not being necessary, and one must practise the work with that in view. Double stroke work is too slow and not as clean-cut as that narrow, single stroke letter.

You will notice how readable these letters are, especially when they are made up into show cards. The reason for this is because of the narrow strokes which show plenty of the background between them. This makes the letter stand out in greater relief than if a heavier letter were used.

There are different features which are embodied in this alphabet which is not found in others. One of these is that all upright strokes are straight. This rule applies to all usually curved letters, such as the "O," "C," "S," etc. These features you will note by a study of the chart. This is a big feature, especially for the beginner, because there is one thing he knows for sure, that all upright strokes are straight strokes and once he or she gets that thoroughly in mind a great deal has been accomplished. In Fig. 1 on the lower line this feature has been brought out strongly. Here are a great many lower case letters

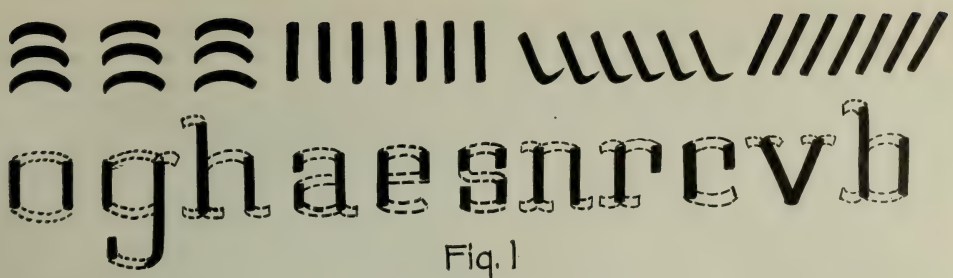


Fig. 1

all showing the first strokes of the letters to be made and they are the down stroke and they all are straight.

Now, the second feature of this alphabet is another one which will also make the forming of this alphabet very much easier than many others we have had to make, namely, all cross strokes are curved. Now just take a good look over the chart and see if this is not the case. "All cross strokes are curved." Get that in mind and that with the other feature will give the entire formation of this alphabet. Now close examination should be made of each letter before starting to work, then practise it. And when you have perfected it, practise the next one and so on all the way through. The farther you go the easier each letter will become and the more graceful you will be able to make each letter.

You will notice that every stroke is numbered and all down strokes are the first ones to be made. When you make them first you get the proper width of the letter and all that remains is to fill in with the curved cross strokes and the curved spurs.

The spurs constitute another feature of this alphabet which gives it an individual appearance.

In order to make this letter formation successfully, one of the main things is to see that you have the proper brushes. And when you have them see that they are in the proper shape for doing this style of stroke work. This has been repeated many times, but this only goes to show the importance we attach to it. The brush is of red sable with round nickel-plated or copper ferrule. They are called red sable writers and all the hair in them should be the same length to ensure getting good, clean ends at the beginning and finish of the strokes. You must keep the brushes flat at all times whether in use or not. It is this flat chisel point that gives you the width of the stroke and enables you to make a brush stroke letter instead of an outline one.

Then there is your show card color—another important factor to good show cardwriting. First of all it must be water color, which can be bought at art stores, made by reliable color firms and is very satisfactory, indeed. This is advisable for cardwriters who can get it and who are only using a limited quantity. If you are in a position where this cannot be obtained, a good, dull black show card color can be mixed, using lamp black and water with a small quantity of wood alcohol in it to cut the lumps. Add a small quantity of diluted gum arabic or a good mucilage, just enough to keep it from rubbing off after it is dry on the card.

If you wish other colors these can be obtained from

"NO LAND for Aliens Who Fight for Foe"—newspaper heading. The regulation six feet—or perhaps a little more—might well be considered.

GREATER RESTRICTION IN STEEL

SOMEWHAT drastic action was taken by some of the leading iron and steel producers in the Pittsburg district and elsewhere last week in that there was a virtual setting aside of all private obligations for the time being at least. In some cases even indirect war needs are being disregarded.

In this turn of affairs is to be seen the most rigid hindrance to non-war consumption of iron and steel that has yet arisen. The United States Government has been insisting with certain mills in the East that their entire output shall be turned to Government requirements.

It is estimated the requirements of shell steel during the present year will exceed 4,000,000 tons. There is now on order for the United States Government and the Allies no less than 2,374,711 tons of ship plates.

Already some of the Canadian manufacturers are feeling the pinch in that they have been unable to count with any certainty on getting supplies of raw materials. Manufacturers in the United States who ship goods into Canada will also feel the effects of this drastic step. These facts but go to show that a still greater restriction of supplies of manufactured articles can be anticipated during the present year.

STOVE OUTLOOK UNCERTAIN

MANUFACTURERS of stoves during the past week have announced a further advance of 10 per cent. in stoves, ranges and heaters, due in large measure to the increased cost of manufacture. Through the uncertain situation in raw materials plants have frequently been closed. At times coke has failed to arrive, at others the supply of iron and steel has failed to come forward in time to keep the plants in operation.

In advancing the price of stoves the manufacturers have reserved the right to cancel all orders of stoves and ranges that remain unfilled at August 31. Prices of furnaces will hold at present figures until June 30 when they will be advanced 10 per cent., according to the announcement of the manufacturers.

With the restriction of steel and iron supplies in the United States for anything other than war work the domestic manufacturers of non-war products are coming more and more to face a serious problem.

COTTON IN UNCERTAIN MARKET

MUCH interest has centred around the cotton market during the past two weeks. A decline of approximately 6c per pound in the price of spot cotton was registered within recent days. For one day the price reached 36.40c per pound. At the time of writing it was down to 30.45c per pound. Interest has naturally been keen in the price of such manufactured articles as cotton twine, rope, gloves, waste and other lines handled by the hardware trade.

The downward movement in cotton was helped along by the fact that there has been a movement on foot in the United States to regulate prices of manufactured cotton goods. Furthermore, a bill was introduced in Congress last week for the purpose of limiting the price of cotton to 20c per pound.

As to the possibility of this bill becoming law there seems small chance. One of the Georgia Senators is quoted as definitely stating that the price of cotton would not be fixed. Cotton men in the New York market freely express the opinion that 20c cotton is entirely too low. Doubt is expressed in that market as to whether there will be any fixing of price.

Manufacturers of cotton goods are of the opinion that the present downward flurry is but a temporary phase of the situation. If prices of the raw material hold around 30c or are fixed at a low figure there is reason to expect that prices of finished products might be somewhat lower.

Current Events in Photograph—No. 17

THE FARM DRIVE IN BRITAIN

Science has done the impossible in this war. When the gasoline supply became so limited that all available stocks were taken over for the use of the army, then science provided gas as a propelling power. The photo shows a gas driven tractor in Britain's drive for production. The gas is contained in a huge envelope on top of the tractor and soldiers on leave have been trained to use these tractors and ploughs.

Parades Will Be Feature of Bicycle Week

Montreal, Hamilton, Toronto, Ottawa, Chatham Will Have Bicycle Runs, Decorated Wheel Parades and Special Newspaper and Window Advertising

ACTIVE preparations are proceeding with the view of making Bicycle Week, May 4 to 11, a big success. Several cities have already made preliminary arrangements, and further details remain to be worked out. The Toronto dealers at a recent meeting decided to use plenty of advertising space in the Toronto dailies during the week. It is proposed that one of the dailies will carry as much as six pages of bicycle advertising on two days during the week. It has also been decided to hold a big bicycle run on the morning of May 5 from University Avenue and Queen Street to High Park, starting at 10 a.m. Souvenirs will be distributed and prizes awarded to dealers having the largest turnout of cyclists. The moving picture men will be on hand to take pictures of the run. It is expected a similar event will be staged on Victoria Day, May 24, and it is proposed to hold a road race one evening in June. . It is also proposed to hold a Bicycle Day at Scarboro' Beach Park during the month of June.

Montreal bicycle dealers are actively engaged in completing preparations for a big bicycle show, which is to be held during the week, May 4 to 11. Ottawa wheelmen are arranging for a decorated wheel parade on May 8 and for a carnival one evening during bicycle week. Hamilton is taking up the project in an energetic manner, and will stage some features on that occasion. Chatham will put on a special feature during bicycle week in the shape of a carnival and Boy Scout demonstration in the market square on Friday, May 10. Prizes will be given for costumes and decorated wheels, and the Boy Scouts will compete for special awards. The Chatham feature will be held under the auspices of the local chapter of the Imperial Daughters of the Empire.

Many other towns throughout Canada will also take up the work of getting the bicycle well started in public favor, which, it is anticipated, will start the sale of bicycles in large numbers. Bicycle dealers are looking forward to the present season as the banner year in bicycle sales. Window displays, interior displays and other forms of advertising will herald the popularity of the bicycle as a means of conveyance and utility. Hardwaremen who handle bicycles should seize the opportunity to help along their sales campaign during Bicycle Week.

MURDERED IN HARDWARE STORE

Constable Bernard W. Snowdon of the Winnipeg police force was murdered in Rosenblat's hardware store at 651 Main Street in that city, while trying to apprehend burglars who had entered the store on the night of April 15. Three men are held on the charge who have criminal records.

What Hardwaremen are Doing

Notes of Hardware Advertising Appearing Throughout Canada — Many Hardwaremen Show They Have Some Idea of the Seasonableness of Particular Lines —Getting Accounts in

CLOSING OUT BALANCE OF FIRE STOCK

The Terminal Salvage Company of Vancouver has recently been disposing of the balance of the Wood, Vallance & Leggatt fire hardware stock. The advertisement of the salvage company reads: "Look here. This is important. Bargains! Moving sale. Starting Thursday at 9 o'clock we will close out the balance of Wood, Vallance & Leggatt's fire hardware stock. Many useful articles can not be replaced on account of advanced cost. Prices reduced about half. These bargains consist of kitchen and hotel ware, bathroom fixtures, tools, cutlery, builders' hardware, enamelware and general hardware. We advise you to come early as supplies are limited.

$2.50 compass saws, nest of three, $1.40.
$2 bench axes, $1.45.
$1.25 pruning snips, 79c.
$1 chisels, ¼ and ⅜ in., 43c.
$4.50 Simonds 26-in. handsaw, $3.25.
75c nail hammer, 38c.
10c carpenters' pencils, 5c.
20c brassed nails, 1 lb. 9c.
25c hammer handles, 9c.
15c cut tacks, 7c.
100 spring clothes pins, per dozen, 5c.
50c push plates, 19c.
10c package shoe nails, 4c.
50c shaving brushes, 24c.
$1.75 inside door locks, 49c.
$1.50 copper nails, lb., 59c.

Iver Smith Co. in charge of sale. Terminal Salvage Company."

EFFECTIVE STOVE ADVERTISING

J. Brandon & Son, of Lashburn, Sask., have been running some very attractive stove advertising in their local paper. The advertisement is illustrated with a range and the wording is particularly catchy. It runs: "The —— range at $48.50 is the best value you were ever offered. It has direct-heated copper reservoirs, regulated by a damper, ventilated oven, asbestos walled. The polished top is always bright. All parts are coated with enamel, making it absolutely rust-proof and the oven washable. At $48.50 for a 432-lb. stove, or 11c a pound, it cannot be equalled for value. It is also the most beautiful stove we ever had on our floor. See it yourself."

MAKING BID FOR CASH SALES

The Traders Company, wholesale and retail hardware, of Buckingham, Que., place before their customers strongly the advisability of paying cash. "Cash discount as usual, 5 per cent. This means 15c off that $3 saw. It pays to pay cash." This announcement followed a well worded advertisement of full two columns in depth in the local newspapers in which butcher supplies were featured. As an example of the good wording of the advertisement one item might be quoted: "Household meat saws. Spring steel frame, blade 12-inch, the very thing where there is a quarter of beef to be cut up. It's filed and set, ready for use. Price 50c."

STRONG ON AUTO ACCESSORIES

Eugene M. Lapierre, hardware merchant, Buckingham, Que., has been doing some effective advertising of motor accessories. His space in the local paper is 14 inches deep across two columns. The advertisement carries a cut of a tire and a spark plug. "Special to automobile owners. Repairs and accessories for cars can be had at our store such as —— tires for Ford, Studebaker and all popular cars. Sizes that we do not keep in stock can be procured at a day's notice. The plain wall, squeegee reeded and traction treads are the ones on hand. The —— tire is one of the leaders as regarding wear and price.

"It is reinforced at the rim. The fabric and the rubber are made of the best quality material, 13 to 20,000 mile tests on two-ton cars in fairly bad roads have made the reputation of it. The red rim and black rubber top add a great deal to the appearance of your car also."

NEW CASH SYSTEM AT PARKHILL

Brewer & Harrison, King and Main Streets, Parkhill, have recently instituted a new cash system which they announce in the columns of their local paper: "We told you so. The George Washington plan a success. 5 per cent. dividend awaits all who purchase merchandise from us for cash. Advertisements of all kinds flicker before the public eye to induce buying, but Brewer & Harrison under their new cash system are ready to divide their profits with their customers. On every dollar's worth of merchandise you purchase from us we hand you back 5 cents. Visit us and compare our prices with any you may have paid and be convinced that it will pay you to buy of Brewer & Harrison."

TIMELY ADVERTISING

Theal Bros., Grimsby, Ont., did some timely advertising at the time of the pruning season. The advertisement was illustrated with a pruner in the act of nipping off a limb. "Pruning time is here and we are ready to supply you with all kinds of grape pruners, tree pruners or toppers. Also —— pruning saws and double-edged pruning saws. Order your grape twine now. Also binder twine."

This firm also recently made a bid for trade in a combination hay and stock rack through their advertisement. They call their store "The Store of 1001 Things." The advertisement was illustrated with the rack in question: "The labor-saving hay and stock rack. One man does the work of two. Can be changed to a stock rack or box in five minutes." At a time when help is scarce this is an effective appeal.

HELPING TO RECONSTRUCT HALIFAX

Cragg Bros. Co., Ltd., Halifax, N.S., have been advertising materials "For the Reconstruction of Halifax." In their announcement they state that they have taken an active part in the reconstruction of Halifax, supplying tools, locks, knobs, hinges and hardware, kitchen utensils, cutlery, silverware and electrical appliances. "We are in the best position to-day we have been for years to supply all your requirements. If you are building we can supply picks, shovels, tools, nails, roofing, tarred and dry paper, locks, knobs, hinges, paint, in fact everything but lumber."

GETTING AFTER INCUBATOR TRADE

Ashdown's Hardware, Winnipeg, is getting after the incubator trade this spring. In their advertisemnt they state:

"Raising poultry is a patriotic duty and a profitable business. Help to win the war by raising poultry. There is an alarming shortage of beef and pork, and what there is must be used for our boys in France. Poultry alone can take the place of beef and pork, also many other foodstuffs. It's a patriotic duty as well as a profitable business. Get a —— incubator to-day, and start in business for yourself. Come and see our display and learn about the Guaranteed —— Incubators.

"The —— Incubator is guaranteed to hatch more chicks and stronger chicks than any other incubator; also requires no artificial moisture and requires no attention to the regulator from the time a hatch is started until it is finished. Over half a million of these incubators are in use by big and little breeders. So why not you play on the safe side, and join in the verdict of the user? Remember, the Big, Busy Hardware stands back of this guarantee.

"Incubator capacities—65 eggs, $15.00; 120 eggs, $26.50; 210 eggs, $35.00.

"All the biggest breeders in the country—and the smallest—use the ——. Anybody can run it; operates automatically and can't go wrong. Hatches every hatchable egg—more and better chicks than you can get from any other incubator, regardless of price. They are unquestionably the most successful hatching devices that have ever been on the market. The surety of these machines certainly make a good investment."

TIME TO PRODUCE

"Garden Time is Here—Get Busy," advise Merrill & Hubbard, hardware merchants, through their large advertisement in the local paper. "Let every true citizen stand by his country in her time of greatest need. More production—that's the word—more production. There is a spade for every patriot, and a hoe, a rake, or any kind of garden tool that's needed in the game of more production at Barrie's Best-for-the-money Hardware Store—Merrill & Hubbard. Perhaps you cannot go and fight, but don't you want to be one of those who will be able to say: 'We helped to win the war'? We have every kind of garden tool on hand and the prices are based on purchases we made a year ago, which is to your advantage." Then follows a list of articles such as rakes, forks, wheelbarrows, lawn mowers, incubators, brooders.

PUSHING FENCE SALES

The Lee Hardware at Stoney Creek, Ont., is making a strong bid for the wire fence trade of the district. They describe each particular style of fence and name the price at which it sells per rod. The list is quite complete. They also advertise it as "Freight Paid to You."

USED SPARE TIME TO INCREASE PAINT SALES

(Continued from page 41.)

the appeal of the man to men, which wins. This being undoubtedly true, don't you think an appeal at a paint-up and clean-up campaign meeting for a more universal use of paint would get people thinking along right lines in respect to this product?

Consider Relative Value of Paint

Paint to-day is the cheapest form of insurance a property owner can buy. If $10.00 worth of paint will save $100.00 worth of lumber for a period of 5 years against renewal, isn't it worth the money? Five years ago lumber which now costs around $40.00 per M could be bought for about $17.00 or $18.00 per M. Paint five years ago was $2.00 to $2.75 per gallon; to-day it is from $3.75 to $5.00, but the relative value is just as good as when sold at $2.75. The cost of paint to-day must be reckoned on its relative value to the surface that it protects and beautifies and when this angle of the paint situation sinks in, the retailer should not have to justify the prices that he asks, it must be apparent the value is there. The high price has frightened some merchants but there is no reason why it should. Sales to-day should be effected as easily and even more easily than a few years ago. Bring home the fact to the property owner that paint insurance is as essential as fire insurance. Paint insurance is taken out to protect property against what must be an inevitable loss—fire insurance against a possible loss.

As a last word, increase the average household use of paint in your territory from $1.88 to $3.00 this year. It can be done and if 1918 shows a 60 per cent. increase in this one department of your business, you have that much bigger objective for 1919. The time for big sales is right now and whereas an official opening might be deferred until your community paint-up and clean-up campaign opens, don't overlook the sales of to-day.

The live merchant must be in a position to meet outside competition or M.O. competition, otherwise he will lose the larger and best part of his paint business, and only get the pint and quart line. If there was more co-operation between the manufacturer and the merchant there is absolutely no reason why this competition could not be met successfully.

BRUSH STROKE FORMATION IN CARDWRITING

(Continued from page 45.)

paint dealers by asking for distemper colors in glass jars. These are already ground in water but you will find they need to be thinned down. They also need to be sized with diluted mucilage or gum arabic.

Fig. 1 shows a good method to start practising this alphabet. Pick out various strokes throughout the chart and practise them until each can be made fluently and without reference to the chart.

The lower line shows the first strokes of the letters to make. All down strokes are to be made first. From these you get the width of your letter; then you can add the cross strokes and spurs. None of the ends of these letters, either on the finished cards or on the chart, have been finished with a cross stroke. The square ends of the brush do this work.

In order that the brush keep this flat point, work the color into it on a piece of scrap cardboard. This will give it a chisel point all ready for lettering. After the brushes are washed out thoroughly in clean water draw lightly between the thumb and forefinger. This will keep it in the proper working shape ready for use.

The three completed show cards show a plain but very neat and attractive style of card. It is not advisable to use any fancy designs or floral decorations with a type like this as it is more or less of a fancy nature in itself and you are liable to overdo it to add anything else of a fancy nature.

This type lends itself beautifully to shading, as these completed cards show. The shadow makes the letters stand out in relief from the background.

A great many color schemes can be worked by using a colored or tinted cardboard. For instance, use a cream card with black letter and a light brown shadow or a cream card, dark brown letters and a light brown shade. Pale blue card, black letters with a medium blue for a shade. Gold makes a nice shade for any of these combinations.

A grey card with a black or dark blue letter shaded with white makes a good card.

Many other light tones of cardboard can be worked up in this manner. If you make the letter black and the shadow the same color as the cardboard, only about two shades darker, you won't go far astray.

EVENTS IN THE TRADE

BUSINESS CHANGES

Alix, Alta. — W. H. McKenzie, hardware, is discontinuing business.

Toronto, Ont.—Boeckh Bros .Co., Ltd., brush manufacturers, has changed name to Boeckh Co., Ltd.

Loverna, Sask.—Milne & Godfrey, hardware, have dissolved, J. G. Godfrey continuing.

OBITUARY

F. S. Wilson, of M. J. Wilson & Sons, hardware manufacturers, Ottawa, Ont., is dead.

GRANTED CHARTER

Winnipeg, Man.—The Dominion Metal Exporting Co., Limited, has been granted a Dominion charter.

CHANGE IN HARDWARE FIRM

Collier & Delany, Enchant, Alberta, have bought out Melvin Hill. The partners are S. D. Peacock, Lethbridge; J. J. Delany, of Delany & Rogers, Ltd., Barons, Alta., and H. J. Collier, of Enchant, Alta.

PERSONAL

M. G. McLeod, manager Beardmore Belting Co., Toronto, is spending a few weeks' holiday at Atlantic City, N.J.

R. H. Mulch, the new sales manager of the Chevrolet Motor Company, left recently on a six weeks' trip to the Coast.

E. C. Boeckh, president Boeckh Bros. Co., Limited, Toronto, has been spending the past couple of weeks at Atlantic City, N.J.

F. Funston, buyer Kennedy Hardware, Ltd., Toronto, is away from his desk due to illness. Mr. Funston has had to undergo a slight operation.

E. H. Teagle, formerly agent of the Imperial Oil, Limited, Windsor, Ont., has been appointed assistant manger at the Regina, Sask., branch of the company.

George Henderson, president and general manager Brandram-Henderson, Limited, Montreal, was in Toronto on a business trip on Tuesday of this week.

J. McNelly of the Alberta Linseed Oil Mills, Medicine Hat, Alta., passed through Toronto on his return home from South America, where he has been spending some months.

F. Turley, formerly assistant manager of the Imperial Oil Limited at Regina, Sask., has been appointed assistant manager at Calgary, Alta., replacing J. A. Boyd, made manager of the Winnipeg, Man., branch.

BECOMES GENERAL MANAGER MARKETING DEPARTMENT

Imperial Oil, Limited, announces the appointment of A. J. Wolcott as general manager of the marketing department with headquarters at the Imperial Oil Building, Toronto. All branches of the sales organization of the company will report to him.

A. J. WOLCOTT

Who has been appointed general manager of the Marketing Department of Imperial Oil, Limited.

Mr. Wolcott has for some time been manager of the Winnipeg division of Imperial Oil, Limited, and is known to many of the trade in Manitoba. He has built up and developed the company's business in that territory, following a wide and broad experience in the oil business in other fields. Mr. Wolcott's appointment is a popular one among executives and employees of Imperial Oil, Limited, where he is respected and liked by all with whom he has come in contact.

DIES FROM WOUNDS

Word has been received that Sergeant Gordon Stafford, who represented the Consolidated Rubber Company in Calgary, died of wounds in France on April 9. Sergt. Stafford was 27 years of age and enlisted from Calgary with the 50th Canadian Battalion. He went overseas about two years ago and had been in France for more than a year. Previous to receiving the wounds which proved fatal he had been laid up four weeks with trench fever. His father, who resides in Toronto, is the Western Ontario agent for the Singer Sewing Machine Company.

MONTREAL NEWS

C. T. Wales, of C. T. Wales and Son, general merchants at St. Andrews, Que., was a Montreal visitor.

Jas. G. Lewis, vice-president of Lewis Bros., Ltd., is spending a few weeks in Florida and other southern points.

W. F. Duffield, representing the Reading Hardware Company, of Reading, Pa., is a visitor to Montreal this week.

S. P. Stanford, purchasing agent for John Millen and Sons, is this week enlisting with the new Tank Battalion.

T. H. Jordan, vice-president of A. C. Leslie and Co., Ltd., is this week in Western Ontario, going as far as Hamilton.

The Brewer-Titchener Corporation of Cortland, N.Y., was represented in Montreal this week by Frank E. Howland.

G. W. Carter, of the Eagle Lock Co., New York, is a visitor to Montreal this week.

H. Kearns, sales manager for B. & S. H. Thompson & Co., Ltd., left for Winnipeg and Western points, where he will make an extended trip.

R. H. Monk, manager of the lead works division of Brandram-Henderson, Ltd., returned this week from an extended trip of several weeks to Western Canada points, going as far as Vancouver.

INCORPORATIONS

The Retlaw Hardware Company, Limited, of Retlaw, Alta., has been incorporated with a capital stock of $25,000. The officers of the company are Stanley D. Peacock, of Lethbridge, president; W. T. Rogers of Commerce, secretary-treasurer; and Clayton W. Johnston, of Retlaw, vice-president and manager.

WILL ENLARGE PLANT

Owing to large orders totalling $2,500,000 for forgings and castings from the United States the Dominion Foundries and Steel Castings Company of Hamilton will have to enlarge its present plant. The company also has large orders for locomotive and car castings and rail steel.

FIRE DAMAGES HARDWARE STORE

The hardware store of Armstrong, Smith & Dowswell at Regina was recently damaged by fire. The principal damage was through smoke and water. The firemen arrived on the scene soon after the alarm was turned in and succeeded in getting the fire under way. The blaze apparently started near the elevator at the rear.

HARDWARE FIRM IN NEW PREMISES

J. Moxon & Son, Picton, Ont., have moved their stock of general hardware, stoves and ranges to their new premises recently purchased and which have been refinished. The building was formerly occupied as a theatorium. Space has been provided in the rear of the store for the display of two automobiles.

SPORTSMAN'S SHOW AT MONTREAL

The First Annual Patriotic Sportsman's Show of Eastern Canada will be held in the Montreal Auditorium from Saturday, May 4 to 11, inclusive, and it is stated the list of exhibitors is growing daily. An orchestral concert will be given twice daily under the direction of Professor J. J. Gagnier and the entire proceeds from the sale of tickets will be devoted to patriotic and charitable institutions. The Imperial Order of the Daughters of the Empire Khaki League and School for Crippled Children have selling organizations already very hard at work and it is hoped that the funds of these institutions will be very largely helped by this exhibition. Manager T. C. Kirby is arranging many features in connection with the show.

FORM MOTOR LEAGUE AT ELMIRA

A branch of the Ontario Motor League was formed at Elmira recently with the following officers: President, O. H. Vogt; vice-president, A. Winger; secretary-treasurer, A. H. Steen; directors—M. Allgeier, O. H. Ruppel, A. Arnold, George Jung, J. Eisenbach, Harry Vice.

ELECTRIC SMELTING FURNACE STARTED

The Electric Foundries, Limited, has started operations at Orillia in their new electric furnace. The furnace has been charged and smelting operations begun. The furnace will use steel scraps from munition factories to produce a high grade of metal.

HARDWARE BROKER WOUNDED

Word has been received in Winnipeg that Capt. Geo. W. Endress has been wounded and is at the base hospital at St. Omer, France. Capt. Endress, who was a member of the firm of Moncrieff & Endress, Ltd., hardware brokers, of that city, enlisted with the Ninetieth Overseas Battalion under Colonel Munro.

Urge Increased Rate on M. O. Catalogue

Dominion Board of R.M.A. Presents Important Matters to Government—Ask Legislation to Increase Charges on Mail Order Catalogues

THE annual meeting of the Dominion Board of the Retail Merchants' Association was held in Ottawa last week, and for the first time in the history of the board there was a full representation from every province represented. The president of the association, Horace Chevrier, Winnipeg, presided at the meetings.

There were a number of matters of interest to the retail trade at large brought up, and the bulk of these formed the basis of representations to the various branches of the Government whose province included the matters under discussion.

Take Exception to Some Points in Bankruptcy Act

While the gathering went on record as favoring some Dominion wide bankruptcy measure, they took strong exception to many clauses in the proposed act now before the Government, and urged that before any definite action were taken on the matter that ample time should be given for a full and open discussion of the various problems involved, so that the law when passed should not bear unjustly on any one class or section. They were given every indication to believe by Sir George Foster that the matter would on their representation be laid over till the next session.

Merchants to Be Required to Keep Books

The matter of the necessity for the merchants keeping books in view of the regulations now in force was also brought to the attention of the Government. The members of the Government interviewed seemed surprised that some action of this nature had not been already taken and it was intimated that legislation would be introduced at the present session to deal with this matter.

Ask Increased Postage on M. O. Catalogues

A resolution urging the increasing of the rate on catalogues and parcels by post was presented to the Government, showing that these cost for delivery 27 cents per car mile, while they were charged for only at the rate of 16 cents per car mile, a direct loss to the Government of 11 cents. It was urged that the Government increase this charge to cover the actual cost of the service and also that it be made compulsory that mail order catalogues be mailed direct from the head office, instead of being sent by freight to some point within the first zone system and there distributed. Some members of the Government expressed the greatest surprise that such conditions existed, and promised that the matter would have an early consideration.

LETTERS TO PRISONERS

With regard to the arrangement instituted whereby correspondence of a private and family nature can be forwarded from individuals in Canada to persons in enemy and enemy occupied territory through the medium of Thos. Cook & Son, 530 St. Catherine St. W., Montreal, difficulty is being caused owing to persons remitting the charge for forwarding these letters (35c) by postage stamps instead of by means of a postal note for 30 cents with five cents in postage affixed thereto, according to the statement of R. M. Coulter, deputy postmaster-general.

The attention of persons sending such correspondence is particularly directed to this as in future where the charges are remitted by means of postage stamps the letters will be returned to the senders.

HARDWARE LETTER BOX

Dealers in Stove Repairs

Thompson & Sutherland, Westville, N.S.—Kindly give address of firm carrying repairs for New Empress range, formerly made by National Manufacturing Co.

McIntyre & Taylor, Toronto. In asking for stove parts, name of stove, date of stove, number of stove and series number should be given.—Ed.

CATALOGUES and BOOKLETS

Catalogue on Automobile Supplies

The Aikenhead Hardware, Limited, Toronto, has just issued a very complete catalogue showing their line of automobile accessories, which comprises 122 pages, well illustrated and nicely printed on calendered paper stock. The catalogue is for distribution to the trade.

* * *

Hints to Car Owners

The Thermoid Rubber Company of Trenton, N.J., has issued some tags for the use of dealers to tie on the steering wheel after new brake lining has been installed. There are eighteen inspections which the card advises should be made regularly, namely, storage battery, grease cups, springs, oil and gasoline connections, crank case, universal joints, differential and transmission, spark plugs, cylinders, valves, piston rings, wheels, water system, bearings, gasoline pipe, starter, steering wheel, brakes. The card advises the owner to watch his car if he wishes to get real service.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1425. **Wood-pulp.**—An English correspondent states that he is desirous of using the great opportunities he now has of adding wood-pulp to his present business and is looking out for some good firm or firms in Canada who desire to do a direct trade with British papermakers. He is prepared to work on commission terms only, and can produce the very highest references as to ability and integrity.

1427. **Grain elevators.**—Two Russian railway contractors are proposing to visit Canada with a view to getting in touch with Canadian manufacturers of grain elevator equipment and experts in the construction of grain elevators. They would like to receive communications from Canadian manufacturers who would be ready to consider proposals for the manufacture in Canada of grain elevator equipment.

1432. **Wringers and washing machines.**—Old established New Zealand agents, represented in Canada, desire price lists and best discounts for wringers and washing machines.

1433. **Chains, bolts and nuts, etc.**—A Glasgow firm wishes to get into touch with exporters of the above lines.

1434. **Wire, bright, annealed, galvanized, plain or barbed, and wire nails of all descriptions.**—A Glasgow firm wishes to get

1437. **Pulp and Paper Materials, etc.**—A general commission house in Boston, Mass., which has connections in England, wishes to arrange for connections with Canadian houses which could supply the following articles: Wood-pulp, talc clay, sulphite pulp, satin white and pigment colours, rags, groundwood pulp, cordage, clays, casein, boiler compounds, raw glue stock (such as scrap hides and bones), ultramarine, sizings, lumber, colours and tintings, chemicals, bleach, rawhide picker waste, glue, etc.

1438. **A Directory of Canadian Exporters.**—A commission house in Leeds, England, is issuing a publication entitled "Canadian Exporters to England (1918)". They offer to publish free of charge the names of any manufacturers or dealers in Canadian products who wish to export to the British market.

1440. **Foodstuffs, Paper and Manufactured Products.**—A commission merchant in Bordeaux, France, would like to make arrangements with Canadian exporters of foodstuffs, paper and other manufactured products to represent them in Bordeaux, France.

1441. **Spars.**—A Newfoundland firm is open to purchase twelve pitch-pine spars 70 to 80 feet long, from Canadian dealers. Correspondents should quote prices, f.o.b., Montreal or Quebec.

1442. **Mantles, etc.**—Canadian manufacturers of mantles, overmantles, picture frames, and picture-frame mouldings are inquired for by a St. John's dealer.

1545. **Brushes.**—A firm in Gloucester desires to get into touch with Canadian brush manufacturers, household and agricultural.

1546. **Binder twine.**—Canadian firms in a position to export binder twine are asked to communicate with a Gloucester firm.

1547. **Barbed wire.**—A Gloucester firm wishes to hear from Canadian exporters of barbed wire, thickly set 4 pt.

1548. **Fancy fencing.**—Manufacturers of above are asked to communicate with a firm in Gloucester.

1549. **Wire nails.**—Canadian manufacturers of wire nails are requested to communicate with a firm in Gloucester.

1550. **Wire fencing.**—A firm in Gloucester desires to import wire fencing.

1551. **Rubber hose.**—A concern in Gloucester is prepared to purchase ½-inch, ¾-inch, 1-inch, 1¼-inch rubber hose in 500-foot lengths.

1552. **Saws.**—Hand and cross-cut saws are required by a Gloucester firm.

1553. **Machinery.**—An engineering firm established in Durban, Natal, are prepared to take up agencies or purchase of any suitable machinery, except centrifugal pumps and agricultural machinery.

1554. **Machinery and mining specialties.**—A firm of engineers invite correspondence re agency or purchase on any line of machinery specialties or mining supplies.

1555. **Tractors.**—A South African firm of engineers ask for details from firms manufacturing crude oil tractors, suitable for hillwork ploughing on sugar plantations, and tractors for 2-foot gauge, powerful for hauling, to take grade 1.6, haul 40 tons on grade, 200 tons on level.

1556. **Lubricating oils.**—A Durham firm with long experience and established connections are prepared to take up agency of lubricating oils.

1557. **Tallow, palm oil, linseed oil, lubricating oil and fish oil.**—A London house company having a house in New York city wishes to secure supplies of the above articles.

1558. **Agency.**—A French commercial traveller familiar with the English, French and Spanish languages was accustomed before the war to visit every year the following countries: Egypt, Palestine, Syria, Turkey in Asia, Turkey in Europe, Roumania, Morocco, Greece and the Canary Islands. Since the outbreak of the war he has continued to visit Tunis, Egypt, Algeria, Morocco and the West Coast of Africa. He wishes to get into communication with Canadian manufacturers whom he might represent after the war. For France he requires the following articles: Leather, tanned; mineral oils; machinery of all kinds; wood-pulp, bleached or unbleached.

For Morocco he requires: Mineral oils; automobiles; well-digging machines; coal oil stoves; paints; agricultural machines of all kinds.

For Egypt he wants: Tanned leather; cutlery and household effects; coal oil stoves; mineral oils.

He asks that all catalogues, references and samples be sent in triplicate. He wishes to get into communication with manufacturers whom he might represent at present or after the war.

1559. **Picks, pick handles, etc.**—A Glasgow firm wishes to place orders for picks, pick handles, etc., for direct shipment to South Africa, and to receive offers from Canadian manufacturers in a position to make prompt shipments.

1562. **Oxides of nickel.**—A Midlands manufacturing company desires the addresses of Canadian producers and shippers of oxides of nickel.

1563. **Hardware.**—A London merchant wishes to arrange with a house or individual in Montreal to purchase Canadian hardware upon his behalf.

1570. **Manufacturers' agents.**—An Australian house, formerly agents for a New York commission house, desires to receive correspondence from leading Canadian manufacturers (not already represented in the Commonwealth) with a view to direct representation. They suggest that the time is now opportune to make definite arrangements in view of trade after the war.

1574. **Formaldehyde, 40 per cent.**—A Melbourne firm asks for samples and lowest wholesale f.o.b. steamer quotations on formaldehyde in wood casks.

1575. **Wood alcohol.**—An Australian firm, doing an extensive business in wood alcohol, invites samples and f.o.b. steamer quotations for large quantities of this spirit. The packing to be in casks, or preferably in steel drums containing up to 100 gallons. The samples must first be submitted to Government inspection and analysis before permission to import will be given.

1576. **Aceto-arsenite of copper.**—A firm in the South of England asks for the addresses of Canadian manufacturers who can supply genuine aceto-arsenite of copper (emerald green) dry colors, for which they are prepared to place an order.

1580. **Nickel oxide, white powdered arsenic, sodium acetate.**—A firm in Liverpool wishes to get into communication with exporters of the above lines.

A BUSINESS BUILDER OF POWER

(Continued from page 53.)

Head Office in Toronto

As a number of the companies that were taken in were working in Toronto and Hamilton, and these districts, Toronto at first was the head office, but the most of the capital invested came from Montreal, and it was not long before the office was moved to that city. Until 1890 the president of the Bell Company was Andrew Robertson, who in the eighties was connected with many of the biggest business enterprises in Montreal, dry goods, etc., and was Chairman of the Harbor Board, and held other prominent positions. Up to 1890, Mr. Sise was the vice-president, and on the death of Mr. Robertson succeeded as president of the company.

During all the time of his connection with the Bell Company, Mr. Sise exhibited singular devotion to the interests of his company, and constantly refused invitations to identify himself with the directorate of a number of leading companies. To the end he held out, and the only companies with which he became connected were those that were closely identified with the Bell Company.

An Unobtrusive Figure

One of these was the Northern Electric & Manufacturing Company, which was organized for the purpose of protecting the numerous patents of the Bell Company, and to manufacture them. In 1899 the Wire & Cable Company was formed and the amalgamation of the two took place in 1913, under the name it holds today, the Northern Electric Company, of which company Mr. Sise occupied the same position as he did latterly with the Bell Company. Outside of these Mr. Sise was personally little known—by no means a familiar figure on the street.

As head of a great public utility Mr. Sise throughout his long connection with the company showed a high regard for the duty that devolved on the company towards the public it served. As he remarked three years ago: "As the population and business of Canada increase, the duties and responsibility of the company towards the public will increase, and will demand from those in charge of its affairs continued and arduous work."

A Business Policy of Service

In the words of one of those who had been associated with him for many years, "From the very inception of the business he maintained that service must come before economy; that no bargain was a good bargain unless it benefited both parties, and that a public service corporation must be a good public servant."

The personal relations of Mr. Sise with with the staff of his own company were of the kindliest nature. A strong loyalty was developed. He was full of human feeling, and many an old employee visiting the city, and dropping into the office of the President with some diffidence, was received by name and welcomed warmly.

Three sons of the late Mr. Sise are connected with the company, C. E. Sise, jr., a graduate in science of McGill, who is general manager; E. F. Sise, president of the Northern Electric Company; and Capt. Paul F. Sise, general manager and vice-president of the Northern Electric Company, who is attached to the British Recruiting Mission in New York.

THE CLERKS DEPARTMENT

A BUSINESS BUILDER OF POWER WAS C. F. SISE

Life Story of Late Chairman of Bell Telephone Forms a Remarkable Record of Business Achievement Reared on a Foundation Laid at Fifty

BUILDING of the business organization of the Bell Telephone Company of Canada—the second organization of its kind in the world—was begun, continued, and brought to its present stage of progress by a sea captain, a man with absolutely no previous experience in the technical departments of the vast work he undertook. Not many business men were aware of the fact. Perhaps the very unostentatious character of the business builder behind the Bell Telephone Company of Canada may account for this. And yet what an adventurous career that quiet, persistent personality played great part in before he came to Canada and began his remarkable work as organizer of the second largest public utility concern of its kind in the world.

Behind the Blockade Runner

There's a savor of the salt sea and the daring it demands in the fact that the late Charles Fleetford Sise, the subject of this sketch was one of the personalities concerned with the direction of the blockade runner "Alabama." Jefferson Davis, President of the Southern Confederacy, saw in Charles F. Sise the executive power of which his life has given such ample proof, and made him his private secretary. In the Indian Mutiny, and in the Crimean War also Charles F. Sise had his part, small as it may have been perhaps. (And yet he was so quiet about his achievements, none can say how important any of these more youthful experiences of his may have been).

Then, nearly fifty years of age, and with a record of activity behind him that might serve many a good business man for a lifetime, Charles F. Sise arrived in Canada, to begin what many Canadian men of affairs would readily call his life work. More aptly it might be termed his life's crowning achievement. Here in detail is his story:

Charles Fleetwood Sise, chairman of the Bell Telephone Company of Canada, and for thirty-five years either vice-president, or president of the company, passed away on Tuesday 9th April, in his eighty-fourth year. The latter half of his life, although spent in a calm business-like atmosphere, contained elements that are in their way as remarkable as the adventurous experiences of his more youthful years.

He was a sea captain when he was only twenty-one, and he did not begin his business life until he was forty-seven years old. That is as far as the Bell Telephone Co. of Canada, his great business achievement is concerned. Charles F. Sise was not merely a master mariner. He was a Master Pilot amongst the many perilous channels of business. Beginning his organization of the Bell Telephone Company of Canada, without technical training in the line, he leaves it after thirty-eight years' service unsurpassed (except by the United States Co.) for number of customers per thousand of population.

For a man who began business at 47 years of age as a novice, and had only a comparatively sparsely settled country for his field, the success of Mr. Sise may be considered outstanding .

Figures Tell the Story

When at the annual meeting of the company, three years ago, he resigned his position as president, which he had occupied since 1890, he referred to the growth of the organization with which he had been identified since its infancy. In the first year the paid-up capital of the company was $377,600, and the total assets $403,324. Thirty-five years later the paid-up capital was $18,000,000 and the assets $40,852,000. In 1880 the total number of telephone stations was 2,100. By 1915 the number had grown to 237,068. In 1880 the number of employees was 150; this rose to 7,836.

Although Mr. Sise had wished to be relieved of the heavy duties of the office for years past, it was not until three years ago, when he was over 80 years of age that the Board consented.

A Judge of Men

The choice of the directors on that occasion is itself a tribute to one of the outstanding characteristics of the late President: his ability to secure for his staff men who would be able to keep pace with the growth of the business and shoulder constantly increasing responsibilities. The new President was L. B. McFarlane, who thirty-eight years ago was "taken over" by Mr. Sise when the new Bell Company absorbed the telephone business of the Dominion Telegraph and the Montreal Telegraph Companies, and he became Manager of the Eastern Division.

It might be noted here that the secretary of to-day, W. H. Black, was in charge of the correspondence of the small company of over thirty years ago; that R. F. Jones, Manager of the Eastern Division, was then an office assistant; that W. G. Slack, the Treasurer of to-day, was over thirty years ago the accountant of the company; and that A. T. Smith, Division Superintendent, and K. J. Dunstan, Division Manager, both of the Western Division, Ontario, have been in the service of the company for over thirty years as well.

A Shipowner's Son

Mr. Sise was born in Portsmouth, New Hampshire, on Sept. 27, 1834, the sixth son of the late Edward Fleetwood Sise, who was a merchant and shipowner. Going to sea he was appointed a captain before he was twenty-one years of age, and for some years commanded vessels in the Atlantic, Pacific and the Australian trade. Later he took charge of his father's shipping and cotton business at Mobile and New Orleans. During the Indian Mutiny he was ill in India, whither he had gone in his merchandising work. The estate of his father-in-law adjoined that of Jefferson ("Jeff.") Davis. He came under the eye of the famous Southern leader, was appointed his private secretary, and engaged in many delicate missions for him.

The Alabama Episode

One of these was in connection with the fitting out of the "Alabama," which ran the blockade and sunk Northern merchantmen, and incidentally cost the British Government some $15,000,000 in claims. After the war he went to Liverpool, England, to manage that branch of his father's business, and he came to know William Ewart Gladstone intimately, living just two doors away. Some time after he entered the fire insurance business and came back to the United States as agent for the Royal Insurance Company. When the Royal Canadian Insurance Company was formed, Mr. Sise took over the management of their United States business with head office at Boston. Just about this time Alexander Graham Bell was perfecting his devices for telephoning, and an American Company, the American Bell Telephone Company was formed.

The Bell System Begins

In Canada various patents were being operated by a number of companies at different points in Ontario, Quebec and the Maritime Provinces. In Quebec there were two chiefly, the Dominion Telegraph operating under the Edison patent, and the Montreal, with the Blake. In Ontario, Alexander Graham Bell had handed over his patents to his father, in some cases even before the patents were issued, and a number of companies were engaged under rights sold by him. It was decided by the interests in the United States that an effort should be made to consolidate the business in Canada, and operate all under the Bell patents, and Mr. Sise was asked to go over and do what he could. He consented and went over to Hamilton, Toronto, Montreal and other centres and the Bell Telephone Company of Canada was organized the next year, 1880.

(Continued on page 52.)

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

BRAKE SHOES FOR FORD CARS

The Adamson Manufacturing Company of Hamilton, Ont., is placing on the market a new type of brake shoe for Ford cars in the lined and unlined pattern. It is claimed for these brake shoes that the faces which come in contact with the expanding cam are hardened. This, it is held, prevents excessive wear at this point and adds materially to the life of the shoe. It is also stated that this feature causes the brakes to operate more freely. The lined brake shoes, it is asserted, are faced with the best grade of brake lining, having wire insertion. The lining is securely riveted to the shoe, which has all the qualities of the unlined type.

Adamson Unlined Brake Shoe

Adamson Lined Brake Shoe

HOT BLAST HEATER

The Sheet Metal Products Company, 199 River Street, Toronto, have recently placed upon the market a hot blast heater. It is claimed for it that it is a most efficient heater and of very attractive appearance, having blue enamel chimney and top, with black japanned fount. It is asserted its construction is such as to give clean heat at very low cost, 1 gallon of oil burning for a period of 27 hours. Heater specification: Blue enameled steel chimneys, blue enameled tops, nickeled Alaska handles, black japanned founts, two 4½-in. wicks, 2⅛-in. filler screws.

New Hot Blast Heater

TWO-PIECE UNIT LIGHT

A well-established lighting principle treated in a new and very pleasing manner is embodied in the new Jefferson two-piece unit manufactured by the Jefferson Glass Company, Follansbee, W. Va., which recently made its premiere before architects.

In this unit, it is claimed, the popular and effective transmission, reflection system is seen at its best as it is reproduced in the well-known moonstone glass.

It is asserted the high light transmission and diffusion qualities of the glass embodying a scientific design permit increased lighting efficiency and at the same time eliminate the presence of shadows or dark spots on the ceiling, walls or floor, which hitherto has been practically the only disadvantage of the transmission-reflection system.

Another feature which, it is claimed, will hold particular appeal to the architect is the wide variety of treatment. The unit can be secured in adaptations from all the period styles as well as other popular motif designs.

An interesting booklet describing the unit and listing the styles in which it is furnished is now being prepared. Copies can be reserved by writing the manufacturers.

DIMMER FOR HEADLIGHTS

The Defiance Welding Company, Defiance, O., is placing on the market the Hoko Dimmer. This device is designed primarily for Ford cars. It is claimed for it that it is the only one having the specially constructed, indestructible barrel resistance coil. It is warranted not to affect adversely the magneto or any part of the ignition or lighting system. It is attached to the car by clamping it over the steering post, after which wires are connected.

ELECTRIC SOLDERING TOOL

The Clemens Electrical Corporation of Canada, Hamilton, Ont., have placed on the market a new electric soldering tool which it is claimed revolutionizes the method of soldering. This tool, which is made in several styles, has, it is claimed, under authentic tests, saved from 40 to 70 per cent., time that was taken to do the work previously. The makers state that the secret of the efficiency of the iron is that it heats only while in contact with the work, and then heats almost instantaneously. These tools give continuous conducted heat and give it faster than it can be taken away by the metal on which it is used.

The makers further state that the

Clemen's Electric Soldering Tool

soldering tools have overcome the many disadvantages found in old style electric or gas irons. They have been developed and perfected after careful study and extensive tests in a wide variety of industrial plants. They develop a direct heat (approximately 3,300 degrees centigrade).

One of the many advantages claimed for the J. C. tool is its lightness and simplicity. They do not require skilled help; they can't burn out, and the only parts that require to be renewed are the carbon contacts.

Jefferson Two-Piece Unit Light

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A DECLINE of 5 cents per gallon from the high mark on linseed oil has been made during the week, which results in a narrowing of the range of quotations formerly prevailing. Hopes are held out that the opening of navigation will see a greater movement of seed from the head of the lakes. In some quarters it was thought that boats would not be used in the flax service. However, with boats moving, the strain on the railways will be considerably eased, and all rail shipments would likely come through much faster.

Turpentine has also receded from the high point in last week's quotations, the decline amounting to 2c per gallon. This also provides for a narrowing of the range somewhat. In some quarters stocks are reported light and further supplies not reaching the market any too promptly.

The strength of the tin market is revealed in further advances during the week. Supplies are reaching the vanishing point, and dealers are limiting orders to a one-ton basis to provide for a more nearly equalized distribution. Permits are not being granted for shipments from Great Britain to any extent, and the future of this metal, as regards supplies, is by no means bright. In some quarters a substantial advance in solder has followed the upward trend of tin.

A new list has been adopted on plate glass, prices established being on a square foot basis, and terms of selling changed somewhat. The new list and discount provide for an advance.

An advance of 1½ to 1¾c in some lines of waste has been recorded during the week. Wool waste is up, and wipers, white quality, are at higher levels. Some lines of ready roofing have registered a substantial advance, and other lines on which higher prices have been established are food choppers, padlocks, jute and hemp packing twines. Business generally is being maintained on a good basis, spring lines going forward in splendid quantities.

MONTREAL MARKETS

MONTREAL, April 25.—Prices are held here for the most part on general hardware lines. There are a few changes on some odd lines. Vulcan chain tongs are advanced about 10 per cent. Some lines of warehouse trucks are marked up and in one quarter there is a 15 per cent. advance on hammocks. Sandpaper in reams also is firmer. Quotations have been withdrawn on various makes of padlocks. Ingot tin is soaring to the highest levels yet known, and is reported to be scarce. Pig lead is easier. Swedes and Norway iron have advanced from $11 to $12 per 100 pounds. Slight changes have been made in jute packing, and Russian soft fibre is up 1c to 3c per lb. Trade is reported good in some quarters and a better tendency is expected with the opening of navigation. Garden tools are going out very freely.

Fan Belts, Tire Holders, Curtain Fasteners Up

Montreal.

AUTO ACCESSORIES.—An advance has been made in the price of fan belts for Ford cars of the fabric make. The 1916 model is selling at 24c each for lots of 100; 26½c each for lots of 25, and for smaller lots the price is 28c. The corresponding prices for the 1917 model belts are—30c, 33c and 35c each. Leader basket type rear tire holders are selling $3.88 in lots of 24; $4.22 in lots of 6; and for single holders at $4.50 each. The advance is a little less than 5 per cent. Curtain fasteners have also been slightly advanced, but this is very small.

Clutch Controls, Anti-Rattlers, Wrenches Up

Montreal.

CLUTCH CONTROLS, WRENCHES UP.—Clutch controls have been advanced this week, and this applies to these used on Ford cars. The list prices of 57c, 53c and 49c are subject respectively to discounts of 33 1/3, 37½ and 42½ per cent. as to quantities of 96, 24 and lesser lots. This represents about 20 per cent. advance on list. Anti-rattlers for radius rods are advanced through a revision of the list, the net advance being about 5 per cent. Carll wrenches with thin jaws are advanced in the 6-inch size to $1.15 for lots of 48, $1.25 for 12, and $1.33 for small lots, with the usual discounts applying. The net increase is around 5 per cent.

Ignition Coils, Jigs, Spring Cotters Up

Montreal.

IGNITION COILS, SPRING COTTERS.—Among the week's advances in automobile accessories is that of the price on Vibrator-les coil ignition for Ford cars. The two styles, for the regular and also for right-hand drive cars, are listed at $24.75, with a discount of 25 per cent. The old trade price was $21, with the same discounts. Rebabbitting jigs for Ford connecting rod bearings are listed at $2.93, against the former price of $2.80. The discount is 10 per cent. to the trade. Campbell's spring cotters are also advanced, and new list prices are available with the usual discounts of 33 1/3 to 42½ per cent., according to quantities bought.

Chain Tongs Up; Padlocks And Chain

Montreal.

CHAIN TONGS, PADLOCKS, CHAIN.—Among the revisions this week, and all of which constitute advances, are those of a 10 per cent. increase in the price of vulcan chain tongs and coil and trace chains, which also have advanced with one jobber 10 per cent. While there have been some revisions in the price of padlocks, two firms have withdrawn their prices for the present, and this presages a change in the way of an advance.

Auger Bits Higher, Hammocks, Trucks, Etc.

Montreal.

AUGER BITS, HAMMOCKS, TRUCKS, ETC.—One jobber has reduced his discounts on Irwin auger bits this week from 22½ to 15 per cent. Prices on hammocks have been altered, the change representing a 15 per cent. advance. Several sizes of warehouse trucks have been advanced too among these, the following representative prices applying:—No. 1 half-bound, formerly $6, has been advanced to $6.75; No. 2, from $7.80 to $9, and No. 3, $11.45 to $13.15 each. The full ironed comparative prices are respectively as follows for the three sizes:: From $6.60 to $7.50; from $8.95 to $10.35, and from $12.20 to $14.05. Sandpaper in reams has been advanced in one quarter by a change of discount from 15 per cent. to 10 per cent.

Factory Milk Can Trimmings Advanced

Montreal.

MILK CAN TRIMMINGS.—An important change has been made effective in the price of factory milk can trimmings through a change of discount. This has been holding at list plus 30 per cent., and the new price calls for 50 per cent. advance over list. The increasing scarcity and the high price of block tin and the scarcity and high price of tinned iron is the assigned reason. Coming as it does at the beginning of the cheese factory season this is a change of much importance.

Some Stove Business With Fall Orders Coming

Montreal.

STOVES, ENAMELEDWARE, ETC. —There is some business for stoves from day to day, and orders are filled at present without difficulty, say the manufacturers. There has been ample material in some quarters for manufacturing the line to this date, but what the future will develop is uncertain. Orders are coming forward for heaters to be shipped next fall, and these orders are being secured from various parts of the country. Enameledware and galvanized goods are moving along fairly well, and all prices are fully maintained.

Gasoline Unchanged; Lubricating Oils Up

Montreal.

GASOLINE, COAL OIL, LUBRICANTS.—There is a good demand now for gasoline and the number of cars in use is daily increasing. Prices have been held unchanged at 34c per gallon for motor gasoline and for coal oil prices are also held at 19c for Royalite and 22c for Palacine and Electroline. The advance referred to in last week's issue of HARDWARE AND METAL for lubricating oils has been made effective, the increase being 2c per gallon all around.

Soft Fibres Higher; Rope Holds Unchanged

Montreal.

ROPE AND CORDAGE.—The position on rope is one of unchanged prices, but the markets are firmly held. Soft jute and Russian fibres are up, with an advance of from 1c to 3c per pound. Sales are just fair, these being of a sorting nature for the most part. Announcement was just made that there is a strong possibility of large supplies coming in from the Mexican centres in the course of a few months to the States, large supplies having accumulated there and arrangements for better trade agreements being thought possible now than for some time past. Sisal is selling here on the basis of 27½c, British Manila 33c, and pure Manila 39c lb.

Nails Ready For Shipment Outside

Montreal.

WIRE NAILS AND WIRE.—There is a fair demand for nails in a general sense. For delivery as soon as boats are available a great many orders are held, and there will be quite a considerable amount of activity in the course of another ten days or so. Some water routes will be open next week, and this will have a desirable effect on business from points served by these routes. Wire nails are selling at $5.25 base, cut nails at $5.60 base per 100 pounds, and standard smooth steel wire at $6.25 per 100 pounds base.

HARVEST TOOLS ADVANCE

As HARDWARE AND METAL goes to press a change in discounts applying to harvest tools has been made, which provides for an increase in prices. This is due to the recent heavy advances made in handles. Discounts now ruling on Waverley, Welland Vale, Rixford, Maple Leaf and Bedford, is 17½ per cent., and on Samson 12½ per cent.

Swedes And Norway Iron Advanced; Trade Fair

Montreal.

IRON AND STEEL.—The usual grades of iron and steel are in fair demand and prices are maintained without change. The tremendous demand that is now made upon supplies for Government purposes across the line has taken a very large percentage of available stocks. Here there is a fairly active demand for iron and steel bars in a sorting way only. The price on Swedes and Norway iron was advanced from $11 base to $12 during the week.

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25

Black Diamond cast steel, lb.	0 20-0 21

Sheet Prices Hold With Normal Trading

Montreal.

SHEETS AND PLATES.—With demand fair and prices held unchanged there is much the same condition with regard to plates and sheets. It is still difficult to get supplies forward of some gauges, while fairly good stocks are maintained of other sizes. It is altogether likely that there will be a larger demand for some of the regular gauges of sheets as the season advances, for there is much work of a necessary nature each season that has to be done. Prices are as follows:

BLACK SHEETS—		100 lbs.
10 gauge	$8 00	$8 75
12 gauge	8 65	8 85
14 gauge	8 80	9 00
16 gauge	9 00	9 15
18-20 gauge	9 25	9 25
22-24 gauge	9 40	9 60
26 gauge	9 45	9 75
28 gauge	....	9 90
10¾ oz. (28 English)	10 55	10 75

GALVANIZED SHEETS—	
10¾ oz.	$10 00
28 ga.	9 65
26 ga.	9 25
22 and 24 ga.	9 05
20 ga.	8 85
18 ga.	8 85
16 ga.	8 70

Not Much Movement Of Old Material Yet

Montreal.

OLD MATERIAL.—There is not a great deal of movement, say the dealers in old material. The prices are well maintained, notwithstanding, and for the most part these will perhaps hold in this position. Heavy cast iron is as firm as any item in the list, and the prices being paid for this are high. There is little inclination toward change at present for brass and copper scrap.

Tea lead	$ 0 05	$0 06½
Heavy lead pipe	0 06¼	0 06½
Yellow brass	0 13½	0 14
Red brass	0 22½	....
Light brass	0 08	....
Scrap zinc	0 05½	0 06
Heavy copper	0 22	0 23

Old rubbers, boots and shoes	....	0 08½
Overshoes, lumbermen's rubbers boots	0 07	....
Bicycle tires	0 04¼	....
Auto tires	0 04½	0 05½
No. 2 busheling	13 00	14 00

Solder Goes Higher; Lead Products Hold

Montreal.

LEAD PRODUCTS.—The pig lead market being easier, there is a tendency to small revisions on manufactured lines. These will probably be considered if the pig lead market declines to any extent, although a small change would not be likely to affect these quotations. In view of the strong position on ingot tin, strictly half-and-half solder has advanced 2c to 50c per pound. Other lines are held as quoted below.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.	....	0 12
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	....	0 11½
Lead sheets, 4 to 8 lbs. sq. ft.	....	0 11

Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.

Solder, strictly, lb.	....	0 50
Solder, commercial, lb.	....	0 44
Solder, wiping, lb.	....	0 44
Zinc sheets, casks	0 26	0 30
Do., broken lots	0 28	0 32

Tin Reaches Record Price; Lead Weaker

Montreal.

INGOT METALS.—The feature of the week is the upward trend of tin, which has again gone skyward. The rise was sharp, and is due to the continued scarcity and the failure of certain shipments to turn up. The high price of £343 per ton was reached in London during the week, and one day's advance was over £10. The commodity is scarce in London, too, are well as here. Lead is easier, with a weak undertone, and other ingots are unchanged in price.

COPPER.—There is a steady amount of trading now that the fixed price is understood. Lots may be had at from 29c to 32c per pound as to quantity wanted. Sales of this in March were better than usual.

TIN.—The very firm position of tin is noticeable in New York, where as much as 95c per pound was paid for Chinese. While permits have been issued for the importation of tin from England, supplies have failed to arrive as expected, and the market is barer than it was. On a light supply trading here is being done from $1.05 to $1.10 pound.

LEAD.—The position is some easier in view of the prices across the line and also as a result of little trading. Price quoted, 9c pound.

SPELTER.—There is much fluctuation in the New York markets and demand here is very light. The price quoted is 9c pound.

ANTIMONY.—Not much trading in this commodity, and the prices range at 14c to 16c per pound, according to quantity.

ALUMINUM.—With United States Government prices fixed there is little change here and trading is limited at 55c to 60c pound.

TORONTO MARKETS

TORONTO, April 25.—There have been few price changes during the week, all markets holding firm, with some advances recorded and one reduction. An advance in wool waste has been made and white wipers are up 1c per pound. Some lines of ready roofings have gone to higher levels. A big advance in tin has been made and supplies are reaching a pretty low level in some quarters. Other metals are inactive and weak. In some quarters, solders have registered further advances. Sheets show no further change for the week, a good demand existing for heavy gauges but comparatively little movement in the lighter gauges. Business generally is good, spring lines moving forward pretty freely.

Wire Wheels Make Advance; Oil Cloth Binding

Toronto.

WIRE WHEELS, OIL CLOTH BINDING.—New prices have been established on House wire wheels for Ford cars at considerably higher levels. These are now being quoted per set of 5, black or white enamel finish, $100.00 list less 20 per cent.; 6 sets, 20 and 5 per cent. The former list was $90.00 with same discount applying.

Oil cloth binding in 50 ft. coils is now being offered as follows: Brass, 9/16 in., $2.75 per coil; ¾ in., $3.25; ⅞ in., $4.00; zinc, 9/16 in., $2.50 per coil; ¾ in., $2.75; ⅞ in., $3.00.

Valve Grinders Up; Gasoline Gauges Too

Toronto.

VALVE GRINDERS, GASOLINE GAUGES.—A substantial increase in list price applying to the Marvel valve grinder has been put into effect, the former list of $4.50 being raised to $5.25 each. No change in discounts has been made of 25 per cent. single lots; twelve 30 per cent., seventy-two 35 per cent.

Gem gasoline gauges, which were previously listed at $1.50 are now offering at $1.75 each, with a discount of 25 per cent.; in lots of twelve 30 per cent.; in lots of forty-eight, 35 per cent.

Padlocks Have Advanced; Auger Bits May Rise

Toronto.

PADLOCKS, AUGER BITS.—An advance of approximately 10 per cent. in all lines of padlocks has been made. The steady advance in steel and brass with increase in cost of production are assigned for this move.

The situation in respect to auger bits, car bits and ship augers is one of extreme firmness and there are indications that an advance in the Irwin line may be put into effect. This line has held on a steady, unchanged basis for some time past and the new prices, it is thought, will range about 10 per cent. higher than present quotations.

Food Choppers Make Further Advance

Toronto.

FOOD CHOPPERS.—A further advance is provided for in new prices issued on food chopers during the week of between 5 and 10 per cent. The quotations now being made are: Universal, No. 0, $16.20 dozen; No. 1, $20.70; No. 2, $25.20; No. 3, $33.40; Gem, No. 16, $14.00 dozen; No. 20, $21.00; No. 22, $26.25; No. 24, $25.70.

Sand Paper Lower; Fly Swatters To Advance

Toronto.

SAND PAPER, FLY SWATTERS.—At least one line has registered a decline during the week, that being B. and A. sandpaper, which is about 5 per cent. lower than former levels.

There are indications that an advance in some lines of fly swatters may be necessary, but as yet no details are available as to just how much this may be though it is thought new prices will be at considerably higher levels.

An advance in Mendets will very likely result in new resale prices being established. The 10c size is now selling to the trade at $1.00 and the 25c size at $2.60 dozen.

Instrument Boards Up; Hemp Twine

Toronto.

INSTRUMENT BOARDS, HEMP TWINE.—New prices to dealers representing an advance have been established on instrument boards of $1.50 each. This affects the leatherette and natural oak finish, stained walnut or mahogany.

Advances have been registered in practically all lines of ordinary packing twines, comprising jute and hemp. It is said that some lines of hemp twine are practically unprocurable at present. One line selling to the retail trade in the hemp is the Atlas, which in ¼ lb. balls is now quoted at $1.25 dozen.

Waste Goes Higher; Oakum Unchanged

Toronto.

WASTE, OAKUM.—An advance averaging about ½c per pound has been recorded in some lines of waste during the week. Wool waste has all advanced and wipers, white quality, is about 1c per pound up. Prices established are now on the following basis: 1X, 17c pound; 2X, 18c; 3X, 20c; XC, 16c; polishing, 21c; colored wiping, No. 1, 14c per pound; No. 1A, 11½c; No. 1B, 10½c; No. 5, 15c; No. 7, 13c. The demand continues good and supplies ample for requirements.

Oakum remains unchanged at declines registered last week. Business is down to a somewhat easier basis and orders are being handled with a reasonable degree of promptness. Prices will be found in current market quotations.

Higher Prices Established On Ready Roofing

Toronto.

READY ROOFING, CEMENT.—Higher prices have been established in some quarters on ready roofing, the present basis being considerably higher than quotations formerly ruling. New prices established on the Amazon are for 1-ply $1.95; 2-ply, $2.25; 3-ply, $2.55 per square; on the Everlastic, new prices are: 1-ply, $1.65; 2-ply, $1.95; 3-ply, $2.25 per square. No change on other lines has been reported as yet.

A fair demand is apparent for cement and reports are to the effect that business is at least equal to April one year ago. Plaster of Paris shows no disposition to change in price. Supplies have reached the market, enabling distributors to clean up back orders and stocks are in fair shape. Shipments from the mills are uncertain owing to transportation difficulties which still are manifest.

Lubricating Oils May Advance; Refined Firm

Toronto.

OILS, GASOLINE.—The situation in respect to lubricating oils is one of ex-

treme firmness and advances ranging from 2 to 3c per gallon and up are expected to materialize. The question of supplies is becoming increasingly difficult and the future in some lines extremely uncertain.

Refined oils are enjoying a splendid sale and the market remains very strong. Orders are going forward freely for both coal oil and gasoline. Prices for the week remain the same, Palacine and Royalite coal oils being sold at 21c and 18c per gallon respectively. Gasoline is also unchanged at 33c per gallon.

Stoves Moving Forward Freely; Enamelware

Toronto.

STOVES, ENAMELWARE.— The heavy demand for all summer lines of stoves continues good and booking orders are being shipped out in large quantities. Business on stoves and ranges continues to show some improvement, though the question of future supplies grows increasingly difficult. The situation in respect to stoves is covered in a special article elsewhere in this issue. Enamelware and tinware are enjoying a very satisfactory demand.

Nail Situation Remains Firm, Unchanged

Toronto.

NAILS, WIRE.—A very firm situation prevails in respect to wire nails and indications are that a very fair volume of business is being transacted. No change in the base price of $5.20 per 100 pounds has been made. Cut nails are also unchanged for the week, the base remaining at $5.65 per 100 pounds. Smooth steel wire at $6.25 base per 100 pounds has held steady.

No Change Marks Iron and Steel Situation

Toronto.

IRON AND STEEL.—Nothing of a particularly interesting nature has marked the situation in respect to iron and steel. Stocks are in fair shape and supplies are coming along though none too rapidly. A fair demand continues and prices have held firm and unchanged at bases shown herewith:

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75

Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Firm Situation Prevails In Corrugated Sheets

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—The position of corrugated sheets is by no means one of extreme activity, though some movement is noticeable. Orders arrive in fair numbers but weather conditions lately have restricted building operations which seemed in a fair way toward getting started nicely a couple of weeks ago. Prices are held firmly at list and discount shown below. The movement of eavetrough and conductor pipe is somewhat freer and improved weather conditions would help considerably with these lines. Prices in current market quotations show no change.

TORONTO—	Per 100 Sq. Feet Galvanized	Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25
No. 26 gauge	9 00- 9 50	7 75- 8 25

No. 20 gauge	19 00-	16 50
No. 18 gauge	23 00-	20 00

Discount 7½%.

Sheets Hold Steady; Heavy Gauges Moving

Toronto.

SHEETS, PLATES.—Black sheets have held steady at decline registered last week and galvanized are also in a firm position. A good demand for heavy gauge of black sheets and plates is manifest and orders are going forward in good volume. Supplies are reaching the market in very good quantities though the lighter gauges in both black and galvanized do not appear to be rolling as freely as a couple of weeks ago. Stocks, however, are in very fair shape and orders are being taken care of promptly.

BLACK SHEETS—		Per 100 lbs.
10 gauge	....	$9 50
12 gauge	$7 55	9 60

14	7 85	8 10	9 35

NEW BASIS FOR SCREW HOOK AND STRAP HINGES

New prices are to be established on screw hook and strap hinges, which will provide for a new method of selling. In the past it has been customary to sell these by the pound, but the prices now under consideration will be figured on the basis of dozen pairs. It is felt by the manufacturers that this method of handling will prove far more acceptable from all standpoints, and retailers will undoubtedly welcome this move owing to convenience in selling to their trade.

No Change In Wrought Iron Pipe; Boiler Tubes

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—No change has been made in wrought iron pipe and the demand runs along in comparatively narrow channels, though in some quarters a fair movement is reported. Difficulty in getting supplies of raw materials continues to manifest itself, though present stocks of pipes are in fair condition. A car of boiler tubes has reached the city but the distribution may be said to be under Government supervision. No change in quotations shown below is apparent. Prices on wrought iron pipe appear in current market quotations.

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00

3½ inch	77 00	60 00
4 inch	90 00	75 00

Solder Makes Further Advances

Toronto.

LEAD AND ZINC PRODUCTS.—Higher prices have been established in some quarters on solder, due to the increasing strength of the tin market and the scarcity of this metal. Present quotations adopted, which provide for a wider range, are:—Guaranteed, 53c to 58c per pound; strictly, 49¾c to 54c; commercial, 43¼c to 52c; wiping, 42c to 46c; wire, 51¼c. There is little change in the situation in respect to manufactured lead products. The demand is light, and prices remain unchanged, although the market on lead shows a somewhat easier tendency.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼

Zinc sheets, per lb.	0 26	....

Situation In Old Materials Uneventful

Toronto.

OLD MATERIALS.—The situation in old materials continues to be uneventful. Dealers report an uncertain condition, with no business being transacted as regards buying or selling. Prices show no disposition to change, and the market can be said to be extremely quiet.

Tea lead	$ 0 04½	....
Heavy lead pipe	0 07	0 07½

Little Activity In Cordage; Prices Firm

Toronto.

TWINE, CORDAGE.—There is little activity in cordage circles at the present time, business being done within a very small compass. Retailers bought in fairly heavy quantities prior to the last advances, and this is having a tendency to curtail shipments at the present time.

Prices remain firm, the Manila rope being quoted at 39c per pound base; British Manila, 33c per pound base; sisal, 27½c per pound base; binder twine, 500 ft. basis, is also unchanged at 23½c per pound.

Tin Makes Advance; Other Metals Weak

Toronto.

INGOT METALS.—An advance in tin featured the metal markets during the week, other lines remaining unchanged and inactive, with a tendency towards weakness. The uncertainty of permits being granted is adding a decided measure of firmness to the tin situation, and dealers are endeavoring to make equitable distribution, orders not being accepted for more than a ton at a time. Spelter is quiet, with a lower tendency, and lead is very weak.

COPPER.—Nothing of material interest has developed in respect to copper. Domestic activity is at a minimum basis and prices remain unchanged. Some dealers look for a slightly higher basis of prices, but this will have little effect on the situation locally. Quotations at present range from 30c to 31c per pound.

TIN.—Stocks of tin are getting down to the vanishing point. Dealers are endeavoring to make stocks go as far as possible, orders being held down to one-ton lots. Prices have advanced about 10c per pound and lowest quotation now being made is $1.05 per pound, with higher offers possible for guaranteed deliveries.

SPELTER.—No further change has been recorded in spelter during the week, but the market is very quiet, with a lower tendency noticeable. Ample stocks are available, and quotations range from 8¾c to 9c per pound.

LEAD.—The lead market is decidedly weak, and very little movement is apparent. Prices remain unchanged at 8¾c to 9¼c per pound.

ANTIMONY.—There have been no interesting developments during the week, business being conducted in very narrow channels. There is little demand, and prices remain the same at 16c to 18c per pound.

ALUMINUM.—The tone of the market is steady, but there is nothing new to report in respect to trading. Domestic consumption is comparatively light, practically all supplies being absorbed in Government work. Quotations remain on an unchanged basis at from 50c to 60c per pound.

PIG IRON.—The situation in some quarters seems to be slightly better, but is far from satisfactory yet. Reports from the United States indicate production for April will be about 85 per cent. of capacity, but this is being quickly absorbed. Scrap is being used in large quantities in Canada, and some manufacturers state that even this cannot be secured in sufficient volume to maintain operations at capacity. Nominally quotations on foundry iron are being made at $49.50 per ton.

LONDON MARKETS

LONDON, April 25.—Prices continue firm with the budget of advances a little lighter than usual during the week. Among the lines to undergo revision upward during the week are nail sets, lawn sprinklers, oil heaters, enamel sinks, packings, nail hammers, flower border and tennis racquets. Business here continues good. Although there is no big rush there is a steady volume of trade and merchants are very well satisfied with conditions at present. Prospects for good summer trade are fine with the exception of builders' hardware. There is very little new building in sight at present. The demand for garden tools is extra good.

Nail Hammers Higher; Nail Sets Up

London.

NAIL HAMMERS, NAIL SETS.—An advance has been made in Maydole nail hammers during the week after a period of steadiness in this line. New prices are at considerably higher levels as will be noted in quotations on the following numbers: No. 1, $15.50 dozen; No. 1½, $14.25; No. 11, $15.50; No. 11½, $14.25; No. 12, $13.50; No. 13, $12.25. A new price has been established on Starrett's nail sets No 116 of $1.25 per dozen, which represents an advance over former quotations.

Advance Made In Enamel Sinks; Oil Heaters

London.

ENAMEL SINKS, OIL HEATERS.—A new scale of quotations on cast enamel sinks has been established which are higher than those formerly ruling. Prices now prevailing are as follows:

16 x 24 in., one at a time, $4.92 each; two at a time, $4.90; three at a time, $4.86. 18 x 30 in., one at a time, $5.62 each; two at a time, $5.56; three at a time, $5.50. 18 x 36 in., one at a time, $9.73, each; two at a time, $9.66; three at a time, $9.60.

Higher prices have been named on McClary oil heaters, quotations now ruling at following levels: No. 860, nickel-plated, $4.25 each; No. 860, enameled, $5.00 each.

Hemp Packings Up; Oil Barrels Climbing

London.

HEMP PACKINGS, OIL BARRELS.—The establishing of new prices on hemp and jute packings has been accomplished and present quotations are on higher levels than formerly ruling. Figures given out are as follows: Russian hemp, 34c; Italian hemp, No. 1, 44c; Italian hemp, No. 2, 36c; jute, 13c per pound. Oil barrels have undergone revision upward and prices being asked for the barrels alone are: Barrels and half barrels for black oils, $2.50 each; barrels and half barrels for other oils, $3.00 each.

Flower Border And Ring Lawn Sprinklers Higher

London.

FLOWER BORDER, LAWN SPRINKLERS.—Galvanized flower border or guard has come in for revision and higher prices have been established. Quotations now ruling are on the following basis: 12 in., $7.50; 18 in., $8.50 per 100 ft. Fountain or ring lawn sprinklers have also evinced an upward trend during the week and are being sold to the trade now at $9.00 per dozen.

Higher Prices For Razors; Tennis Racquets Too

London.

RAZORS, TENNIS RACQUETS.—A big advance has been made in quotations on English made razors, the new prices established representing new high levels for these lines. Two grades familiar to the trade are the Conqueror No. 1000, black handle, which are quoted at $20.00 dozen, and the Peerless, No. 2000, white handle, now selling at $21.00 per dozen. Quotations on tennis racquets have also been arranged on a higher plane as shown in the following lines: Vantage, R. 11, $1.10; Niagara R 10, $1.50; Wonder, $2.15; Court, $3.25; Invincible, $3.65; Ascot, $4.85.

Garden Tools Moving Freely; Unchanged

London.

GARDEN TOOLS.—The demand for garden tools of all kinds is good and booked orders along with orders being placed now are moving forward freely. Prices remain firm and unchanged at the discount of 25 per cent. Net prices figured on this discount on some of the best sellers are:

Blued field hoes, $3.34 doz.; ladies' hoes, $5.62; garden hoes (solid), $6.38; garden hoes (socket), $7.13; field hoes (solid), $6.75; field hoes (socket), $7.50.

Blued rakes, 12T, $3.34 doz.; 14T $3.64 doz.

Weldless steel rakes, 12T, $6.60 doz.; 14T, $7.05; 16T, $7.50.

Straight steel rakes, 12T, $9 doz.; 14 T, $9.82; 16T, $10.69.

Concave steel rakes, 12T, $9.75 doz.; 14T, $10.58; 16T, $11.44.

Weeding hoes, $6.56 doz.

Thistle spades, $4.50 doz.

Buco Cultivators, 5-prong, $11.25 doz.

Pull Easy Cultivators, $18 doz.

Rope Unchanged; Nails In Fair Demand

London.

ROPE, NAILS.—Rope is moving very slowly and there is nothing of interest to report. Prices are unchanged on the following basis: Pure Manila, 39c; British Manila, 33c; New Zealand hemp, 33c; Sisal, 27½c base per pound. There has been no change in the situation in respect to nails. Prices have been firmly held and a fairly good sale is reported. The base on wire remains at $5.20 per 100 pounds and on cut $5.60 per 100 pounds, those on the miscellaneous list selling at 60 per cent. discount.

Lawn Mowers Steady; Prepared Paint Selling

London.

LAWN MOWERS, PREPARED PAINTS.—Steadiness marks the situation in respect to lawn mowers, prices holding unchanged and some improvement in the demand being noticeable. The discount remains at 40 per cent. on one line which reveals net prices as follows:

Daisy, 12 in, $4.95 each; 14 in., $5.40; 16 in., $5.82. Star, 14 in., $6.42; 16 in., $6.84. Woodyatt, 14 in., $7.08; 16 in., $7.50; 18 in., $7.92; 20 in., $8.34. Empress, 14 in., $9.15; 16 in., $9.60; 18 in., $9.99; 20 in., $10.41.

Prepared paints are moving forward freely and indications are that sales will reach splendid totals. Minerva is being quoted at unchanged figures as follows: Ordinary colors, 1 gal., $3.40; ½ gal., $3.50; quart, $3.60 per gal.; white, 1 gal. $3.60; ½ gal., $3.70; quart, $3.80 per gallon.

Linseed Oil And Turpentine Decline

London.

LINSEED OIL, TURPENTINE.—A decline of 5c per gallon has been registered in prices applying on linseed oil during the week. This decline will be welcomed by retailers generally, though little hope is held out that further declines of a great amount will be made: 1 to 2 bbls., raw, $1.95 gal.; boiled, $1.98 gal.; less bbls, add 10c gal. A decline of 2c per gallon has been made in turpentine during the week. Conditions at primary points are unchanged, the market enjoying a very fair measure of firmness. Stocks are in fair shape but some difficulty is being experienced in getting shipments through from the south: 1 bbl. lots, 65c; 2 to 4 bbl. lots, 64c; 5 gal., 75c, Imperial gallon.

White Lead In Oil, Putty, Glass Steady

London.

WHITE LEAD IN OIL, PUTTY, GLASS.—There is nothing of particular interest to note in any of these markets during the week. Sales are light and prices have held unchanged as follows:

White Lead in Oil—Pure, ton lots, $16.20 per 100 lbs.; less, $16.55; pure Elephant, ton lots, $16.70 per 100 lbs.; less, $17.05.

Putty—Standard, 25, 50, 100 lb. drums, $5.40 per 100 lbs; pure, do., $7.40.

Window Glass—Single diamond, 25%; double diamond, 25%; cut lights, 10%.

WINNIPEG MARKETS

WINNIPEG, April 25.—Advances in prices for the past week are again numerous, showing advances varying from 5 to 20 per cent. according to the goods affected, and conditions just at present point to strong markets in general. Among the lines affected by the advances appear game traps, horse nails, fibreware, sweat pads, chalk lines, gall cure, Gilmour auger bits, short eye augers, wrapping twine, mirrors, shovels and scoops. Business for the past week has again been very brisk and indications point to a continuance for some time at least

Advance Made in Game Traps

Winnipeg.

GAME TRAPS.—Prices on game traps again move upward due to further increases in the cost of production. The new advances represent an increase of approximately 10 per cent. over former quotations. New prices now effective are herewith quoted.

Victor traps—No. 0, $1.95; No. 1, $2.30; No. 1½, $3.45; No. 2, $4.80; No. 3, $6.40; No. 4, $7.55 dozen

Oneida jump traps—No. 0, $2.60; No. 1, $3.10; No. 1½, $4.55; No. 2, $6.70.

Hawley & Norton traps—No. 1, $3.60; No. 1½, $5.40; No. 2, $7.50; No. 3, $10.00; No. 4, $11.80.

Newhouse traps—No. 2½, $17.10; No. 3½, $19.15; No. 4, $17.10; No. 4½, $41.45 dozen; No. 50, $7.35; No. 5, $10.40 each.

Mirrors Advance From 25 to 30 Per Cent.

Winnipeg.

MIRRORS.—Much has been said in these columns regarding the seriousness of the window glass situation due to the fact that the manufacturers had agreed with the American Government to reduce their output to approximately 25 per cent. of normal. This has had the effect of bringing into force high prices and in turn has affected the prices of mirrors, as new prices recently received from the manufacturers show advances in some lines of 25 to 30 per cent. Net prices now in effect on a few of the more familiar lines are given below.

Earl—6 x 9 in., $4.80; 8 x 10 in., $6.15; 9 x 12 in., $7.40 dozen.

York—5 x 7 in., $2.55; 6 x 9 in., $3.25; 8 x 10 in., $4.25; 9 x 12 in., $5.50 dozen.

Alexander—9 x 12 in., $8.60; 10 x 14 in., $10.25; 12 x 18 in., $14.60; 14 x 24 in., $20.25 dozen.

Auger Bits and Augers Make Advances

Winnipeg.

AUGER BITS, AUGERS.—Further increases in the costs of production have forced an advance in the price of Gilmour auger bits, the discount being reduced from 50 per cent. to 45 per cent., making net prices as follows:

3/16 in., $3.30; 4/16 in. to 8/16 in., $2.75; 9/16 in., $3.30; 10/16 in., $3.30; 11/16 in., $3.85; 12/16 in., $3.85; 13/16 in., $4.55; 14/16 in., $4.55; 15/16 in., $5.25; 16/16 in., $5.25 dozen.

Prices on short eye augers also come in for an advance and are quoted to-day at 30 per cent. off manufacturers' list, making the following net prices:

¾ in., $9.75; 1 in., $10.50; 1¼ in., $12.75; 1½ in., $15.90; 1¾ in., $18.70; 2 in., $21.00; 2½ in., $33.60; 3 in., $61.60 dozen.

Horse Nails Higher; Fibre Ware Again Up

Winnipeg.

HORSE NAILS, FIBRE WARE.—New prices have just gone into effect covering Peerless horse nails which show only a moderate advance in price. To-day's ruling prices are given below: No. 5, $3.94; No. 6, $3.67; No. 7, $3.55; No. 8, $3.47; No. 9, $3.35; No 10, $3.27 per box 25 lbs.

Prices on all lines of fibreware are again advanced, this being the third advance since the first of the year due to increased labor costs. New prices just issued are given below:

Fibre tubs—No. 3, $13.30; No. 2, $15.60; No. 1, $18.85; No. 0, $21.95 dozen.

Fibre pails—Star, No. 1, $4.80 dozen.

Cotton Twine Up 3c Lb.; Chalk Lines Higher

Winnipeg.

COTTON TWINE, CHALK LINES.—As predicted in the last week's issue of HARDWARE AND METAL, further advances were to be expected on cotton goods. New prices now effective covering wrapping twine confirms this prediction, the advance being 3c per lb. To-day's prices based on this advance are as follows: 3-ply cones or balls, 67c lb.; 4-ply cones or balls, 70c lb.

Chalk lines, which is another line affected by the heavy advances in cotton, have also been revised, new prices being approximately 10 per cent. up as follows:

No. 18 x 20 ft., $3.90; No. 21 x 20 ft., $4.40; No. 24 x 20 ft., $4.95; No. 30 x 20 ft., $5.50 gross.

Masons' lines, 100 ft white, $1.65 doz.; 100 ft., yellow, $2.00 dozen.

Sweat Pads $1 Dozen Higher; Gall Cure

Winnipeg.

SWEAT PADS, GALL CURE.—Following the recent heavy advances in cotton goods and other materials entering into the manufacture of sweat pads new prices have been found necessary, the advances being about $1.00 dozen over former quotations and they are selling to-day as follows:

Brown and white—12 in., $7.85 dozen; $90.00 gross.

Red edge—12 in., $8.20 dozen; $94.35 gross.

Prices on Bickmore's gall cure show a very heavy advance, after remaining firm and unchanged for the past year. New prices now ruling are as follows:

2 oz., $2.70 dozen; 6 oz., $5.40 dozen; 16 oz., $10.80 dozen.

Revised Prices on Shovels and Scoops

Winnipeg.

SHOVELS AND SCOOPS.—Prices on shovels and scoops which have remained firm for some time past have again been revised, shovels showing an advance of approximately $1.00 dozen while scoops show advances on the smaller sizes and reductions on some of the larger sizes. New prices now effec-

tive on some of the lines given herewith:

Jones and Bull Dog—Polished, DH and LH, round point, No. 2, $15.50 dozen; do., square point, No. 2, $15.50 dozen; black DH, round point, No. 2, $14.50 dozen; do,. No. 3, $14.75 dozen.

Olds and Fox—Polished DH and LH, round point, No. 2, $13.50 dozen; do., square point, No. 2, $13.50 dozen; black, DH and LH, round point, No. 2, $12.50 dozen; do., square point, No. 2, $12.50 dozen.

Jones Socket Scoops—Half polished—No. 5, $19.00; No. 6, $19.25; No. 8, $19.75; No. 10, $20.25 dozen.

Black Cat and Crescent Scoops—Black, No. 4, $17.00; No. 5, $17.25; No. 6, $17.50; No. 8, $18.00; No. 10, $18.50 dozen.

Moose scoops—Black, No. 4, $18.25; No. 5, $18.50; No. 6, $18.75; No. 8, $19.25; No. 10, $19.75 dozen.

Snow Shovels—Prince, $9.00; Queen, $10.00; Moose, $15.00; King, $12.00 doz.

Linseed Oil Firm; Turpentine Unchanged

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices still hold firm on the local market with prices remaining at $2.00 gallon for raw and $2.03 gallon for boiled. Turpentine prices remain unchanged at former quotations which are given herewith: Barrels, 80c gal.; ½ barrels, 83c gal.; 5-gal. lots, 85c gal.; 1-gal. lots, 85c gal.; plus the usual extra for containers.

PITTSBURG MARKETS

PITTSBURGH, Pa., April 25.—As reflected in previous reports, the steel trade has hitherto been disposed to feel that the authorities at Washington had a tendency to exaggerate the danger of a shortage of steel for war purposes, the steel trade feeling that all war requirements would not total more than 50 per cent. of the output. The steel producers did not, of course, contend that there would be a plentiful supply of steel for all purposes, their attitude being that the remaining 50 per cent. could hardly supply the non-war or ordinary commercial demand. There were those in the trade, not producers, who held other views as to this, and felt that if 50 per cent. of the production were left for all commercial purposes dissociated from the war, it would probably constitute a fairly comfortable if not an actually excessive supply.

There has lately been a change of view on the part of the steel producers as to Government requirements. The requirements are appraised at a greater tonnage than formerly. There are two new factors in the general problem of trying to determine how the supply of steel is going to fit in future months. First, while it was formerly thought that many of the early war requirements in steel would disappear, not to be replaced by others, it is now seen that new requirements are constantly appearing. The early orders, of course, involved much steel that would be used in construction work, and it was argued that when this construction was accomplished, that class of war steel demand would disappear. Actual developments, however, have been that when these cases of construction work are taken care of the military authorities find other projects, and thus there seems to be no end.

Second, the shipbuilding work promises to take more steel, regularly, than was recently supposed. When, a few weeks ago, the shipbuilding interests called for more steel, the steel producers' analysis of the situation was that they were calling for steel at a greater weekly rate than they could possibly use, and all that would be necessary would be to make the heavier shipments, particularly of plates, for a few weeks, and get the fabricating shops and the shipyards stocked up, whereupon the authorities would themselves be quite content to have the rate of shipment reduced. It has developed in the past week, indeed, that about three weeks ago there was an actual controversy on this subject. J. Leonard Replogle, Director of Steel Supplies, took the side of the steel producers to the extent of showing what was to him the obviously large quantity of steel that had been shipped from the mills for account of shipbuilding, shipments having risen to about 60,000 tons a week, of which about 60 per cent. was plates, but he very positively took the side of the shipbuilding interest when it came to a matter of steel supplies for the future, insisting that the domestic shipyard requirements, plus the engagements the Government had made to its Allies, would make such a total as would continuously strain the capacity of the plate mills.

The Call for Plates

It was about the beginning of this month that the steel mills undertook, by instructions from Washington, to increase their shipments of war steel, and particularly of plates, but their attitude at the time was that they would not need to do this for long. Now they show an expectation of this pressure continuing indefinitely.

The appointment of C. M. Schwab as Director-General of the Emergency Fleet Corporation has served to strengthen these views as to the future requirements of shipbuilding. The entire steel trade has confidence that however much improvement in performance the shipyards have lately recorded, Mr. Schwab is going to add greatly to those results. There is every prospect that Mr. Schwab's appointment will count, from his personality, his great knowledge of shipbuilding, and the almost unlimited authority he has been given in this new position. Mr. Schwab leaves all his personal affairs. Long ago, with no thought of anything of this sort, he had announced that the managements of the Bethlehem and associated properties had been so aligned that he could drop out at any time and the work would go right long.

It has developed that most recent accounts have exaggerated the volume of shell steel buying that is contemplated for the second half of the year. Some estimates have been printed, running up to 4,000,000 tons for the second half, which appeared to be based upon authentic information, but it turns out that they were estimates based partly upon mistakes. The tonnage to be bought in the present buying is much less than 4,000,000 tons. However, the rate of producing shells has increased materially, and it will increase more. Some of the shell steel bought for delivery by June 15 will run well over July 1 in delivery, partly on account of changes in specifications and partly by reason of the shortage of forging capacity, as there has not been enough forging capacity to keep all the shell making factories busy. By this time that situation has been remedied as to all sizes 6-inch and under, and it will probably be remedied shortly as to the larger sizes as well.

Production

The rate of production, in pig iron, steel ingots and finished steel, has not increased very materially over the average rate maintained in March. There has been a slight increase, perhaps, but hardly enough to balance the fact that at many mills the stocks accumulated, which were drawn upon when the railroads loosened up, are now largely exhausted, so that without any increase in production shipments would now be less than those being made from three to six weeks ago. As a general average, it may be said that production all along the line, since March 1, has been at about 85 per cent. of capacity. Roughly speaking, this represents approximately the tonnage produced in 1916 and 1917, but whereas the production during the major part of 1916 represented the existing capacity, at the present time the same tonnage is only about 85 per cent. of capacity, because the capacity has been so materially increased.

The chief restrictive influence in production continues to be shortage of coke. This is now confined chiefly to beehive, the by-product ovens being in nearly every instance well supplied with coal, so that they can operate full. The movement of beehive coke is restricted particularly in the case of Connellsville, the Connellsville region shipments last week and week before having been somewhat below the average in March, when of course there was a great improvement over the early weeks of the year. The railroads appear to be making strenuous efforts to furnish more cars to the coke region, but with indifferent success thus far.

The Carnegie Steel Company this week operated 49 of its 59 blast furnaces, ten being entirely out of blast. The company's banked furnaces have all resumed, but on Monday two of them had a close call, some coke arriving just in time to avoid banking. For over two weeks the Republic Iron & Steel Company has been seeking a supply of coke to blow in an idle furnace, and without success thus far.

WEEKLY PAINT DEPARTMENT

Give Paint the Place of Honor

It is the Greatest of All Conservators—Keep it Where it Can be Seen, for the More it is Advertised the Greater Will be the Sale — Grouping Commodities That Are Akin

PAINT should be given the place of honor at this season of the year because paint is one of the greatest of all conservators. In this time when the world is groping around in the welter and waste of war and it seems that almost every commodity is being recklessly sacrificed to satisfy a maniac who imagines that to build he must destroy, any article that helps to conserve existing goods should be looked upon with more than the usual interest.

And paint is looked upon more than ever as a great preservative of the things that are. Buildings that have not received their proper care in the shape of a paint coat within the past two or three years have had an immeasurable depreciation. The cost of the building materials has greatly increased. Paint has also increased somewhat in price. But the accretion in the value of the building is not to be compared with the small increase in the price of paint.

It is poor economy to let dollars slip out of the value of a building when an investment of a relatively small sum will prevent that wastage. Paint is the greatest of all conservators because everywhere all over this broad land are buildings which are continuously exposed to the searing elements of wind and stormy weather. And not only stormy weather but the hot blast of the summer's sun is destructive in its action on the exterior painted surface.

It is the greatest of all conservators because the greater part of the wealth of people consists of the home in which they dwell and the factory in which they work. The aggregate wealth of any small town is largely represented in the buildings which it contains. If this wealth can be conserved and given a greater lease of life then paint becomes the greatest of all preservers. The hardwareman should not lose sight of this fact. He is doing a service to his community when he preaches the doctrine of "paint up." Once he becomes convinced that he is doing a real service to his clients by getting them to take the proper precautions to preserve their property he has gone a long way along the road toward becoming an aggressive paint salesman.

GROUP COMMODITIES THAT ARE AKIN

Paint is one of the main household lines and its sale can often be increased by grouping it in a display of other spring household lines. For instance there are varnishes for brightening up the furniture, polishes of various kinds for renewing the lustre of interiors, polishing mops, paint brushes, step ladders, carpet beaters, and numerous other articles.

Looming large in any such a display is the paint section. But when these lines are all displayed in a certain section of the store they bulk large and have a striking power they would not have if distributed in different parts of the store. There is one successful hardware merchant who has enlarged the rear of his store so that he may be able to place these various lines all together. When the customer pays a visit to that section of the store the paint-up and clean-up idea forthwith becomes infectious. To see is to think in terms of painting and cleaning. With an attractive display each one of these lines pulls a little for the other line.

It is mainly a matter of getting the householder started to think along the line of clean-up and paint-up. Springtime is a natural ally to the hardware dealer and paint merchant in this respect. All he needs do is to see that it is properly nursed and directed in the right channel.

AUTOMOBILE PAINTS IN DEMAND

Now that the good roads have come and motorists are anxious to have their car looking at its best, there should be a good field to increase the sale of this specialty line. With a possible restriction of the number of new cars that will be available in Canada this year it should naturally follow that old cars will be put in the best possible shape.

MOORE'S HOUSE COLORS

Painting for Economy

Good paint like Moore's House Colors is an investment for economy. It preserves and protects and adds value to property.

The more you can make your patrons realize this truth the more paint you'll sell.

Keep hammering away on the economy idea now while everyone is thinking on Spring painting.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, April 25.—The paint trade has experienced a fairly active week with a general tendency to a firm position on nearly every line. This is especially true of mixed paints and colors in oil, with white lead and putty holding unchanged. There is a feeling that advances made early in the year were not as great as the increased costs of labor, material and other overhead charges justified and if the revisions come this will be as a result of actual necessity, say the paint makers. The only actual change is that made in one quarter for certain colors in oil.

Linseed Oil Holds With Firm Undertone

Montreal.

LINSEED OIL.—The situation is a strong one. Seed prices have been characterized by the usual fluctuations from day to day but still are high. There is much difficulty in ascertaining just what the supply of seed is at the head of the lakes and this will not be known for some time until transportation improves. Announcement has been made that the users of flaxseed will be able to get their supplies by rail all the way, the congestion apparently being relieved through the lake and rail routes being utilized for other cargoes. With navigation now open there should be some improvement, even though small.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.82-$1.86	$1.84½-$1.88½

Movement Of Turpentine Better; Prices Hold

Montreal.

TURPENTINE.—There is a freer movement of turpentine here as the painting season approaches and jobbers report a better trade. The same condition applies in southern points, where prices are fairly well maintained although there was a slight reduction during the week at Savannah. Stocks here are such as to meet all demands and there is nothing at this writing to point to price revision.

Turpentine—	Per Imp. gallon	
1 to 4 barrels	$0 57	$0 62½
5 barrels and over	0 55	0 61½
Small quantities	....	....

Putty Holds Firm With Fair Demand

Montreal.

PUTTY.—The demand for putty is fair for this season of the year and prices are fully maintained. The strong position of the markets generally applies as well to the putty market and there is no indication of an easier position. With ample stocks to meet the demand and quantities going forward with other spring requirements, prices are as follows:

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Discount 25 per Cent.

Much Strength To Mixed Paint Market

Montreal.

MIXED PAINT.—From all sources the strong position attained by paint is emphasized. With the supply of oil inadequate to meet normal needs the probable date of any price revisions will not be long deferred. Costs other than that of linseed oil have entered into the matter and these are such as to give the paint men serious thought. "If we don't get relief on the oil situation prices are undoubtedly going to advance," was one maker's way of putting the matter in a nutshell. Another, "I think we'll have to make an advance all through."

Shellacs Are Firm; Colors In Oil Higher

Montreal.

SHELLACS, COLORS IN OIL.—The strong position of shellacs is one that may lead to price revisions in the near future. This was one jobber's manner of referring to the situation as it stands. Gums are costing more and the United States is considering the restriction of importing the commodity. The position on colors in oil is one of strength and on some lines advances have been made. These are considerable, one line advancing from 28c to 33c per pound. Others may be advanced also.

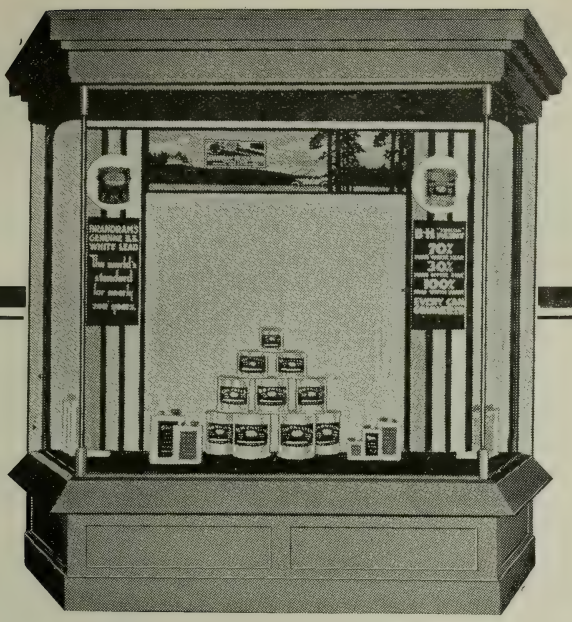
More White Lead In Oil Moving Out

Montreal.

WHITE LEAD IN OIL.—While there is no great volume of business reported, the amount of lead going forward to the various sections of the country is larger than at any time of recent date. Prices are fully maintained, even though there is an easier tone to the price of pig lead. Quotations are for five ton lots, $15.50 per 100 pounds; ton lots, $16 per 100 pounds, and small lots, $16.35 per 100 pounds.

TORONTO

TORONTO, April 25.—A readjustment of prices has resulted during the week which provided for declines in both linseed oil and turpentine. Linseed oil has declined 5c per gallon over high prices ruling last week and turpentine 2c per gallon, this serving to narrow the range to that extent. Transportation is presenting difficulties in respect to movement of turpentine, all rail routes now having to be utilized, which may mean delays. The demand for ready-mixed paint is very fair and repeat business is coming along in very good volume. There is not a heavy movement of white lead in oil or putty reported generally. A new price list on plate glass has been issued providing for quotations now being made on a square foot basis.



ANNOUNCEMENT

Within the last few weeks, the new B-H Poster has appeared throughout the country. Painters, Paint-Buyers, Paint Dealers, and particularly B-H Agents, have admired and been influenced by its power and beauty.

Now, we are pleased to announce, what we believe our Dealers are as much interested in, as they are in our other forms of advertising:

The New B-H Window Display Material

The principal parts of this powerful new window trim are three panels—one intended for each side of a window; and the third panel being an exact lithograph reproduction of the new B-H Poster—joins on to the tops of the two side panels.

Each of the panels measures 54 inches by 13 inches. The display is one of the best "eye-catchers" your store could ever have, while at the same time it leaves ample space between the panels for the passer-by to see clearly your complete Window Trim.

The familiar B-H "three-can display"—each can with its contents of blue, yellow and red paints respectively pouring from it—has been retained in this wonderful new paint window display.

To assist in dressing the windows our Agents have at their disposal large upright cut-outs of a Painter, handsome display cards of the different B-H Products; color schemes, signs and every other "Help" that could possibly be utilized. These, when arranged to form a background to the new window-trim panels, make a most powerful business-getting window.

If you are the B-H Agent in your town, secure your B-H window-dressing material, and put in your paint window **now.** Our national campaign of newspaper, farm paper and poster advertising is right at its height, and by putting in a B-H Window you will be tying right up with this publicity which—this year, more strongly than ever—is calling particular attention to B-H Agents' stores.

If you are not a B-H Agent, let us explain to you, not only the window and store display helps we offer, but also about all the B-H co-operation, the quality of the B-H line, and its value to hardware men. Let us tell you how we advertise your name and store on the B-H posters and newspapers in your town.

MONTREAL HALIFAX ST JOHN TORONTO WINNIPEG CALGARY EDMONTON VANCOUVER

Linseed Oil Declines 5c From High Point

Toronto.

LINSEED OIL.—A decline of 5c per gallon from the high point prevailing during the past two or three weeks has been recorded during the week. Indications are that navigation on the lakes will open very shortly and hopes are expressed that space for flax will be allotted in some of the first boats moving. Crushers intimate early arrivals of flax would be decidedly welcome and enable them to take care of orders somewhat more promptly than uncertain railway deliveries have permitted. Prices on seed for the week are up between 8 and 9 cents on the Winnipeg exchange, No. 1 C. W. cash price on Wednesday of this week being $3.87½ per bushel against $3.78⅞ on Wednesday of last week. In some quarters the oil situation is said to be somewhat easier as regards supplies and it is felt back orders may be cleaned up within the next three or four weeks.

	Raw, Imp.gal.	Boiled, Imp. gal.
1 to 2 bbbls.	$1.84-$1.95	$1.86½-$1.98
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Lower Price Named On Turpentine Of 2c

Toronto.

TURPENTINE.—Lower prices have been named on turpentine, the decline amounting to 2c per gallon over former high prices. The situation in primary markets remains about the same, with a fair measure of firmness apparent and some increase in sales. Turpentine has now to take an all-rail routing from the south as coastwise shipping to New York has been withdrawn from the turpentine service. How quickly supplies will be handled is a problem, some orders coming through fairly quickly while others are seriously delayed. In some quarters stocks are reported light and it is felt supplies may reach still lower levels. The demand as yet is by no means heavy though some movement is evident.

	Imp. Gal.
1 barrel	$0 59-$0 65
2 to 4 barrels	0 58- 0 64
5 gallon lots	0 66- 0 75

White Lead In Oil Remains Unchanged

Toronto.

WHITE LEAD IN OIL.—There have been few developments of interest during the week, conditions remaining on about the same basis existing for some time past. Some movement is reported, and although by no means heavy, indicates some interest in this market. Supplies generally are more than ample to take care of demands. No change in prices has been made, quotations being maintained throughout, although some weakness in the metal market has developed. The market is steady at quotations as follows: Pure, in ton lots, $16.20 per 100 pounds; smaller quantities, $16.55 per 100 pounds.

Sales Continue Good For Mixed Paint

Toronto.

MIXED PAINTS.—Repeat business continues to come along in fairly good volume for mixed paints though the cold, uncertain weather during the past couple of weeks has put a slight damper on operations. It means that outside painting cannot be gone ahead with now but indications are that retailers are going to carry on an aggressive campaign and big business is looked for. The scarcity of help will throw property owners on their own resources, and the extra hours of daylight can be utilized in applying paint. It will not be found such a terribly hard job and retailers might emphasize this point to advantage. Prices are unchanged.

Plate Glass On New Selling Basis; Putty

Toronto.

GLASS, PUTTY.—New prices representing an advance and change in method of selling has been adopted by glass manufacturers in respect to plate glass. The selling price has been arranged on a square footage basis, new list being shown in panel on the preceding page. The discount from this list to the trade is 25 per cent., and where the order is for over $25 net in value freight is prepaid and there is no charge made for boxing. However, if the order amounts to less than $25 net, freight is not prepaid and a charge is made for boxing. Window glass shows no change for the week in price and conditions of sale remain about the same. Stocks are inclined to be light and in some quarters it was intimated that further advances would not be unexpected. Putty is moving along slowly and remains unchanged. With an improvement in building operations it is thought some demand for put... will develop, but at present there is very little movement. Prices have been firmly maintained during the week as follows: Standard bulk in casks is quoted at $4.55; 100 lb. drums at $5.30-$5.40; and bladders in bbls. $5.45-$5.65 per 100 pounds. Prices on pure putty range $2.00 per 100 pounds higher than above.

Brushes In Good Demand; Unchanged

Toronto.

BRUSHES.—The situation in respect to brushes remains about the same. Business is moving along in very good quantities and brush manufacturers intimate that a revival in painting would seem apparent owing to continued heavy demands for all lines of paint brushes. Prices hold firm and unchanged.

EMBARGO ON WATCH CRYSTALS REMOVED

The bureau of imports of the War Trade Board of the United States announces the removal, as of April 12, 1918, of rice, cahuni nuts, and watch crystals from the List of Restricted Imports No. 1.

Importers are advised, however, that, in view of instructions previously cabled to Consuls throughout the world, it will still be necessary to furnish United States Consuls abroad with the numbers of import licenses for these articles before such Consuls will certify consular invoices.

STEEL PLANT FORCED TO CLOSE

William B. Dickson, vice-president of the Midvale Steel Co., announced recently that the company would close the Diamond State steel plant at Wilmington because it had found it impossible to produce blooms and billets at a profit under existing prices. The plant is isolated and was forced to depend on outside supplies.

The Diamond plant is one of the largest owned by the company, and efforts will be made to convert it for use in the production of war materials. The action of the company was in line with the policy now general in the trade of making economic production the first consideration.

ADVOCATING HIGHER PRICES

Conferences have already been held between the representatives of the copper refining interests and the authorities at Washington with respect to the probable prices to prevail after June 1 next. Signs are in evidence that the copper refiners will ask for an advance in the price of copper to 25c per pound, or an increase of 1½c. The refining interests point out that they are actually losing money on the present basis of 23½c per pound. A conference will be held in Washington on May 1, at which the representatives of the refiners will be heard. The copper refiners assert that their refinery charges necessitate an increase in price.

STEEL BUYING PRACTICALLY CEASED

Advices from New York during the week state that steel buying for commercial purposes has practically ceased. The steel companies are busy with deliveries on deferred orders, and after these are made it is felt there will be very little steel available for ordinary non-war purposes. The United States Government continues to buy heavily for all purposes, and there is fear expressed by some of the departments of the Government that there may be some difficulty in meeting the full demands of the Government. Steel interests, however, do not concur in this opinion, as they point out that production is practically double the amount of current Government orders. Charles M. Schwab has been appointed the new director-general of shipbuilding operations, and attention is now directed toward the speeding up of this branch of Government activity. Mr. Schwab has called for the full co-operation of the steel mills to this end.

Why Waste Time

when wages are so high in making up eavetrough and other sheet metal work when we can supply it cheaper than you can make it. Use our complete plant to increase your capacity and your profits. Do you know our proposition?

WHEELER & BAIN
TORONTO

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

A Live Line
It Pays to Push

Every owner of one of the four million motor cars now in use is a possible buyer of

Berry Brothers'
AutoColor Varnishes

They are made especially for the unskilled varnisher, and are so easily applied that any man can refinish his car in his own garage just the way he wants it and save finishing shop charges and delay.

It is a live line to push, because by adopting the *"Berry way"* any owner can restore the spick and span appearance of his car at a merely nominal expense.

We furnish an attractive cutout counter sign in colors, and a descriptive folder telling the amateur everything he needs to know about finishing his car, just how much varnish it will take, and giving colored illustrations showing how cars look when refinished. A real selling help.

Ready to Ship Assortments

We have already put up, well selected assortments of colors that we can ship promptly. Order one to-day and get in the field early. You will sell it quickly and want more. Write for further particulars anyway.

"I've Noticed this Pratt & Lambert Full-Page Advertisement in this Week's Saturday Evening Post, and I want some of their "61" Floor Varnish."

THERE are three classes of your customers who are influenced by Pratt & Lambert advertising. First is the type shown above. This scene has occurred in the stores of thousands of P&L dealers — so often in fact, that many dealers look on these cases alone as their share of the benefits derived from the national advertising of Pratt & Lambert Varnish Products, and are perfectly satisfied.

But this is only *one* of three types.

The second class is that very large class who read the advertising and ask for "61" Floor Varnish without mentioning the fact that their purchase is the result of the advertising — perhaps without even realizing themselves that such is the case.

But the third class is the largest of all — and one which you can cultivate enormously. These are the folks who come to you asking for "varnish," but smile in pleased recognition when you offer them "61" Floor Varnish.

All of the classes are reached by the big magazine advertising typified by the

FULL-PAGE PRATT & LAMBERT ADVERTISEMENTS IN THE SATURDAY EVENING POST ISSUES OF APRIL 27TH AND MAY 25TH

And this is not the end! The full-page spring campaign in the Post is not yet completed; big page advertisements in the American, Country Life and the others are still to appear; and when this series is over there'll be another huge campaign in the fall, followed by others, in the same steady, consistent fashion that has been characteristic of P&L advertising for the last *ten years*. The piled-up consumer influence of this decade in the limelight is waiting your call to shower its benefits on *your store* — on *YOU*.

Write today for the Pratt & Lambert Dealer Proposition.

Livingston

THE SUPREME PRE-EMINENCE OF

Livingston Brand

Linseed Oil was not achieved in a day or in a year. It is the result of over 50 years' persistent effort and honest service. During all these years there has never been a time when Livingston Brand was not what it claimed to be—

SIMPLY THE BEST

The Science of Expressing like every other branch of learning moves forward. Better constructed warehouses, steam-heating, cleaning and drying machinery make possible to create ideal conditions for the ageing of Livingston Oils.

This is technical talk and may not interest you. After all, what you want to know is, which is the best? There should be but one answer to that question.

LIVINGSTON BRAND

BEST IN QUALITY, MOST RELIABLE, GUARANTEED ALWAYS.

BE SATISFIED WITH NOTHING SHORT OF THE BEST

The DOMINION LINSEED OIL CO.

A237 — "Kitchener" packless, quick-opening Bibb, swan neck, China handle.

When you see "Empire" you're sure of Quality.

Good Money in "Kitchener" Bibbs

The "Kitchener" Quick - opening, Packless Bibb for kitchen, slop sink and laundry tray has proven a good seller wherever shown. Its ease of operation and quick action, together with the big, smooth, splashless stream it delivers have made it a general favorite with householders.

The "Kitchener" is made of full Empire Quality red metal. It is standardized, which means big business for the dealer who lays in a stock of parts.

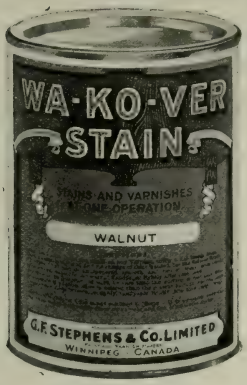
In this case it's economical to spend



Have you made your customers realize that they can economize by applying Wa-ko-ver Stain to their Floors? Do they know that many homes save money and acquire beauty by spending a **small** sum on Wa-ko-ver instead of a **large** sum on carpets? Then, too, Wa-ko-ver preserves the floor, prevents dry rot and decay, and adds a coating that actually resists wear.

The Stephens Agent who neglects to call his customer's attention to the economy of using Wa-ko-ver neglects a patent means of increasing his sales on a permanent, value-received basis.

If there is not a Stephens Paint Agency near you tell us about it.

The **REFLEX** Spark Plugs

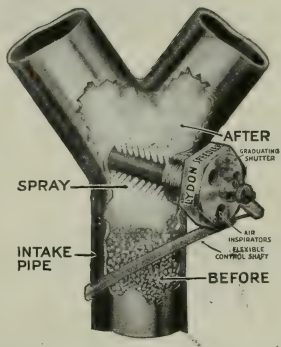
TWO EASY SELLERS

MONEY SAVERS FOR MOTORISTS

No effort is required to sell the **"Speedler."** It saves—actually **40% of gasoline consumption.** Think you any motorist would refuse such a saving? Use the **Speedler** on your own car—demonstrate its advantages. You can easily prove these claims to your customers and reap a big profit from the sales you will make—let us tell you how. Write to-day.

The "REFLEX" Spark Plugs have big sales. Each plug is guaranteed. With the **Reflex** line you have a plug that meets every motor requirement. Let us tell you all about our proposition—it is a money-maker for you. Write

The **SPEEDLER** Gas Saver



Great West Electric Co., Limited

WINNIPEG, MANITOBA

Distributors of Laco, Tungsten and Nitro Lamps

MADE IN CANADA

BUFFALO OILS

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

HARNESS OIL
NEATSFOOT OIL

Special Cylinder Oil (for steam engines).
A Gas Engine Oil (for gasoline engines).
Tractorlene Oil (for oil burning engines).
Ideal Thresher's Machines Oil (for general use).
Automobile Oil and Transmission Greases.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG

MEHASCO

ANOTHER MEHASCO MESSAGE

2 With very little practice you can pronounce Me-has-co correctly, but only by experience can you know what it means. It means dealer satisfaction—certain and absolute. It means the very best goods shipped promptly and carefully. It means goods guaranteed to sell.

You can prove these facts in the way that many other dealers have proven them—by ordering from any of these lines: Wagons, spark plugs, Easyon chains, Cannon Ball and 20th Century barn door hangers, hay carrier equipment, litter carrier equipment, Maytag and Mehasco washers, aluminum ware, gasoline and electric irons, wire stretchers and hoists, complete line of tool grinders including power, sickle and hand, the Will plunger oiler, New Standard food choppers and presses, dazey glass and steel churns, automobile funnels and filler cans, Mehasco pocket cutlery and household cutlery, Genco razors, Mehasco watches and clocks, Kwiklites, Neverfail oil cans, Round Oak ranges, heaters and furnaces, children's sleds, stock tank heaters, wrenches, pliers, screw drivers, etc., tinned and galvanized ware.

CANADA PAINT and House-Cleaning

enter the minds of your customers at the same time. They know that Canada Paint means clean, beautiful and durable results. The finish and effects they want to get. Are you ready for this demand?

The trade mark that stands for quality and perfect results is the one to display on your shelves and counters, and in your windows. The Paint or Varnish with this trade mark cashes in on the Spring business. Here is your opportunity to connect up with our Big National Advertising Campaign. Live Merchants will take advantage of it.

This mark of distinction on the goods you sell will mean more business for you. Satisfied customers are what you are trying to make. Let Canada Paint help. A product of the right quality for all your customers is included in the C-P Agency line. More sales, more business and larger profits. This is assured with the Canada Paint Agency.

Is your stock in proper shape to handle the increasing demand for Canada Paint?

Write us to-day about our proposition if you are not a C-P Agent.

JAMIESON'S

From your shelves
Mr. Dealer
to the householder and
master painter
in endless sales since
1858

Make The Householder

Strong For Your Store

The extra satisfaction which Jamieson's Pure Prepared Paints always give, even to the most inexperienced painter, exerts a wonderful influence on your store. If he has used other paints, the Householder finds, on his first experience with Jamieson's, a new pleasure and a greater degree of efficiency in doing his own painting. Naturally he decides always to use Jamieson's, and to make sure by always buying at the same store. Thus Jamieson's, because it is the best paint for general home painting, makes for the Jamieson Agent real, solid friends who stick.

Are you the Jamieson Agent?

Jamieson Varnishes Contain the Same
Good Qualities as Jamieson Paints

R. C. JAMIESON & CO., Limited, Montreal, Canada

ESTABLISHED 1858

Owning and Operating P. D. DODS & CO., LIMITED

Show him that it's a *Butterfield* and he's perfectly satisfied

Experienced mechanics know Butterfield Tools and have confidence in them. They are satisfied that any tool that is stamped "Butterfield" will give a maximum of grinding.

When selling

Carbon and High Speed Twist Drills

show your prospect the Butterfield mark, and if he knows anything about tools you'll make a sale and gain a satisfied customer. It has taken considerable time, patience and money to make "Butterfield" mean so much, but it has been worth while to the dealer as well as to ourselves.

BUTTERFIELD & Company Inc.

Rock Island, Quebec

DOUGALL'S TRANSPARENT INTERIOR VARNISH THE ECONOMY FINISH

This clear, brilliant finish for interior woodwork is as economical as it is effective.

It lays easily and rapidly, has remarkable covering capacity and dries hard and smooth.

An ideal interior finish that anyone can use.

Sales are certain because the quality is certain.

The complete home laundry that saves clothes

When you put a Crystal Washer and Wringer on your floor you offer the families of your district all the washing equipment they need in one compact unit.

Washer and Wringer are connected to the one motor, and can be operated together or independently. Wringer is adjustable to three positions.

Thorough cleansing without slightest damage to even finest laces is accomplished in the "Crystal" perforated zinc cylinder. This cylinder, revolving at high speed, forces water, steam, suds and air through the meshes of the cloth, removing every particle of dirt without subjecting the fabric to wear and tear.

The time-saving, power-saving, space-saving, clothes-saving features of the "Crytsal" are readily recognized and present their own forceful sales arguments.

It is easier to sell a "Crystal" than an ordinary washer, and it's more profitable.

"Ride a Bicycle"

Make this your Slogan during

BICYCLE WEEK, MAY 4 TO 11

Tie up your store with the great bicycle movement sweeping over the whole country.

Not a fad, but a realization of the wonderful usefulness and economy of the bicycle.

The harder you push, the more you will benefit.

THE MARK OF A GOOD BICYCLE

C·C·M·
MADE IN CANADA

This design is on all C. C. M. Bicycles.

It is widely advertised in the street cars and elsewhere.

Cash in on this advertising by pushing C. C. M. Bicycles.

Write for prices and agency terms. Wholesale only.

Canada Cycle & Motor Co., Limited

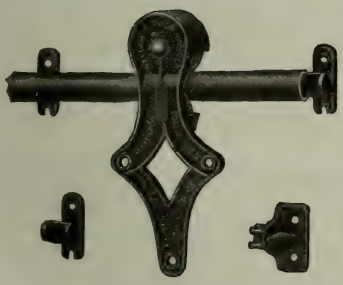
Our aim is to hold your business through perfect goods



Reliable Door Hangers

Bring Repeat Business With Never a Dissatisfied Customer.

With greater production comes the urgent need for greater protection of the harvested crop. This means more buildings, more doors, more door hangers—More sales of "Reliable" Door Hangers, for they are well known to rural builders.

The "Reliable" is, as its name implies, reliable under all conditions. It is practically "unbreakable" and cannot come off the track, always runs.

Note the various parts shown herewith—the round track makes for easy operation, no chance for obstructions in sleety or snowy weather; the adjustable track supports which enables the track to be put up easily and securely. (They miss the cracks and knots); the hanger which is strong, the upper roller protected from the elements and the under roller which holds the hanger to the track.

We Guarantee Every Reliable Hanger

We make a full line of door hangers, including square and round trolley track and fire door fittings that are labelled under the direction of the National Board of Fire Underwriters. We also manufacture locks and builders' hardware. We invite enquiry.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are **smaller** than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

MARTIN-SENOUR
PAINTS AND VARNISHES

MADE IN CANADA—SOLD ON MERIT

UNSURPASSED QUALITY
COMBINED WITH
STRONGEST SELLING SERVICE

Some of the effective selling helps now being used for the benefit of our Dealer Agents are

POSTER SHOWING. Our new 24 sheet poster, lithographed in attractive colors, is now being featured on every available bill board throughout Canada, thus keeping the name of Martin-Senour before the eyes of millions of paint and varnish users during the whole of the Clean up and Paint up Season.

CONSPICUOUS ADVERTISEMENTS are now appearing in the widest range of newspapers, magazines, farm and religious journals ever used by any paint manufacturer in Canada. Each advertisement is large enough to dominate the page on which it appears, and wherever possible in our newspaper advertising the name of our Dealer Agent is incorporated in the advertisement appearing in his local paper.

CONSUMER MAILING CAMPAIGN, reaching thousands of actual paint prospects, is now being carried out. By this means a unique and attractive mailing feature is being sent direct to home owners from lists supplied by our Dealer Agents. Every piece of mailing for each district is printed with the name of our Dealer Agent in that locality, directly linking up his store with our publicity, and thus putting him in touch with every paint prospect in his vicinity.

WINDOW TRIMS of attractive design and coloring have been supplied to every Martin-Senour Dealer Agent, and are now being used to excellent advantage by them in connecting up their stores with our nation wide publicity campaign.

Martin-Senour Dealer Agents are at present cashing in on these and many other effective selling helps supplied by us. The opportunity of reaping the same benefits is yours if you will decide to become the Martin-Senour Dealer Agent for your locality.

Any time is a good time to accept our Proposition. The best time is NOW.

THE TEST OF TIME

Made in Canada *Used the World Over*

International Varnishes

CANADA'S DISTINCTIVE HIGH GRADE LINE

RECOGNIZED EVERYWHERE FOR SUPERIOR QUALITY

OUR LEADERS

ELASTICA FLOOR FINISH. The one perfect Floor Varnish. Made to withstand hard usage. Protects floors under the most severe wear and frequent washings.

SATINETTE WHITE ENAMEL. The immaculate finish for all high-class interior work. Equally goood for outside use. Produces a surface like choice china, smooth, hard and extremely durable.

LACQUERET. The household Lacquer for renewing all articles of furniture, or for use on old or new interior woodwork, and on floors.

KLEARTONE ACID or OIL STAINS. The most advanced product of this character on the market. The ideal finish for all interior woodwork. Brings out the natural beauty of the grain in the wood.

There is a special International Varnish made for every varnishing need, and quality is the first consideration in the manufacture of each and every line. The dealer handling International Varnishes is in the best position to secure the big end of the varnish business in his locality.

NOW IS THE TIME TO REPLENISH YOUR STOCK. MAIL ORDERS RECEIVE OUR PROMPT ATTENTION.

BT Hay Carrier

Will you be one of the unlucky ones?

Last year a number of dealers had to pass up sales of BT Hay Carriers because they didn't get their stock in early enough. Each year sees a greater last-minute rush than the year before, and as a consequence there are not enough carriers to be had when the selling season is actually on.

There is only one safe way to be sure of supplying your customers, and that is by keeping close check on your stock and having sufficient always on hand. Conditions this season will be worse than last on account of the embargo on pig iron. There will be more Hay Carriers wanted and a smaller quantity of raw material from which to make them.

Don't leave yourself in a serious predicament, but act quick. Be prepared.

Mr. Dealer: Sell This Fence

Establish a trade that will stay with you and at the same time will show a substantial growth. Compare this strong, rustless, unyielding fence alongside flimsy netting, and every poultry raiser will flock to your store. Note the close spaces at bottom that turns the small chicks and keeps out intruders.

SEND FOR LITERATURE

Get our catalogue of fencing for all purposes. Every foot of it guaranteed. Write today for agency in open territory. Our fence in every instance backs up our advertising.

Genco RAZORS

A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

THE space occupied by this Genco Razor Display Case is about one square foot. Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.

The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.

All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.

We are making a special proposition which included one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

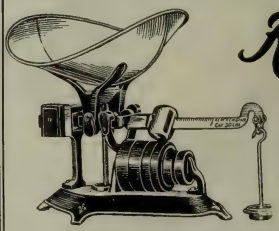
Stirs up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing—weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the



Renfrew

HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs. Government inspector's certificate accompanies every scale.

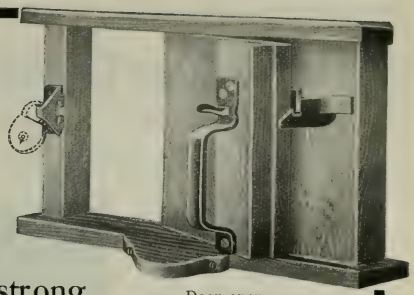
Western Representatives: P. A. C. McIntyre & Co., 206 Scott Block, Winnipeg, Man.; Crandall Co., Ltd., Vancouver, B.C. **Our Other Lines:** "Renfrew" Cream Separators; 2,000-lb. Farmers' Truck Scale, Tractors, Wood-Saws, Grain Grinders, etc.

If interested, tear out this page and keep with letters to be answered.

The Perfect Barn Door Latch



Door open

No. 29 All-Steel Latch is neat, strong, close-fitting, and has no projecting parts. The danger of harness catching in it is eliminated by its peculiar construction. The strike is made with a guard, and the bar extends only ⅜ths inch beyond the edge of the door. The projection of the bar is so slight that it would be impossible for harness to catch on it. This feature has a strong sales - appeal, especially with farmers, and is sufficient argument to close any sale.

The door can be locked by attaching padlock through slot in strike and slide. When not in use padlock can be hung on strike as illustrated.

Each latch is supplied with a catch to hold door when open and prevent damage to door and hinges from swinging in the wind.

Door closed

To insure proper placing of each part a paper template is packed with each Latch, along with necessary screws for attaching.

Show the Owner and the Contractor

the advantages of hanging Garage Doors on rollers and your efforts will be repaid by increased sales and profits.

Efficiency, ease of operation and no waste space are three outstanding features.

Let us supply everything you need to display and sell this profitable outfit.

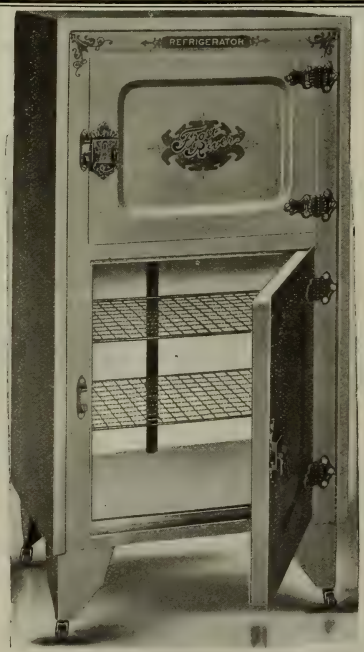
The Hatch Garage Door Outfit

rolls the doors around the corner to the side wall taking up very little space in the Garage, and makes sagging, warping or slamming of doors impossible.

Write our "Hanger Dept." for detailed information and prices

Canada Steel Goods Company Limited

HAMILTON, CANADA



Davidson's Well Known FROST RIVER

Refrigerator shown herewith

Made entirely of Sheet Steel Galvanized

The exterior is Japanned French Grey, beautifully finished with neatly decorated panels and corner scrolls.

The Food Chamber is coated with white enamel, thoroughly hardened and baked on in an oven of high temperature.

All inside parts are removable for cleaning purposes.

The drip pipe for the waste water has been carried outside the body, and does not run through the Food Chamber—as usual in other refrigerators.

Made in three sizes, the largest with double doors.

NOW is the time to get your Orders in for these goods and ensure prompt shipment.

A Good Sign

This hardware man has just put up a good sign—the sign of Hercules Dynamite. It helps increase his trade. If you sell Hercules Dynamite to farmers and are not supplied with one of these signs we will gladly send one if you ask for it. If you are not a customer we want to interest you in the sale of

HERCULES DYNAMITE

to farm customers. It is proving a profit-maker for merchants throughout the country. Many of these men hesitated at first to do business in such a commodity. Now they know that their objections and fears were groundless.

We stand ready to assist you in many ways to build up this department of your business. A Hercules sign in front of your store will help attract trade. Free advertising matter of various kinds will be supplied. You will have the assistance of our extensive advertising in farm papers which is continually increasing the use of dynamite on the farm. Fill out the coupon below. Mail it today and we will give you our active co-operation.

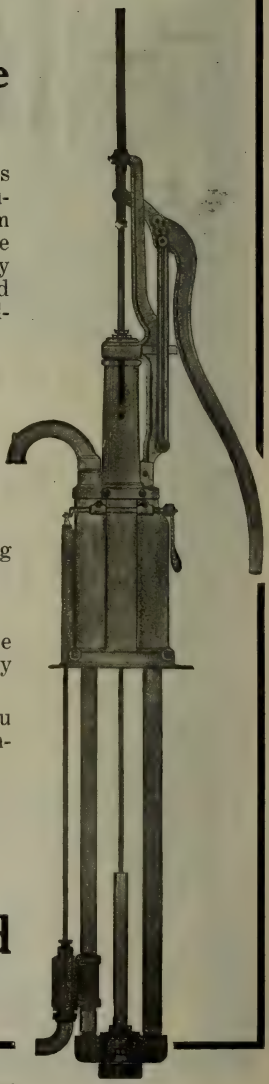
BT Ready-to-Ship Pumps

"7 Pumps that take the place of 700"

The BT line of pumps are seven in number—seven pumps that meet with every demand. We specialize in the manufacture of these seven pumps, and are able to produce them better in design, better in workmanship, and better in price than any other pumps of their kind. BT Pumps are Ready to Ship, Ready to Sell, and practically Ready to Install. Used for house or barn, engine or wind-mill, outside cisterns, shallow wells and deep wells.

EASY TO HANDLE. You can buy and stock and sell them as you please—the service we give you makes the selling easy and convenient.



Pump Cylinders

Our **Ready-to-Ship** idea changed our cylinder variety from 10,904,000 to just 67 different styles. The change has proven a benefit to us, the dealer and consumer. We are now making them better and cheaper and selling them for less money.

Pump Leathers

BT Pump Leathers are cut, formed and finished with the greatest care. Only best portions of hides are used. They will keep in stock for years without deterioration.

Our catalog will explain thoroughly the advantages you derive from selling BT Ready-to-Ship Pumps, Pump Cylinders and Pump Leathers. Write for it.

Buy now for summer business—scarcity of raw material will likely cause prices to go up. Quick deliveries.

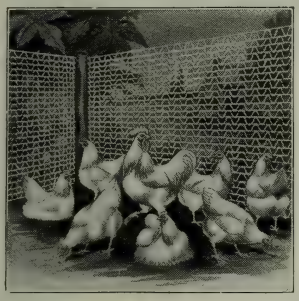
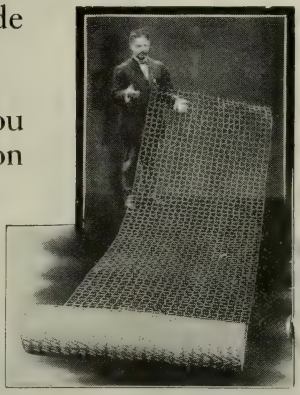
U.S. Poultry Netting Stretches Perfectly

Easily Handled, Strong, Durable —just the thing for chicken coops



Any one who has handled the ordinary poultry netting knows the heartbreaking problem it is to stretch it to get a nice smooth job —not so with U.S. poultry. The U.S. weave is such that the netting will lie as flat on the floor as a piece of carpet, will cover any opening as smooth as a piece of cotton, never buckles or stretches, never curls up when handling. And best of all, it is strongest, being made entirely of No. 19 gauge wire, while most others are made of No. 20.



Every yard of U.S. Poultry Netting you sell will bring its returns in satisfaction to you and your customer.

This is chicken coop time—this business is worth while. Get in touch with the chicken raisers of your town for their coop and run requirements.

Stanley Tools

Made in Canada

The illustration above shows a line of Screw Drivers which should be in the store of every dealer who prides himself upon carrying a complete stock of tools.

It is an assortment of SPECIALS that will appeal to many of your customers.

For instance—No. 21, shown at the extreme right of the picture—blade only 1½ inches long, just fits the vest pocket, a strong little Driver and very handy.

Also No. 60 — shown at the left — only 1⅝-inch blade but with a big sure grip handle. For heavy work into close corners it cannot be beaten. Used by Plumbers, Machinists, Millwrights, etc.

Nos. 51, 52 and 53—Called MACHINISTS' DRIVERS—Big, broad tips for large screws and extra large shanks for heavy work.

Nos. 51½, 52½ and 53½—also Machinists' Drivers, have hexagon nut on shank for use with a wrench.

No. 54—Note the DOUBLE GRIP, also the hexagon feature for wrench. With this latter Driver one can turn anything.

We make other drivers. See Catalogue.

For Those Who Want the Best

—the shot shell that has made its name so rapidly by having the quick punch that blows the clay targets into dust and brings home the finest bags.

Canuck
is the choice

Examine the loading of the Canuck by slicing the side with your knife. Notice the firm crimp with the proper bevel that insures positive operation in repeating shotguns. The body paper is tough but not brittle and will not crack at firing. Test the shot for roundness, hardness and uniformity of size.

Call special attention to the wads. Notice how well they are seated, the cupping, the quality of the felt. Properly seated wads have a tremendous effect on the shooting qualities of a shell. The cleanliness and even granulation of the powder should not be forgotten when showing the loading.

This demonstration of quality will interest your customer and make sales.

All Dominion Shot Shells will stand this test.

Dominion Cartridge Company, Limited

Complete Your Line of Dairy Equipment by Adding

SHARPLES—the Separator with Sales-Service Behind It

Not only does the famous Sharples Separator possess exclusive advantages familiar to most dealers, but carries with it thorough, effective sales co-operation for dealers.

These Sharples Sales-Promotion Campaigns are planned and carried out to meet your own local conditions and to reach the farmer through various ways.

That is why Sharples Separators become ready sellers in your store.

Here's how the plan works:

Your first order brings a Sharples Sales Specialist to call on you. He looks over the territory, gathers data, and plans just what should be done to get Sharples Separators in still greater demand. He knows; his advice is valuable. He helps you to arrange advertising, make window displays, commence out-door advertising and generally get things started. It is also part of his service to educate every salesman in your store as to the most effective method of selling Sharples Suction-feed Separators.

There is a demand for cream separators in your immediate locality. We can prove to you that you can take advantage of it by handling the Sharples Suction-feed Separator. We can satisfy you that the Sharples Separator is far ahead of anything of its kind on the market today. Skims clean at any speed—no troublesome discs. We can show you a larger return on investment than is made in most lines you handle. Not only a bigger discount, but extra bonuses.

OPEN IT UP AND SHOW THEM

The big feature of the Stack Gas Water Heater—the near perpendicular copper tubes in which the water is heated—is readily understandable. All that is necessary to a sale is to open up the Heater and show prospect. He can see at once that the water in those tubes is subjected to intense heat from the time it enters the heater until it passes out of the coil. He will understand how **small columns** of water will heat much more quickly than a **large coil,** especially when heated from all sides. He will be convinced that the Stack can heat water in one minute, and he'll buy because he's perfectly satisfied that he's getting the best heater on the market.

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.

Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

Success and Your Associates

ALWAYS associate with men who are earning more money than you are. Such is the advice given by a man whose name is known the world over for his own success and the business which he created. It is good advice of a certainty, but we are not urging that it is the best advice. At the same time it is wise to associate with better or bigger men than you are yourself, because you are likely to be lifted up to their levels.

Most of us would probably like to be the intimates of J. P. Morgan, or of John D., or of Charlie Schwab, or Canny Andrew. If we had a speaking acquaintance with John Wanamaker, or Lord Beaverbrook, or Lord Shaughnessy, and with other distinguished and successful men, we would take comfort from the fact.

And most of us would feel rather small and uncomfortable if we were placed beside President Woodrow Wilson at a dinner table, or beside Sir Robert Borden, Sir Herbert Holt or Sir Wm. Mackenzie. And the reason would probably be that we know so little of the knowledge that really counts. If these successful business men engaged us in conversation we would probably find ourselves knowing very little about the things that matter.

This will illustrate the point:

Here's a true story. A Toronto manufacturer found himself on a train going to Albany in company with a number of distinguished Americans about to attend the inaugural ceremonies of a State Governor. A washout led to a delay, and the Canadian was thrown into close association with senators and congressmen and prominent lawyers. They bantered the little Canadian about Canada. He had the pluck of a bigger man. He had been a constant reader of THE FINANCIAL POST, and had absorbed many facts about Canada. He surprised his American travelling companions with his positive, well-informed and wide knowledge of Canada. When the company reached Albany, the Canadian was persuaded to attend the ceremonies and was introduced as the man who knew all about Canada. The Governor was interested in Canada, and said so. and the little Canadian found himself telling the story of Canada very ardently to a very attentive listener, much to the amusement of his friends who introduced him.

This man made a hit on that journey, and many friends. One of the company gave him a stock market tip worth a fortune

The point of this story is: You, as a Canadian, can make yourself informed very fully and intelligently if you become a regular reader of THE. FINANCIAL POST. You can make yourself a worthy companion and intimate of presidents and magnates. The world likes to listen to men who know something well, and who can talk interestingly and informingly on the subject of their study.

You can become worth listening to if you know your Canada well. And you can get the kind and amount of knowledge concerning Canada which will make you interesting to others if you will read THE FINANCIAL POST regularly each week

IF you read THE FINANCIAL POST REGULARLY you will find yourself keeping company with the highest paid staff of editors engaged on any publication in Canada—trained men who know how to make others know what they know and learn.

You will find yourself living in a most interesting world—the great, throbbing world of business. You will have your thoughts tremendously stimulated and helpfully directed. You will find yourself becoming a fit table companion for big men — this because you will have knowledge of a quality that will keep you from shame.

What is it that keeps you and THE POST separated? It cannot be its subscription price of $3. Probably it is because you are not very well acquainted with this paper.

We are going to put it to you this way: If you have the desire to be worthy of association with big men, then prepare yourself for such association by reading THE POST, and to make acquaintance easy, we provide the coupon below. It offers you THE POST for four months for a dollar bill.

The MacLean Publishing Company, Limited,

Dept. F.M., 143-153 University Avenue, Toronto.

Send me / us THE FINANCIAL POST for four months for One Dollar. Money enclosed / to be remitted

The Two Essentials of Every Sale

A Satisfied Customer

A Satisfactory Profit

Every man who enters your store is a prospect —a prospect in more senses than one—a prospect for a sale—a prospect for satisfaction for himself —a prospect for profit to you.

He is a prospect for an AutoStrop Safety Razor. There is nothing he will enjoy more than a clean, comfortable shave—one he can secure with ease and comfort in less than three minutes—there is one razor that will give it to him—one razor that is always "on duty"—that will give satisfactory service under all conditions—the one razor that sharpens it own blades automatically and thus keeps them in perfect condition at all times.

The AutoStrop Razor

is the ideal one for you because it gives you the two essentials of the desirable sale—a satisfied customer and a satisfactory profit.

Our extensive advertising campaign is planned with the idea of creating satisfied customers for you—link your store up with it by prominently displaying AutoStrop Safety Razors in your windows.

AutoStrop Safety Razor Company, Ltd.

Toronto, Ontario

When suggesting a razor for soldiers' use remember that the AutoStrop, because of its self-stropping device, is most suitable for active service.

Tree Pruners

The great efforts to increase food production which will be made this year will tend to increase sales of tree pruning tools. Every grower will be anxious to give his trees every assistance to bear well.

You can do your part by being prepared to supply the most approved type of pruners. We have many styles all positively guaranteed against defects in material and workmanship.

Every occasion that prompts gift-purchasing is an opportunity for the "Premier" dealer.

IN the past a good many electrical appliances have been bought rather thoughtlessly—by folks who wanted merely the convenience that electricity brings. But there will be less of this kind of buying in the future. There will be more inquiring into merit, into design, construction, finish. That's the thought most dealers have in mind when adopting the new "Premier" line. They realize that in the "Premier" organization are men who have grown up with the industry; men who are known throughout the trade as progressive. At a glance they know that "Premier" appliances are "all that the name implies." And the advertising campaign now running is but the forerunner of our effort to warrant their faith in becoming "Premier" dealers. You can't afford to judge the "Premier" by your previous experience of electrical appliances makers. Get in touch with the "Premier" men themselves, know the goodness of "Premier" appliances, learn the handsome margin of profit they allow. Act on the impulse—write now.

The Garage that's as good as its Stanley Hinges, is a mighty good Garage.

A Garage can be judged by its Hinges

STANLEY Hinges swing heavy doors easily, quietly, weather-tight. They need no inside space for operation and permit all the doors to be opened at one time—an important advantage.

In the above illustration the gracefulness and stylish characterful lines of the Stanley Hinges are evident. The doors here are hung on Stanley Garage Hinges No. 1457, the 24-inch at top and bottom, with 10-inch at the center. There are larger Stanley Hinges for very massive doors.

Stanley Door Holders No. 1774 make it impossible to have an accident due to a swinging door crashing into the auto. These, with Stanley Butts, Bolts, Latches and Pulls, are in constant demand by builders and garage owners.

You should carry a complete line of Stanley Garage Hardware because there's a call for it; it satisfies perfectly every garage requirement, and there's money for you in handling it!

To-day write for Stanley Garage Hardware catalog and information on "Selling More Stanley Garage Hardware."

THE STANLEY WORKS

Auto Accessories Are Not Taxed

Tax Announced on Automobiles, but Accessory Men Are Not Advised That it Will Apply to Their Commodities—Increase of Income Tax Will Affect Many Hardware Merchants and Their Employees

AUTOMOBILE accessory dealers in Canada have been led to believe the new taxes levied on automobiles will not apply to accessory lines. According to the speech of the Hon. A. K. MacLean, Acting Minister of Finance, delivered in the House on Tuesday of this week, there was no mention made of the accessory lines. The opinion was expressed by some wholesale dealers that such a tax was almost to be expected in view of the tax levied on automobiles. It did not seem consistent that the automobiles should be taxed and that the parts go untaxed

"The resolutions shall also provide for a special war excise tax of 10 per cent. upon the selling value of automobiles, jewelry, gramophones, graphophones, phonographs, talking machines, mechanical piano and organ players and records when imported into or manufactured in Canada. The tax upon automobiles is applicable to all imported into or manufactured in Canada and unsold this day. Such are the taxation proposals, and other than I have stated no tariff changes are proposed."

Gramophones Included

From the above citation it will be apparent that it is proposed to tax gramophones, graphophones, phonographs and talking machines, together with the records for same. As some hardware stores handle these various lines, it will be apparent that the tax on these will be of vital interest. There will be no complaint from any quarter, however, as the necessity for these taxes has been fully realized.

Incomes Will be Affected

Another feature of the new taxation proposals that will interest the hardwareman is the fact that the taxable point for incomes has been reduced from $1,500 to $1,000 in the case of unmarried persons, and for married persons from $3,000 to $2,000. In consequence of this provision quite a number of hardwaremen who were not included in the previous schedule will be included. An amendment is furthermore to be introduced providing for an exemption of $200 for each child under the age of sixteen years. Take for instance the married man with an income of $2,500 per year and with two children in his family. He would be called upon to pay on $500 less $400 for the two children. This would make the remaining taxable income $100 and would amount to $2 at 2 per cent.

HOW INCOME TAX APPLIES

To illustrate the effect of the proposed income tax amendments, Hon. A. K. MacLean, in his budget speech, read a statement showing the present and proposed tax, payable in the case of a married person on the following incomes:—

Income	Present Tax	Proposed Tax
$ 3,000	Nil	$ 20
5,000	$ 120	140
10,000	360	392
20,000	1,260	1,382
30,000	2,460	2,707
50,000	5,260	5,782
75,000	10-010	11,007
100,000	14,760	17,607
200,000	42,760	50,957
400,000	101,760	142,757
600,000	130,700	195,407

Important amendments to the Income Tax Act are proposed. The exemption in the case of unmarried persons is to be reduced from $1,500 to $1,000, and for married persons from $3,000 to $2,000, the rate to be 2 per cent. from $1,000 and up to $1,500 in the case of unmarried persons and widows, or widowers without dependent children, and 2 per cent. from $2,000 and up to $3,000 in the case of all other persons.

The present super-tax is to be continued as at present up to incomes of $50,000, at which point a new classification and rate is proposed, and which is as follows:

From $50,000 and up to $75,000, 15 per cent.

From $75,000 and up to $100,000, 20 per cent.

From $100,000 and up to $200,000, 25 per cent.

From $200,000 and up to $400,000, 30 per cent.

From $400,000 and up to $600,000, 35 per cent.

From $600,000 and up to $800,000, 40 per cent.

From $800,000 and up to $1,000,000, 45 per cent.

All over $1,000,000, 50 per cent.

In addition to the normal tax and super-tax, it is proposed during the war to enact a war surtax assessable up to and inclusive of the calendar year in which the war ends upon the tax payable as follows:

On incomes from $6,000 to $10,000, 5 per cent.

On incomes in excess of $10,000 and not exceeding $100,000, 10 per cent.

On incomes in excess of $100,000 and not exceeding $200,000, 15 per cent.

All incomes in excess of $200,000, 25 per cent.

"At the last session of Parliament the Minister of Finance was strongly urged to provide an exemption for each child in the family of a married person liable under the Income Tax Act. During the recess and before he left Ottawa in January last he had given careful consideration to these representations, and he concluded that some exemption in such cases should be made. Accordingly an amendment to the Act is to be submitted providing for an exemption of $200 for each child under the age of sixteen years. This amendment is not retroactive, and is not applicable to the income tax payable for the year 1917. The corporation income tax now 4 per cent. is to be increased to 6 per cent. Other amendments are proposed, but I need not detain the House with them at this time."

Watches Not Jewelry

In the debate following the budget speech further light was forthcoming on some points which were obscure. One of these developed the fact that watches were not considered as jewelry under the new proposals. Certain classes of watches are handled by hardware stores and merchants will be interested to know that the tax is not meant to apply to them. Jewelry is apparently to be distinguished when it is used as an "adornment for the person." The discussion also developed the fact that it is not intended to tax commercial motor vehicles and motor trucks. Passenger cars or pleasure cars, however, are to be taxed. In the case of the tax on automobiles it is to be made retroactive, that is, any cars already manufactured prior to April 30 but which have not been sold will carry the tax.

Interior of Store of Fabien, Limitee, Montreal, Showing Neat Arrangement of Bicycles and Bicycle Accessories. Week of May 4 to 11 is to be Bicycle Week Throughout Canada. A Good Display of Bicycles Will Help Get the Spring Trade Started.

One-third Store's Turnover in Bicycles

Fabien, Limitee, Montreal, Started a Hardware Venture After War Broke Out and Makes Success of it—Keeping Own Books Helps in Curtailing Purchases—Watch Prices and Stock—Bicycles as a Side Line First New Big Factor

"WE started our hardware department two or three months after the war broke out," said L. E. Fabien, of Fabien, Limitee, 1177 Wellington Street, Verdun, a suburb of Montreal, to HARDWARE AND METAL recently. "We have put the profits back into the business through the buying of stock and have been able to increase our turnover and to establish a business that shows an annual increase."

This is an interesting statement for a business man to make regarding a hardware business that has existed less than four years, and which was started in the fall of 1914. It indicates clearly that it is possible to make headway against obvious difficulties, and in the following story some of the methods that have been used to advantage will be of interest and value to many.

Knowing Your Markets

"We find HARDWARE AND METAL very good to give us the prices as they change from week to week," said Mr. Fabien. "We always are anxious to get it so we can know what is changing and adjust our prices accordingly. We find the market reports very useful."

In these words Mr. Fabien has summed up one of the vital points that every successful merchant must consider and to which he must give heed if he will succeed—that of buying to best advantage in the lowest market—and further, that of adjusting his selling prices in accordance with the changes that are so frequent these strenuous days. Too much emphasis cannot be placed upon this point and the hardware merchant who is alive to his own interests will ponder this actual experience of the Fabien store.

Small Sales of Bicycles First

The first interest in the selling of bicycles was necessarily confined. It was in the fall of the year when the business was started. As a matter of fact bicycles were not seriously a factor in the sales until two years ago. Until that time they were not reckoned as a probable large seller, but the matter of increasing the demand was seriously considered. As a result, the sale of bicycles to-day is responsible for about one-third of the store's annual turnover, rather a remarkable fact after less than three years experimenting with the probable chances of increasing the output. In all, ten different models are carried.

Methods of Display and Sale

"How have you been able to increase the sale of bicycles so that they figure to this extent in your business?" was asked of Mr. Fabien.

"By displaying our bicycles in the windows and by giving our customers good service," was the reply. It was observed that there were many in the district who would probably be interested in the purchase of a wheel and while there have been many enlistments the demand for bicycles has continued reasonably good.

The accompanying photograph is that of a typical window display in the Fabien store. It shows that advantage is taken of one of the best mediums of publicity at the hardware dealer's disposal. The windows should be made to earn a dividend for the store and there is no doubt that the average merchant can make no better use of this medium than by having seasonable and in fact frequent displays such as this to promote interest in his bicycle and sporting goods department.

The Interior Display

The man or the boy, the young lady or woman who has any interest in cycling will find a well arranged display within the store for immediate examination. A selection is thus readily possible and as some eight to ten models are now carried, in various finishes and with a variety of equipment, every prospect is likely to find the desired model suited to the buyer's individual taste.

For the purpose of keeping the samples in neat order a few inexpensive stands are procured and these are fixtures in which but a small amount need be tied up. In this way the needed space is confined to the minimum and the bicycles look well and are readily moved if need be.

Accessory Sales Increased

In addition to the display of bicycles

within, one of the first silent salesmen to the left of the store as one enters is given over to the display of bicycle accessories. It is recognized that much of the profit in handling bicycles comes from the sale of the big variety of accessories that are required by every cyclist. Many want complete equipment and with a new bicycle one will probably want a bell, an extra inner tube and a cover. He also may require a carbide lamp or if he prefers an electric lamp this can be provided. And after wear and tear does its work, spokes, pedals, grips, inner tubes, etc., are required.

"The sale of bicycles has increased the sale of accessories very much and of course the sales work both ways," was Mr. Fabien's way of referring to the growth of the business for these lines.

Advertising a New Catalog

"We expect to advertise in the local papers, and in order to get business from the country we will issue a catalog of bicycles, accessories and other specialties. This catalog comprises 24 pages and cover and is printed in both English and French. The announcement is made on one side of the first pages that a separate catalog giving a full description of the range of bicycles is printed separately. The bicycle accessory catalog comprises such lines as wheels, tires, hubs, horns, grips, handle bars, lamps, electric lamps, pumps, mudguards, saddles, carriers, cyclometers, repair kits, oilers, enamels, tools, Ingersoll watches, flashlights, razors. In these articles it will be noted lines which appeal particularly to the youth and young man.

Catalogs will be mailed to those answering advertisements in the papers and to others that the firm feel may be interested in this line of goods,

In this connection it was further stated that direct reference through the special newspaper appeal would be made to the fact that a catalog would be furnished those directly interested.

The Accessory Case

Mr. Fabien carefully planned the fittings of his accessory "salesman" so that it would have ample room for the care and display of his accessory stock. Thus, there are 60 different sections or compartments where bells, hand grips, spokes, nuts, axles, ball-bearings, pedals, speedometers, tools, tool bags and scores of other parts and specialties are shown. This is a wise arrangement, in that many a man who does not know what he wants so that he could ask for it by name might see the actual part and point it out. Having been a practical cabinet maker, Mr. Fabien designed and made this sectional case himself.

Other Features of Store

The store of Fabien Limited has some other interesting features. Thus, the shelving and boxes as shown in the interior photograph accompanying was designed and built to meet the needs of the stock, and a neat appearance is thus obtained which will appeal to the customer. It likewise is a protection to the stock and keeps it neat and free from dust and sunlight. The drawers were planned to give ample room for the average article of shelf hardware in quantities desirable to have ready at hand for immediate sale. Their dark oak finish gives them a desirable and fitting shade well suited to the general color scheme of the store as a whole. The drawer material is of chestnut.

In order that the surplus stock may be kept in equally good condition sliding doors have been provided above the boxes just described. This has the additional advantage of making a presentable section right from the floor to the ceiling. Seven of the sections are used for hardware and four have been adopted for paint and varnish specialties.

Here's a Good Screw Case

How many are there who have wished for a good case that would hold a fair stock of screws and where they would be convenient when asked for? Here this has been provided in a different manner from the average case seen by the writer during many years' experience, and the arrangement is one that any store might provide for itself without great expense.

Immediately under the forward serving counter, just adjoining the first silent salesman on the shelf hardware side of the store, a space extending to the floor has been reserved which is three and a half feet long. The same has been divided to suit the extent of screw stock carried and likely to be needed for the future demands of the trade. A large number of drawers two inches deep, three and a half inches wide and twenty inches long are made to fit this section. These, being of good length, are neatly

Window Display of Bicycles Arranged by Fabien, Limitee, Montreal. Attractive Window Displays Are One of the Best Advertisements to Help the Sale of Bicycles.

Paint Advances 15c Gallon on Colors

Reason Assigned is Advances in Price of Linseed Oil and Dry Colors—Paint Business Reported Very Good, With Many Prospects—All That is Needed is Aggressiveness in Getting After Business

AN advance of 15c per gallon has been announced as effective by the paint manufacturers of Canada to apply on first and second grade house paints, floor, wall, porch, concrete, in colors but not in white. This advance has been occasioned largely through the higher price of linseed oil that has prevailed since the last general advance of 25c per gallon made in the price of paint in January of this year. At the time of the last advance in January linseed oil was quoted in a wholesale way at $1.50 to $1.55 per gallon for raw oil in single barrel lots. At the present time raw linseed oil is quoted at $1.86 to $1.95 per gallon in single barrel lots. Price to manufacturers buying in carload lots would be somewhat lower than these figures, but the proportionate advance would be the same. The manager of one of the Canadian paint companies is authority for the statement that an advance of 10c per gallon in the price of linseed oil should mean an equivalent advance of 7c per gallon in the price of paint. In other words, with an advance of 35c to 40c per gallon in the price of linseed oil the corresponding advance in the price of paint should be 25c to 28c per gallon. The manager in question was strongly of the opinion that the advance put into effect during the present week should have been considerably more than the price announced.

Another factor that has entered into the present increase is the difficulty in obtaining dry colors and the advance in prices which have recently taken place in these commodities. Most of these articles now come from the United States, and conditions have been such in that country to make the manufacture and shipment difficult.

Advance Predicted

This advance was definitely predicted in HARDWARE AND METAL in our issue of April 13. On that occasion we stated: "New Paint Prices Possible—It is very probable that higher prices will prevail for paint and some kindred lines. These may become effective within a few days. HARDWARE AND METAL was definitely informed that the increased cost of oil and the strong position it is likely to occupy for some time, higher costs for containers, packing, labor, etc., made this a very probable forecast. It will be remembered that the special announcement appearing exclusively in HARDWARE AND METAL on February 2 stated that orders would be taken on the old basis up to April 1, and the general tendencies indicated that even higher prices might be later considered. It is probable now that on mixed paint an advance of 15c to 25c per gallon may be made."

NEW PAINT SCHEDULE OF ADVANCES APRIL 27, 1918.

First and Second Quality House Paints—Colors advance 15c per gal.

Flat Wall Paints—Colors advance 15c per gal.

Floor Paints and Enamels advance 15c per gal.

Marine Paints (except dory) advance 15c per gal.

All other Oil Paints (excepting barn paints), advance 15c per gal.

White Paints to be sold at not less than 10c per gallon over revised cost of colors.

Note.—These prices indicate the general advances made but in some instances individual paint makers may have made odd revisions applying to their own lines.

The trade, therefore, was well advised before the recent advance was made.

Business Surprisingly Good

"Business is surprisingly good in ready-mixed paints," said the manager of one of the Canadian paint company's in reply to a question from HARDWARE AND METAL as to the way the spring paint trade has opened up. "Repeat orders are coming along in good volume. One firm in a wide-awake city recently sent us a spring sorting order for $1,200. Paint is selling with this concern because they have gone after the trade in an energetic advertising campaign. They have featured the spring paint-up idea in their store displays and in the newspaper advertising. They report that the people of their city are crazy about the paint-up idea this year, and that they are selling the paint fast. This is but an illustration of what can be done in the way of selling paint this season. People are ready to do painting if the matter is put to them in the right manner. This recent advance is not going to affect the sale one iota. They will realize that it is poor economy to put off painting if the advantages are put up to them in the right light.

Sold Thirteen House Jobs

One of our travellers on Saturday of last week assisted a dealer to sell the paint for thirteen house jobs in his town. The dealer realized that these were likely prospects, and when our salesman called on him the situation was laid before him. As a result the dealer and our salesmen went out and sold the paint for thirteen houses in that town. The aggregate of the sales for this dealer on Friday and Saturday of last week was in the neighborhood of $450. This is an example of what other live dealers can do. They should not sit back and expect the manufacturer's representative to unearth the prospects for them. They should have initiative enough to look out for prospects. Another dealer unearthed three prospects for barn paint, and our representative went with that dealer and sold thirty-four gallons of barn paint.

"These are but isolated examples of what could be done throughout the trade if the dealer would take enough interest in his trade to look out for the prospects. If dealers were to take a live interest in this matter it would not be possible for the manufacturers to supply the demand that would develop. The matter of price has nothing to do with the selling of paint. It would be as easy to sell paint now as it was in normal years if the prospective customer was made to realize what is involved in his failure to paint. It is cheap insurance for his building, even if prices were much higher than they are at present."

FIRE LOSSES IN CANADA LARGE

J. A. Robertson, secretary of the Canadian Fire Underwriters' Association, stated to the Fire Insurance Commission of Ontario, during the past week, that the fire loss in Canada during the year 1916 amounted to 3.58 per cent. compared with 2.32 per cent. in the United States, .67 in England, .63 in France and .17 in Germany. He asserted that the primary cause for fires in Canada was the carelessness of the people, and that 28 per cent. of the fires were preventable. On this basis Canada could save $6,100,000, based on the 1916 fire losses, if the element of carelessness were eliminated.

LEAD IMPORTATIONS PROHIBITED

The United States Government has prohibited the importation of lead ore into that country in order to save tonnage. It was the intention of the original order to prohibit all lead imports into that country except those coming from Canada and Mexico after May 13. Since that time Mexico has been included within the order owing to the rail congestion. However, it is hoped that Mexican ores will be allowed to enter the United States as the lead ore from that country contains large values in silver which the United States needs for coinage purposes. For the eight months' period ending March 31, Mexico shipped to the United States 97,000,000 pounds of lead ore as compared with 17,000,000 pounds from all other countries. It is understood also that the shipments of zinc ore from Mexico have been ordered halted on the ground that freight car space is needed for other and more important purposes.

Present Cows to Sanatorium

Proceeds Raised by Retail Hardwaremen's Association in Connection With Picnic at Port Stanley—Cows Form Part of Herd of 30 Which Give Milk Supply to Worthy Institution

THE London, Ont., Retail Hardwaremen's Association has given evidence that its members are interested in worthy and philanthropic causes by the presentation of three fine cows to the Queen Alexandra Sanatorium. The amount raised for this purpose was $350 and was collected in connection with the last annual picnic held by the association at Port Stanley. When the annual picnic was talked of for 1917 it was suggested that something should be done to assist the Sanatorium in the good work it was doing. The idea was approved by all the members of the association and it was decided that a raffle would be a good way to raise the money. A traveler interested in the work of the association donated a fine cut glass fruit bowl for this purpose. Duplicate tickets were printed and 3,500 were sold at ten cents each, making a total of $350.

The sale of this large number of tickets was made possible by the enthusiastic work of all the members of the association, assisted by the clerks of all the stores. A considerable number of tickets were sold at supper time on the occasion of the picnic, when between four hundred and five hundred hardwaremen and boys with their friends sat down to lunch at one time.

The selection of the cows was made by J. A. Brownlee, vice-president of the London Retail Hardwaremen's Association, who is considered an expert on cows, and was assisted by the head farmer at the Sanatorium. As will be noted by reference to the picture the animals have the appearance of being fine types. They form part of a herd of thirty and give their full share of the milk that supplies the sick kiddies, grown people and soldiers at the Sanatorium. The officers of the London Retail Hardwaremen's Association are shown in the picture and are as follows: President, T. A. Jones of James Cowan & Co.; vice-president, J. A. Brownlee, of Brownlee Hardware; secretary, T. H. Purdom, Jr., of Purdom Hardware Company.

An amusing incident happened following the taking of picture shown herewith. Mr. Brownlee is a horseman as well as a stockman and had an opportunity to prove his prowess in getting an unruly animal under control. Just after the picture was taken the cow in Mr. Brownlee's charge bolted and made off at full speed for several hundred yards, with the vice-president clinging to the rope. With coat tails flying to the breeze and feet making a rapid clap, clap, this London hardwareman had a merry lead for a time. But he held to the rope and shortly succeeded in getting the cow to desist from her rapid flignt, after which she was brought back to her starting point.

The gift was greatly appreciated by the Queen Alexandra Sanatorium, the superintendent on receipt of the cows sending the following letter to the association:

Mr. J. A. Brownlee,
Retail Hardware Association,
London, Ont.:

Dear Sir,—Will you please extend to the members of your association our most sincere thanks for their splendid gift of three cows to the Sanatorium. We assure you that their kindness and interest is greatly appreciated.

Yours very truly,
D. A. CRAIG, Superintendent.

MAY INCREASE SIZE OF CEMENT BAG

During the past week there was introduced into the House of Commons by Sir George Foster some proposed amendments to the Inspection and Sale Act, one of which provided that a standard of 94 pounds be made for all cement bags. The majority of bags used at the present time have a capacity of 87½ pounds. The proposed amendment met with considerable opposition when the House discussed the matter in committee. Cement dealers when interviewed on the matter were at a loss to know why such a measure should be introduced. Various opinions were ventured, one of them being to the effect that a bag of 94 pounds would conform more nearly to the United States standard bag which contains 95 pounds. Another opinion was to the effect that engineers would probably welcome such a change as four bags of 94 pounds would make five cubic feet and would therefore be easier to compute in mixing operations. If such a measure were put through it might entail some loss in the shape of discarded bags.

These bags can be used four or five times, and in some cases where extra good care is taken of them they have been known to last for ten fillings. Time would undoubtedly be given to work off the old stock of bags that might now be on hand. However it is not yet apparent that the measure will pass the house owing to the opposition which it met.

Cows Presented by London Retail Hardwaremen's Association to Queen Alexandra Sanatorium, London, Ont. Men in the picture comprise the committee in charge of collecting funds for this purpose and from left to right are: T. Jones, of the Cowan Hardware Company, President; J. A. Brownlee, of J. A. Brownlee Hardware Company, Vice-President; C. J. Craig of D. H. Howden Company; T. H. Purdom of Purdom Hardware Company, Secretary.

More Paint Should be Used and Sold

Charley Wright, of Acme Hardware Co., Continues His Discussion of Paint and Varnish Trade and Suggests Plans for Carrying Out a "More Paint" Campaign in Another Conversation With Jim Rogers, of the Spreadit Paint Company

There can be no doubt but that more paint can be sold in Canada if the matter is taken up energetically. The following is the second installment of an article designed to show the field that is "ripe already to harvest." The first of the series appeared in a recent issue and caused comment among the paint trade.—Editor.

NOTHING short of smallpox or a case of "stretcher blighty" could have kept Jim Rogers of "The Spreadit Paint Co." from calling at "The Acme Hardware" store during his spring sorting trip. His conversation with Charley Wright last fall, after the latter had booked his spring order, had bristled so full of suggestions and information concerning the paint trade that he had designedly arranged his call earlier than usual to pick up some more pointers. Besides every spare moment since that day confronted him with the possibilities for his trade arising out of the figures given by Wright.

"Hello Jim, you're around pretty early for sorting orders aren't you?" greeted Wright.

"Orders be hanged," expostulated Rogers, "I told you that the next time I called here it would be with a note book; my order pad is in the grip where it's going to stay till I pump you dry of those criticisms and suggestions you made about the trade when I was up here last fall. I don't care if you don't sort up a half-pint tin this trip. You've got something a blamed sight more valuable for me under your hat than sorting orders and I want it—and want it bad."

"Oh, that's your line of talk," exclaimed Wright, good-naturedly and with surprise. "I didn't think for a minute that those little one-horse observations of mine would be worth a continental cuss to you and that you'd have forgotten them by this time. However, if it worries you to have me get some more off my chest come on in to the office and I'll try to load you up."

Rogers and Wright seated themselves behind the closed door of Wright's business sanctum. Roger's note book and pencil were quickly produced instead of the usual cigars. In fact Rogers had entirely overlooked this formality in his eagerness to get Wright started on the topic of using and selling "more paint" discussed in their former conversation.

"I intended to put the whole of our last conversation before the house," commenced Rogers, "but after thinking it over I decided to wait and discuss the whole matter more thoroughly with you. So here I am to thresh this matter out to a finish."

"You'll make me think I'm some pumpkins, interviewing me in this manner," observed Wright with a grin, as he settled down for what he knew would require a long discussion.

"Well there is this about it, Charley, those figures and arguments of yours have kept me awake more than one night, and the mischief of it is they've been proving themselves just about right. They opened my eyes and ears to a lot I didn't know about the trade and everywhere I go I can see them sticking out like sore thumbs. You certainly diagnosed our case right down to the ground and now what I want is the tonic you promised to suggest for our trade."

"Where'll I begin?" asked Wright with some amazement at Rogers' eagerness. He was not a little surprised at the effect his former criticisms had produced on Rogers, and was stalling for time to arrange his ideas so that his arguments would prove as reasonable and logical as he felt they should be.

Rogers pondered a moment before putting his leading question. "You seemed to be of the opinion that the paint trade, as a whole, is a loose-jointed rambling contraption handicapped by parts that aren't nicely machined for smooth running. To you they seem to lack co-ordination and co-operation to make good progress against the adverse facts you pointed out, and to keep pace with the other industries of the country. What's your suggestion for fixing us up so that we can take all of these grades on high gear?"

"Did it ever strike you that a great deal of co-ordination and co-operation is lacking in your methods of distribution?" countered Wright. "Some of the branches of your business are something like the doctors':—the allopath has a sneaking idea that the homeopath is providing business for the undertaker, and the homeopath is vice versa with the allopath; while both are about half-way right and three-quarters wrong."

"Come on, Charley, I know you've got some brass tacks to pound on this subject, don't be afraid to hit them clean and straight," encouraged Rogers with an endeavor to get Wright started.

"There was a time in the early history of this continent when painting was looked upon as a moral detriment to the community," commenced Wright reminiscently, "and so in order to keep the community from corruption and contamination and to make their example a good one, the good old Pilgrim Fathers around Boston called to account a minister who had had the audacity to paint his dwelling."

"If you'd lived in those times, Charley, you'd have been shot at sunrise for heresy, treason and wizardry with your argument for 'more paint.'"

"Perhaps I'll be tried yet for spreading seditious libel on your trade," mused Wright. "However times must have soon changed and their morals sadly degenerated, judging from the well preserved condition of some of the old New England homes now standing. As you know good old-fashioned 'pure white lead' and 'pure linseed oil' were the only orthodox paint materials for many years, till some heretic got into his head that he could mix a standard formula in a factory and parcel it out in cans. Naturally the chaps that had inherited the mysterious secrets of painting from their forefathers and conjured them up on the job with simple pots and paddles, resented this intrusion. They scented all kinds of danger. They had some reason to do so, at that. Painting began to look like something that anybody could do;—and with Tom, Dick and Harry as well as Samantha turned loose on the job without any real knowledge of the proper conditions for painting, trouble was bound to come—and it did come as you probably realize in every town you call on. But that didn't stop the maker of ready-mixed-in-bunches. Despite his heresy, and the fact that Tom, Dick, Harry, Samantha and the hired man ocasionally got the job and themselves all mussed up, he multiplied his factories and extended his business to the benefit of the trade in general. Then some fool notion got into his head that the business needed a chemist. This move simply out-mystified the mystery of the old white lead painter's hereditary lore. The ancient and honorable painting industry was being turned into a comedy by giving the contents of those standard packages a college education with test tubes and all the other black art of the laboratory.

"Of course the chemists had to do something to hold down their jobs, and just naturally had to chemist with everything in or out of sight. The upshot was that before long the heretic manufacturer with his alchemic chemist began to order barrels, then cars, then more cars of stuff with names that were just so much Greek to the old timer. More mystery, more terror, more damnation hove in sight with more factories, more laboratories, more chemists and more business. And this wasn't being done for charity and our friend the orthodox painter was mighty well aware of it. The truth of the matter was that the organized manufacturer of standard formula was digging up good paint materials that sadly jolted all the time honored traditions of the trade and he was making good with his

scientific foolishness. But he has always fallen down just in one spot and so far as I can see is likely to keep stumbling for some time to come. He knows as well as you and I that his paint is right for the purpose for which it was intended, but he can't scatter himself or his organization all over with every tin that he sends out. Consequently he cannot control the conditions under which it is used. He scatters his goods to the four winds and like the biblical seeds, some gets on good ground, some gets on poor ground and a whole lot gets spilled or plastered on good, bad and indifferent ground."

"We've taken all kinds of trouble to have the directions on labels, read so plainly that all a man or woman has got to do is read them, open the can and commence operation," explained Rogers.

"When I start traveling in the air, Jim, I'm going up with the man that's been running around with an aeroplane for some time in preference to the chap that's read the life of the Wright Brothers and sipped his knowledge of flying out of the condensed essence of a correspondence school," rejoined Charley, "and that's where the time-tried painter has one vantage point in service to the public with paint. He has had experience with paint, he knows when to use it and when not to use it. He has developed an instinct that tells him when conditions for its use are right or wrong. It's just here that both the painter and manufacturers have clogged up the machinery of the trade. Both sides have mistrusted each other too much. The painter has been unable to fathom the discoveries and progress of the manufacturer, despite the trouble that has been taken to establish absolute proof of superiority for manufactured goods through paint and varnish associations and the good offices of government testing bureaus. On the other hand the manufacturer has too often imagined that he could sail his own little ship full rigged through all the besetting shoals of paint application by a syncopated short course in painting set forth in small type on the back of his can,—for him the painter could go galley-west in a hurricane of his own wrath. Between the two, our beloved public, who must pay the shot, have been wondering where they really got off at."

Rogers interrupted with a laugh. "Say, Charley, did you ever have the chance of reading over an architect's specifications for paint, or the specifications attached to a railroad or big corporation requisition, prepared by an authority on paint who lived in a sub-cellar in the dark ages? No? Well, it's more fun than you'll find in the almanac when you follow them up with the prices they're willing to pay, considering all the pure this and that, that must absolutely be contained in the stuff they want. If you ever have to go through a strict specification deal in paint, take an arm chair along with you to rest up occasionally from the dizzy spells you'll get. Go ahead now. Your little speech just reminded me of one or two little deals I've gone through."

"I'm not caring a hoot about the big fellows, Jim. If they haven't got enough money and brains to take care of themselves, that's their lookout. What I'm leading up to is that the more thorough distribution and use of paint for every day use is being hindered by this confusion brought about by needless misunderstandings between two big factors in paint distribution. Ever since the ready-mixed paint game began the manufacturer has gone too much his own sweet way regardless, and the painter has wielded a knocking hammer that hasn't driven home any nails for his effort. There's a whole lot that the painter can add to his knowledge of painting materials from the careful scientific investigations and tests of the organized manufacturer. What's more he might as well set his mind easy about hindering the manufacturer—it's an impossibility—the manufacturer is going to continue his effort and progress and the painter might as well climb into the band wagon while the climbing is good.

"On the other hand manufacturers are a long way from the stage where you can afford to ignore the benefit of having experienced painters use your goods more generally. From the little experience I've had in handling paints it pays to do so; and if you can induce the public to utilize the combined services of good paint and experienced painters your efforts will result in better appreciation of mixed paints and open a larger field for your distribution. Let me draw one of those deadly parallels of the journalists that illustrates the point. When I sell a saw or a chisel to an experienced carpenter I know that they will be appreciated and used to far better advantage than when I sell the same articles to a man who wants to keep them around handy for odd jobs,—and his wife to open tomato cans with. There is this difference, however, in the average man's appreciation of a sharp edged tool and mixed paint. He can quite comprehend the limited use of a chisel as a sharp edged tool—and he doesn't come at you for his money back if the wife happens to land on it as the first thing handy for lifting carpet tacks or prying open a paint can. But with paint too many people are of the opinion that because it's ready-mixed it ought to stay stuck wherever it's put and whatever it's put on or over. If it don't, well—us fellows have to fork over another can to make good, or rap up the 'no sale' sign on the cash register. Everybody cites the axiom that 'you can't mix oil and water' in everyday affairs, but you can't seem to get them to see the application of the rule with paint on a surface that is not in a condition to receive it. Now a painter appreciates and recognizes conditions with regard to paint that the public have failed to comprehend. I'm with you fellows heart and soul in encouraging the use of mixed paint, in the use of good paint of any kind for that matter, but I have felt for a long time that you if you would encourage, not discourage, the painter in its use, by pointing out strongly and directly to the retailers, their clerks and the public the added advantage that will be given through the services of the painter, you would greatly assist in placing your goods on a better footing with the public as a service in protection and preservation."

"What about you retailers taking a hand in the game?" shot out Rogers pointedly.

"To tell the truth I guess as a whole we've been as much to blame as the manufacturer," confessed Wright. "About three or four years ago I got my eye teeth cut on that very proposition and if I tell you the story I think it puts the argument I am trying to make in a nut shell. There's a chap up the street by the name of Bob Wagner, who owns two or three houses which he keeps in pretty good shape if paint counts for anything. Along about this time Bob had just put up a new house for himself and was beginning to think about paint for it. He came into the store one day and it so happened that I waited on him. He had never used ready-mixed before but was showing some curiosity about it, so I loosened up on the subject and we discussed the matter pro and con for quite a bit. He told me he had just moved in so he thought he would buy ready-mixed and put it on himself. Far be it from me to discourage him from doing so, at that time, and I sold him his whole bill from primer to varnish. Bob went at it with a vengeance every spare moment he had,—five o'clock in the morning, noon-hour, Saturday afternoon, rainy days and holidays and I've an idea he sneaked in a few good hours with the inside work on Sundays. I've passed his place at ten o'clock at night with Bob slinging paint and his wife holding a lantern, so that he could see. It struck me that the old lady must be made of pretty good stuff to stand there all evening holding a lantern at arm's length, listening to some of Bob's profanity and getting an occasional squirt of paint for good measure. Once in a while he'd call on me for a pointer or two and of course I'd chip in with all the advice I could muster. After the job was finished Bob took me over it with him. I noticed he wasn't any too enthusiastic over the work and I must confess I was disappointed too. As we moved around the place I could tell just about what time of the evening Bob had been painting certain parts by the way it was put on. About a year afterwards Wagner came in the store and very emphatically declared that there would be no more ready-mixed for him, and I saw I had something to patch up if I was going to hold his trade in that direction. It struck me at the time that the paint hadn't quite a fair chance the way it was put on so I carefully pointed it out to him. Bob, of course, couldn't see it that way. It was all the fault of the paint whichever way you looked at it. Even so, he argued, that won't explain why it peeled off on the north side, and I must confess I just knew enough about painting then not to realize why. He was good sport enough not to come back at me to replace the job, but I knew that I was to lose more than that if I couldn't fix him up.

"I wanted to make good on the work but just how to do it had me puzzled. About an hour afterwards I was going up to the post office for the mail when I met Jake Saunders who does most of the painting around here; and Jake knows more about putting on paint in a day than I did in a year. 'Jake,' I said, 'I'm going to open up to you four-square about that paint on Bob Wagner's house.'

Jake heard me out while I told the whole story, but I noticed that he increased a cynical grin about the corners of his mouth as I unfolded my woes. 'Serves the both of you darn well right,' was Jake's observation when I finished. 'I've asked you for medicine, Jake,' I told him, 'and I'm willing to take it.' Then Jake told me his side of what he'd seen. 'Any man that's fool enough to think that he can preserve his patience and brush paint well enough into a surface after he's done a day's work and when his head and eyes feel more like hitting the hay deserves to be left with a job on his hands like Bob's got. Painting is a real job, and a day's work, and if he thinks that his wife with a lantern throwing shadows all over can take the place of the good old sunlight why didn't he contract to have the house built by moonlight and let the contractor snooze in the backyard hammock when the sun was hot?' Jake observed the same as I had that he could hit every ten-o'clock-at-night-spot on the house. 'Take his priming for instance,' added Jake, 'who in under the old stable lantern can tell whether a knot or sap-spot has been properly primed with his wife squirming to get a comfortable place to sit while she's providing the light.' 'How do you explain that peeling on the back of the house?' I asked. 'That's easy,' he answered. 'Bob commenced painting that side on the 24th of May; he had a holiday and was out to make the most of it, and if you remember it rained all the night before and it was wet and foggy all that morning. I know you just couldn't keep Bob away from that job if there'd been a bunch of Bosches coming over to take it away from him next day.' Then Jake opened up a tirade on ready-mixed paint. Of course I had to argue it out with him and I had a lot of other mixed-paint jobs around the town that had made good that helped me out. When we'd both quieted down a little I told him that I was out to make good on this job of Wagner's if I had to do it myself. Jake's harangue on ready-mixed wasn't so much of an argument as it was a case of letting off the steam of his pent up prejudice and bias against it and I told him so. 'Furthermore," I told him, 'I'm going to make good with the same original paint that I sold Wagner in the first place.' Then I added 'I'm going to fix a deal with Wagner that'll include you for the job.' He blinked at this. With a good job in sight for Bob Wagner, the question became a horse of another color for Jake, although I could see that there was gall in the cup for him to accept it on the condition that he used his imagined enemy. I ground it into him that I was out to make good with our ready-mixed plus his experience and that I wanted him to give it every show that he could from the experience he had had with paint. He consented to do it especially when I told him that perhaps I could throw other jobs his way if my scheme worked out. I hunted up Wagner and told him I had been thinking over that job of his and pointed out the reasons I had learned for its failure. Bob was only half convinced. However, I knew he was going to have it done over, so I said to him 'I'll bet you Jake Saunders' time for doing that job of yours up right against all the paint you require that this paint of mine will make good on your house.' 'How do you mean,' he hollered at me, 'use more of that ready-mixed stuff of yours? not on your life!' 'That's exactly what I mean,' I persisted. 'You buy the paint over again and I'll pay Jake for the job. If at the end of two years it doesn't make good you get your money back for the paint. If it does make good you pay me for half of Jake's time.' Bob's pretty careful with his money. At the same time he'll take a chance if he thinks he can play it safe. So he said he'd take me up on the offer."

"How did you come out on the deal?" interrupted Rogers, knowing that the reputation of "Spreadit Paint" was at stake in the arrangement. "Did Saunders try to queer the paint?"

"The coming out part is the best end of the story," was Wright's satisfied assurance. "No! Jake may be cantakerous in his conversation, but he's conscientious once he has given you his word, and he certainly gave your paint a fair deal. It took him some considerable time to wire brush and scrape the north end of the house and what the lantern did for Bob's evening efforts Jake had to get rid of with the blow torch. The job was about half done and I noticed that Jake's attitude towards your ready-mixed began to mellow up a bit. 'Say,' he said to me one day, 'this stuff of yours is certainly smooth working and I've noticed that where Bob did happen to get it on right, it's there to stay for some time.'

"I didn't say a word. I'd staked myself to this little experiment and, like the fellow with the hole in his trousers, I was sitting tight. But Jake's change of mind towards ready-mixed gave me little visions of carrying on experiments in other directions. When the work was done I went over the whole place with Wagner and he certainly showed a livelier enthusiasm about it than he did the first time. 'Satisfied, Bob?' I enquired. 'So far,' he admitted, 'but this is a two-year bet,' and I left it at that."

"What about Saunders, was he satisfied?" pressed Rogers with eagerness.

"I'm coming to that," explained Wright. "Saunders came the nearest to giving me palpitation of the heart that I've ever had when a few days after he'd finished Wagner's job he walked into the store, looked over your color slats and ordered several gallons of your outside white and 313 green to be sent up to another job he had in hand. Thinks I, 'Here's a case of where an old dog has learned a new trick,' but I knew Jake well enough not to ask any questions as to his motives. I just threw out a remark to the effect that ready-mixed wasn't so bad after all. 'Just experimenting,' was the only reply I could get out of him."

"You don't mean to tell me that a dyed-in-the-wool old timer like Saunders switched from just lead and oil as quick as that?" questioned Rogers with astonishment.

"Oh no; you can't shake a man like Saunders out of a life-long habit like that, but he gradually began using more of this paint, until now I guess he uses it on about half his work. I'm inclined to think that it just depends on what humor you find him in whether he uses it or not. If he gets out of bed cross ways in the morning, his life-long habit of grouching a bit for company's sake, makes him feel like sticking to mixing his own. But if the cockles of his heart warms him up to feeling genial he decides on the canned stuff. Another thing that has helped pull him our way is the fact that I have instructed everybody in the store to encourage hiring a painter to those who buy any considerable quantity of paint. We keep a list of such customers back here in the office and I have asked Jake to run his eye over that list whenever he's in, and Jake never needs a kick to take the hint."

"How'd you finally come out with Wagner?" asked Rogers, maintaining his curiosity.

"Two years to the day I made that bet with him I happened to walk out into the store and found Bob busy with one of the clerks figuring on a list of your paints for two of his other houses. He glanced up and saw me. 'By the way," he exclaimed, 'how much do I owe you for Jake Saunders' time on that house of mine?' I told him to forget it, that I'd got enough experience from that job to pay me several times over.'

"'Do you think the wife will hold the lantern for you this time, Bob?' I asked. 'The old lady and I are going to enjoy the moonlight in the flivver,' he shot out. 'I've learned my lesson too; Jake Saunders can do the cussin' this time and I'll be ahead of the game at that.'"

Rogers tilted back his chair, rubbed his chin reflectively for a few minutes while Wright allowed him to think it over. "I can quite see where this thing has brought you and Saunders closer together, and incidentally we've been on the wining side of your bet too, but how are you going to work this thing generally?"

"Much of that is up to you fellows," smiled Wright. "What I've told you is a simple every day incident that every hardware man handling paint can adapt to his own use. I'll admit there isn't any great plot or mystery in this yarn but there's a lot of principles on a small scale that can be worked into your distributing and advertising methods on a vastly larger scale. In the first place I've learned that painting isn't every Tom, Dick and Harry's work, especially on the larger jobs, and the more experience I can get worked into the job the better for the paint and for me. Secondly, it pays the man who buys it to have an experienced hand apply it. The disappointments of the amateur in doing his own plumbing, plastering, carpenter work, etc., alongside of the satisfaction he gets from having men do the work who know how, applies to painting as well. Third, I found there was a good deal of unreasonable and prejudiced bias on both sides of the fence that was blocking my way to more paint sales and keeping Jake Saunders from jobs that he might otherwise just as well have. Fourth, I've learned that ready-mixed applied by a painter has gained more confidence and a better footing with those who are really interested in paint. Both Jake and I have found that there has been more real painting done around here since we came to understand

each other, because we could both boost each other's end of it to mutual advantage. Fifth, I've kept a pretty close eye on Jake's work and am convinced that if the paint people want to preach protection and preservation for paint, they should encourage the man who can apply paint so that it will protect and preserve."

"And so you two are going to live happy ever after?" laughed Rogers.

"The understanding between Jake and I is just ordinary everyday business sense."

"Is that the only monkey-wrench you've found twisted up in the machinery of our distribution?" demanded Rogers.

"Not by a long shot," continued Wright. "That's only the first verse of the first chapter of this 'more paint' spasm I've got, but this time I'm going to talk to you straight about little selfish me and show you a jumping off place for the riotous manner with which paint manufacturers have been needly corralling and tying up the capital and shelf space of us dealers."

"Amen! so be it! go to it!' encouraged Rogers, turning over a leaf in his note book to accommodate more of his hieroglyphic shorthand.

Wright brought out one of the Spreadit Company's ornate descriptive catalogues and laid it before Rogers. "Supposing that with this 'more paint' bug of mine and an off-day with nothing to do but fill up an order pad; I should turn loose and order a stock of every size and color you've described here, what do you think would happen to me?"

"Your Uncle Jim would be in clover, Charley Wright would have to enlarge his paint department, our credit man might scratch his head a bit, but I think any order of yours would go past him sailing," exclaimed Rogers enthusiastically, thinking both he and the house were already on the scent of bigger business arising out of Wright's pet subject.

"My coon isn't in the same tree you're barking up," countered Wright. "If every dealer was to take the same notion you salesmen would be busier than a fox terrier in a nest of polecats."

"You seem to be scenting more trouble in the atmosphere," was Roger's astonished reply. "It would look to me like good business."

"That's all right for you as a salesman, but you don't have to eat, sleep and live with capital, overhead charges and the general expense of running a business the same as we do. For that matter I'll bet your house is up against the same proposition only they haven't got the nerve to admit it," said Wright pointedly. "There's certain colors of yours out there now that I've been carrying on my shelves for three years and about the only hope I have of getting rid of them is to dump them out and sell them for barn paint. But supposing I did take the notion of buying everything you've listed in your catalogue, certainly I'd have to enlarge the department, but that wouldn't get my customers taking it off my shelves any faster."

"As I understand it, this 'more paint' idea of yours would fix that part all right," chimed in Rogers.

"Not so fast," chided Wright. "More paint or less paint, you manufacturers have been crowding us fellows with too much stock, too many colors, and I'm beginning to think too many sizes."

"Of course, you knew that the manufacturers both in Canada and United States had decided to cut down the number of colors on their color cards and do away with half-gallons and pints?" prompted Rogers.

"I know all about that, but it took a situation, brought about by the war and a gentle hint from the government, to bring you to your business senses. I've wondered why you didn't do it long ago. Just the other day I heard of a big hardware firm out in British Columbia that cut out half-gallons and pints over two years ago as a war measure of their own and I understand that the slight inconvenience and insignificant loss of trade wasn't a patch on the saving they made."

Rogers shook his head dubiously, as though any departure of this nature from established procedure would spell less sales and put a crimp in his record. He was quite prepared to boost Charley's 'more paint' scheme, but to get enthusiastic over slicing off possible business was like squeezing into a shoe that fits too close to his favorite corn.

"Let me put it this way," explained Wright, resorting to his pencil and paper. "Let us say you and I are starting up in the hardware business. Between us, we have $10,000 capital. Out of what we already know about the business we decide to put 20 per cent. or $2,000 into the paint department. If we spread out that $2,000 to cover your catalogue, there's going to be some mighty thin spots if we prepare adequately to meet our trade in the best sellers. Now you know as well as I know that if we do that, anywhere from 30 per cent. to 40 per cent. is going to be tied up in poor sellers and stuff that will hang around our shelves till we sacrifice, dump, or lose money on it some way or another. In other words we're tying up capital and shelf space that doesn't earn its salt. The manufacturer has got us in a place where we can't help ourselves. We trot out his color cards to every customer that comes in for paint. Nine out of ten of them of course pick out a best seller. But the tenth one is a pernickety, fussy, purposely different individual whose trade we want to hold at any cost and he picks out some outlandish shade that only sells once in a blue moon. If we don't bring it out Johnny-on-the-spot, he trots off to our competitor's store, and gets it, or some other white elephant that has been gathering cobwebs for a couple of years or so. The only consolation we've got is that our competitor is up against the same difficulty."

"H'm," chuckled Rogers, "I guess I'm as much to blame as anyone for that. All a dealer has to do is to say that we ought to have some particular competitor's shade on our card and I raise merry old Cain around the office every Saturday morning till I get it there."

"It's a dollar to a doughnut that you sell about ten gallons of that particular pet shade to the man that hinted for it, and there it sticks, a regular pest to the rest of us fellows. Now about this little $2,000 paint department of ours. You can see for yourself how this sort of thing begins to gum up its earning capacity. Sixty per cent. of it is turning over as nicely as you please and the other forty per cent., besides eating its own head off, cuts down returns from the active sixty. I feel pretty sure, Jim, that if you got into the paint selling game at the retailer's end you could go to work and cut out from forty to fifty per cent. of the shades on your color cards and reduce your list of varnishes, driers and other sundries to about the same extent, at the same time meeting the needs of your trade without a whimper. The trouble is that both the manufacturer and retailer get cold feet and think if they're not adding to the weight of everybody's burden in this way they're not making any progress and that the other fellow will back them off the map. Cut forty per cent. of the items off that list of yours, as well as forty per cent of useless investment in trying to keep up with this needless and wasteful competition, and it will leave us $800 of workable money that we can use to good advantage."

"I can't couple this up with your 'more paint' ideas yet," remarked Rogers with perplexity.

"Which would you rather do, invest $1,000 at 10 per cent. in one department or $2,000 with a return of 5 per cent?" asked Wright like a shot out of a gun.

"$1,000 at 10 per cent," answered Rogers quickly.

"Why?"

"Well it leaves you with $1,000 to hunt around somewhere else for 10 per cent. or 5 per cent. or whatever you can get."

"Exactly," declared Wright, "and I consider it better business sense than cluttering us up with a lot of dead wood that keeps both the turnover and its returns at the low water mark. Get your business with live stuff that moves. When you put it down in straight dollars and cents and consider it from the standpoint of turnover, it's time to cut some of the superfluous lists down to the essentials that will meet the paint users' needs just as adequately. When you do that, then you're in a position to begin to multiply our turnover with a campaign for 'more paint' on a safe and sound basis."

"I get you now," exclaimed Rogers, "and I can see where the paint manufacturers are in exactly the same boat as you fellows."

"Sure they are," concluded Wright with no attempt to conceal satisfaction from his argument. "Besides when you condense your lines in this way, that credit man of yours won't have as many worry bumps to scratch as he would if we all tried to swallow this voluminous list of yours holus bolus."

EDITORIAL COMMENT

THE RETURNED SOLDIER

ONE of the big problems that confronts the industrial and business community is the assimilation of the returned soldier. Already 35,000 of these men have been returned from the shell-pocked fields of Europe as unfit for further military service. There are between 20,000 and 25,000 Canadians still in English hospitals.

To train these men in schools in such a way as to fit them to take up some sort of vocation would necessitate large training centres. At most it is estimated not more than twenty or twenty-five courses could be provided for them. If these men were to get their training with employers some 175 occupations would be open to them.

It has been deemed advisable by the Government that these men should receive their training under the conditions they will earn their livelihood in. To this end the Government has taken steps to get the co-operation of employers in this matter.

Retail merchants, manufacturers and other employers of labor will not be tardy in accepting their fair responsibility in this matter. Kindness, consideration and tact, but not for charity, should be the impelling motive of all dealings with these worthy men.

NEW TAXES FALL EQUALLY

THERE is quite general approval of the new scheme of taxes proposed in the Budget speech of the acting Minister of Finance, Hon. A. K. MacLean. The taxes will fall on the hardware trade at a number of points. Automobiles are to be taxed 10 per cent. for passenger cars, but motor trucks and commercial vehicles do not carry the tax. Gramophones, graphophones and talking machines will also be subject to a duty of 10 per cent.

From present indications it would seem that it is not the intention to tax automobile accessories. Up to the present time no mention has been made of these commodities. This is a point of interest that has been watched with a great deal of interest by accessory dealers. It was expected in some quarters at least that these lines would carry a tax in amount equal to that on automobiles.

The increase in the income tax will also affect quite a number of hardware merchants. It is now proposed to levy a tax of 2 per cent. on incomes of unmarried persons who receive $1,000 and over. The line was formerly drawn at $1,500 and over. For all married persons the tax will apply to incomes of $2,000 and over, as compared with $3,000 formerly. Exemption to the extent of $200 for each child under sixteen years of age will also be made.

VALUE OF PRIDE IN GOODS

IF the merchant wants other people to have a high opinion of his goods he must first have a high opinion of them himself. It should be his endeavor to have goods in his stock in which he can take real pride. This is where his ability as a buyer is made manifest.

The merchant can show this pride in his goods by the way he handles them. Careless, slipshod methods of picking these goods up and in laying them down again will make the prospective customer think lightly of them. If you show your customer that you admire your stock and handle it with unfailing care it cannot help but make an impression on the would-be buyer.

Clerks should be given this viewpoint of the master merchant who handles almost in a fond way the articles which he has bought with the idea of selling again. A sale may be nipped in the bud by careless handling of goods.

PAINT ADVANCES ONCE MORE

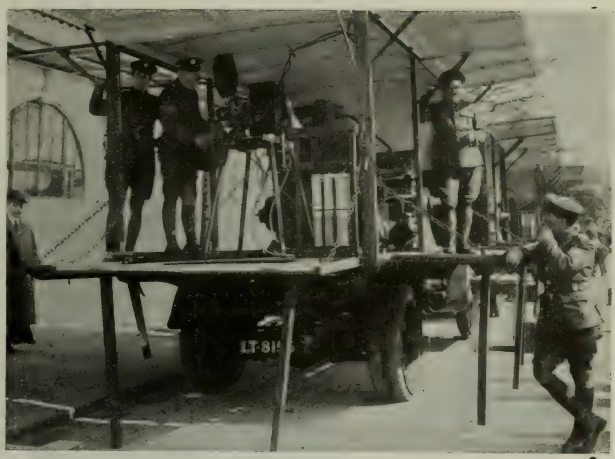
HIGHER prices on ready mixed paints have been announced during the past week amounting to 15c per gallon on colors for the standard ready-mixed grades. White paints of standard grade have not been increased in price. Inside, porch and floor paints in both colors and white have been advanced 15c per gallon. Marine paints and iron paints have also been increased 15c per gallon.

Necessity for these advances is stated by the manufacturers to be due to the fact that linseed oil is higher at the present time by 35c to 40c per gallon than it was at the time the last general advance was recorded in January of this year. Manufacturers also assert that there has been great difficulty in getting certain raw materials such as lithopone and dry colors. Deliveries have been very poor on some of these articles which come from the United States, and this has caused an increase in operating costs.

Current Events in Photograph—No. 18

INFORMATION ON THE WAR

THE new department of the British Government, the Ministry of Information, with Lord Beaverbrook at the head, is charged with the important task of keeping up the morale of the people at home. The policy of suppressing news always has a depressing effect, and of late in Britain there has been a great clamor for the fullest and most complete information in matters pertaining to the war. The people of rural England are not only to be told of the war but to see it in pictures. The accompanying "Cine Motors, as they are called, equipped with moving picture apparatus are touring England under the direction of the Ministry of Information telling the people about the war.



Pacific Coast is Prosperous

R. H. Monk, Manager Lead Works Division of Brandram-Henderson, Ltd., Reports Conditions Good in Far West—Shipping Activity Responsible

THE prosperity of the far West, especially as relating to the general business conditions in Vancouver city was outlined to HARDWARE AND METAL by R. H. Monk, manager of the lead works division of Brandram-Henderson, Ltd., who has just returned from an extended visit to the coast city and other points.

"The present conditions are accounted for," continued Mr. Monk, "through the amount of shipbuilding that has been carried on there for some time past. There were about 25 ships in the construction programme of the Imperial Shipping Board and this has been a great help in giving business a healthy condition."

In a general way Mr. Monk feels that there will be a continuation of good business there. Asked as to the condition of retail trade as found in Vancouver he stated that the same was good as far as he had been able to judge. The results of shipping contracts were reflected in the business conditions obtaining and sales were being made in good volume.

There is plenty of scope there too, for the development of the paint industry, and the retail hardware men can do much to cultivate this trade and to do their share in following up the broad paint campaigns that are being conducted. Vancouver is to have a "clean-up week," and this will probably have a definite effect upon the sale of paint and materials.

"A great many of the farmers who have been prosperous in Alberta are spending their winters at the coast," said Mr. Monk. "They were there in large numbers during the past winter, and special entertainments were put on from time to time, catering particularly to these men and their families. It is a great place for them to meet."

"As further shewing the better conditions there, rents have been advancing considerably and in some cases these are much higher than they were several months ago."

BICYCLES ON INSTALMENT

At the April meeting of the Ottawa Valley Bicycle Dealers' Association important action was taken with regard to payments for bicycles sold on the instalment plan. It was decided not to accept less than $15 as the initial payment on the time sale of a bicycle and monthly instalments are not to be less than $5. Previous to this meeting, the Ottawa dealers had been accepting $10 as the first payment on time sales.

The association also decided to hold a masquerade bicycle parade on Wednesday evening, May 8, as one of the local stunts for Bicycle Week. Money prizes of $10, $5, and $2.50 have been hung up for the best costumes. All dealers displayed posters to advertise the event.

COKE PRICES FIXED

Maximum prices at which coke may be sold at the ovens are announced by the United States Fuel Administration in an order covering ovens in the State of Colorado and at points in West Virgina and Alabama.

The maximum price at which coke made in the State of Colorado may be sold is $8.50 for smelting or furnace coke and $9.50 for 72-hour selected foundry.

Coke made in Monongalia County, W. Va., may be sold at a maximum of $6.25 for blast-furnace grade and $7.25 for the 72-hour selected foundry.

A maximum of $8.75 was put upon 72-hour selected foundry coke made by the Empire Coal Co. at Empire, Ala. The prices are effective as of April 15.

EVENTS IN THE TRADE

BUSINESS CHANGES

Toronto, Ont.—W. E. Magee, hardware, has been succeded by Ingram Bros.

Allan, Sask.—F. B. Willaims, hardware, has been succeeded by Williams & Cavers.

The bicycle business of W. G. Hawthorne, Brantford, Ont., has been bought out by J. L. Isaac and H. M. D. Isaac.

PERSONAL

N. A. Malcolm of Malton, Ont., was in Toronto on Tuesday of this week.

T. P. Hessian, at one time sales manager for Merrick-Anderson Co., Ltd., wholesale hardware dealers, Winnipeg, will leave shortly for France.

Geo. B. Ball, who prior to going overseas early in 1916 had charge of the Toronto office of A. C. Leslie & Co., Montreal, has since returning to Canada again become associated with A. C. Leslie & Co., in charge of the Toronto office at 64 Wellington street west.

ELECTRICAL MAN DIES

Alfred R. Miller of Hamilton, who for about twenty years was connected with the Canadian Westinghouse Company, latterly as treasurer of the company, died at St. Joseph's Hospital on April 28. Mr. Miller had resided in Hamilton practically all his life, although he was born in England. His wife survives him.

SCREW FACTORY FOR OWEN SOUND

The Great Lakes Steel Corporation of Owen Sound has acquired a site for building a screw factory in that town. The company was organized last fall, when an agreement was made with the town for a loan of $75,000, which was sanctioned by the ratepayers. J. H. Cole is the organizer of the company.

HARDWAREMAN KILLED IN ACTION

Word has been received that Lieut. Norman Henderson, who before enlisting with a western battalion was in the hardware business with his brother at Vanguard, Sask., has been killed in action. Lieut. Henderson was a son of the late Richard Henderson of Cobourg, and is a nephew of William and John Henderson, contractors, also of Cobourg. His mother survives, together with two brothers who reside at Vanguard, Sask., and another brother at Victoria, B.C. A young daughter also survives him, his wife having died some time ago.

Lieutenant Henderson with his brother, W. T. Henderson, started the store at Vanguard in 1912. Since then they have opened up a branch at Webb, Sask., and both these stores have been operated by W. T. Henderson in the absence of his brother. Prior to 1912 the Henderson brothers were in the general store business at Condie, Sask., and had branch stores at Kincaid and Aneroid, Sask., which stores were sold when the firm went into the hardware business.

E. M. PUTNAM

Who Has Seen Service in France and Who Has Been Appointed Advertising Manager of Dominion Cartridge Company, Montreal.

WESTERN HARDWAREMEN WOUNDED

Word has been received in Winnipeg that Sapper William M. Robertson, who prior to his enlistment was employed with the Marshall Wells Company, wholesale hardware, had been wounded in France on April 11 by gunshot. He was reported in hospital at Arques, France. He left Winnipeg with the 90th Battalion but transferred to the transport section of a Canadian railway battalion. Sapper Robertson's wife resides in Winnipeg.

Trooper F. W. Coulter, who prior to his enlistment with a Canadian cavalry unit in April of last year was employed with Walter Woods Company, wholesale woodenware, at Winnipeg, has been reported wounded by gunshot in the right thigh. He is now in the Canadian General Hospital at Basingstoke, England.

TORONTO HARDWAREMAN DIES IN WEST

James Waddell Allan, who for many years conducted a retail hardware business in Parkdale, died suddenly at Sovereign, Sask., on April 30. Mr. Allan was on a visit to the West. He had been a resident of Toronto for 24 years and had a wide business connection. He is survived by his wife, one son and three daughters—Fred J., Marion, Marjory and Belle. W. T. Allan, barrister of Collingwood, and Lieut.-Col. J. A. W. Allan of Newmarket, are brothers of deceased.

MONTREAL NEWS NOTES

C. J. Staniforth of Arondel, Quebec, hardware merchant, was a visitor to Montreal.

F. Langlois of River Beaudette, Quebec, hardware merchant, was a Montreal visitor last week.

Mr. Corriveau of Corriveau Freres, St. Sebastien, Que., was in Montreal in the interests of his firm.

Oliver B. North is in Montreal this week in the interests of O. B. North and Co., New Haven, Conn.

George C. Wiltshire, representing F. H. Noble and Co., of Chicago, is expected in Montreal early next week.

Mr. Stevens, representing Stevens-Hepner, Port Elgin, Ontario, was in Montreal calling on the trade.

Mr. Moody, manager of the Alpha Chemical Co. of Kitchener, Ontario, was in Montreal in his firm's interests a few days ago.

George Henderson, president and general manager of Brand-Henderson, Limited, is in the Maritime Provinces this week.

J. G. Lorriman, manager of the marine specialty branch of Brandram-Henderson Limited, is in Ontario this week calling on the shipbuilders' and general trade and will be away for a couple of weeks.

STOVE MANUFACTURER DIES

John Burns, who for fifty-three years carried on the manufacture of stoves and ranges on Craig street, Montreal, died at his home on April 30. Mr. Burns had been ill for several months. He was a native of Ireland, having been born some forty miles from Belfast 75 years ago.

NEW BRUNSWICK NEWS

Joseph F. White, of the staff of W. H. Thorne & Co., Ltd., St. John, has left for North Sydney, N.S., to accept a position with the Thompson-Sutherland Company.

Lieutenant-Colonel A. E. Massie, Maritime manager of the Consolidated Rubber Company, who went overseas early in the war in command of a divisional train, has returned on furlough.

Victor Markham of the staff of T. McAvity & Sons, Ltd., St. John, who has enlisted in a siege battery unit, carries with him a gold-mounted fountain pen presented to him by his associates on the eve of his departure.

The combination of the food production campaign and the daylight saving plan has given the hardware men an excellent argument for the sale of garden tools and equipment and the dealers in St. John are making the most of it.

St. John merchants have been perturbed by the announcement that the steamer Connor Brothers, which has operated between St. John and Bay of Fundy ports along the coast to the border, is to be withdrawn from the service because no Dominion subsidy will be available this year.

An eight-team bowling league, representing as many departments of T. McAvity & Sons, Ltd., St. John, has completed a tournament which ended with a victory for the team from the King Street retail stores, this team winning the silver cup donated by Clifford McAvity for competition.

Wholesale robberies from the stores of W. H. Thorne & Co., Ltd., St. John, which had been going on for some time, have been stopped by the arrest of two men who now await trial on the charges of theft and burglary. Nearly $1,000 worth of stolen goods have been recovered.

ENLARGING WAREHOUSE

The firm of Mackenzie, Milne & Co., hardware dealers, Sarnia, Ont., has undertaken the enlargement of their warehouse near Clark's dock. An addition of sixty feet will be added.

CHANGES LAW OF ROAD

The Government of New Brunswick has at last decided to change the rule of the road in this Province, and, in the future, all traffic will keep to the right. Nova Scotia and British Columbia are the two Canadian Provinces which still cling to the European custom of keeping to the left, but there are strong agitations in both of these Provinces for a change to conform wtih the road practice in all other parts of the continent.

RUBBER COMPANY IN LARGER QUARTERS

Steadily increasing business, due partly to the wider use of motor vehicles as the result of war conditions which have made men scarcer and the upkeep of horses more costly, has made it necessary for the New Brunswick branch of the Dunlop Tire and Rubber Goods Company, Limited, to secure larger quarters for their establishment in St. John.

ADVERTISING MANAGER RECEIVES APPOINTMENT

Edmund Doremus, for some time past advertising manager with the Dominion Cartridge Company, Limited, Montreal, has accepted an appointment with the DuPont Powder Company of Wilmington, Del. His numerous friends in Montreal took occasion on Wednesday, April 24, to tender him a banquet in the vice-regal suite of the Ritz-Carlton Hotel, Montreal.

The feature of the evening was the presentation to Mr. Doremus of a very fine gold encased fountain pen and also

EDMUND DOREMUS
Formerly Advertising Manager with the Dominion Cartridge Company, Montreal, Who Has Accepted a Position with the DuPont Powder Company of Wilmington, Del.

a pencil. Both were suitable engraved and are much prized by the recipient.

Edmund (Teddy) Doremus has been with the Dominion Cartridge Company for the past five years. He was the originator of the "Dominion Marksmen" idea among boys, which was instituted a year ago and has become very popular. It now has several thousands of members throughout Canada. It has, as its object, the formation of shooting clubs for boys from 12 to 19, throughout Canada, and as suitable pins are awarded for scoring, the boys' interest is immediately aroused.

E. M. Putnam succeeds Mr. Doremus as advertising manager for the Dominion Cartridge Co. He will be better known to many of his friends and to readers of HARDWARE AND METAL as "Mel" Putnam, having travelled extensively through Canada for many years and is a former employee of the Hingston-Smith Arms Co., of Winnipeg.

Mr. Putnam has seen active service and went overseas in the earlier days of the war as a member of the Third Siege Battery. He was in the service for fourteen months, was wounded near Ypres and after being invalided home and securing discharge became connected with the Dominion Cartridge Company. Having been actively engaged in the sporting goods trade for so long, Mr. Putnam will doubtless be right "at home" in his new position.

CATALOGUES and BOOKLETS

Catalogue on Motor Requisites

The New Era Spring and Specialty Company of Grand Rapids, Mich., has issued a twenty-page catalogue on New Era "Better" motor requisites, containing illustrations and descriptive matter on their bumpers, automobile springs, tire carriers, spring clips, contact points, air breathers and accelerators. The catalogue gives a lot of detailed information about the various lines manufactured by this concern. It is well printed and illustrated.

Issues Hardware Catalogue

The Stover Manufacturing and Engine Company, of Freeport, Ill., has issued a very neat catalogue descriptive of their lines of manufacture. The issue is described as Catalogue P-17 and contains illustrations and information concerning their lines of builders' hardware, shelf hardware, hardware specialties and gray iron, brass and aluminum castings. The catalogue, containing 111 pages, is well printed and has a very attractive embossed cover done in black and tan and slate gray colors. Information contained therein is complete with respect to the various lines indicated above. The catalogue is for distribution to the trade.

Builders' Hardware Catalogue

As an evidence that greater things are expected in the building line in the not distant future the Toronto Lock Manufacturing Company, Patterson Place, Toronto, manufacturers of builders' cabinet and structural hardware, has issued their first complete Catalog A. The catalog contains in all 132 pages and gives a very complete line of these articles, well illustrated and printed. The cover of the catalog is of artistic tan shade, heavy paper, and is neatly embossed in green and black lettering. One of the features of the catalog is the display of the Rixson line of hinges, casement adjusters and operators, stays, bolts, door checks, friction hinges, garage door holders, knuckle hinges, pivot hinges and transom operators. A commendable idea in connection with this catalog is the fact that the page numbers are placed in bold figures about the centre of the page in the margin, just where the thumb would ordinarily be placed in leafing over the pages. The book is for distribution among the trade interested in these various lines.

Overcoming Friction in Hot Air Pipes

Splendid Installations so Far as Workmanship and Neatness Are Concerned Often Inefficient Because of Amount of Friction Set Up by Acute Angled Fittings —Types of Furnace Shoes Described—Practical Sheet Metal Work

By Thomas Stanfield

HARDWARE AND METAL has been asked to give some simple methods of constructing furnace shoes. In the construction of these fittings one of the most important things to overcome is friction. Types of furnace shoes described below have this point in mind.

Plate 15

In Fig. 1, Plate 15, is a type of shoe to be inserted into the rectangular stack pipe B. C is the side view of the rectangle.

A fitting of this type is used between the warm air pipe at the foot of the warm air vertical stack pipe, and is a very simple fitting to make. Fig. 1 may be used as pattern for side, allowing material for locks. To develop pattern for piece between B and A divide into equal parts as shown at A, 1, 2, 3, 4, 5, 6, B. Then draw a perpendicular stretchout line as shown in Fig. 2, B^1, A^1. Next transfer the measurements from A B, Fig. 1 to Fig. 2, as shown, and draw another line B.A. Then B B^1 A A^1 will be the size of sheet metal required.

Fig. 3 is front view of the fitting, Fig. 4 is the pattern for throat of shoe as shown in Fig. 1, C. D. E.

Fig. 5 is the pattern for square to round piece shown in Fig. 1 at E A. Allowance for seams must be made in every case.

Another fitting which will be found to very handy is an offset for the stack pipe Fig. 6. Solid lines shows the regular style, but it will be plainly seen the curved type is a much more desirable kind providing there is room in the partitions to place it. The round curves do not set up as much friction as the square sharp cornered ones shown in dotted lines. Fig. 7 shows the pattern for the material required, which is self-explanatory.

Fig. 8 is another fitting which though not often used is very handy, that of a rectangular offset. This type of warm air fitting is used where one partition crosses the one in which a stack pipe is being installed.

The side view shows that the back A C is perpendicular, while the front B D is slanted. Then the front view gives the slant of the sides. To develop patterns for this fitting is very simple, though some metal works find it an awkward task.

First draw a dotted line as shown. Through front view and pattern draw the rectangle A. B. X6. Next draw sides C. D. X7. Now take compass and measure the length of slanted side B. D. on side view. With this measurement join the two rectangles X6 and X7 as shown on front pattern. This will give the desired amount of material for front.

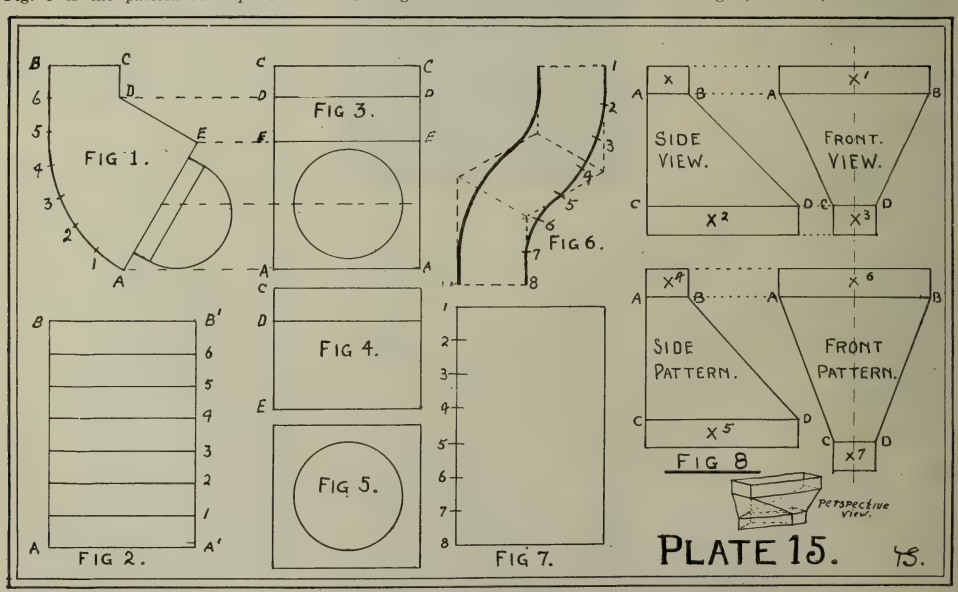
For side pattern follow the same course by drawing first the two rectangles X4 and X5, then using the measurements at side of front view A.C., and transferring these by connecting the rectangles X4 and X5 as shown at A.C. The slant line BB on side pattern is the true length of the material for side. By going over the various measurements with compass these can be easily proved. Allow for seams according to style required.

Plate 16

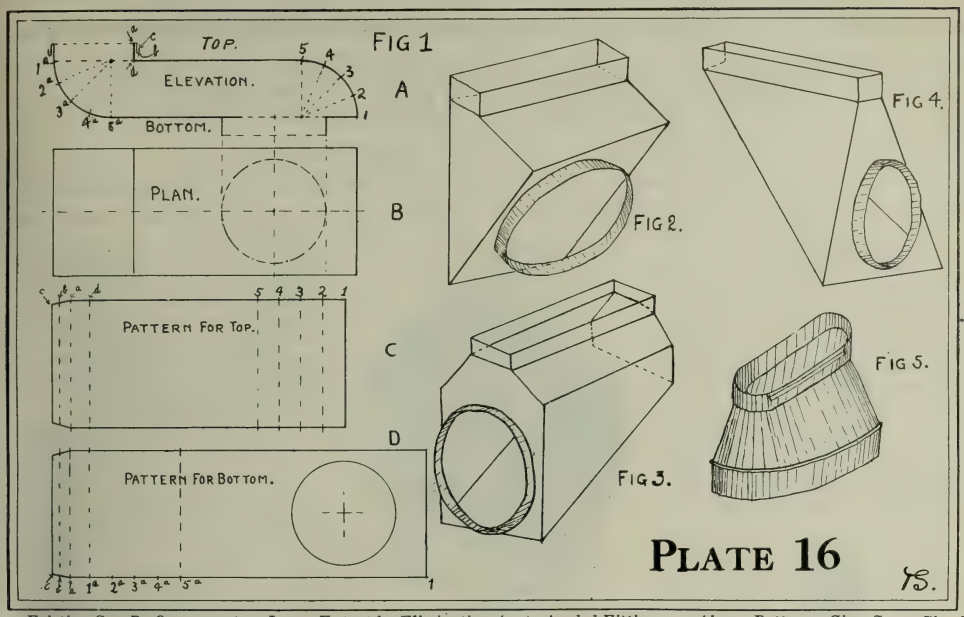
In warm air heating construction one of the most important elements to overcome is that of friction. Many a splendid installation as far as workmanship and neatness go has been proved very inefficient on account of the amount of friction being set up by having too many acute angled fittings.

In this article a number of fittings are described which are made in such shape as to overcome friction.

In Fig. 1, Plate 16, is shown a fitting



Working Patterns Designed to Show Methods of Drafting Furnace Shoes.



Friction Can Be Overcome to a Large Extent by Eliminating Acute Angled Fittings. Above Patterns Give Some Simple Methods of Drafting Furnace Shoes.

which very often has to be used when a beam, or trimmer is so placed as to be in the way of a stack pipe. A is the elevation from round to rectangle.

It will be seen that instead of this fitting being constructed with square corners, they are circular, and while a very trivial change in construction is made, a lot of friction is overcome. B is the plan, and C is the pattern for top piece, D being pattern for the bottom piece.

To develop this fitting, the elevation is first drawn, and by allowing extra material for the seams, this may be used as the patterns for sides. a, b, c, d, in elevation shows the sectional view of joint over which the stack pipe fits.

Now divide the circular ends into equal parts, both ends being the same. Next draw two lines parallel with each other and same distance apart as shown in plan and described at C, and transfer these measurements 1, 2, 3, 4, 5 to top line at C, then measure from 5 to a, b, c, as shown, this will give the true length of material required for pattern of top piece.

Follow out the same instructions for development of pattern for bottom piece. A round collar will have to be fitted into this pattern which is made and fitted as described in previous articles.

Figs. 2, 3, 4, and 5 are very useful and easily made fittings and can all be used to great advantage in many ways, with the sole object of eliminating friction where possible; with the exception of Fig. 5 these fittings are easy to develop, by using only a straight edge and rule.

Anti-Glare Law Still in Abeyance

Deputy Minister of Highways Asserts That Enforcement of Clause Would Present Technical Difficulties That Courts Could Not Properly Overcome

THE clause in the Ontario Highway Act which provides that the Government shall have power to proclaim a regulation prohibiting the carrying on motor cars of any lighting device with a blinding glare is not to be brought into effect immediately at any rate. W. A. McLean, Deputy Minister of Highways, suggests that the statute must be amended so that a standard glare applicable to all types of headlights and lamps can be established. It was suggested that the province should approve of certain types of lamps and refuse licenses to cars not so equipped. The Government is not in the mood for taking such a course unless it is found absolutely necessary.

According to the opinion expressed by the Deputy Minister of Highways to Hon. F. G. Macdiarmid technicalities would make the enforcement of the law as drafted difficult.

"Mere observation will not fix a standard of glare which the courts could properly enforce," asserts the Deputy Minister. "A testing floor with trained men using special light-measuring equipment would be necessary to procure evidence to convict. The present tentative adoption of the statute has drawn attention to the matter, however, and a large proportion of car owners seeking to avoid offensive lights have procured lenses and other devices which moderate the glare; so that the difficulty is largely curing itself."

The Deputy Minister states that a special type of lens is not necessary to make the head-lamp conform to the proposed law. A bare head-lamp may be made to conform to the intention of the law by bending the supporting bracket downward until the direct beams of reflected light, as indicated by the circle of strong illumination, do not rise to a greater height than 42 inches, at a distance of 75 feet from the car. If amended to provide for a standard glare the regulation would be radically changed.

"Were manufacturers and dealers in all cases to fit each car with a suitable type of head-lamp and have the lights properly focused and adjusted before the car is delivered to the purchaser, much of the difficulty would be overcome at its source," Mr. McLean concludes. "Manufacturers can render an important public service by dealing with this situation."

While it is apparently the intention of the Government not to enforce the regulation as it stands at present in view of the technical difficulties presented, it should be borne in mind that this provision may be amended by providing for a standard glare applicable to all types of headlights and lamps, as suggested by the Deputy Minister. It remains to be seen what action will be taken in this respect.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

RONSON WRENCHES

The Canada Sales Company, 183 Church street, Toronto, are now marketing through jobbers the Ronson wrench. This tool has been on the market for some little time. It consists of eight standard open-end wrenches, screw driver, Prest-O-Lite key, and bottle opener, combined in four blades of best grade tool steel, case hardened, and, it is claimed, practically wear proof. It is nickel-plated and weighs eight ounces, and can be carried in the pocket. Turning the thumbnut half a turn releases any tool desired, which may be slid past the others. It is asserted the thin, strong blades reach where the ordinary wrench is useless.

Ronson Wrench

AUTO-COP FORD LOCK

The Auto-Cop lock is a device designed to fit over the standard Ford lock, and thus locks the ignition against theft. It is claimed it is impossible for an auto thief to wire around this lock at any point, as the entire system is short-circuited and grounded. The lock may be installed in a few minutes and as there are no screws in the cover it can only be removed by means of the proper key. The lock itself consists of twenty sliding tumblers, making over a million combinations of keys.

It is also claimed for it that in addition to being a safeguard against theft or joy-riding on the streets, it also prevents garage employees from "borrowing" the car without permission. It is stated the underwriters allow a rebate of 15 per cent. on insurance where this lock is installed. It is being sold in Canada by the Canada Sales Company, 183 Church street, Toronto.

Auto-Cop Lock

AIR BREATHER FOR FORD CARS

The New Era Spring and Specialty Company, Grand Rapids, Mich., is placing on the market a new air breather for Ford cars, called the "Moto-Nose." It is claimed for this article that it is the old ship funnel method of ventilation added to the cooling system of automobiles. It is not designed to tell when the water in the radiator is too hot, but rather to keep the water from getting too hot by taking cold air into the radiator over the surface of water and relieving air pressure of the radiator.

"Moto-Nose" Air Breather

It is made of metal, neatly designed and highly finished. A screen in the funnel opening keeps out dirt and other foreign matter.

CORNER IRONS AND MENDING PLATES

The accompanying illustrations show two new items which the Stanley Works recently added to its line of wrought steel corner irons and mending plates. No. 999½ ornamental corner iron is made in sizes ranging from ⅜ x 2½ inches to 1½ x 8 inches and is furnished in bright steel and brass plated. They are packed in cartons with screws to match. No. 998½ ornamental mending plate can be obtained in sizes ranging from 2 to 10 inches, in length, and is furnished in bright steel and brass plated, and are packed in a carton with screws to match. Full information will be supplied by the manufacturers, Stanley Works, New Britain, Conn.

No. 999½ Ornamental Corner Iron

No. 998½ Ornamental Mending Plate

NEW ENAMEL PRODUCT

"Invincible White Enamel" is being placed on the market by A. Ramsay and Son, Montreal. This, the makers state, is the result of considerable experimenting and the enamel is stated to be of heavy body, assuring the user that it will not "crawl" when applied to a perpendicular surface. The enamel is put up in quarts and half-gallons, has a large filler on top and is fitted with a "ringed" cup lid inside, which may be used to hold a quantity of the enamel while applying.

Invincible White Enamel

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

PRICES on mixed paints have undergone revision upward during the week, colors going up 15c per gallon and white to be quoted not less than 10c per gallon higher than colors. House, floor, concrete and marine paints have all been affected.

Tin again features the metal markets, and a further advance of 5c per pound has been made, with offers at considerably higher figures for guaranteed delivery. Stocks are at a very low point, and prospects of further receipts by no means bright. In line with the market on tin, solder has advanced a straight 10c per pound in some quarters. Figures now named are said to be only nominal, and orders are now being taken subject to stock being on hand.

A firm situation in turpentine exists. Prices at primary points have registered advances, and quotations here, it is thought, will go to higher levels towards the end of the week. Advices from the Southern States indicate that a reduction in production by 25 to 50 per cent. is expected under last year's total, producers turning to other forms of activity. The market locally is virtually bare of supplies, though further shipments are expected almost daily.

There has been an intimation from the War Trade Board at Washington that exportation of 10-gauge black sheets and plates is to be restricted. The board indicates that no further permits for stock shipments will be granted, orders for specific work only being considered. This is not retroactive, and mills will be permitted to fulfil present contracts, which really means that supplies for this year will be largely taken care of.

Price changes of a miscellaneous nature have been fairly numerous, and the tendency has been upward. However, a decline in brass spring wire and brass snare wire has proved an exception, though a slight one. Among the lines to advance are boxwood rules, auger bits, center bits, car bits, stepladders, turnbuckles, corrugated strap and tee hinges, fly swatters and chamois skins. Business for the month just past has been exceptionally good, according to reports now available, and prospects for the present month are very encouraging.

MONTREAL MARKETS

MONTREAL, May 2.—The week has been one of a well-maintained market on nearly every line and with several changes. Harvest tools are higher, with the former discount of 25 per cent reduced to 17½ per cent. Several lines of auto accessories are higher. Sandpaper is slightly lower. One jobber has made a slight change in the discount on agricultural wrenches, making the discount 42½ per cent. Tin still rules very firm with little supply in sight. Solder is high, due to the tin situation. Neverslip calks and shoe prices are slightly revised to higher levels. Some lines of jute products are higher and boxwood rules are advanced in price about 5 per cent. Stove prices advanced 10 per cent. There is a better outlook and business from the country is shaping up well.

Harvest Tools Higher; Also Some Lines Jute

Montreal.

HARVEST TOOLS, JUTE LINES.—Among the week's changes are those of a revised discount for harvest tools. These are now selling on the basis of 17½ per cent. from the list and the former discount being 25 per cent., this shows considerable increase. Some of the odd lines of cordage registered advances. Jute rope of ⅝ in. diameter is selling at 20c, the former price being 18c per pound. Bell rope selling before at 19c is advanced to 21½c per pound. Jute fine yarn selling at 14c previously is now 15c, and beaver halyards (white polished), which was selling at 32c is now 35c basis per pound.

Sandpaper Lower; Rules, Shoe Calks Up

Montreal.

SANDPAPER, HORSE SHOE CALKS—Reduction was made in the price of sandpaper in rolls a short time ago and now the reduction has been applied to the line right through. The discount now is 10 per cent. advance on list and formerly this was list plus 15 per cent. Horse shoe calks of Neverslip make have been advanced and the following list prices apply subject to the regular discounts: 5-16 inch, $2.60; ⅜ inch, $2.60; 7-16 inch, $2.80; ½ inch, $2.80, and 9-16, $3. Certain lines of boxwood rules are up and the advance is about 5 per cent.

Graphite, Felt Washers And Chain Jacks Up

Montreal.

AUTO ACCESSORIES.—Felt washers and gaskets are advanced this week as follows. Lots of 48 with a previous list of 49c per set are advanced to 61c; lots of 12 from 53 to 66c and small lots from 57c to 70c. Usual discounts apply. Lubricating graphite also is higher and this advance is about 12 per cent. over the previous prices. The same applies to Mexican auto-gear lubricant. Weed chain jacks are listed at $6.38 each for lots of twelve and at $6.80 for small lots. This shows an advance of $1.88 and $2 respectively over the old list prices and usual discounts apply.

Tire Pumps, Brakes, Valve Tools, Braces Up

Montreal.

AUTO ACCESSORIES.—Among the lines of auto accessories registering advances for the week are Rose tire pumps, which on the new list are about 25 per cent. above the old prices. The new lists are $2.45 for lots of 24; $2.65 for lots of 6, and $2.83 for smaller quantities. The regular discounts apply. Countersinks of various sizes are slightly higher than previous quotations. Fender braces are up about 20 per cent. in two styles. Raybestos lined brakes with an old list

of $1.12 for singles and $1.03 for lots of 12 are now on a list of $1.22 and $1.13 respectively. Regular brake lining is up about 15 per cent. Small valve tools for re-threading bolts, etc., are up from 17¼c in lots of 24 to 23c, and in small lots from 20 to 27c, with the usual discounts applying.

Oil Stove Demand Good; Stoves Higher

Montreal.

STOVES, ENAMELEDWARE, ETC. —The situation on stoves is one of much strength. Those engaged in the manufacture of these have advanced prices to the extent of 10 per cent. This bears out tendencies forecast in HARDWARE AND METAL recently, and applies to some firms, while those who have not done so expect that they will make an advance in the near future approximating the above increase. In view of the short material situation there is a strong undertone and prices will probably go to even higher levels. The advance applies to heaters, ranges and stoves—the complete line in fact. Oil stove sales are heavy and those selling gas stoves have reported a brisk demand. Enameledware has been selling fairly well.

Good Gasoline Sale; Oil Price Unchanged

Montreal.

GASOLINE, COAL OIL.—There is a very good demand for gasoline here and the country sales also are better. With good roads this will be in more active request all around. The prices have been held without change on both gasoline and coal oil. Motor gasoline is selling at 34c; Electroline and Palacine coal oil at 22c and Royalite is 19c per gallon.

Cotton Rope Firm; Sisal And Manila Held

Montreal.

ROPE AND CORDAGE.—The market is steady, with soft fibres particularly strong at advances made recently. Sisal and manila rope are still firm and there seems to be a somewhat settled condition now, more so than that of a few weeks ago. The prices of cotton rope are being frequently revised by various jobbers and prices for this rule very high. There is a scarcity of seine twines, that is for import, and these cannot be delivered in some cases for several months. The jobbers in these have ample supplies for the present, however. Sisal rope is based at 27½c, British, Manila at 33c, and for pure, 39c per pound.

Fair Nail Movement; Wire Holds Firmly

Montreal.

NAILS AND WIRE.—The situation on nails is steady and a fair amount of business is being done with country dealers. Locally there is but little building, the activity being in repair jobs almost entirely. Many orders that were held subject to shipment via water routes are now going out and several boats are endeavoring to make their first trips over the regular courses they cover each season. Wire nail basis still holds at $5.25; cut nails at $5.60 and smooth steel wire at the base price of $6.25 per 100 pounds.

Maintained Basis For Iron And Steel

Montreal.

IRON AND STEEL.—The market is steady. Excepting for some of the unusual sizes of bars that are asked for occasionally there is little difficulty in filling orders which come to hand fairly well. The state of trade is better from outside points than from the city and some orders are now going forward by boat. Quotations are unchanged as follows.

RESTRICTIONS ON HEAVY SHEETS AND PLATES

Latest advices to hand indicate that the War Trade Board at Washington will not be granting any further permits for shipment of 10 gauge black sheets and plates to be taken into jobbers stocks, only orders for specific work being considered at all. This ruling is not retroactive and mills will be permitted to fill orders for which they have already contracted, which means that requirements for the present year will be pretty well covered. This latest order has been instituted to eliminate any element of speculation which might develop and to keep supplies generally on the move rather than accumulating in warehouses. The increasingly heavy governmental demands for sheets will have a tendency to curtail shipment of all gauges to some extent as production will naturally follow along the needs of the government first. When present contracts on plates have been completed jobbers express the hope that they will be able to make new ones.

Supplies Sheets And Plates Getting Smaller

Montreal.

SHEETS AND PLATES.—The market is steady and a fair demand only is reported. The greatest interest centres in that of securing stock. Import is becoming more difficult and this is particularly true of ten gauge sheets and plates. Details of an order just issued covering these appear in panel and none can now be imported unless for actual war trade needs. As a consequence prices have moved up somewhat and as stocks are not heavy of some sizes it is a question how long these may last.

BLACK SHEETS—		100 lbs.

Old Metal Market Steady And Unchanged

Montreal.

OLD MATERIAL.—The situation is one of little interest in the volume of business that is passing. In a general sense the tone is firm and prices, while unchanged, rule with higher tendencies. Some hope is held that the freer movement of freight with boats running will help the market somewhat but this is an uncertain quantity. All quotations of heavy iron products are particularly firm.

Tea lead	$ 0 05	$0 06½

Solder Is Higher; Lead Products Hold

Montreal

LEAD PRODUCTS.—The feature of the week is that of further increases in the price of solder and this is due to the strong position of tin. Guaranteed has moved up to 58c per pound, while strictly is 52c, and commercial and wiping 48c. With the volume of trading all around quite satisfactory under these high prices and a fair request for lead products from the trade there are no further changes.

Less Tin Than Ever; Copper To Be Steady

Montreal.

INGOT METALS.—The tin situation holds more interest still than any item in the list. Spot stocks are very small and as a conseuence of the light offerings and the great difficulty of getting further supply, advances have been made. Other items in the list are without much new feature.

COPPER.—In view of the fact that production has been great and a large amount of trading being accomplished across the line, copper seems to have settled itself into more or less of a steady position. Sales still are made at 29c to 32c per pound.

TIN.—Sky-high prices are obtaining for this and new records have been made. Prices are quoted at $1.10 to $1.12 per pound, and some of the inferior grades are bringing high prices too, as much as $1.05 being paid for a uantity of Chinese.

LEAD.—The market is very dull. Some fluctuations have been made in the States markets and the tendencies are lower under increased production and light trading. Price here is 9c per pound.

SPELTER.—Locally there is not a great deal of interest. After some declines the bottom seems to have been reached. Reports of considerable purchases by the United States Government served to strengthen the market there. Quotations here are 9 to 9½c per pound.

ANTIMONY.—In this item the United States Government is reported to be in the market for supplies and this has caused a little flurry. Price here is steady and unchanged at 14c to 16c per pound.

ALUMINUM.—The quantities sold of this commodity are small, the large trading being in strong hands. With demand fairly light, price holds at 55 to 60c per pound.

TORONTO MARKETS

TORONTO, May 2.—Price changes are again fairly numerous during the week, and although in the majority of instances advances have been recorded, there is a slight reduction to be noted in new prices established on brass spring wire and brass snare wire. Step ladders have undergone revision upward and a sharp rise is to be noted in quotations now ruling on centre bits. Auger bits are higher in price and boxwood rules have also gone to higher levels. Tin has recorded a further advance and supplies are becoming increasingly scarce. Solder has reached a very high point and in some quarters it is intimated that orders are very hard to fill. Prices on hemp twine have been withdrawn. Business for the past month has been excellent, reports from all sources indicating a heavy volume of orders handled.

Brass Wire Makes Slight Reduction

Toronto.

BRASS WIRE.—A slight reduction in prices applying to brass wire has been made during the week, spring wire and snare wire being affected. New quotations now ruling are as follows:

Brass Spring Wire.—Nos. 3 to 8, 58c; Nos. 9 to 11, 59c; Nos. 12 to 14, 60c; Nos. 15 to 16, 61c; Nos. 17 to 18, 63c; Nos. 19 to 20, 64c; Nos. 21 to 22, 65c; No. 23, 67c; No. 24, 70c; No. 25, 80c; No. 26, 87c per pound.

Brass Snare Wire, 1 oz. coils.—No. 22, 70c; No. 24, 75c per pound.

Step Ladders Advance; Corrugated Hinges Up

Toronto.

STEP LADDERS, CORRUGATED HINGES.—New prices have been named on step ladders during the week which are at higher levels than those formerly ruling. Cost of lumber and continually increasing manufacturing costs are given as reasons for this last revision in this line. Quotations now being named are:

4-ft., 62c; 5-ft., 78c; 6-ft., 95c; 7-ft., $1.15; 8-ft., $1.25 each.

Best grade—6-ft., $1.25; 8-ft., $1.70; 10-ft., $2.10 each.

A further revision in corrugated hinges packed in individual cartons has been made in some quarters which provides for higher prices. Prices now established are for

Tee—4-in., 23½c; 6-in., 30c; 8-in., 39c; 10-in., 61c; 12-in., 82c; 14-in., $1.15 per pair.

Strap—4-in., 17c; 6-in., 28c; 8-in., 43c; 10-in., 65c; 12-in., 95c per pair.

Auger and Centre Bits Advance; Turnbuckles

Toronto.

AUGER BITS, TURNBUCKLES.—As predicted in HARDWARE AND METAL last week an advance has gone into effect on Irwin auger, car and machine bits. Irwin auger bits are now selling at a discount of 17½ per cent., Irwin car bits at 25 per cent., Irwin machine bits, 20 per cent.

Centre bits have undergone a sharp advance, prices ranging from $2.35 dozen for ½-inch to $5.00 for 1½ to 2-inch, with corresponding increases being made in intermediate sizes.

An advance has been made in quotations ruling on stub end turnbuckles. Prices now being asked on a few sizes, a corresponding increase on others having also been made, follow: ⅜-in., 55c; ½-in.. 61c; ¾-in., 86c; 1-in., $1.20; 1½-in., $2.45; 2-in., $4.35 each.

Boxwood Rules Go Considerably Higher

Toronto.

BOXWOOD RULES.—Comparisons of pre-war prices on boxwood rules as well as many other lines prove interesting reading and in the list below are noted many familiar numbers which have now reached extremely high levels. Take the No. 68 which used to sell to the retail trade at 97½c per dozen and compare that with to-day's price of $2.20; No. 53 used to sell at $2.10 and is now quoted at $3.95; No. 51 which sold at $1.37 is now $3.10; similarly No. 52 has jumped from $2.87 to $6.25 and No. 66½ from $1.83 to $5.25 per dozen. The trend has been continually upward and although this line has undergone few if any sharp advances, there has been what might be termed a steady revision towards higher levels. Quotations now being made are as follows:

Boxwood Rules.—No. 42, $3.50; No. 51, $3.10; No. 52, $6.25; No. 53, $3.95; No. 53½, $7.10; No. 54, $7.65; No. 61, $2.65; No. 62, $7.00; No. 62½, $7.00; No. 63, $3.50; No. 66, $5.25; No. 66¼, $6.10; No. 66½, $5.25; No. 66¾, $13.20; No. 68, $2.20; No. 70, $3.50; No. 72, $4.35; No. 72½, $7.95; No. 73, $4.35; No. 78½, $10.50; No. 84, $5.70; No. 94, $23.00 per dozen.

Lamp Burners, Fly Swatters, Chamois Skins Up

Toronto.

LAMP BURNERS, FLY SWATTERS, CHAMOIS SKINS.—A 10 per cent. increase has been made in prices on Arctic lamp burners, figures now ruling being $4.00 per dozen.

In line with prediction in HARDWARE AND METAL last week, a revision has occurred in at least one line of fly swatters, the Dunlop rubber going up from 85c to $1.10 per dozen.

Chamois skins continue to soar and prices now being asked for 17 x 19 inch are $10.15 and 20 x 22 inch $14.10 per dozen.

Gasoline Enjoying Heavy Demand; Oils

Toronto.

OILS, GASOLINE.—A very heavy demand is manifesting itself for gasoline and orders are going forward in big volume. Sales of coal oil have been maintained on a very good basis also, indicating its increasing use as fuel. No changes of any nature have been made in prices, gasoline being invoiced at 33c per gallon; Royalite coal oil, 18c, and Palacine coal oil at 21c per gallon.

Prices on lubricating oils are still under consideration. Further intimations are to the effect that changes now contemplated are largely in the differentials. The increasing cost of small containers has made this move necessary, it is stated.

Stove Situation Remains Unchanged

Toronto.

STOVES, ENAMELWARE.— There have been no new developments in the stove situation during the week. Summer lines are still moving forward freely and it is estimated in some quarters that a revision in electric stoves has been made. Little business is being solicited for fall requirements of stoves and ranges owing to the uncertainty of the future as regards raw material and prices at which it can be secured. Gov-

ernment requirements in the United States in all lines of steel and iron are exceeding expectations and this will undoubtedly be reflected in a curtailment of supplies available for commercial use. Enamelware and tinware are enjoying a good demand though indications are that stocks are by no means too heavy.

Nails Firm; Wire Unchanged

Toronto.

NAILS, WIRE.—There is little of interest marking the position of nails during the week. A fairly good demand has been noticeable in some quarters and prices have been firmly held. Quotations on wire nails remain at $5.20 base and cut nails at $5.65 base per 100 pounds. Some call is manifest for fence wire, but the movement is not heavy. The basis for smooth steel wire is unchanged at $6.25 per 100 pounds.

Iron and Steel Show No New Developments

Toronto.

IRON AND STEEL.—There have been no new developments to create special interest in this market during the week and conditions follow along in the prescribed channels of the past few weeks. A very fair demand continues to manifest itself. Stocks, though not heavy, are equal to present calls. Prices remain unchanged.

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25
Common bar steel	....	5 50

Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Corrugated Sheets Show Little Change

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—A slightly improved demand is reported for these lines during the week though the volume of business being done is still within comparatively narrow limits. In some quarters it is reported that difficulty in getting shipments of sheets through is becoming more apparent and with the increasingly heavy governmental demands the future supply cannot even be hazarded. Stocks at present are none too heavy though more than equal to present calls. Prices on corrugated sheets shown below have undergone no change and eavetrough and conductor pipe regain firm at prices shown in current market quotations.

TORONTO—	Per 100 Sq. Feet Galvanized	Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25

No. 18 gauge	23 00-	20 00

Discount 7½%.

Position Of Sheets Remains Unchanged

Toronto.

SHEETS, PLATES.—Deliveries of sheets are not coming through in any too good time to destination on local market and some questions as to future requirements naturally arise. In view of the increasingly heavy demands being made on mills in the United States to fill Government contracts, it is just a little uncertain as to what amount will be released for commercial use. It looks as though a decided curtailment in sheets coming through for commercial use is a natural sequence to the exceptional and unexpected demands being made for war purposes. Prices continue to rule at levels prevailing for the past two or three weeks which provides for a wide range as follows:

BLACK SHEETS—		Per 100 lbs.	
10 gauge	....	$9 50	$12 00
12 gauge	$7 55	9 60	10 00

16	7 95	8 20	8 45
14	7 85	8 10	8 35

FACTORY MILK CANS UP

New prices at higher levels have been established on factory milk cans, and not on milk can trimmings. as noted in last week's issue of HARDWARE AND METAL. The prices now established show an advance on list of 50 per cent. against the former quotations of 30 per cent. on list. This is a very substantial increase, but owing to the increasing costs and scarcity of tin is thought to be warranted.

Wrought Iron Pipe, Boiler Tubes Unchanged

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—Difficulty in getting supplies of raw materials is still curtailing production of wrought iron pipe, it was intimated in some quarters. The demand is within a comparatively narrow compass, however, and production even on its curtailed basis is able to take care of practically all the business. Boiler tubes remain in an unchanged position. The car of tubes reaching the city last week is still to be distributed. No change has been made in quotations below. Prices on wrought iron pipe appear in current market quotations.

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00

3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Solder Makes Further Advance of 10c Lb.

Toronto.

LEAD AND ZINC PRODUCTS.—Solder has again featured this market during the week and in some quarters a straight advance of 10c per pound has been named. These quotations are said to be nominal and based on to-day's tin market, and some doubt was expressed as to whether solder would soon be available even at enhanced values. The range of prices now being made is exceptionally wide, the lowest quotations given representing fairly stiff advances over previous week's figures. Quotations on strictly range from 49c to 64c per pound; on commercial from 45c to 62c per pound; and on guaranteed from 55c to 68c per pound. Manufactured lead products remain unchanged at figures shown below:

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼
Lead sheets, 4 to 8 lbs. sq. ft.		0 12½

Solder, commercial, lb.	0 45	0 62
Solder, wiping, lb.	0 44	0 56
Solder, wire, lb.	0 59	0 65
Zinc sheets, per lb.	0 26	....

Still Awaiting Developments in Old Materials

Toronto.

OLD MATERIALS.—The market for old materials continues in much the same condition as has obtained for several weeks. There is a marked disinclination on the part of buyers to enter the market, while on the other hand dealers do not appear to be particularly anxious to sell. Business consequently is decidedly dull and shows little or no indication of activity in the near future. Heavy melting steel and cast iron scrap are still very scarce at firm prices. With so many electric furnaces now operating in Canada there is not much chance of stocks of steel scrap accumulating as supplies soon pass into consumption. In this connection a market has been found for shell borings and turnings. There are no price changes to report this week.

Tea lead	$ 0 04½	....

Hemp Twine Prices Withdrawn; Jute Rope Up

Toronto.

TWINE, CORDAGE.—Prices on hemp twine have been withdrawn and quotations are only being made on request. Supplies are very hard to get though the

situation locally is not so severe in this respect as yet. Prices on jute ropes have undergone another change upward, the basis now being 20 to 21½c per pound. Fine jute packing at 15c per pound has also touched higher levels.

Rope business is within narrow limits just now, and prices are unchanged. Manila is being quoted at 39c; British manila at 33c, and sisal at 27½c per pound base. Prices on binder twine appear in current market quotations.

Waste Holds Firm; Oakum Steady

Toronto.

WASTE, OAKUM.—Prices established on waste last week have been firmly maintained and nothing new has entered into the situation during the week. Stocks are in good shape and orders in good volume are being shipped out. Oakum is steady and a fair demand is being taken care of satisfactorily. Prices on both these lines appear in current market quotations.

Tin Again Advances; Other Metals Steadier

Toronto.

INGOT METALS.—Tin continues to be the principal object of interest. Prices have again advanced and the metal is still very scarce with no indication of increased supply. Copper continues unchanged although it is reported that the War Industries Board may advance the price to 24¼c at the conference which is to be held shortly. Lead and spelter are both somewhat steadier following recent declines. Business continues very good locally.

COPPER.—The principal feature of importance is the conference which will be held shortly by the copper producers and the War Industries Board. It is reported that the fixed price of copper may be advanced to 24¼c as it has been estimated that there has been an advance in producing cost of ¾c since the date when the present price, 23⅛c, was agreed on. The market is quiet and quotations are unchanged at 30 to 31c per pound.

TIN.—This metal continues in the same unfortunate position. There is no spot metal offering. Small lots have been reported sold in the last few days in New York at as high as 95c. It is not a question of price now but one of obtaining the metal. Inquiries for tin of any grade and in all positions indicate anxiety of consumers to obtain a supply, but the holders of Chinese, which is the only tin which can be offered with any assurance of delivery, ask so much for their products that buyers hold off as far as possible. Straits and Banca tin are for the time being out of the market. Tin has advanced again and is now quoted at $1.10 per pound.

SPELTER.—Little interest is being shown in spelter and business is consequently dull. It is understood that the British Government has ratified an agreement to buy all of Australia's surplus zinc concentrates for ten years after the war. The market is somewhat steadier, prices of spelter ranging from 8¾c to 9c per pound.

LEAD.—The market is steady and prices unchanged. The trust price remains steady at 7c New York, but outside sellers are quoting around 6.80c New York. Lead is now quoted locally at 8¾c to 9¼c per pound.

ANTIMONY.—The demand for antimony is very light with more sellers than buyers. The market is easier but quotations are unchanged at 16c to 18c per pound.

ALUMINUM.—It is reported from Bombay that the embargo passed by the Indian Government on the imports of aluminum and manufactures thereof has been removed. The market continues quiet with little demand. Price is unchanged at 50c to 60c per pound.

PIG IRON.—In regard to supply there is very little improvement to note in the domestic pig iron situation. All the malleable and foundry pig iron that is being produced quickly passes into consumption. The demand for basic iron continues insistent and is beyond the capacity of the furnaces. In the States very little pig iron is being sold except through government intervention for consumers that are working on war contracts, but there are few foundry interests that are not working either directly or indirectly on war orders. It seems probable that the iron industry must come more than ever under government control, in which case the furnaces would be relieved of the responsibility of satisfying the demands of their customers. Receipts of coke at the furnaces have increased, but deliveries have been irregular and furnace operations have not increased to the extent anticipated.

LONDON MARKETS

LONDON, May 2.—Numerous price changes have been recorded during the week, all lines affected undergoing revision upwards. English cutlery is on the upward trend, and English hedge or garden shears and sheep shears have also attained higher levels. Boxwood rules are up 5 per cent., and about the cheapest broom obtainable now is priced at $8 per dozen. Other lines affected include wood bake boards, wallpaper cleaner, toe calks and tubular wheelbarrows. Business during the week has been very fair.

Toe Calks Take New List; Wheelbarrows Up

London.

TOE CALKS, WHEELBARROWS.—A new list has been adopted on Neverslip toe calks at higher figures than those formerly prevailing. The discount remains the same. Lists now ruling are, per 100:—5/16 in., $2.60; ⅜ in., $2.60; 7/16 in., $2.80; ½ in., $2.80; 9/16 in., $3; ⅝ in., $3, and the discount is still 15 per cent.

Tubular wheelbarrows have also undergone revision upward, and quotations now being made on some of the more familiar numbers are:—No. A02, $9.75; No. A13, $12; No. F2, $11.75 each.

English Cutlery Goes Up About 20%

London.

ENGLISH CUTLERY.—Revised prices on Joseph Rodgers & Sons' cutlery have been put into effect during the week, which provide for an advance of about 20 per cent. The lines affected include butched knives, skinning knives, sticking knives, farriers' knives, and table cutlery. The scarcity and high price of steel and heavy insurance and freight rates have influenced prices to their present high levels. Prices on some of the familiar numbers and sizes are:

Butcher Knives—No. 1707 x 5½, $6.35 doz.; 6, $6.60; 6½, $7.15; 7, $8.25; 8, $8.90; 10 in., $14.20.

No. 1707 x 12, $22.55 doz.; 14 in, $34.40 doz.

Skinning Knives—No. 1707 x 5½ in., $6.60 doz.; 6 in., $6.90.

Sticking Knives—No. 1707 x 6 in., $7.30 doz.

Farrier Knives—No. 3103 x ⅝ in., $7.45 doz.; ¾ in., $7.45.

Medium Knives—No. 3744, $13.45 doz.; No. 3749, $12.65.

Dessert Knives, No. 3744, $10.50 doz.; No. 3749, $9.75.

Higher Prices Named On Garden And Sheep Shears

London.

GARDEN SHEARS, LAWN TRIMMERS, SHEEP SHEARS. — Garden shears, lawn trimmers and sheep shears brought in from England are being quoted at considerably higher prices. The supply is said to be limited, jobbers' orders only being supplied in part by the manufacturers and the question of the balance of orders arriving being extremely doubtful. Present prices adopted are:

Garden or Hedge Shears—No. 100 x 8 in., plain, $1.30 pair; No. 101 x 8 in., notched, $1.50; No. 100, 9 in., plain, $1.60; No. 101, 9 in., notched, $1.80; No. 107 x 2 in., Ladies, $1.65.

Lawn Trimmers—No. 106 x 9 in., $2.35 pair; No. 105 x 9 in., $2.50; No. 1062 x 9 in., $3.

English Sheep Shears—No. 1360 x 5½ in., unpolished, $4.50 doz.; No. 5G x 6 in., half polished, $7.75; No. 5G x 6½ in., half polished, $8.25; No. K20 x 6½ in., full polished, $9.50; No. BBA x 7 in., full polished, $18.

Bake Boards Up 5%; Boxwood Rules Higher

London.

BAKE BOARDS, BOXWOOD RULES.—New prices established on wood bake boards show an advance of about 5 per cent. over quotations previously ruling. Some difficulty in securing supplies is being experienced with this line, although present stocks are in very fair shape. The new figures named are:—No. 1, 18 in. x 24 in., $6.25 doz.; No. 2, 18 in. x 28 in, $6.75 doz.; No. 3, 20 in. x 30 in., $7.50 doz.

A further advance has been made in Stanley boxwood rules of about 5 per cent., new prices established being as follows:—No. 36, $3.95; No. 51, $3.10; No. 61, $2.65; No. 62, $7; No. 66½, $5.25; No. 68, $2.20; No. 70, $3.50; No. 84, $5.70; No. 66¾, $13.20 dozen.

Wall Paper Cleaner, Shoe Polish, Brooms, All Up

London.

WALLPAPER CLEANER, SHOE POLISH, BROOMS.—A good sale is in evidenced for wallpaper cleaner at the present time, when house-cleaning is so general. A new price has been named on the Climax of $1.50 per dozen, which represents an advance.

Black and tan shoe polish, 2-in-1, is also on the upward trend, as evidenced in new price of $1.20 dozen now ruling.

Corn house brooms have registered a further advance of 50c per dozen, and the new price on the cheapest line has now reached $8 per dozen.

Rope Holds Steady; No Change In Nails

London.

ROPE, NAILS.—Rope has held steady during the week, and little movement to the retailer is in progress. Prices are unchanged as follows:—Pure Manila, 39c base, per lb.; British Manila, 33c; New Zealand hemp, 33c; sisal, 27½c.

Nails have also held firm and unchanged, with a fair movement manifest. Wire nails remain at $5.20 and cut nails at $5.60 base, per 100 pounds.

Oil Stoves Selling Well; Paris Green

London.

OIL STOVES, PARIS GREEN.—A good demand exists for all lines of oil stoves, and orders are going forward in good volume. No change has been made in quotations, which range as follows:

Oil Stoves—New Perfection—2 burners, $12.75 each; 3 burners, $16.50; 4 burners, $21.

Oil Stove Ovens—No. 70, glass front, McClary, $4.25 each; 142G, glass front, Perfection, $5.

Booked orders for Paris green are practically all filled, manufacturers having made deliveries of stocks to the jobbers. Prices have undergone no change, orders being filled on the following

C. P. Co. make—½-lb. packages, 66½c per lb.; 1-lb. packages, 64½c; 25-lb. drums, 62½c; 50-lb. drums, 61½c; 100-lb. drums, 61½c.

Linseed Oil Holds At Lower Levels; Turpentine

London.

LINSEED OIL, TURPENTINE.—No change in prices over decline noted last week in linseed oil has been made. The situation in oil does not seem quite so acute, and a fair amount of business is being transacted.

	Raw, per gal.	Boiled, per gal.
1 to 2 bbls.	$1.95	$1.98
3 to 5 bbls.	1.94	1.97
6 to 9 bbls.	1.92	1.95

Less bbls. add 10c gal.

Although a change was noted in turpentine downward last week, this was in error, as prices have undergone no change. The price on pure turps is being firmly maintained on the basis of 70c per gallon, barrel lots. Stocks are by no means heavy, transportation difficulties influencing this position. Quotations are:

1 bbl. lots	70c gal.
2 to 4 bbls. lots	69c „
5-gal. lots	80c „

WINNIPEG MARKETS

WINNIPEG, May 2—Price changes for the week again show an upward trend in all lines and affect the following articles: putty, canvas belts, window glass, half and half solder, Perfect handle wrenches, W. & B. knife handle and railroad special wrenches, cotton clothes lines, cotton rope, self-ringing mops, candle wick, sash cord and Irwin auger bits.

Business for the past week shows up well and reports indicate that shipments are heavier than in previous years.

Auger Bits Make 12½% Advance

Winnipeg.

AUGER BITS.—New prices are just to hand showing a further advance in Irwin auger bits. The discount quoted to-day is 10 per cent. from list, making an advance of 12½ over former quotations. Net prices figured on the new basis are as follows: 4-16 in., $4.50; 5-16 in., $4.50; 6-16 in., $4.50; 7-16 in., $4.50; 8-16 in., $4.50; 9-16 in., $5.40; 10-16 in., $5.40; 11-16 in., $6.30; 12-16 in., $6.30; 13-16 in., $7.40; 14-16 in., $7.40; 15-16 in., $8.55; 16-16 in., $8.55 per dozen.

Two Cent Advance In Price Of Solder

Winnipeg.

SOLDER.—Half and half solder again shows an increase of 2c a pound over last quotation. This is due to the exceedingly high prices ruling on tin. Prices just issued are as follows: Full cases, 56c pound; less than cases, 57c pound; wire solder, 62c pound.

Advances Made In Cotton Goods

Winnipeg.

COTTON GOODS.—Prices on many lines of cotton goods have again advanced. This was predicted in the last issue of HARDWARE AND METAL, and new prices show rather strong advances. The following lines are affected: cotton clothes lines, self-wringing mops and mop cloths, sash cord, candle wick packing. Still further advances would not come as a surprise. Market prices now ruling are given herewith: Cotton clothes lines, 40 ft., $3.05; 48 ft., $3.65; 60 ft., $4.55 dozen; self-wringing mops, $5.25 doz; extra cloths, $3.00 doz.; candlewick packing, 72c pound; sash cord, No. 6, 74c; No. 7, 73c; No. 8, 72c; No. 9, 72c; No. 10, 72c pound.

Endless Canvas Belts Record Advances

Winnipeg.

ENDLESS BELTS.—The recent heavy advances in cotton are also responsible for new prices being established on endless canvas belts. Quotations now effective are given herewith although owing to the extensive line only a few of the biggest selling sizes are enumerated:

	Each
100 ft x 7 in. x 5 ply	$70 40
120 ft. x 7 in. x 5 ply	84 48
150 ft. x 7 in. x 5 ply	105 60
100 ft. x 8 in. x 4 ply	64 00
120 ft. x 8 in. x 4 ply	76 80
150 ft. x 8 in. x 4 ply	96 00
100 ft. x 8 in. x 5 ply	80 00
120 ft. x 8 in. x 5 ply	96 00
150 ft. x 8 in. x 5 ply	120 00
160 ft. x 8 in. x 5 ply	128 00
120 ft. x 9 in. x 5 ply	108 48
150 ft. x 9 in. x 5 ply	135 60
160 ft. x 9 in. x 5 ply	144 64
150 ft. x 9 in. x 6 ply	162 00
160 ft. x 9 in. x 6 ply	172 80

Further High Levels Established On Wrenches

Winnipeg.

WRENCHES.—Owing to increased production costs advances have been found necessary on Perfect handles, W. & B. knife handles and railroad special wrenches. The Perfect handle is now selling at 35 per cent. advance on list and the other two lines at 15 per cent. advance on list. Net prices figured on this basis follow:

Perfect Handle Wrenches—6 in., $13.50 doz.; 8 in., $16.20; 10 in., $18.90; 12 in., $24.30; 15 in., $32.40; 18 in., $43.20.

W. & B. knife handle and railroad special wrenches—6 in., $11.50 doz.; 8 in., $13.80; 10 in., $16.10; 12 in., $20.70; 15 in., $27.60.

New Prices Named On Window Glass

Winnipeg.

WINDOW GLASS.—Much has been said in recent issues of HARDWARE AND METAL regarding the window glass situation. The fact that three advances have taken place since the beginning of the year clearly illustrates the position of this commodity and even further advances may be found necessary owing to the fact that the government has limited the amount that can be manufactured, which means a much greater overhead cost. The new prices which have just gone into force show an increase of from 5 to 10 per cent., and net prices on the different breaks are as follows:

	Single Per Box	Double Per Box
25 in. break	$13 50	$18 50
40	14 50	21 00
50	18 50	23 75
60	19 50	24 25
70	20 50	25 75
80		27 75
85		34 75
90		37 00
95		37 75
100		44 25
105		49 00
110		54 75

Substantial Increase Made In Putty Prices

Winnipeg.

PUTTY.—In view of the fact that all raw materials entering into the manufacture of putty are advancing, new prices have just been issued and show fairly strong advances over previous quotations. To-day's market prices are given below: Barrels, $4.50 per 100 lbs.; 100 lb. drums, $5.70; 25 lb. drums, $6.30 100 lbs.; 10 lb. tins, $7.00 100 lbs.; 5 lb. tins, $7.70 100 lbs; 1½ tins 12c each.

Linseed Oil Firm; Turpentine Steady

Winnipeg.

LINSEED OIL, TURPENTINE.—Prices on linseed oil continue firm, while shipments are about normal. Prices ruling to-day are: Boiled, $2.03 gal.; raw, $2.00 gal.

Prices on turpentine show no change over previous prices and the market is reported firm. To-day's ruling prices are: Barrels, 80c gal.; ½ barrels, 83c gal.; 5 gal. lots, 85c gal.; 1 gal. lots, 85c gal., plus the usual extras for containers.

PITTSBURG MARKETS

PITTSBURGH, Pa., May 2.—One of the most important actions for some time past taken by the War Industries Board is the request recently made to the steel producers to report in full detail the nature of the consumption involved in their commercial orders. The weekly reports that have been made to Washington for some time past, of shipments made during the week and of orders remaining on books, have divided the steel into three classes, that intended for the Government, that intended for the Government's allies, and that intended for the general trade. By means of order numbers or other description the precise character of the steel involved in the first two categories has been given. That in the third category has been given only in lump tonnages.

The object of the War Industries Board in taking fresh measures with regard to steel distribution appears to have been misunderstood in some quarters. At any rate the report that has been circulated, from Washington, that steel deliveries except for war work are to be shut off for the future, is contradicted in the steel trade. The steel manufacturers are in close touch with Washington. While some reports have referred to "nonessentials," their information is that Washington has tabooed the word "nonessential" entirely. No such thing, as regards steel, is recognized. There are "less essentials." Everything in steel is more or less useful, the gradations being in the degree of usefulness. In order to supply the information required by Washington, the steel makers are calling for reports from customers, detailing precisely the use to which the steel now on order is to be put. The authorities will eventually be able to formulate a complete list, showing the sequence of importance of all employment of steel. The conception that steel supply will be extended only so far down the list, as far as it will reach, and then stop absolutely, is erroneous. If there are 1,000 items in the list, and a 75 per cent. steel supply, it will not mean that the first 750 items will be taken care of and the remaining 250 items not get a pound. After a few prime essentials are fully taken care of, the allotment will decrease gradually as one goes down the list. Regulation will be by means of the coal distribution and the allotment of traffic facilities, already invoked in many instances, and through the distribution of steel itself, as defined by the authorities to the steel producers.

Less Commercial Steel Shipments

Through the double influence of the Government calling upon the steel mills, some three weeks ago, for heavier shipments for shipbuilding and some other purposes, and of this more recent call for detailed information as to the intended employment of steel involved in commercial orders, there is a decrease in the shipments of steel for commercial purposes, not thus far distinguished by any consideration on the part of the Government. This decrease may be only temporary. Steel is scarcer than it was. Deliveries are more difficult to secure, against old orders, and it is still more difficult to place new orders. There is, however, no great clamor on the part of buyers. While there are urgent unsatisfied needs, they do not relate to large tonnages.

Freight Cars Bought

The Railroad Administration has begun to place orders against the program of buying 100,000 freight cars, the first order being placed last Friday, involving 30,000 cars to be furnished by the American Car & Foundry Co. While the specifications are withheld, it is known that the types adopted require less steel, particularly sheared plates, than was involved in the original plans. This is concrete evidence of the seriousness of the apprehensions entertained by the War Industries Board as to the supply of plates for shipbuilding.

As to steel for shipbuilding, an interesting piece of information is furnished by the management of the Hog Island yard, that the management estimates an average of 60 days for the time elapsing from the steel leaving the mill until it reaches the shipyard in fabricated form. The yard, which has 50 ways, some already completed, and will build ships of 7,500 and 8,000 tons deadweight, draws its fabricated parts from more than 35 shops distributed as far west as Minneapolis. Allowing three months from keel laying until the vessel is launched, and one month additional for completion in the fitting-out basin, there is a six months' interval from the time the steel leaves the mill until the ship is delivered. Accordingly, the rate at which ship steel must be produced now is not the rate indicated by the rate at which vessels have lately been completed or launched, which rate recent reports have shown to be such a disappointing one, but the rate that will be obtaining six months hence, and certainly a much higher rate.

Production

There has not lately been any further increase in the rate of production, in general, of pig iron, of ingots, or of finished steel. The rate as a whole is about 85 per cent. of capacity, which is about the average rate maintained since March 1. Production at this rate, however, means substantially as great a tonnage as was produced in 1916, when operations were practically at capacity. The difference is accounted for by the new construction that has been carried through since. So much has been said about the inability of the industry to operate at capacity that there is danger of a distorted view being created, through the 15 per cent. that is not being produced being emphasized, rather than the 85 per cent. that is being produced. As a matter of fact, this production is about equal to the largest output ever made before the war by the original belligerents, Britain, France, Russia, Germany and Austria-Hungary. It is materially in excess of the tonnage these countries actually made during the first twelvemonth of war. Were only 50 per cent. of the United States output passing to war use, the contribution would be a very large one, but the proportion is undoubtedly higher than 50 per cent.

The chief restrictive influence is the insufficient car supply in the Connellsville coke region. For three successive weeks the reports of the *Connellsville Courier* have shown slightly decreasing shipments. There is probably a normal number of cars in the service, but they do not make the round trip as expeditiously as in 1916, for instance. Thus supplies of Connellsville coke have been less in April than in March, rather than greater. The by-product coke ovens, however, have done somewhat better this month, and have been operating substantially at capacity.

MOTOR TRUCK TO HELP TRANSPORTATION

The following announcement has been authorized by the United States Council of National Defense:

The Council of National Defense has given its formal approval to all measures designed to facilitate the use of the motor truck in transportation wherever it can be utilized. Its efforts in this connection have been directed through the Highways Transport Committee. Through the State councils of defense and other agencies it is urging all communities as far as possible to adopt the motor truck to their local needs and encourage its use in any way to help existing transportation problems. The truck is proving of a great deal of service in many districts in relieving congestion in freight terminals. The council has just passed the following resolution:

"Resolved, That the Council of National Defense approves the widest possible use of the motor truck as a transportation agency, and requests the State councils of defense and other State authorities to take all necessary steps to facilitate such means of transportation, removing any regulations that tend to restrict and discourage such use."

WEEKLY PAINT DEPARTMENT

Start a Clean Up Paint Up Campaign

Originator of Idea Says That it is Easy—All That is Required is Initiative and That the Spirit of Co-operation and Civic Pride Should be Fostered—7,000 Towns Carried Them Out Last Year

By Allen W. Clark, Chairman National Clean Up and Paint Up Campaign Bureau, St. Louis.

SOME man or woman, in nearly 7,000 towns and cities started the ball rolling for a local clean-up and paint-up campaign last year. Some already were civic leaders, some developed that leadership through their campaign activity, others merely started things and let others play the leading role. Thousands of these "starters" have reported that the campaigns regenerated their towns. Some town campaigns have practically refurbished an entire country—the spirit is contagious. You can start one of these campaigns for homes and towns beautiful. You can do it immediately—to-day. How?

"Go to It"

Take your telephone in hand—phone a half-dozen boosters. Talk it over and agree upon a meeting of live paint men and others. Impress upon each the fact that in this movement, as in everything else worth while, "there is nothing in it for us, unless we get into it ourselves."

Committee Duties

At this meeting of live business men the whole local paint trade, or the representatives of every interest therein, should be present and participate in the organization of the local Trade Committee that will be the background or the mainspring of the campaign, or that at least will arrange for its successful launching into the harbor of public and press approval. This Trade Committee's duties are threefold: 1. To send the National Bureau the Report of Organization. 2. To counsel with the newspapers, the city officials and others on the date and place and personnel of the citizens' meeting for the organization of the general committee to conduct the campaign. 3. To look after the interests of the trade throughout the campaign, to handle the co-operative advertising, etc., and to see that the trade's participation in the general campaign is so creditable and effective that the city will be proud of the campaign and its sponsors.

Soon after that meeting should come your citizens' meeting, and for this your

ALLEN W. CLARK
Of St. Louis, Originator of the Paint-up and Clean-up Idea.

newspaper men, editors and business managers will be your best advisors and helpers in planning this meeting and its action. These newspaper men realize that the civil and news features of this work deserve liberal space and that though it profits the dealers and a dozen other lines of merchandise, it also enables the publisher to sell his own merchandise first of all, and to all of these. Therefore paint men and newspaper men can talk to each other like brothers, and with each anxious to help the other to profit through co-operation.

Sowing the Seed

Talk together about the citizens' meeting to launch the campaign; see that it gets proper advance publicity; and make certain that each of the men and women essential in such a community movement is there. Every force that can help and every influence that could hinder, if it is ignored, should be represented. Then

1. This meeting, in opening, should select a chairman and a secretary, this chairman generally being chosen because of his knowledge of the movement, his ability to "state the object of the meeting," and perhaps also because of his fitness and willingness to be made permanent chairman, of the general campaign committee.

2. The character and methods and national scope of the movement should be explained, and the immediate launching of a local campaign should be urged: because these campaigns reduce the fire loss and insurance costs, conserve and increase property values, make thrift gardens of vacant lots and back yards, remove unsafe buildings, swat the fly; make cleaner alleys, yards and homes; educate children in fire prevention and clean-up measures, plant trees; collect and utilize "waste"; make more attractive and safer homes and places of business, and develop a community spirit that permanently ensures a cleaner, safer, healthier and more beautiful city.

3. Then adopt a motion to organize at once for a local clean-up and paint-up campaign. The planning should begin then, although the date for a definite program of a week or more, to open the campaign, should be set ahead.

4. Be sure to organize at this meeting—select the permanent chairman and other officers and instruct the chairman to appoint the chairmen of all the various sub-committees within a day or two—these and the officers to constitute the general committee. These sub-committees may number a half-dozen or a score according to the scope of the work undertaken.

5. Appoint a committee to request the Mayor (or the Board of Health)to proclaim the opening week of the campaign.

6. Adjourn, after fixing date for a get-to-work meeting a few days later, which all these chairmen and members of their committees should attend, to jointly plan their work.

(Continued on page 64.)

He'll do a good job with that Brush

The good effect of the paint you sell is often nullified by the poor brush with which the paint is laid. With Boeckh's Steel Grip Rubber Set Brushes the veriest amateur can do a good job.

Boeckh's Brushes **have selected bristles of unusual elasticity and resiliency** that are held firmly and can't come out; brushes are perfectly chiseled, and the paint goes on evenly, giving a good-wearing, satisfactory job.

You can make sure that the paint you sell is going to get full chance to make good by selling Boeckh's Brushes to your paint customers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 2.—The interest this week is directed to mixed paint. An advance approximating 15c per gallon has been made in several lines of oil paints, and this is referred to in special article in this issue. This bears out the very definite forecast made in HARDWARE AND METAL for the past two weeks, and, it is said, the changes have been made in accordance with defined necessity through increased costs of basic materials. The new prices are immediately effective, and reference to the specific items affected can be readily seen. The linseed oil situation is one of maintained firmness and delivery of seed from the lake head has not materially increased, although it shows an improvement. Turpentine is held, and the tone has been a little stronger with some jobbers. White lead in oil and putty hold in a firm position without change. Improvement is expressed in the condition of trade generally.

Linseed Oil Firm; Better Seed Delivery

Montreal.

LINSEED OIL.—The situation continues firm. This is a reflection of the seed situation, which still is strong, with fluctuations characteristic as usual. Delivery of some large quantities is reported to have been made down the lakes, but this has gone to United States points. In a few instances improvement is reported in the amount of seed delivered here, but this is not yet very marked. It is expected that information will be available this week as to the size of supplies at the lake head, and from this some forecast may be made as to what oil can be expected for the coming season. With crushers well booked for immediate future delivery here and in the States oil will probably hold its present position for some time.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.82-$1.86	$1.84½-$1.88½

Turpentine Sells On Held Basis

Montreal.

TURPENTINE.—The strength of the market is quite marked in southern points, and trading is done on a decreasing light supply in the spot market. Here there is rather more activity than usual and business is done on the basis of 60c to 62½c per gallon for single barrels. The supply is apparently ample to meet the present request from trade sources. Altogether there is a tendency to a firmer basis, some having quoted as low as 57c last week for barrel lots.

Turpentine—	Per Imp. gallon	
1 to 4 barrels	$0 60	$0 62½
5 barrels and over	0 58	0 61½
Small quantities	....	....

Some Movement Putty; Prices Hold Firm

Montreal.

PUTTY.—The situation holds and prices are fully maintained, with material costs all of a firm nature. However, there has been no change of price whatever. A certain amount of business is being done from week to week, and many orders for other lines have a fair proportion of putty accompanying them. The undertone is steady and firm all around.

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Full Prices Hold For White Lead In Oil

Montreal.

WHITE LEAD IN OIL.—The market has a firm undertone, even though pig lead is ruling somewhat easier. The latter ingredient has been one of a little more strength, however, within the last day or two. With oil prices holding well, there is every indication of a maintained price for lead in oil. Sales are made on the following basis:—Five-ton lots, per 100 pounds, $15.50; one-ton lots, $16, and small lots, $16.35.

Advance Is Made On Mixed Paint

Montreal.

MIXED PAINT, ETC.—As was very definitely forecast in the columns of HARDWARE AND METAL, an advance has been made in the price of mixed paint, and the same is immediately effective. This advance, it is intimated, has been made necessary through advancing costs of oil and other materials, amounting to 15c per gallon on certain lines. This has been covered elsewhere in a special article. This advance applies to the better grades of oil paint, those containing a considerable quantity of the various high-priced raw materials. In the matter of trade there has been a good demand, and painting operations are now being undertaken in some parts, with others contemplating an early start.

TORONTO

TORONTO, May 2.—Interest for the week centres in changes made in ready-mixed paint, full details of which are given in a special article elsewhere in this issue. There have been no new developments in the linseed oil situation. Deliveries of seed show little improvement as yet, though with lake and rail service available now, it is thought shipments will be despatched with greater rapidity. Turpentine has stiffened at primary points and this is reflected here in a narrowing of the range. Stocks locally are very low, though shipments are reported on the way. Business continues to be transacted in good volume, and mixed paints are enjoying a splendid demand.

Linseed Oil Firm And Unchanged

Toronto.

LINSEED OIL.—There is little change in the linseed oil market during the week, though a slightly firmer tendency is noticeable in some quarters. Quotations generally are being made on the basis of $1.95 per gallon for raw, though lower prices, as noted below, are being named. Some improvement in receipts of seed is looked for now that lake and rail routes are open, though little change is recorded as yet. Prices on seed from Wednesday of last week to Wednesday of this week show a decline of $3.87½ for No. 1 N.C.W., against $3.80 per bushel for respective dates. Indications in some quarters are that back orders will be pretty well cleaned up in the next couple of weeks if supplies continue to come along as at present

	Raw, Imp.gal.	Boiled, Imp. gal.
1 to 2 bbls.	$1.86-$1.95	$1.88½-$1.98
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine In Firmer Tone; Supplies Scarce

Toronto.

TURPENTINE.—The market on turpentine shows a firmer tendency during the week, and advances have been made in some quarters which have resulted in

—OF VITAL IMPORTANCE To B-H AGENTS

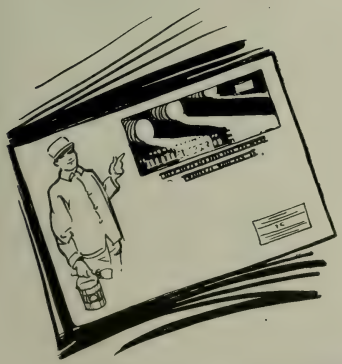
A SHORT time ago we issued our 1918 Spring Mailing Folder.

Immediately specimen copies of it had been received by B-H dealers, they began to send in their lists to us of customers to whom they wanted this new Folder mailed.

So enthusiastic, in fact, was the response thus evidenced that we found it necessary to order at once from our printer a second edition of the Folder—which, as all who have seen it admit, is the finest bit of advertising of this kind ever issued by a Canadian Paint Manufacturer.

The second edition will be ready in a few days. It will provide a quantity large enough to take care of **all** our Agents' requirements.

We are anxious that **every** B-H Agent shall take advantage of this exceptional opportunity. We want every one who handles B-H Paints to send in at once his list of customers. We will mail the folder to every one of those customers whose names you furnish us. This service is free; we even pay the postage.



The B-H Spring Mailing Folder forms one of the most important links in the great B-H publicity chain for 1918. It is one of the features that help to keep B-H a most profitable line for all who handle it.

House owners, this year—because the call of the times is conservation and thrift —may be tempted to consider painting as an extravagant habit; they might easily overlook its value from the standpoint of preserving and protecting. Well does this folder explain why painting should be a feature of the thrift programme —the part paint plays in the conservation of all buildings—it tells why people should paint this year more than ever before. It explains why it is economical to use a real Paint rather than inferior grades. It is a timely piece of literature—one that will inspire painting activity.

If you are not a B-H Agent, let us tell you about the B-H Paint line and the limitless co-operation, prestige and extra business you can secure, by securing first the B-H Agency. If there is not representation for the B-H line in your territory, write us. Let us tell you how you can get your name signed to the B-H 1918 Spring Mailing Folder and this Folder in the hands of every one of the prospective paint-buyers in your locality.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST JOHN TORONTO WINNIPEG CALGARY EDMONTON VANCOUVER

If interested, tear out this page and keep with letters to be answered.

a narrowing of the range. In dications are that following the strong tone of this commodity at primary points further advances may be looked for and an increase may be recorded towards the end of the week. Stocks locally are at a very low point and the market may be termed bare of supplies. Further shipments are rolling and deliveries are expected before the end of the week. From producing centres advices are being sent out that production of turpentine this year will be from 25 to 50 per cent. less than last year, producers turning to other lines of endeavor in many instances. Ruling prices on to-day's market are:

	Imp. Gal.
1 barrel	$0 62-$0 65
2 to 4 barrels	0 61- 0 64
5 gallon lots	0 69- 0 75

Fairly Good Demand For White Lead In Oil

Toronto.

WHITE LEAD IN OIL.—A fairly good demand for white lead in oil exists in some quarters during the week, and orders have been moving out with greater freedom. It was intimated by one source that the week's business was about equal to the total business done for the previous months of the year. The weakness of the pig lead market has not had any influence on prices as yet, quotations being maintained throughout. The market is steady at quotations as follows:—Pure, in ton lots, $16.20 per 100 pounds; smaller quantities, $16.55 per 100 pounds.

Mixed Paint Registers Further Advances

Toronto.

MIXED PAINTS.—A further advance has been made in ready-mixed paints, as outlined in HARDWARE AND METAL a couple of weeks ago. Full details as to the changes made appear in a special article elsewhere in this issue. Manufacturers and jobbers are very optimistic over prospects for paint business this spring, a good volume of spring business being handled already and repeat orders now coming to hand in splendid volume. New prices established on paints appear in current market quotations.

Glass In Firm Position; Putty Fairly Active

Toronto.

GLASS, PUTTY.—The position of window glass is one of decided strength, an advance of about 11 per cent. in single thick, first three brackets in the United States, exerting an influence on local conditions. Supplies of window glass are reaching a pretty low point, and the question of when further shipments may arrive is a doubtful one. No intimation is yet made that shipments have started from factories in the South. Prices remain unchanged, as shown in current market quotations.

Putty is experiencing some movement during the week, though this as yet is by no means heavy. Prices remain firmly established on the following basis:—Standard bulk in casks is quoted at $4.55; 100-lb. drums at $5.30-$5.40; and bladders in bbls., $5.45-$5.65 per 100 pounds. Prices on pure putty range $2 per 100 pounds higher than above.

CLEAN-UP, PAINT-UP CAMPAIGN

(Continued from page 60.)

Work Through Committees

Get as many men and women as possible to work, each at some specific thing. Don't make the mistake of heaping upon one willing and patient enthusiast all the detail and responsibility of this work. If you do, he or she will be completely overwhelmed, while the rest of you will be thinking of a hundred things "the chairman ought to do."

Committees to do specific work and chairmen who will think and work and inspire suggestions and zeal among the members of their committees are essential. So much for the "plowing and sowing."

The Harvest

Now for the cultivating and harvesting, which go together. The machinery for this should be complete and in good working order from the first—for business and profit crops begin to ripen as soon as the clean-up and paint-up spirit begins to permeate the air. By careful handling of the growing and the harvesting alike, the campaign field can be kept in bearing for months—and then be in excellent condition for replanting for another harvest season. Two such seasons a year, with ample surplus harvest to tide over and employ the interim from season to season, are perfectly practicable.

The volume of this profit harvest depends (1) upon your ability to reap and handle this business crop; (2) upon the extent of the local campaign field, and (3) upon the length and activities of the continuing period of cultivation and production, and (4) upon the teamwork of all the local paint men.

If you advise a clean-up and paint-up "week" do not expect any special interest after that week is finished, nor during that week for that matter. One of the worst and most unjust obstacles the National Bureau has had to meet has been the false impression in various quarters that it encourages or condones the old and odious "week" of clean-up activities so redolent of the "annual bath" and generally confined to street and alley scavenging as the only thing that can be undertaken with any prospect of completion within six days. Plan for and thoroughly advertise the "opening week" of a continuous campaign, and make it continuous by continued campaign activities and advertising.

Co-operation Counts

It is here that trade co-operation counts—in the advertising that gives character and dignity to the paint man's part in the campaign, and that permits the proper presentation of the whole gospel of good paint and good painting; also in securing the economies and the effectiveness of mass-play in the buying and placing of printed matter and other campaign supplies; and in the making of the city or district surveys of paint-needy property and getting the range upon each owner for the direct fire of the allied trade forces.

The real spirit of co-operation, however, should inspire, rather than discourage, the individual initiative of all who are doing their share in the associated efforts with their fellows. There should be friendly but earnest emulation in the efforts of each to secure by straightforward and businesslike enterprise his full share of the campaign harvest.

ONE-THIRD STORES TURNOVER IN BICYCLES

(Continued from page 39.)

divided so as to give each drawer ample space for a gross or more screws of several sizes each.

The advantage of this case is that the salesman has it immediately at hand when needed, that it keeps the stock in the best of condition and that in so small a space, very often wasted in many stores, the whole screw stock takes up a very small amount of room.

Other Important Factors

Mr. Fabien stated that when he started his store he had to depend upon his own district largely for his business—one that was being served by other stores. By working early and late and giving his customers careful attention and a good quality of merchandise he was able to make his business pay its way and increase his stock out of the original and modest capital put into it.

One of the matters he has considered necessary is that of keeping his own books. In this way he has not only been able to watch his credits but prices are the more readily and carefully checked, bills are kept within reason and stock and prices are given closer attention, which is a big advantage.

By keeping flashlights, watches, and razors well to the fore a nice business for these goods has been developed and this is still increasing. Electrical lamps also are sold and the special arrangement shown over the counter permits the customer to select the strength and style of lamp wanted, these being connected with the current just for this purpose.

VANCOUVER TO HAVE PAINT-UP

Arrangements are being completed to have a clean-up and paint-up week in Vancouver from May 6 to 11. Money is being raised for the purpose of giving publicity to the matter. Posters are to be printed and merchants will display them in their windows. It is probable the campaign may extend to May 24.

If it is too high in price the customer will not hesitate to say that it is more than he wants to pay. If it is too low he will also tell you. You get some idea of what is revolving in the back of his head as to the price he is prepared to pay.

MYERS POWER PUMPS

The wide range of pumping service and the high standard of construction of these pumps create a demand for them throughout the entire world. Many styles to choose from — many sizes for capacity. Gasoline engine, electric motor or other power. **Catalog on request.**

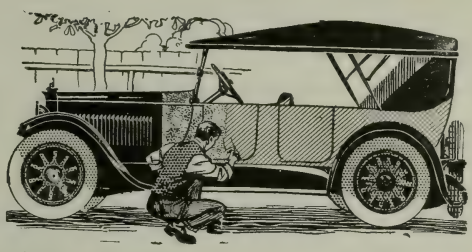
TORONTO



Economizing Helps the Sale of Specialties

The nation-wide impulse for economy means that many motor cars will go unfinished this season unless the owners adopt the *"Berry way,"* which makes the cost nominal.

Berry Brothers'
Auto Color Varnishes

are made especially for the unskilled varnisher, and with his garage for a workshop any man can produce a handsome, lasting finish on his car in just the colors he prefers, without any finisher's bill to pay.

We furnish an attractive cutout for counter display, and descriptive folders giving explicit directions for the amateur varnisher, telling how much varnish it takes, and showing in colors how cars look when refinished. A real selling help.

Ready to Ship Assortments

We have all ready put up, well selected assortments of colors that we can ship promptly. Order one to-day and get in the field early. You will sell it quickly and want more. Write for further particulars anyway.

BERRY BROTHERS

Reasons Why You Can Place Your Orders for Babbitt Metals With Us

1. We are the largest manufacturers of Babbitt Metal in the Dominion of Canada.
2. All our Babbitt Metals are made under the supervision of a skilled metallurgist.
3. Our facilities for manufacturing are superior to any other firm in the Dominion.
4. We can buy larger quantities of raw material than any other firm and can therefore give favorable quotations.
5. All raw material is tested for purity before being used. Anything not coming up to our high standard is rejected.
6. When satisfied that our raw material is right we melt thirty-five tons of metal at once, thus making thirty-five tons of any one grade at one heat. During the process of melting many tests are taken and checked up in our laboratory to absolutely guarantee a uniform alloy. After the alloy is satisfactory, the metal is poured, but before being passed as perfect the Babbitt Metal is tested on a friction testing machine and must stand up to severe tests before being passed as O.K.
7. Our Babbitt Metals are lower in specific gravity than most all other metals of similar grades. Our Imperial Genuine is the highest grade of Babbitt Metal manufactured and is lower in specific gravity than any other genuine babbit manufactured. It contains no lead.
8. We manufacture for some of the largest and most discriminating users of Babbitt Metals in the Dominion.
9. We guarantee our Babbit Metals to give excellent service.
10. We can deliver promptly from stock and guarantee a uniform alloy.
11. Our prices are as low as is consistent with the high quality.
12. Dependability is our motto.

We Manufacture All Grades of Babbitt Metals. Write for Complete List.

If you let Spring pass her judgment

Spring is the season that proves paints—that determines whether they'll sell with profit and with promise for the future, or whether they'll fail.

Dealers who have put Jamieson's Crown and Anchor Paints to the Spring test are our best friends. They have let Spring pass her judgment and they're satisfied with the verdict.

In many stores Crown and Anchor Paints are proving up this Spring and showing their value as business-builders. When customers come for "more of that paint I bought last week" it's a sure sign you've at last hit on the paint that satisfies.

That's the way Jamieson's gets all its business—through satisfaction.

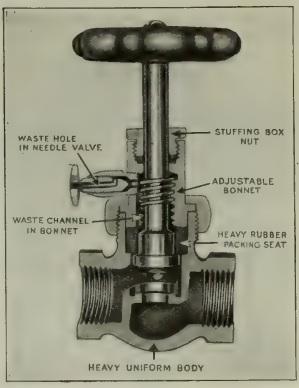
A Real Compression Stop and Waste Cock



Nothing is so annoying as a stop and waste cock that DOES NOT STOP AND WASTE every time it is closed. In introducing this new line of compression stop and waste, we know it will do all that is required of it.

Just look at the accompanying sectional view. Full weight heavy designed, red brass and accurately fitted in every detail.

Needle valve on waste hole. This does away with the little brass tube or ordinary hole that has become more of a nuisance than anything.

Adjustable union fitted bonnet. This permits the waste valve being turned to any direction, no matter what position the stop cock is in.

Waste channel in bonnet is a good size and will not become easily blocked.

Ample sized stuffing box with knurled nut can be tightened easily with a pair of pliers.

Heavy rubber packing seat which prevents any leaking when the stop and waste cock is open.

This is a very important feature.

When writing us or ordering from your jobber, ask for the Empire IMPROVED Compression stop and waste cock.

EMPIRE MANUFACTURING CO., LIMITED

LONDON TORONTO

Everyone admits that the "Reliable" idea is correct

Anyone who is at all familiar with churns and the principles on which they work must admit that the old dash and stick principle produces the best quality of butter. It is this principle made mechanical which has been embodied in the Reliable Patent Dash Churn with such wonderful results. With a small fraction of the muscular effort needed to operate an old-fashioned dash churn the "Reliable" will, in half the time, produce as good butter without having made any muss.

Because the "Reliable" is simply an up-to-date dash churn, and because everyone who churns believes in the dash principle, agents find it comparatively easy to sell "Reliable."

If there is no "Reliable" Agent in your town, write us about it.

The Reliable Churn Company of Canada

T. W. FOSTER, Mgr. 141 King St. E. TORONTO

are appearing during

Bicycle Week

MAY 4 TO 11

in the best newspapers throughout Canada.

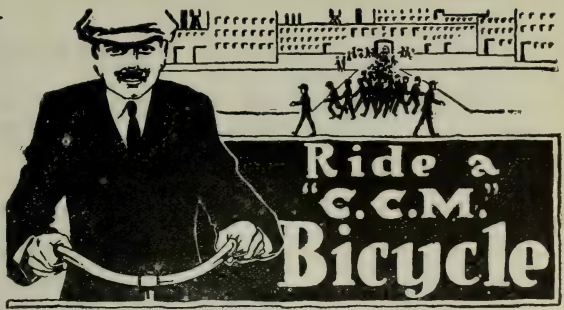
After them will come street car cards in the over-crowded cars all over the country, telling still more people about C.C.M. Bicycles.

These are only two of the many ways in which we send customers to C.C.M. dealers.

Best of all, **the Quality is put in the bicycle.** Every one sold helps to sell more.

Desirable C.C.M. agencies may still be had in many districts. Write for particulars.

Canada Cycle & Motor Co.
LIMITED



Make Your Pay Go Further

SAVES car fare and shoe leather. Costs nothing for upkeep. Gets you to work feeling fine. Lets you slip home for a hot dinner instead of a cold lunch.

Cycling is easy and pleasant when you ride a "C.C.M.," the Bicycle that runs smoothly and easily year after year.

Stephens' House Paint—For general painting inside and outside of the house. A smooth-flowing, wide-covering paint that protects as well as beautifies.

Stephens
REGISTERED TRADE MARK

Stephens' will do it

Whatever his customer wishes to paint the Stephen Paint Agent is able to offer a "specialty" paint peculiarly adapted to the work contemplated. And because that "specialty" paint does a better job than the customer thought possible he's made "strong" for Stephens and the Stephens' Agent.

Ask your customer what he wishes to paint. Then recommend the Stephens' Paint best suited for the job. He'll be satisfied.

G. F. STEPHENS & CO., Ltd.

PAINT AND VARNISH MAKERS

WINNIPEG, CAN.

Branch at Calgary, Alta.

Stephens' Wagon Paint—Saves the Farmer much money by preserving from decay wagons, implements, etc. Brilliant colors, good, heavy body, stands the weather.

Stephens' Elevator Paint—For use on Elevators, Barns and all outbuildings. Especially compounded to withstand effects of weather. Best covering for exposed surfaces.

If interested, tear out this page and keep with letters to be answered.

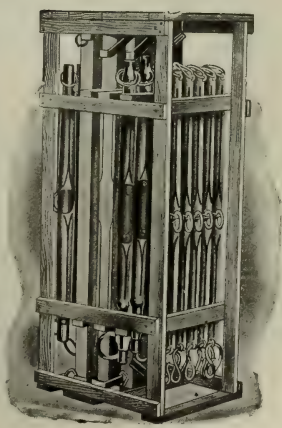
Protected by the Westwo Guarantee

Selling Westwo Painted Waggon, Implement and Plow Sets is satisfactory and profitable. They are made from selected No. 1 quality Oak and Hickory, are carefully painted (2 coats), striped and varnished, and are absolutely guaranteed against defects in material and workmanship. The best way to order Westwo Painted Sets is in crates of six sets. Then you're sure of getting them in perfect condition. —no bruised woods—no marred finish.



Guarantee

All Westwo Sets are guaranteed, and any defective part will be replaced free.

Send to-day for the Westwo folder that describes the various Westwo lines.

HOUSE CLEANING TIME

Brighten Up!!

Housewives are getting busy with Spring cleaning. A little Paint, Varnish, Stain or Enamel is required to make things look bright. Blinds need a coat of Paint, also the verandah, front steps and probably the house itself. The paint they are sure of is what they want.

SWP

The Paint of highest quality, with a beautiful gloss, that is permanent and durable.

ARE YOU READY TO MEET THIS DEMAND?

A great many merchants will think this over, but the good, live ones will see that their stock carries a good supply of SWP and Sherwin-Williams other lines.

Our Big National Magazine and Newspaper Campaign will start in a few days, increasing the demand for S-W Products. Be prepared to get this business and the profits by having a good assortment of S-W Paints and Varnishes.

CARTER'S

QUALITY
THE BEST

Your customers will need Red Lead to protect the iron work around their homes. The Painters want a Genuine Red Lead for their work. Are you prepared for this demand? If not, put in a good stock of

Carter's Genuine Dry Red Lead
and
Carter's Genuine Powdered Litharge

They are the best quality you can buy. Made in Canada from the best grade of Canadian Pig Lead.

Do you know the quality of these goods? Your customers know it and will insist on using Carter's Brands. Look over your requirements and order now.

Manufactured by

DOUGALL'S
Transparent Floor Varnish
It won't wear off.

As tough and elastic as it is smooth and brilliant, this perfect floor finish shows remarkable wearing qualities.

Regardless of the amount of traffic over its surface, it retains its beauty always, preserves the floor and brings out all the natural beauty of the wood.

All your customers who take pride in the beauty of their floors would be pleased to know of this finish.

Ask us to help you tell them.

ASHDOWN'S GUARANTEE

Out of the Fire

Plans have already been completed for the replacing of our Saskatoon warehouse, which was completely destroyed by fire on March 10th. We intend to turn this evil circumstance to good account and to equip ourselves to serve our Saskatchewan customers better than ever.

A New Warehouse
twice the size of the old one

will be erected without delay. It will be of mill construction and protected against fire by a modern sprinkler system. When completed we will be in a position to give the best service in the Province.

In the meantime temporary premises have been acquired, and we have now a reasonably well-assorted stock of hardware in Saskatoon. Any shortages will be promptly filled by our Winnipeg house.

NEW SAFETY STOVE PIPE

The lock that holds

No. 1—Costs same as ordinary pipe.
No. 2—Made in 6 and 7-inch sizes.
No. 3—Made of 29 gauge iron.
No. 4—Telescope pipe does away with half lengths.
No. 5—No wiring needed. Can't be pulled apart.
No. 6—Pipe is nested, saving freight rates and storage room in store.
No. 7—Eliminates all danger of pipe falling down; easy to put up; absolutely leak-proof; cannot come apart; locks automatically; good appearance.
No. 8—New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe.
No. 9—Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe.
No. 10—Patented in Canada and the United States, and "Made in Canada" by Fairgreave & Son, Toronto.

When you sell the new Safety Stove Pipe, same price as ordinary pipe, you are assured of repeat business because your customer receives the latest in stove pipe construction, the pipe with which no trouble will be experienced in joining the pipes or in keeping them in place after they are put up. The automatic lock on each joint is so easily operated that even a child can put the pipe together. The screw joint which connects and holds the pipe together makes a strong, solid connection which eliminates all danger of the pipe falling down, and which also eliminates necessity of using stove pipe wire, ceiling hooks and the consequent loss of time and annoyance which accompany the erection of pipes that need supports of various kinds.

Retailers, clerks and customers save time where this line is handled, and above all, the customer receives a product which satisfies him and agreeably surprises him to such an extent that he will pass the "tip" about the new stove pipe on to his neighbor. Write for prices.

"Delta" Files

—we'll help you sell them

TRADE MARK

DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

DUNLOP TIRES

SEAL OF QUALITY

AUTOMOBILE

Are You Seriously in the Tire-Selling Business?

Every tire dealer in every part of Canada will find food for thought in our next sentence:—

"No other rubber company in Canada can compare with Dunlop in length of auto tire manufacture or experience in co-operating with the dealer for successful tire-selling."

Our auto tire business alone to-day is greater than our total business in all lines two years ago. That surely indicates two things:—

That we have obtained a good measure of the new business, and **retained a goodly measure of the old.**

We need not point out to you that the automobile is now a mammoth industry; but it is important that you realize that the first automobile tires ever made in Canada were made by us. The auto tire to-day, with all its perfection, is the enlargement or outcome of our original patented bicycle tire.

Because we were successfully manufacturing bicycle tires and other rubber products when the automobile first came, we feel we have been in closer touch with every angle of the industry than any other tire-maker. All the more reason, we should think, why every dealer should know all about the Dunlop Line and the Dunlop Plans. Our men are competent to talk to you about tire-selling, and they'll be perfectly frank with you, too.

MICHELIN

No. 3

Michelin Tires Wear Longer Because They Contain More Rubber and Fabric

The durability of a tire depends primarily on two things: 1st, the **quality** of the rubber and fabric it contains, and, 2nd, the **quantity.**

Michelin's world-wide reputation for making only the best, and Michelin's unique experience as the world's oldest automobile tire maker are sufficient guarantees that only the best quality rubber and fabric are used in Michelin Tires.

As for the **quantity** of rubber and fabric, you can prove for yourself that Michelins contain more of these mileage-giving materials by weighing Michelin Tires in comparison with other makes.

You will find that Michelins weigh from 12 to 15 per cent. more than the average.

In 34 x 4 size, for example, nine popular non-skids weigh as follows:

Michelin	**26 lbs.**
Second Tire	**25 lbs.**
Third Tire	**22¼ lbs.**
Fourth Tire	**22 lbs.**
Fifth Tire	**21½ lbs.**
Sixth Tire	**21½ lbs.**
Seventh Tire	**21 lbs.**
Eighth Tire	**20 lbs.**
Ninth Tire	**18½ lbs.**

As is well known, the extra weight of Michelin Tires is not due to adulterants or useless wire in the beads. It is due to extra mileage-giving rubber and fabric.

If you want to sell a high quality and well-advertised tire that will give satisfaction to your customers, join the ranks of Michelin Dealers.

WRITE TO-DAY!

Automobile Jacks and Pumps

Badger Jack

Now is the time to equip your Car with a reliable Jack and Pump. Every Motorist knows the necessity of these important Accessories as part of his emergency equipment for town driving or touring.

Insist that your Dealer supply you with a BADGER JACK or MAYO TIRE PUMP. Guaranteed to give perfect satisfaction.

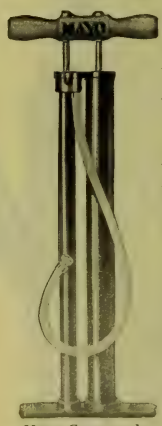
Badger Jr. Jack

"BADGER" JACK No. 5

is designed for heavy trucks. Drop forged pawls with steel reversing parts. The bearings are heavy, leverage great, makes lifting easy even when trucks are loaded to capacity. These Jacks are tested for strength and absolutely guaranteed.

"BADGER" JACK No. 3

is the most powerful and reliable one ton Jack made. No better workmanship or material can be put into such a handy and useful article. No complicated or loose fitting parts to get out of order. Short stroke makes lifting easy and rapid. Pawls automatically lock.



Mayo Compound

"Mayo" Auto Tire Pumps

We recommend this line of PUMPS to Motorists because they offer a greater degree of efficiency at a minimum cost. The saving of manual labor in the use of "MAYO" PUMPS will surprise you.

"MAYO" COMPOUND TIRE PUMPS

A well made, handsomely finished 2-cylinder Pump, ⅞ inch barrel, 16 3/16 inches long; 1½ inch barrel, 17 inches long, made from 20 gauge steel tubing which is threaded into the base with a long thread. Washers are all of high grade material and oil treated. Special nonresisting, leak-proof leather check valve will hold 150 pounds air pressure. Rubber tubing 20" long three ply cloth inserted. Pump finished in black enamel. Weight 3½ lbs.

"E-Z QUICK" TIRE PUMPS

—the name tells the whole story. EASY because it is a small diameter Pump, therefore the piston area is reduced resulting in very much less effort being required to pump a high air pressure, and pump quickly. Very simple in construction and light in weight. Length over all 25½ inches. It has a 22-inch barrel, enabling the operator to take a long full stroke. Each full stroke carries with it the complete capacity of the barrel which has been supplied with a maximum charge of air. Rubber tubing is three ply cloth inserted, 22 inches long, and equipped with a perfect threaded connection for standard tire valves.

Deliveries by Ford One-Ton Truck

THE commercial car is looked upon today as a necessity by progressive business firms who have hauling and delivering problems to consider.

Wholesale or retail merchants who must deliver quantities of merchandise have found the horse-drawn delivery to be too slow, expensive, and entirely inadequate.

The Ford truck, with a single driver, will do more work and cover more ground than two teams and two drivers, for it travels in half the time. This truck will reduce your hauling costs. It eliminates one driver's salary and the care which horses always require. It will make your delivery service more efficient. It will widen your area of distribution. It will be constantly ready for work—day or night. It will show a profit on your investment.

There has been a popular demand for a Ford truck as is shown by the many uses, for commercial purposes, to which our standard chassis has been put. Now, after most careful designing and exacting tests, we are able to offer the Ford One-Ton truck to meet this demand.

The Ford truck is supplied as a chassis only. This permits the purchaser to mount any one of the many body styles specially designed for the Ford truck, and already on the market, and he can select it to meet the individual needs of his business.

Price $750 f.o.b. Ford, Ont.

See any Ford Dealer in Canada, or write for a catalog

Ford Cars offer an ever growing market for Champion Spark Plugs

CHAMPION "X"
for Ford Cars.
Price 75c.

The following is quoted from the instruction book in each Ford car: *"There is nothing to be gained by experimenting with different makes of plugs. The make of plugs with which Ford engines are equipped when they leave the factory are best adapted to the requirements of our motor."*

It is estimated that there are in use in Canada approximately 70,000 Ford cars.

This means a possibilty of 300,000 Spark Plug replacements every year in Fords alone, to say nothing of the replacements in Overlands, Maxwells, Studebakers and other cars that are factory equipped with Champions.

Of the 205,000 motor registrations in 1917, the great majority were equipped with

Champion

Dependable Spark Plugs

Champions offer to auto supply dealers greater sales possibilities than any other accessory.

Champions are being backed up with such a comprehensive campaign of advertising that they are more than half sold when the user reaches your store.

Champions are guaranteed to give "Absolute Satisfaction to the user or free repair or replacement will be made."

Champions are the spark plugs for you to push, not only because they are easiest to sell but because they offer an excellent margin of profit and bring customers to your store who are possible buyers of other goods you sell.

Order now from your jobber a supply of Champion "X" plugs for Fords and an assortment of the complete line of Champion plugs—you will then get the full benefit of Champion advertising.

IVER JOHNSON

Safety Automatic **REVOLVER**

The Easiest Selling Revolver in the World

Forty-seven years ago the man who wanted a small firearm went to a hardware store and asked the clerk "to show him some revolvers."

The clerk explained at length the merits of each. Perhaps the customer did or did not buy an Iver Johnson. If he did, he secured a revolver that was well made of honest materials.

How buying habits have changed since Grant was in the White House!

To-day thousands think "Hammer the Hammer" when they think revolvers. Others think the name Iver Johnson. Others think of just SAFETY. Taking the public into our confidence has made the *safest* revolver in the world the *easiest selling* revolver in the world

Iver Johnson Revolvers shoot *hard* but sell *easily* - - remember that!

War-time conditions keep the sale of Iver Johnson's going over the top. If you have not a complete line of Iver Johnson Revolvers in Regular, "Perfect" Rubber or "Western" Walnut grip order from your jobber to-day.

HYSLOP AUTO-BIKE

A Popular Unconventional Model

To-day the bicycle is the most-talked-of thing in locomotive circles. The wave of bicycling enthusiasm that has been sweeping over the country is now carrying everything before it.

Thousands of people are waking up to the fact that the most **beneficial,** the most **convenient,** the most **economical,** the most **pleasurable** means of reaching any place quickly and safely is by using the bicycle.

The **BICYCLE WEEK** which is being inaugurated to-day (May 4th - 11th) will be international in character, and the publicity derived therefrom will doubtless result in winning tens of thousands of enthusiastic cyclists to the "two-wheeled" friend of man.

The wide-awake dealer will be alive to the opportunity now presented, and will make due preparation to supply the big demand for wheels.

The **HYSLOP BICYCLE** needs no introduction; it is one of the pioneers in Canada. For the past 29 years it has catered to the needs of all classes, and to-day the name of **HYSLOP** on a bicycle is a guarantee of **dependability.**

Seven different models equipped with the most modern improvements await your selection. Get into the habit of talking **"HYSLOP"** to your customers. The name sells the machine.

The hardware dealer will find our bicycle a splendid medium for increasing his business, and incidentally his profits.

"We Make and Temper Our Own Steel"

SIMONDS

"The Saw Makers."

Steel used in Simonds Crescent Ground Cross-Cut Saws is made from a special quality of steel manufactured in our crucible steel mill and tempered by our own secret process. This steel gives the teeth a toughness and hardness which enables them to hold their sharp, keen cutting edge under long and severe usage. Write for Booklet.

NUMBER 128 HECLA FURNACE, USED short time. Good as new. No. case. $75. D. G. Reid, Bothwell, Ont.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

WAREHOUSE AND FACTORY **HEATING** systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

Your Ad In This Paper

will get the attention of the busy men. They find here what they want, and they use it as a catalogue when they are in need. Will they see your ad?

NOTICE

TENDERS will be received by the undersigned for the hereinafter mentioned property, up till 12 o'clock noon, May the 10th, 1918.

Parcel No. One.—The hardware business formerly carried on by Wm. F. Mickus, Esq., insolvent, at Preston, Ontario. The stock is well assorted and the location is central.

Parcel No. Two.—The land and premises situate on the south side of King Street between Wellington and Argyle Streets, having a frontage on King Street of forty feet and a depth of one hundred and sixty-five feet, being the premises known as the Mickus Hardware Store. The store is of brick veneer, is central and an ideal business location.

The highest nor any tender not necessarily accepted.

Terms.—For the stock in trade, cash. For the real estate, terms to be agreed upon.

H. C. EDGAR, Esq.,
Assignee of the Wm. F. Mickus Estate.
Preston, Ont.

In the Hoyt Metal Co.'s plant a body of picked men, headed by the best metal mixer in Canada, work intelligently, enthusiastically, energetically, bent on turning out the best metals man can make. Under a perfect, smooth-working system entirely devoid of "red tape" they are giving manufacturing Canada the benefit of years of experience in the alloying of metals. They are putting a quality into Hoyt Metals that can be found in no other alloys.

Circulation of Hardware and Metal has been audited by the Audit Bureau of Circulations.

War conditions make accurate information very necessary

Canadian merchants are now troubled with new war-time conditions that require special attention.

(1) Turnovers are greater, but with less profit. (2) Clerks are scarcer, more costly and less efficient. (3) Overhead has increased out of proportion to profits.

To meet these conditions and maintain a normal percentage of profit, it is essential for the merchant to get his business figures promptly and accurately every day.

A National Cash Register will give you just the figures you most need to obtain complete control of your business.

With an N.C.R. System you can tell whether your turnovers and overhead are in proper proportion to your profits.

It will tell you whether you are getting all your profits—and enable you to know that the money is actually in the bank.

It will show which clerks are efficient, how many sales each is making, how much they amount to separately and together, and what kind of transactions they are. It will show which clerks are accurate, and which are making costly mistakes.

A National Cash Register will stop the guesswork and the losses

------For further information fill out this coupon and mail it to-day------

Don't Argue, Show Them!

No need of "sales-arguments" to convince a customer of the effectiveness of the Stack Gas Water Heater. The principle on which it operates is so simple that anyone can quickly grasp its efficiency on being shown the interior of the heater. The copper tubes rising almost perpendicular break the water up into small columns entirely surrounded by heat from the gas flame. Rapid circulation carries the water out of the heater without giving time for the deposit of sediment, thus preventing the tubes from being coated and losing their efficiency.

James Morrison Brass Mfg. Co., Ltd.

National No. 805 Sliding and Swinging Garage Door Set

Just a Push—and the Doors are Open

This is an exceptionally easy working Garage Door Set —a push and the doors are open; a pull and they are closed. There is absolutely no binding or friction.

When closed, doors fit snugly, swinging into the jamb against stops. Doors are perfectly weather-tight and as they open inwards snow and ice cannot interfere with opening and closing.

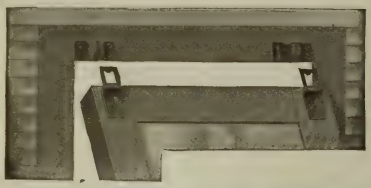
When open, doors fold and slide against wall, occupying a minimum of space in the garage. One door is so hung as to open independently, giving free access to garage at all times.

Set No. 805 includes No. 29 Latch, 1 Swivel Hanger, 6-foot Braced Rail, 4½ pair 4x4 Jap. No. 505 T.P. Butts, 1 No. 820 Chain Bolt, 1 No. 830 Foot Bolt, 1 No. 5 Pull, 1 4½ inch No. 30 Safety Hasp, all necessary bolts and screws.

NATIONAL MANUFACTURING COMPANY

STERLING, ILLINOIS

If interested, tear out this page and keep with letters to be answered.

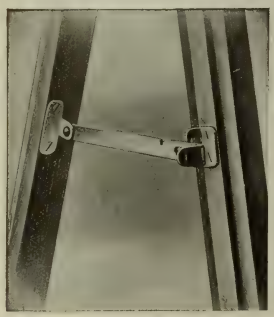


No. 1717. Applied to window, holds the sash secure and prevents rattling.

Every Home A Prospect

No other way of hanging screen or storm sash can compare with the Peerless method which permits hanging the sash easily and quickly from the inside of the building.

Every home owner you show and explain its special features to is a possible customer.



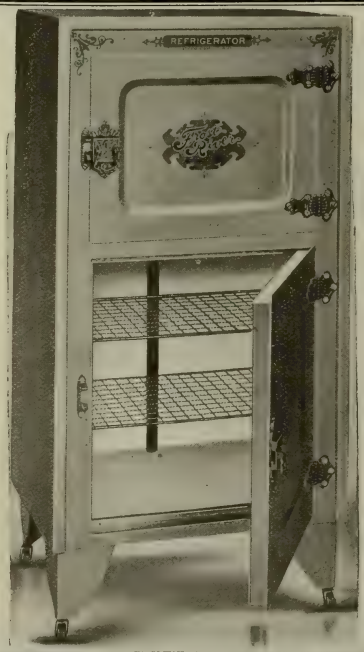
No. 1719. Applied to window, holds sash open, and when closed is self-locking.

For Peerless Window Hangers and Fasteners

They are easy to put up—no trouble to operate and generally satisfactory and economical. Made of wrought steel, japanned or galvanized, to prevent rust, and packed with screws.

Canada Steel Goods Co., Ltd.

HAMILTON, CANADA



Davidson's Well Known FROST RIVER

Refrigerator shown herewith

Made entirely of Sheet Steel Galvanized

The exterior is Japanned French Grey, beautifully finished with neatly decorated panels and corner scrolls.

The Food Chamber is coated with white enamel, thoroughly hardened and baked on in an oven of high temperature.

All inside parts are removable for cleaning purposes.

The drip pipe for the waste water has been carried outside the body, and does not run through the Food Chamber—as usual in other refrigerators.

Made in three sizes, the largest with double doors.

NOW is the time to get your Orders in for these goods and ensure prompt shipment.

"YANKEE" TOOLS

PUSH DRILL No. 44

Saves Time at Every Turn

Here you have a rapid fire drill, with adjustable tension for hard or soft woods and the 8 different size Drill Points furnished with it.

A turn of the cap does the trick that saves time, labor and Drill Points. This drill is about as valuable to the average mechanic as any "Yankee" Tool we make. Built for hard service.

Why You Should Be A Michelin Dealer

No. 4

You Can Show Your Customers Why Michelin Tires Wear Longer

It is easy enough to **claim** that a tire will give extra mileage, but the Michelin Universal possesses a unique advantage in that you can actually point to certain features of its construction, which, even to the novice, must prove its extra durability.

You need not stop at explaining Michelin's unequalled experience as the world's oldest tire maker, but you can go on to show your customers that Michelin Tires contain more rubber and fabric as is proved by their extra weight and by the extra thickness of their cross sections.

Michelin Dealers are provided with actual cross sections of the tire to show its remarkable tread-thickness. The 34 x 4 section, for instance, contains rubber and fabric practically a whole inch thick.

When a motorist buys a Michelin he does not wonder what he is getting. He *knows*. For the Michelin dealer can show him conclusively why Michelins are better.

WRITE TODAY FOR MICHELIN'S DEALER PROPOSITION

MICHELIN TIRE CO. OF CANADA, LTD.

The "Feel" of a Good File

Did you ever watch a really capable mechanic test a file? He has a way of passing a sensitive thumb over its teeth. Instinctively, unfailingly, he thereby determines whether it is fit for use.

This man always chooses *"Famous Five."* He never buys blindly. He can *"feel"* that a *"Famous Five"* is right. He can feel its sharp, keen-cutting teeth, arranged in rows of perfect uniformity. There is no doubt in his mind. He buys *"Famous Five."* He makes sure of satisfaction.

To get this trade and satisfy him specify *"Famous Five"* Files when ordering from your jobbers.

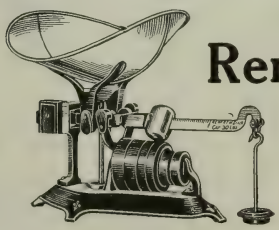
Kills The Losses

Why should housewives take all the risk in regard to honest mistakes in weighing? It certainly is easy to convince her she shouldn't, and that a Renfrew scale will save not only risk but many actual losses. That builds up sales for you.

An ordinary, doubtful scale would only add useless disputes. The Renfrew is accurate for every weight from ½ oz. to 30 lbs., and its owner can prove her weights every time by means of the Government Inspector's Certificate which goes with every Renfrew.

The Renfrew is made in black finish, or in all-nickel finish suitable for candy stores or homes desiring something a little bit better. Write for literature and attractive selling proposition.



The Renfrew Household Scale

Guaranteed to weigh accurately Capacity: ½ oz. to 30 lbs.

SHALER

5 Minute Vulcanizer

Mends Tubes in 5 Minutes

Complete (With 12 Patch-E-Heat Units) $2.00 in Canada

The Vulcanizer, 6 Patch and Heat Units of round shape for punctures and 6 of oblong shape for long cuts and tears are included in the outfit. Each unit is complete—ready to use. No gasoline, acid, cement or flame required.

The Patch and Heat unit is placed over the puncture—the vulcanizer clamped in position and a match applied. *In 5 minutes* you have a perfect, lasting, "feather-edge" repair.

The SHALER 5-Minute Vulcanizer sells itself. You only need to place the display case on your counter or in your window.

The 12 Patch and Heat Units that go with the outfit are soon used up—and the motorist comes back to you for more.

This repeat business pays you a good profit and brings motorists to your place regularly—who will also buy other goods!

Place Your Order With Your Jobber NOW!

Don't delay! The enormous demand for SHALER 5-Minute Vulcanizers has exceeded our factory capacity to make deliveries. We are building a large 3-story addition to our plant—but to make sure of prompt shipments—place your order with your jobber now—specifying date of shipment desired.

Catalog describing the complete line of SHALER Vulcanizers for Motorists and Tire Repair Shops—Sent FREE on request.

NEW SAFETY STOVE PIPE

The lock that holds

Did you read about the "New Safety Stove Pipe" in the full-page ad on page 88 of last week's issue of Hardware and Metal? Ten outstanding features were enumerated in connection with the new pipe. Ten features that will interest merchant, clerk and customer alike. If you read the ad you must have been impressed by the many decidedly new features in the stove pipe. If you did not read it, turn to your last week's issue—you can't afford to miss it. In the "New Safety Stove Pipe" you get the latest in stove pipe construction—at a cost no greater than on ordinary pipe.

Made of 29-gauge iron — no stove pipe wire needed — all danger of falling pipes eliminated—pipe is nested—patent lock saves one length in every twelve.

If Your Dry Cell Sales Can Stand An Increase—Write Me

W. M. Turnley, Manager
The Dominion Battery Company, Limited

THE most important part of my work is not selling RELIABLE Dry Cells to you but selling them for you. I help you to build a bigger, more profitable and permanent dry cell business.

If you want to know how—and as a progressive dealer you certainly do want to know—just write me.

RELIABLE Dry Cells make steady customers. There's more service crammed into RELIABLE Dry Cells than the customers expect to get. They satisfy. So when your customer wants a new dry cell he asks for RELIABLE.

You cut down losses and build up profits when you sell RELIABLE Dry Cells. Power doesn't leak out—cells won't go dead on your shelves.

Our selling policy eliminates undesirable competition. You buy RELIABLE Dry Cells from your jobber. They're never sold by mail order houses or from the factory.

Write us for trade discounts.

Becoming a Bigger Man

WHAT is the difference between some men you know and others known to you? Why are some men earning $3,000 a year and some $30,000? You can't put it down to heredity or better early opportunities, or even better education. What, then, is the explanation of the stagnation of some men and the elevation and progress of others?

We are reminded of a story. A railroad man, born in Canada, was revisiting his home town on the St. Lawrence River. He wandered up to a group of old-timers who sat in the sun basking in blissful idleness. "Charlie," said one of the old men, "they tell me you are getting $20,000 a year." "Something like that," said Charlie. "Well, all I've got to say, Charlie, is that you're not worth it."

A salary of $20,000 a year to these do-nothing men was incredible. Not one of the group had ever made as much as $2,000 a year, and each man in the company felt that he was a mighty good man.

Charlie had left the old home town when he was a lad. He had got into the mill of bigger things. He developed to be a good man, a better man, the best man for certain work. His specialized education, joined to his own energy and labor sent him up, up, up. To put it in another way: Charlie had always more to sell, and the world wanted his merchandise—brain, skill and ability. Having more to sell all the time, he got more pay all the time.

Charlie could have stayed in the old home town; could have stagnated like others; could have been content with common wages. In short, Charlie could have stayed with the common crowd at the foot of the ladder. But Charlie improved himself and pushed himself, and this type of man the Goddess of Fortune likes to take by the hand and lead onward and upward.

Almost any man can climb higher if he really wants to try. None but himself will hold him back. As a matter of fact, the world applauds and helps those who try to climb the ladder that reaches towards the stars.

The bank manager in an obscure branch in a village can get out of that bank surely and swiftly, if he makes it clear to his superiors that he is ready for larger service and a larger sphere. The humble retailer can burst the walls of his small store, just as Timothy Eaton did, if he gets the right idea and follows it. It is not a matter of brain or education so much as of purpose joined to energy and labor. The salesman or manager or bookkeeper or secretary can lift himself to a higher plane of service and rewards if he prepares himself diligently for larger work and pay. The small manufacturer, the company director, the broker—all can become enlarged in the nature of their enterprise and in the amount of their income,—by resolutely setting themselves about the task of growing to be bigger-minded men.

Specialized information is the great idea. This is what the world pays handsomely for. And to acquire specialized information is really a simple matter, calling for the purposeful and faithful use of time. This chiefly.

One does not have to stop his ordinary work, or go to a university, or to any school. One can acquire the specialized information in the margin of time which is his own—in the after-hours of business. Which means: If a man will read the right kind of books or publications, and make himself a serious student at home, in his hours—the evening hours or the early morning hours—he can climb to heights of position and pay that will dazzle the inert comrades of his youth or day's work.

IF business—BUSINESS—is your chosen field of work, we counsel you to read each week THE FINANCIAL POST. It will stimulate you mentally. It will challenge you to further studious effort. It will give you glimpses into the world of endeavor occupied by the captains of industry and finance. With the guidance of the POST, and with its wealth of specialized information, you, a purposeful man, aiming to go higher in life and pay, will find yourself becoming enlarged in knowledge and ambition, and will be acquiring the bases and facts of knowledge which become the rungs of the ladder you climb by.

It is the first step which costs. But this cost is trivial—a single dollar. We offer you the POST for four months for a dollar. Surely it is worth a dollar to discover how right we are in our argument. If you have the will to go higher in position and pay, sign the coupon below.

THE MACLEAN PUBLISHING COMPANY, LIMITED,
143-153 University Avenue, Toronto.

More Customers and Bigger Profits For You

How you can increase your number of customers by selling Polarine Oils

THE 200,000 automobiles in Canada this year will use more than 3,200,000 gallons of lubricating oil.

How much of this profitable business will be yours?

A portion of this big market is within your reach, and every new customer you secure for automobile oil is also a prospective customer for many other articles you sell in your regular hardware line.

The majority of these 200,000 automobile owners use Polarine Motor Oils. The best proof of their merits is in their increasing and widespread use. Several years' continuous advertising in newspapers throughout the Dominion and a large list of motor magazines and farm papers has created a constantly increasing demand for them.

Here then is your opportunity to make quick and generous profits in automobile oils as well as increasing your customers for your other hardware goods.

Polarine is made in two grades, Polarine and Polarine Heavy. There is also a Polarine Transmission Oil and a Polarine Transmission and Cup Grease. Polarine Motor Oils are sold in attractive lithographed sealed cans—half gallon, one gallon and four gallon sizes. Also sold in 12½ gallon steel kegs, barrels and half barrels.

Polarine Motor Oil means an efficient motor. An efficient motor means a satisfied customer.

A satisfied customer will come back for more oil as well as for other supplies.

We have a very attractive proposition to offer hardware dealers who will sell the Polarine line.

Send for our new Polarine booklet on Automobile Lubrication.

An O-Cedar Window--Now is the Time for it!

THE O-Cedar newspaper advertising has started. It is the biggest and best O-Cedar Polish Campaign ever launched. It means a big and profitable "O-Cedar selling season" for the dealers who handle O-Cedar Products.

O-Cedar Polish and the O-Cedar Polish Mop have distinctive merits. By our advertising we make these qualities known—we influence housekeepers in favor of O-Cedar; we impress on them right at housecleaning time the importance of these, our products.

You can get a big percentage of the O-Cedar Sales, by letting your customers know you are an O-Cedar Dealer.

An attractive window display of O-Cedar Polish Mops and O-Cedar Polish will pay you big dividends. We have a number of beautiful window cut-outs and signs, that are of great assistance in dressing your windows.

Let us send you a set of O-Cedar Helps. Ask your jobber's salesman about the Special Assortments of O-Cedar Products.

Elimination of Travelers Broached

Matter Brought Up in Dominion Parliament by Member for Dufferin—Thinks Much Man-Power Could be Saved—Wholesale Hardwareman Thinks Good Opportunity for Effecting Economy Along These Lines

IN a recent discussion in the Dominion House the commercial travelers came under discussion as affording a source of manpower for the country. John Best of Dufferin, in the course of some remarks on the needs of the farm, declared that commercial travelers could all be called off. He asserted that the Government should consult with the wholesalers and have this carried out. He was of opinion that the labor situation was serious. Men were required for the trenches but it would be a bad thing if people should die of starvation later on because the farm had been neglected. According to Mr. Best the commercial traveler's services could well be disposed of.

HARDWARE AND METAL sought the opinion of several prominent hardwaremen on the subject. The inquiry divulged the fact that there has been considerable thought given to the whole question of traveling salesmen on the part of many business houses. Albert E. Gilverson, president of Rice Lewis & Son, entered into a frank discussion of the matter. He was of the opinion that considerable economy could be effected along the line of curtailing traveling salesmen. It would not be necessary to work a hardship on a worthy lot of men who had given many years of service to their concern. With their own concern they could utilize the services of every one of their traveling salesmen to better advantage by keeping them within the precincts of their own premises. He was of the opinion that they could give their customers better service if the services of these men could be utilized at headquarters. Such action would mean a radical change of business methods, and it would have to be carried out in a Dominion-wide manner. It would not do for one section of the community to eliminate their salesmen while the other section continued the practice. Here is the opinion as expressed by Mr. Gilverson:

"If you ask me for my opinion of the present sales methods, it has seemed to me that there is an economic waste in the present system. From this city of Toronto alone there goes out a small army of traveling men every Monday morning. They travel in groups and represent such houses as Howland's, Kennedy's and Rice Lewis, all of whom are selling hardware. Many of these men from different firms will touch the same towns, and make practically the same calls as the other hardware salesmen. This is true of the millinery trade, the grocery trade, in fact almost every branch of trade that you can name. It has always seemed to me that if a better and saner plan could be evolved whereby this waste could be eliminated it would enable the merchant to get his goods at a lower price and would mean a saving to the consumer and perhaps larger profits for the wholesaler. In other words, if some of this waste can be eliminated it would be to the benefit of both the buyer and seller.

Advantages of Present System

"There can be no question but that the present system has its advantages. Trade can be promoted in the introduction of new lines. There is the element of convenience to the retailer in that the selection of goods is made easy for him, all of which the retailer recognizes as distinct advantages and services. These are features of value of the traveling salesman that must be recognized. It is a system that has met the requirements of trade in normal times. With abnormal times such as we are living in it would seem that some change in the ssytem might be justified. It is a debatable question, however, and one that would require earnest consideration before it were changed.

"In the present system there is a real service given to the retail buyer, who is saved any trouble in the selection and ordering of goods. It is largely a tradition, however, and it would appear that education along the proper lines would soon acquaint the retailer with different methods of ordering his goods. At the present time some such action would seem to be justified. If it were to work a hardship on a worthy body of men who have given good service in the interests of their firms it would not in my opinion be advisable to institute such a change. But in the instance of our own firm there would be no hardship, for we could utilize the services of every one of our traveling salesmen to good advantage on work and business promotion if they were never allowed to go out on the road. We could serve our customers infinitely better if we were able at the present time to have the services of these men at our head place of business.

What it Would Mean to Retailer

"Withdrawal of the traveling salesmen would start retailers to the consideration of other methods of getting their goods ordered. It would also mean a revolution on the part of the wholesale house. It would undoubtedly mean the more frequent mailing of stock lists, catalogues would have to be supplied more generously, bulletins would be necessitated, and in this the trade newspaper would form one of the most important links in the chain of publicity that the wholesaler would require. At the present time it is hard to get the maximum value out of the traveling salesmen. There is much loss of time in traveling and in making trips home over the week-end.

"If such a measure were passed it would undoubtedly mean a chaotic state at first. It would require the exercise of no little ingenuity on the part of business houses to adapt themselves to the new order. Any such measure would have to be universal. It would not do for it to apply to Ontario and not to Quebec, or vice versa. Before any such measure could be adopted it would be very necessary to thoroughly canvas the situation and get the opinion of those interested before steps were taken. As it seems at present there would be good grounds for working into an economy along these lines."

Success in Selling Electrical Fixtures

Alfred Goyette, Montreal, Has Contrived Unique Method of Displaying These Lines —Can Switch Light Into Any of Fixtures Exhibited—Uses Space to Best Advantage—Believes in Catching Eye of Customer

INTERIOR OF STORE OF A. GOYETTE, MONTREAL.

No. 1.—Suspended plank frame to which electric fixtures are attached gives fine effect to interior appearance of store and this is inexpensive and easily arranged.

No. 2.—Location of compact glass rack. This gives convenient access to salesman who may be alone in store and makes for promptness. Holds 8,000 to 10,000 feet.

No. 3.—Cutlery case with attractive display placed where customer can readily see and receive advantage of suggestion.

No. 4.—Paint, varnish, and kalsomine brushes kept here out of dust in partitioned drawers. Conveniently placed for salesmen.

No. 5.—Silent salesman well-placed for display of tools. This attracts eye of carpenter and other mechanics.

MANY merchants could sell a nice lot of electrical fixtures if they gave some thought and arrangement to this most attractive line of goods. They fit in well with a hardware stock too, and the mechanical mind of the hardware salesman should be attracted more or less to a class of goods that is so attractive and interesting.

Alfred Goyette of 124 Mount Royal Avenue, Montreal, has adopted a unique idea for displaying his splendid stock of fixtures and a glance at the accompanying photograph will give a good idea of the attractive arrangement secured.

How Fixtures Are Displayed

It will be observed that the various styles of fixtures are fastened to a suspended piece of timber. This is a plank —dressed on both sides and edges. The same is painted with a coat of dead black paint which is a good color to use for the purpose. Its width is five inches and the thickness two. Suspended from the ceiling by specially made hooks—it is ready for the fixtures and holes are bored in the plank for these wherever desired.

Every twelve feet a drop switch is provided and the lights having been previously wired and connected to operate when the switch is used, a prospective customer may be shown any desired light, whether it be a single drop, a two-arm unit or a large cluster or chandelier. There is no confusion, no waiting, no fuss, and the arrangement so afforded is one of the best possible in interesting prospects and closing sales.

Prices are in plain figures and Mr. Goyette attributes many of his sales to the reasonable prices he has decided upon asking.

How Sales Are Stimulated

As was natural HARDWARE AND METAL asked how this department of the business had been running and if it was a paying proposition. "In this part of the city more electricity is being used all the time," said Mr. Goyette, and a good demand exists and is developing. We keep a good display, and use the

windows also for showing these goods. We get good results in this way and the idea of having the fixtures connected up inside the store is a good one. And in case our customers desire the selected fixtures installed, we can do this for them."

Neatness Evident Here

Although a big stock of various lines is carried which generally entails much muss in the average basement or storeroom, there was a decided absence of any disorder or carelessness whatever. The same neat appearance evident in the store as shown in the photograph herewith produced is characteristic of every corner.

In the basement it was particularly noted that the oil cans, measures, funnels and the drip arrangements for these were such as to prevent loss and an accumulation of dirt and consequent danger from fire. The measures and funnels are cleaned twice a year in a solution of water and caustic soda, which costs about 15c to buy and remove the gums and oil. All scrap paper is carefully baled in one of the heavy baling machines now procurable.

Sixty-five Barrels Whiting Sold

Such a common every-day commodity as whiting is not often given much consideration by the hardware merchant. However, it is a big seller here and Mr. Goyette stated he would probably sell about 65 barrels of it per season.

This whiting is put up by the clerks in spare hours in 5, 10, 15 and 25-pound bags which are the quantities most asked for by the trade. It is used for freshening walls and general purposes around basements and in stables and cellars. Considerable is sold to regular gilders' trade.

Increasing Store's Light

The writer was impressed with the good lighting of the store on the occasion of this visit and on asking how this was attained, Mr. Goyette said that the painting of the ceiling had accomplished this. By using white paint he believed his store was 50 per cent. lighter than before. There are many merchants who might follow this plan profitably in increasing their light and improving the appearance of the store interior as well. Plenty of light is a big factor.

Fine Glass Rack—Storage

The store has two sections each 25 feet wide by 60 feet long. On the side shown in the photograph reproduced herewith, and to the rear of the store, a large glass rack or case has been constructed. And yet this rack occupies a space only 8 feet by 9 feet, but will hold from 8,000 to 10,000 feet of glass. It is 54 inches deep and will hold in some sections two full cases of glass, the depth of 54 inches permitting a large quantity to be carried at the back. In order to prevent wear and that the glass may be readily removed from its sections, the floor part of each compartment is made of hard maple. There is practically no wear on this and it keeps smooth and permits easy removal of the glass.

In order that paint and varnish brushes may be kept in good condition storage beneath a 30-foot counter has been arranged and suitable bins with partitions provided have been built.

Suitable arrangements for the display of tools has been made near the store entrance where a silent salesman contains a good arrangement of planes, pliers and kindred lines.

Mr. Goyette has provided his displays to "catch the eye of the customer" and thereby make sales increase. The business all around has shown steady growth.

Good Profit in Staple Electrical Lines

Common Articles, Such as Sockets, Attachment Plugs, Fuse Plugs, Receptacles, Offer Inducement by Reason of Margin for Merchant—Irons and Toasters Also Carry Good Profit—Sale Can be Facilitated Through Displays

MANY hardwaremen have already found to their satisfaction that there is a good profit to be made in handling a line of staple electrical goods, such as sockets, attachment plugs, two-way plugs, fuse plugs, irons and toasters. These are lines which are commonly referred to among the electrical trade as the "bread and butter" stuff of the trade. Other hardwaremen may not have had occasion to go into the matter to see what prospect there is in handling these lines. For instance, attachment plugs can be bought at 12¼c each when bought in lots of one hundred, or at 14¾c when bought in lots of less than one hundred plugs. The list price at which these plugs sell to the retail trade is 25c each. When they are bought in the larger quantities it will be seen the profit is slightly over 100 per cent. Fuse plugs are another of the lines on which a profit of 100 per cent. can be made. In quantities of less than 50 fuse plugs can be bought by the retail merchant at $6 per 100. In quantities of 50 to 199 the price is $5.50 per 100 and in quantities of 200 to 1,000 fuse plugs the price is $5 per hundred. These plugs sell to the consumer at 10c each or three for 25c. If these plugs can be handled in quantities to get the 5c rate, it will be evident that a profit of 100 per cent. can be obtained on this line.

Sockets carry a profit ranging from 43 per cent. to 100 per cent. according to the way they have been purchased. The usual price at which the standard key sockets is sold is 50c. Now these sockets can be bought at prices ranging from 25c to 35c each, according to the number taken on the order. Less than fifty sockets cost 35c each to the retail man, from 50 to 249 cost 30c each, from 250 to 999 the cost is 26c each and for 1,000 and over the cost is 25c each.

Do Not Stock Beyond Needs

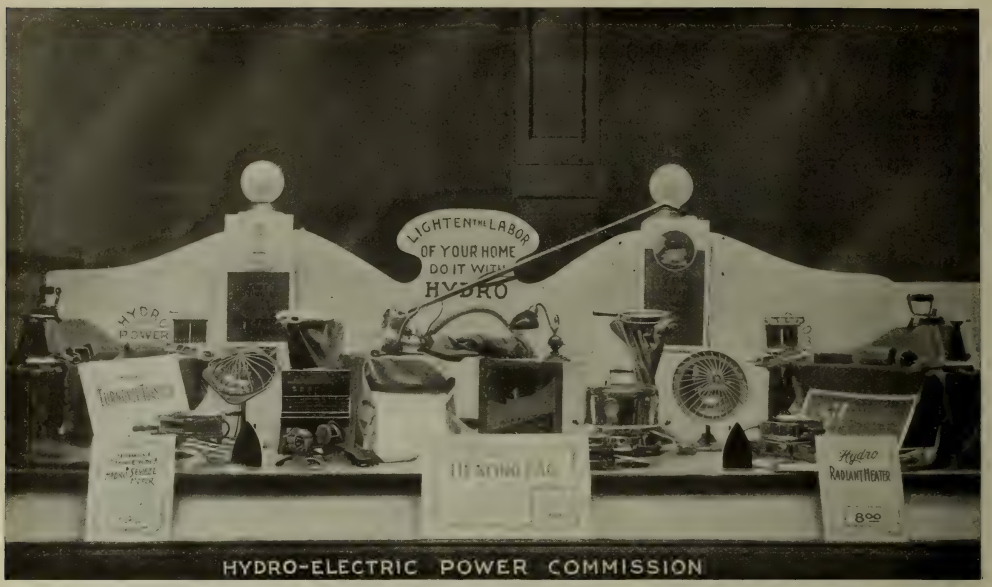
The above prices are not given with a view to inducing the hardware merchant to stock heavily in order to take advantage of the lower prices. It is good business to have money tied up in any particular line through stocking heavier than for normal requirements. They are given to show the advantage that can be secured if the lines can be turned over in fairly large quantities. And just here is a line of development that it would undoubtedly pay to give more attention to. It is not in the large items in which a big investment is often required that the most money is to be made. It is often in the smaller items where the biggest margin is to be secured. The best merchants are today finding out the lines in which there is the most profit and are confining their selling attention to them. For instance, one hardware firm finds there is a good profit to be secured in the sale of alarm clocks and he always makes a feature of these articles in his store display.

As indicated in the above lines of electrical goods it will be seen that it is possible to make a good profit and the initial investment need not necessarily be large. Another of the electrical lines which is gaining in popularity as a seller is the two-way plug. With these articles it is possible to attach a light and an iron or toaster cord to the one socket. In quantities of less than twenty the discount to the retail trade is 20 per cent., and in quantities of twenty and up the discount is 25 per cent. Just by way of illustration to indicate the advantage of buying in the various quantities the following prices on sockets will be found of interest:—

PRICES TO RETAIL TRADE ON SOCKETS

Quantities.	Key Sockets Per 100	Keyless Sockets Per 100	⅜ in. Key Socket Per 100	⅜ in. Keyless Per 100
1 to 49	$35.00	$34.50	$41.00	$40.50
50 to 249	30.00	29.50	36.00	35.50
250 to 999	26.00	25.50	32.00	31.50
1,000 and over	25.00	24.50	31.00	30.50

Above prices are net.



Fine Display of Electrical Goods of Hydro Electric System at Lindsay, Ont.

Profit on Irons and Toasters

Many hardwaremen already know the amount of profits to be secured in handling electric irons, toasters and heaters. They have sold many of them and know from first-hand experience. When the order amounts to $50 either on irons or toasters separately or on a combination purchase of the two articles the discount is 25 and 5 per cent. On purchases of $100 and up the discount is 25 and 10 per cent. Heaters carry a discount of 25 per cent. when ordered in quantities of 1 to 50 and 25 and 15 per cent. in quantities of 50 and over.

Bulbs is a line in which the margin is not quite as large as in some others. On bulbs of 15-watt, 25-watt and 40-watt the list price is 44c and on 60-watt, 60c each. In quantities of less than 100 the price to the retail trade is net. When standard package of 100 is ordered discount is 10 per cent. When order on lights amounts to $250 up to $500, the discount is 13 per cent.; on orders of $500 and over, 15 per cent.; on orders of $1,000 and over, 20 per cent.

Manufacturing Conditions All Right

The trouble connected with manufacturing light bulbs and other electrical lines experienced some months ago has now been overcome. Manufacturers have caught up on orders and raw materials have been obtainable in sufficient quantities to meet the needs of manufacturers. Manufacturing conditions are quite satisfactory on sockets, as well as on irons and toasters.

Advertising For Electrical Lines

There are various ways of advertising electrical lines in order to give them a good presentation before the public. One electrical man made a display in his windows of sockets and bulbs wherein it spelled the firm's name. This was in the days when there was no restriction on window lighting and electric signs for advertising purposes. It made a very attractive display and it helped sell the goods. Interior displays in silent salesmen are also a very effective way of selling toasters, irons, sockets, plugs and other lines. Advertising such a line as two-way plugs in the local paper will do much toward getting the people to anticipate their needs in this respect. Electric fixtures can be placed on display to very good advantage in the interior of the store and the current connected so that the light can be turned on various styles of fixtures.

Washing Machines Promising

The sale of electric washing machines is a promising trade if the merchant goes after the trade in an energetic manner. Of course, the best method of advertising is the actual demonstration of what the machine will do. This can be accomplished through placing a machine in the store window. Connect it up with the electric power and place some clothes therein for the machine to wash. It is only necessary to put one machine in stock as others can be sold from sample. The list price on one of the copper models is $120 and from this amount the dealer is allowed a discount of 20 per cent. It will be seen that the amount of profit on each individual sale is considerable.

It sometimes happens that the hardware merchant gets in a stock of two or three machines and leaves them in the rear of his store or in some other place where they are equally inconspicuous. He often wonders why his sale of this line is small. But he could hardly expect any other result because the machines never receive any attention so far as salesmanship is concerned. The machines are expected to sell themselves so far as any assistance from the merchant often goes. Such methods are indeed not good business methods and the hardwareman who may be following them would undoubtedly find that it would mean dollars in his cash till to make a window display or an interior display showing the actual working of the machine.

GOES TO THE NEW ERA SPRING CO.

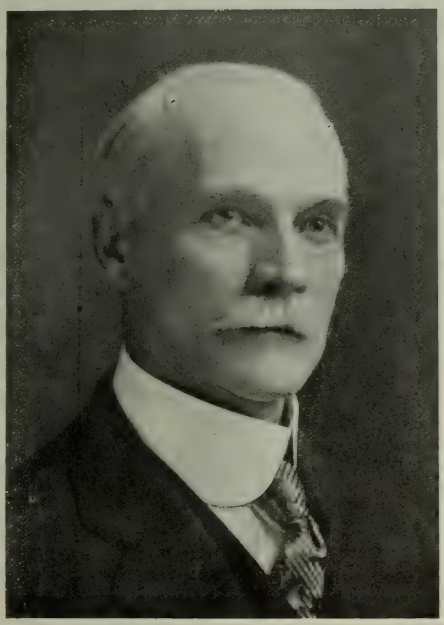
H. W. Badenhausen, who for the past year was general manager of the Warnola Manufacturing Co., in New York City until a fire completely destroyed them, has joined the New Era Spring & Specialty Co., Grand Rapids, Michigan, in a similar capacity and as treasurer of the company. Mr. Badenhausen was at one time Eastern representative for the New Era Company at New York.

Co-operation of Manufacturers Needed

President of Canadian Manufacturers' Association Asserts They Should Get Together to Reduce Overhead in Disposal of Goods and in Their Manufacture —Trade and Tariff Board Needed

"DISCUSSING trade conditions after the war, apart from their bearing on the matter of tariffs, is of little or no use. The two go together, and they cannot be separated. Trade cannot be developed apart from tariff regulations, and that might as well be faced at the very start."

That is the ground from which S. R. Parsons, President of the Canadian Manufacturers' Association, starts his reasoning when he discusses the big problem of Canada's trade, especially of the export sort, after the war. Mr. Parsons has the happy faculty of sticking to the point. He discussed the matter with a representative of HARDWARE AND METAL recently. No matter how far afield the talk ran, when it reverted to trade matters, Mr. Parsons would keep his Trade and Tariff point to the top like a sore thumb. Apparently he reckons that his Two T's make a good tandem, but are not worth spoiling pasture on if an attempt is made to keep them alone.



S. R. Parsons, Pres. Canadian Manufacturers' Association.

Reduce the Overhead

"If the Canadian manufacturers want to get in shape for the jolt that will come after the war, the time for that start to be made is right now. Don't let us make the fatal mistake of waiting until the acute situation is here. Although the war is our big problem at the present moment, the conditions following are so closely related to it that it's hard to separate them.

"The manufacturers of Canada," continued Mr. Parsons, "must realize that they will have to come together to reduce their overhead charges, not only in the ultimate disposal of the goods, but in the manufacture of them as well. We must come to the stage where we will to a large extent cease fighting each other, and turn that energy into fighting for trade. The best brains of the land should get together. I don't mean that we should of necessity go in and copy the German system because they were sinning against several very real economic laws in the pursuit of business. Sooner or later the inbation is bound to come out of such forced business, and then come depression and trouble."

HARDWARE AND METAL'S representative here referred to the organizations that were springing up in the Old Country to meet the efforts of Germany and Austria, the latter including the purchase of the Woolfe News Bureau by the Krupp interests. The Old Country expects competition from Japan and United States to be keen also.

"It is interesting to note what is being done in Britain," replied Mr. Parsons, "and to think that they are able, in spite of the tremendous war burdens, to plan for after-war trade, but conditions differ. Britain has five times our population, and her people are more centred in industrial pursuits than in this country. Then, too, it is much easier to control the transportation problem there.

Wants One Central Board

"We could make a very good start in Canada by having a Trade and Tariff Board. I would apply the dual name to the organization because we must realize in Canada that these two things travel together. Let's get that clear at the start. It's no use talking about trade unless we include the tariff side as well. We are living alongside a nation that, under its low tariff, has an average trade protection of 25 per cent. above ours. That is the actual condition we have to face. This Trade and Tariff Board need not be a large or cumbersome body. It should be part of the machinery of the Government, and from the Government we should receive a direct and straight lead. The board to which I refer would make a scientific study of the whole question from a national standpoint, and would include not only manufacturers of all kinds, but the agriculturists of the Dominion. I believe in giving every needed stimulus to farming, but I do not believe in doing it at the expense of other interests. A scientific study of the whole situation would lead to all having fair play.

Discouraging Trade

"But let's get back to the trade matter," continued Mr. Parsons, "and see how it can be discouraged as well as encouraged. Recently we were at Ottawa presenting the claims of the Canadian manufacturers and discussing a number of recent restrictions. The tractor situation took up our attention to a considerable degree. I can state the case of one Winnipeg man. He was prepared to start the manufacture of these machines in his city. There are 500 soldiers out of work in that city right now, and he figured that he would be able to provide employment for 200 of them. What happened? When the Government announced its policy of bringing in tractors free of duty without rebating the duty on the raw material brought into Canada for their manufacture here they simply quit. And I know of half a dozen other plants, most of them in Ontario, that are in the same position right now. What follows? Labor will not be employed, and when the munition plants are closed down the number of idle men will increase. When the jolt comes it will not be the men from the farms who will be walking the streets looking for work. They will still be enjoying an era of high prices for farm produce. To my mind it is not feasible to develop foreign trade in an atmosphere that discourages it at home."

About Standardization

Mr. Parsons is apparently convinced that, with other conditions being favorable, it is possible for Canadian manufacturers to work in groups to develop

(Continued on page 38)

Left Interior of Store of Dakin Bros., Digby, N.S., Showing Neat Arrangement of S[illegible].

Sets Personal Example in Using Paints

Dakin Bros., of Digby, N.S., Paint Own Store Before Urging Customers to Paint—Systematic Window Displays Increase Sales — A Paint Window Every Other Week for Eight Months—Big City Methods Succeed in Small Town.

"LOOK Out! This is Wet Paint!"

Such was the warning—verbal and printed—which greeted the HARDWARE AND METAL Editor as he entered the hardware store of Dakin Bros., Digby, N.S., one morning in March. And if any further evidence were needed of what was going on, it was supplied by the clean pungent smell of fresh paint, and the obviously bright appearance of the redecorated counters and shelving.

"This color combination is giving us 50 per cent. more light in the store," said Fritz Dakin, the proprietor. "Perhaps other subscribers to HARDWARE AND METAL will want to try the same colors—Crimson and Vienna Drab."

Mr. Dakin is a strong believer in practising what he preaches. He feels that he cannot conscientiously advise his customers to paint up their premises unless his own store property sets them a good example. So the redecoration of the store interior was really the first shot in Mr. Dakin's spring paint campaign.

"As soon as the weather is favorable," he explained, "we intend to repaint the store front and then put a big banner right across the front, bearing the legend "Clean Up and Paint Up."

"That banner goes up on our store front only every other year because we do not paint the store front oftener than every two years, and we feel that such a sign is out of place on a front that has not been painted.

"We have tried to get the Mayor and Town Council interested in the "Clean Up and Paint Up" idea to the extent of proclaiming the necessity of cleaning up the back yards. So far, however, we have failed to secure their co-operation, though we realize that it would be a big help to our campaign, because it would give a sort of official backing to our efforts.

"Paint is a big line with us," Mr. Dakin continued, "and this year we are pushing auto enamels and expect to do well with them, because there are 110 autos right in the town of Digby besides a large number in the surrounding country. The high prices of new cars and the limited number of them available for this year will give a big impetus to the sale of auto enamels.

"Lots of Ford owners who, under ordinary circumstances, would turn in their cars on more expensive ones, will this year be compelled to bring out the old 'flivver' and make it presentable for another season. When they find out that they can make a good job themselves, by applying auto enamels at a trifling cost, they are going to take advantage of this new line."

A great deal of Mr. Dakin's success in paint selling he attributes to his systematic window display campaign.

"For eight months in the year," said Mr. Dakin, "we put in a paint window every other week. We commence in April, and run these displays right through to the first of December. The manufacturers whose lines we carry give us strong co-operation, not only in window dressing material, but in store helps, newspaper and circular advertising, and in a number of other ways. For our own part, we have a lot of window stands which we have made up ourselves, and which we keep ready for instant use. Changing a window, therefore, is by no means a tedious and tiresome job with us.

"Our window displays are worked in conjunction with our newspaper advertising, and both are planned six months ahead. We always know in advance what lines

Right Interior of Store of Dakin Bros., Digby, N.S.

we are going to advertise, and what we are going to show in the window."

At this point HARDWARE AND METAL thought he would test Mr. Dakin's system of planning windows in advance—to see if it were merely a theoretical system or a genuine part of the everyday business.

"What are you going to display next week?" he asked.

"A maple sugar window," replied Mr. Dakin quickly, "with sap buckets, sap spouts, and the other requisites for sugaring off!"

So you see the system really works.

Paint is a big line at Dakin Bros., but it is not the only line by any means, and Fritz Dakin's energy and modern big city methods are shown in selling Christmas goods or slow selling left-overs just as much as in his paint campaigns.

Square in front of the door, facing every customer who entered, was a sign: "Make us an offer." Beneath it, a table was neatly arranged with a miscellaneous assortment of hardware articles. The HARDWARE AND METAL man was much interested in this, and said so.

Getting Rid of Left-Overs

Mr. Dakin explained: "That's our method of getting rid of left-overs. We tried a good many schemes for these slow sellers. First, it was Monday cash bargains, and we worked that scheme hard for three years, making special counter displays, and cutting prices to the bone on such lines as cereal cookers, scale beams and tire protection patches. Then we changed the day to Saturday. In three years I don't think we sold $25 worth of slow sellers by these methods."

"Last year we printed a small four-page booklet of slow sellers and made a special drive on them. They sold pretty well, and all we have left you will find on that table. We figure that there is enough sporting blood in most people to respond to such a challenge as "Make us an offer," and that is how it is working out. We put the regular retail price on each article, and also, in code, the lowest price we can accept. We find that most of the offers we are getting are well in advance of our minimum price."

"Do you conduct a cash or credit business?" asked HARDWARE AND METAL.

"Both," was the reply. "But the proportion of our cash and credit sales has been simply reversed, within the last few years. Formerly the credit sales were far greater than the cash sales, but the opposite is now the case. We attribute this showing to the fact that, for a couple of years past, we have been granting a cash discount of 5 per cent. on purchases over $1. It certainly pays, for it is cutting down our charge sales, and every retailer should aim at this result in these days of restricted credit terms on almost every class of goods we handle."

An Enthusiast on Advertising

Mr. Dakin is one of the best advertisers HARDWARE AND METAL has met in the retail trade. The readers of the Digby papers are not afflicted with refrigerator ads in December, or snow shovel announcements in April. They are treated to something new, in Dakin Bros.' advertisement every time the paper comes out.

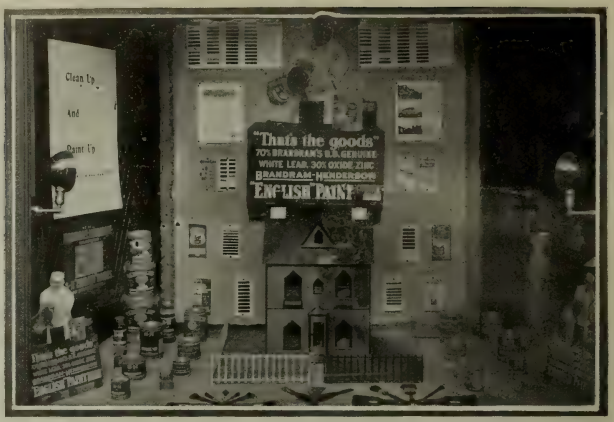
It has already been remarked that Dakin Bros.' newspaper advertising is planned six months in advance. Anybody can pick it out instantly, in the local paper, because there is the stock border, the peculiar "D" which is Dakin Bros.' trade mark, and the inevitable illustration which focuses the eyes on this space.

"HARDWARE AND METAL'S electro service has been very useful to us," said Mr. Dakin. "It is only a few days since we got in an additional twenty cuts. They are particularly useful at Christmas time, when we get out a special Christmas announcement, followed by a series of three Christmas advertisements, making specific suggestions for Christmas gifts. A special holly border design is used for this series."

Mr. Dakin has a scrap book in which he has kept all of his advertisements for the past ten or twelve years. It is most interesting to look through this book, and trace the evolution of his ideas on advertising.

He pointed to one with the heading: "Did the Mail Order House Ever Do This?" "I copied that ad. from HARDWARE AND METAL. I prefer not to mention competitors at all, in my advertisements, if for no other

A Hardwareman's Yacht, Owned by Fritz Dakin, Digby, U.S.



Practical Demonstration of Paint—Display by Dakin Bros., Digby, U.S. Part of France and House Left Unpainted.

reason than that they call the attention of the public to the fact that I have competitors."

A Scrap Book of Window Display

Another interesting scrap book is reserved for illustrations of window displays. They have been clipped from various trade papers, and among the early ones the HARDWARE AND METAL man recognized two mechanical windows, one showing a toboggan slide and the other a Dutch windmill and lighthouse which he had photographed in a Montreal hardware store twelve years ago.

"We have had a number of good mechanical windows," Mr. Dakin commented, "including Ferris wheels, revolving shelves, windmills, lighthouses and toboggan slides."

The cut accompanying this article illustrates some of Mr. Dakin's window dressing ideas. The background is removable, and Mr. Dakin has a large number of these panels fixed up for displays of various kinds. When not in use, they are stored in a dust-proof cabinet in the basement where they are free from any possible injury. These panels are for the most part made of wall board, painted to suit the class of display for which they are intended.

Notice the two reflector lamps, and their location at either side of the window. These have proven to perfectly illuminate every article in the window at a low consumption of current. Two alarm clocks are used in connection with the window lights—one to turn the lights on, and the other to turn them off.

Buy Small Quantities and Buy Them Often

A survey of Dakin Bros.' auto accessory department disclosed one of the cardinal principles of their business.

"With 110 motor cars in Digby alone," said Mr. Dakin, "we at first made the mistake of purchasing auto supplies in too large quantities, and in fact we had been making the same mistake in many lines. It is folly to believe that the merchant saves enough in reduced freight charges to make up for what he loses in carrying overly large stocks. Our delivery charges in 1916 when we bought in large quantities were 4.10 per cent. Last year, working under a policy of buying often and in small quantities we even reduced this to 3.199 per cent."

"This year our entire stock of inner tubes is not as heavy as our opening order was for one size alone. We carry a couple of tubes of each size, and, as St. John stocks are so handy to us, we find that we can keep our tubes well assorted without carrying a big stock such as we did at first."

In a town of 1,300 inhabitants where there are 110 motor cars, it is only natural that a live hardware store should carry auto accessories. Dakin Bros., however, have gone further than the average hardware store. They have a thoroughly modern storage battery service, including a charging outfit which also generates the power for lighting their store.

This department has been a big success, and has been kept very busy as a result of Mr. Dakin's aggressive advertising.

"We have a list of the auto owners in this part of the country, and we plan to send them about a dozen circulars in each of which we shall emphasize our battery charging Department. Formerly we only sent our four circulars in a season. We have been so well pleased with results from department. Formerly we only sent out four circulars in ing on putting in an outfit for oxy-acetylene welding."

This article does not begin to cover all the up-to-date ideas that were explained by Mr. Dakin in the course of HARDWARE AND METAL'S brief visit to his store. His simple, but extremely useful, system of accounting is worthy of a separate article in itself. However, enough has been said to show that big-city methods of merchandising can be adapted to the circumstances of a small town merchant, and can be made to pay.

CO-OPERATION OF MANUFACTURERS

(Continued from page 35)

foreign trade. "We want one strong committee to go into this work. A few live men around a table could do a lot to bring some real organization into existence. We want to avoid a multiplicity of committees and a cumbersome organization or an approach to the Irishman's horse that was all harness."

HARDWARE AND METAL here inquired if working in groups would involve standardization of farm implements or supplies, which might not be an agreeable proposition to the manufacturers.

"That's a big question," concluded Mr. Parsons, "and one in which there is room for a lot of discussion. I believe there are some shops which, from their location and equipment, can do certain work to much better advantage than others, and it would be well to make use of this fact. But I am in serious doubt as to the advisability of standardizing implements throughout. Don't you think it would lead to stagnation? The present system, defective as it is in some ways, but also capable of correction, is a constant stimulus to invention and improvement. Remove that and I am afraid we would soon drift into that poor state of letting well enough alone."

Mr. Parsons, in concluding, stated that he believed the first step in after-war trade would be the appointment of a Trade and Tariff Board, and he was certain this should be proceeded with at once.

Electric Development Growing Rapidly

Consensus of Canadian Press Opinion in Various Parts of Canada Shows a Feverish Interest in Question of Electric Light and Power—People Are Thinking in Terms of Electricity for Heating Purpose—Extensions Being Made Rapidly.

THAT there is more than a passing interest in electric development in various parts of Canada can be gleaned from a survey of the comments of the various newspapers from time to time. It is not a passive interest; it is a feverish interest. Failure of coal supply, the inconvenience and trouble connected with coal fires, the realization from utterances of leaders in electric development like Sir Adam Beck that heating of homes is now within reach—all these are factors that have turned the minds of the people to thinking in terms of electric light, heat and power. All of the following comments have been taken from newspapers of recent issue, and give a clear conception of the widespread interest that is manifest in the subject.

To Enlarge Quebec Plants

J. E. Aldred, president of the Shawinigan Water and Power Co., was in the city to-day, and had a consultation with Charles R. Hosmer, vice-president of the Laurentide Power Co. regarding installing extra apparatus at their plant at Grand Mere in order to provide additional power that is required for several industries that are locating on the St. Maurice River.

Mr. Aldred stated that there is a great movement from the United States in sight for the establishment, not only of those dependent upon the war, but permanent industries, where they know they can get such power as is required at a fixed and reasonable price."—Mail and Empire, Toronto.

Electric Energy For Smiths Falls

Within a fortnight or three weeks at the outside it is expected that Smiths Falls will be receiving electrical energy from the Rideau Power Company's plant at Merrickville. Men have been at work on the transmission line all winter and by the end of next week it is expected to have it all complete.—Rideau Record, Rideau.

Kingston Cuts Power Rates

The local Utilities Commission this afternoon adopted power rates of 2.5, 1.7, and .15 for power users, instead of the old rates of 3, 2 and 1 cents per K.W. hour, and expect an influx of big business to make up the deficiency in revenue.—Kingston dispatch to Mail and Empire, Toronto.

Rumors of Big Electric Project

There are great rumors in the air in town these days about an electric light and power proposition that will embrace Shelburne, Orangeville and other points. It isn't a water power idea, either, but a big producer gas project. The way rumor has it, it is a pretty good looking proposition, too. Put briefly, the idea of the company that is behind the deal would seem to be to secure the existing electric light plants in Orangeville, Shelburne, Grand Valley and possibly other places, build transmission lines between the different points, put in a big producer gas power plant at Orangeville, and transmit electricity for lighting and power. It would be a 24-hour, or night and day, service.—Shelburne Economist.

Pay When Power is Available

The secretary of the local hydro commission on Thursday last received from the Hydro-Electric Power Commission the communication for which the citizens have long been waiting—the one which revealed to them what they will have to pay for their lighting when hydro current is available.—Alliston Herald.

New Rate For Electricity

Addressing the Hydro-Electric Railway and Municipal Electric Association yesterday afternoon, Sir Adam Beck made the interesting announcement that in the near future a new rate would be given that would render it possible for the small householder to substitute electricity for gas.—Windsor Record.

Rate Cheaper Than Gas

"It is the purpose of the commission, after consultation with engineers and heads of municipal departments, to inaugurate a third rate for electric power for heating purposes in various municipalities. In the case of Toronto, you have a two-cent rate for a certain number of kilowatt hours, depending on the size of the house. You reduce that by half after a certain quantity. In the case of a small house, a consumer pays, say, 60 cents for thirty k.w. hours. Then the rate is one cent. But the third rate of half a cent will make it possible to heat your water much cheaper than gas at 60 cents a thousand cubic feet, not to speak of $1.20 per thousand."—Sir Adam Beck, reported in Toronto Telegram.

Electricity to Help Agriculture

The possibilities of electric power on the farm was the subject on which Engineer Purcell of the Hydro-Electric Commission spoke to an audience of interested listeners in the town hall on Thursday afternoon. "The electrical age," our present century has been styled, and after listening to Mr. Purcell one is convinced that the great agricultural industry of this country is in the years to come going to fully participate in the power advantages of the country. Power on the farm is no longer an experiment. It is a demonstrated utility, now being used in a number of instances giving both satisfaction and increased profits.—Grand Valley Star.

Power For Agincourt

Hydro-Electric officials notified the Scarboro' Township Council at its meeting yesterday that the Hydro would be turned on at Agincourt this month. The poles are nearly all planted, the wiring alone remaining to be done.—Globe, Toronto.

Rate Reduced For Heating

J. A. Ellis, chairman of the Ottawa Hydro-Electric Commission, stated today that as the result of last year's business the house lighting rates would be reduced probably about 6½ per cent. Mr. Ellis also stated that a new rate had been established which would mean that electric cooking would for the current consumed cost about half the present price of gas. He states that under the new rate electric heating would be equal to coal at $18 per ton, and for spring and fall use proper regulation would make it as cheap as coal.—London Free Press.

Electricity Popular in Regina

Since the introduction of cheap electricity for domestic consumption, the city reports a boom in the sale of electric ranges and water heaters. According to the officials cooking by electricity has come to stay in this city judging from the number of ranges which are now in use.—Regina Leader.

Ogdensburg Considering Contract

The water board is considering a proposition from the Ogdensburg Power & Light Company to enter into a 20-year agreement for the supply of Hydro-Electric power.—Recorder Times, Brockville.

Doubling Power Plant

The large addition to the power plant at Eugenia Falls is rapidly nearing completion and the building will be ready for the new dynamos within a few weeks. The addition is larger than the original building and is of very substantial construction and when completed and the new machinery installed the capacity of the plant will have at least doubled.—Kincardine Review.

Port Colborne May Adopt Hydro

It is probable that before many

months the people of Port Colborne will be called upon to vote on the proposition of becoming part of the Hydro-Electric system by buying out the present plant.—Port Colborne Citizen.

Ranges Popular in Orangeville

Since the coming of hydro a number of citizens have put in electric ranges and other electric appliances, thus reducing their consumption of fuel. Those who have experimented with electricity say they save money by its use. Hydro, which provides the "juice" at cost, makes it possible to use it in this way. —Orangeville Sun.

Power Project For Cobalt

Negotiations are under way with a view to going ahead once more with the power scheme at Hanging Falls in Gowganda. It is understood interests closely identified with the Reeves-Dobie have associated themselves with the enterprise.—Cobalt Nugget.

Power Going to Waste

When the Hon. Frank B. Carvell was in Montreal the other day, he said that enough water power was running to waste between Prescott and Montreal to turn every wheel in the city, and to heat practically every home. This is the view that is taken by most people: in fact it is probable that we have all looked forward to the time when all our heating as well as our motive power will be derived from electricity.—Montreal Herald.

Hydro Takes in Essex Company

The Hydro-Electric Power Commission of Ontario has welded another link in its chain, which now stretches from one end of the province to the other. Announcement was made by Sir Adam Beck yesterday that the Commission had concluded the purchase of the properties of the Essex County Light & Power Co. Until power can be made available the plant will be operated as in the past, by steam, a contract having been concluded with the Canadian Salt Company.—Globe, Toronto.

Havelock Wants Power

According to the estimated expenditures of the Hydro-Electric extensions in central Ontario $588,000 will be spent in new work. Part of this extension is supposed to be for a trunk line to Peterboro' from Healy Falls. If that is so, it is up to the town council to get busy again and put forward Havelock's claims for a supply of current for the village. Hastings and Norwood are reported to be in line for Hydro service and with a big pull together we should secure all the juice for power and light that we require.—Havelock Standard.

Moorefield and Drayton Get Light

After several months' building the line from Palmerston to Moorefield and Drayton, Hydro-Electric light was turned on last Friday evening, says the Drayton Advocate, and now the two places are flooded with light.—Mount Forest Confederate.

Electric Lines to Beeton

The Hydro-Electric construction gang finished the erection of poles to the substation in town on Monday, and moved to Bradford on Tuesday morning to begin operations on the Cookstown-Bradford branch of the line.—Beeton World.

One of Power House of Hydro-Electric System, Showing Type of Construction.

Norwood Anxious About Power

The estimates for Hydro-Electric extensions and improvements for the present year which were presented to the Legislature of Ontario last week contained an appropriation of $588,000 for the central Ontario division. This, it is presumed, includes a sum for construction of the power line from Healey Falls to Peterboro'. This being the case it would seem to be the opportune time for Norwood citizens to avail themselves of the opportunity of securing this public utility.—Norwood Register.

Power For Prince Edward

The announcement has been made that Prince Edward is to have a Hydro light and power line immediately. The Ontario Government have passed an order providing the necessary funds for the purpose and the Hydro Commission is authorized to proceed at once with construction.—Picton Gazette.

Extension of Port Arthur Lines

In the estimates of the Ontario Electric Commission for 1918, which total $9,000,000, appears the sum of $150,000 "for extensions to the Port Arthur system." Asked to-day for the significance of this appropriation, I. L. Matthews, chairman of the Port Arthur Utilities Commission, said he was entirely without official information, but gave it as his personal opinion that it was for preliminary work on the development of Nipigon.—Fort Francis Times.

To Ascertain New Brunswick's Potentialities

Great interest has been aroused by the announcement that the commission of conservation will make a survey of the water powers of New Brunswick during the coming summer. The province has several opportunities for the development of hydro-electric power on a large scale, and the increasing cost of coal makes their development imperative in the interests of the industrial life of the province.—Montreal Star.

Power at Alliston Soon

Hydro power is coming nearer to Alliston every day. Just now it is about three miles distant, the wires of the main transmission line having been strung as far as the Nottawasaga burg and on Monday the workmen on this portion of the construction moved into town and are now working out of here. The transmission and service lines in town are pretty well completed and are so far ahead that should the current be available any day now it could be transmitted through the town by means of the wires already strung and the old transmission plant. — Alliston Herald.

Uxbridge After Electric Power

Uxbridge is again talking Hydro-Electric in conjunction with Port Perry. The project is to tap the Wasdell system at Sunderland. Uxbridge should have been a partner in this venture five years ago, but turned it down for what was thought to be a cheaper proposition.—Beaverton Express.

New Plant at Stratford

There should not be any more trouble with power and lights in the city, as yesterday the power was transformed from the old to the new plant on York street and luckily there were no accidents. Power was shut off practically all day. Great praise is due the workers of the hydro system for the efficient way in which the change was made.—London Free Press.

BIG ORDER FOR CLEANING RODS

The Marble Arms & Manufacturing Company, of Gladstone, Mich., has received notice from the Government that a contract will be placed with them at an early date for fifty thousand cleaning rods for Government rifles, with the possibility of one hundred thousand more being required.

Manufactured Slate Shingles for Houses

Designed to Take the Place of Wooden Shingles for Better Class of Home—They Fill the Same Bill for Dwellings That Ready Roofing Does for Barns and Sheds —Profit to Dealer is Good—Trade Can be Developed

DEALERS in ready roofing perhaps have asked themselves the question whether or not the ready roofing is designed for use on dwellings. Manufacturers do not advocate the regular one, two or three-ply ready roofing for that purpose as a general thing. They prefer to let the ready roofing fill the needs for roofs on barns, sheds and similar classes of building. Their quest for suitable materials for the better class of dwelling has led to the development of the asphalt slate shingle. These shingles are made in three sizes, namely, the single shingle which is 12¾ inches by 8 inches, and the double shingle, which is 12¾ inches by 20 inches. Another shingle of narrower width is made in the double variety, size 10 inches by 20 inches. These shingles are usually laid four inches to the weather and in the double type require 180 of 20-inch shingles to cover 100 square feet. In single shingles the number required to cover 100 square feet is 424. These shingles are placed on the roof with nails and manufacturers assert that it requires 585 nails for nailing 100 square feet of the double shingle.

Cost of Slate Shingles

Dealers are naturally interested in the cost of any such commodities. Prices to dealer on single shingles in 12¾ inches by 8 inches in size range from $6 to $6.60 per square of 100 feet. Price on double shingles 12¾ inches by 20 inches is $7.20 per square, while cost of double shingle 10 by 20 inches is $6.15 per square. Manufacturers assert that the dealer can make $1 profit per square even when dealing with the contractor and when dealing with the consumer direct he is usually able to get $1.50 profit on a square of these shingles. The average house will take from 12 to 14 squares. It will be seen, therefore, that each sale that is made means considerable net profit.

Used on Better Class Building

These shingles are being used on the better class dwelling houses for instance that run in price from $10,000 to $12,000 in cost. They are being used on lower-priced dwellings of course, but the above figures are given as an indication of the type of dwelling that is being roofed with them in certain sections. These shingles have an asphalt felt base with a covering of finely crushed slate. They have the appearance of slate and come in the form of substantial looking slabs. In colors they are made in soft greens and red and are adapted to harmonize with any surroundings or architectural plan. One of the big advantages for this class of roofing is the practical indestructibility of the roof and the freedom from fire hazard. This is a time when thought should be taken of the morrow—a time when loss from fire should be reduced to the minimum. Statistics show that the loss by fire per capita in Canada is greater than in any other country, United States not excepted.

By reason of their indestructibility and elimination of fire hazard they are an economical roofing. Nothing is dear that gives good value for the money—no matter what the price may be. With a slate covering they make it impossible for sparks to obtain lodgment in a roof. It is a well known fact that most conflagrations spread from the roofs of buildings.

Every Builder a Prospect

When all the needs of the building trade in the shape of roofing is thus anticipated, namely, ready roofing for barns and sheds and shingles for the dwellings, the hardware dealer can be well supplied with lines that will enable him to get after the trade of his community in an energetic manner. His lines will be complete and his one big essential toward getting business is to get after it. "Hardwaremen are allowing much of this business to slip away from them because they are not going after it," said the manager of one of the Toronto wholesale firms. "Every building that is erected is a prospect for the hardwareman. The large firms have been making an energetic canvas for this business in many sections but the smaller dealer has been content to sit back and wait for the business to come to him. If the business is worth having it is worth going after. It is worth having as some of the larger concerns will testify in the amount they are selling."

Following Up Building Permits

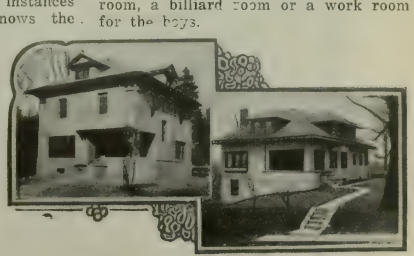
One of the best methods to keep in touch with prospects is to follow up the building permits and get in touch with the builders. In some of the smaller towns the record of permits issued is not usually published. But in these instances the hardwareman usually knows the builders and can keep in touch with prospective buyers by this means. Very often the hardwareman will be one of the first to be apprised of the fact that a building is contemplated. It often transpires that the prospective builder will make his first inquiries at his local hardware store in order to get a line on the cost of certain materials before he proceeds with engaging a builder. That is the time when some seed can be sown which may result in sales of roofing materials a little later.

Wallboard in Big Sale

There has been an extra good demand for wallboard during the present spring. Manufacturers have been busy and have orders for all they can fill in the immediate future. The reason for this is assigned to the fact that people are not going abroad to spend their vacation but will spend their vacation periods nearer home. They are building summer cottages on the inland lakes and this is causing a good demand for the materials. Furthermore, the manufacturers have been busy since the Halifax disaster in supplying rush orders to look after the temporary housing in the stricken city. In the early spring months manufacturers supplied large quantities for that purpose and as soon as that demand ceased the local demand started strong. A large use is being found for wallboard in camps, cottages and bungalows. In buildings of that description economy of construction is one of the big considerations. Ease of construction is also another consideration, the owner of the building often doing the work himself. One of the advantages in the wallboard lies in the elimination of the cost of papering.

A more extended use is being found for wallboard as an interior trimming for garages. Manufacturers claim for it that it is an insulation against both heat and cold, thereby making an interior warm in winter and cool in summer. Being slow burning it is not a dangerous material to have in a garage.

It very often happens that the attic of a home has been left unfinished and in consequence this space is not being utilized by the owner of the building. A suggestion in the form of an advertisement of some sort will very often start the householder thinking along this line and may be the means of unearthing a sale. By this method it can be pointed out that at small cost an old, dingy attic can be made into a sleeping room, a billiard room or a work room for the boys.



EDITORIAL COMMENT

"CLEAN Up and Paint Up" is a good slogan, but action is needed to get results. It is the duty of every hardware merchant to set the ball a-rolling in his community.

* * *

DON'T speculate, except in War Bonds, is a good slogan just now. "Buy what you feel reasonably sure you can sell, and pay for when due" is good advice. Incidentally, see that your debtors also "Pay up" when accounts are due.

* * *

COTTON has been bumping downward. At one time it reached 36c for spot, and now it is holding somewhat groggy around 26c per pound. Threat of the establishment of a 25c price took some of the proud primp out of the Old King.

* * *

SUPPLIES of anthracite coal from United States to points west of Winnipeg are to be cut off. The United States Fuel Administration asserts that conservation of coal in Canada must be practised to the utmost extent. Our Western mines will now have a free chance to capture the Western market.

* * *

NO SHIPMENTS of Banca tin have left Batavia for over two months. Henceforth the Dutch Government is to license shipment of tin from that source. Germany put the screws on Holland. Holland had to get even with somebody or something. It is not Dutch to "eat their heart alone."

* * *

A RECORD for shipbuilding was made in the Camden shipyards when the single screw collier Tuckahoe of 5,548 tons was launched 27 days after her keel was laid on the ways. In ten days from launching the constructing company promises to turn the new vessel over to the Government fully completed for service. An automobile a minute has been made possible by illustrious Henry. The ultimate goal for shipbuilding is a "ship every minute."

CANADA'S FUTURE IN EXPORTING

THAT Canada has a future as an exporting country cannot be doubted. One of the leading journals in the United States, the *Wall Street Journal,* in an editorial on May 6, expresses the following viewpoint in this connection:

"Whatever readjustments may follow in the years immediately after the war, Canada may be looked on as a distinct factor to be reckoned with in foreign trade, both inside and outside of the British Empire. It is not to be expected that the abrupt swinging round from an adverse or debit balance of $162,000,000 in 1914 to a credit balance of $624,000,000 in 1918 will give Canada's export trade a momentum of itself enabling her merchants and manufacturers to maintain an average excess of 40 per cent. of sales over imports.

"Exports to the United Kingdom rose from $215,000,000 for the year ended March 31, 1914, to $742,000,000 for the year 1917. For the year to March 31, 1918, these exports clip the $800,000,000 mark. Comparison of figures will show greater relative gains in percentages than perhaps in any other country.

"After every allowance has been made for war, for war prices and patriotic organization of industries, the bald fact remains that, with its small population and many handicaps to overcome, Canada in the past fiscal year fell only $21,000,000 short in dollar value of our own trade in 1914. Capacity to utilize every opportunity to the utmost has at least been shown and cannot be denied. This ability to make the most of the work of the day in foul weather as well as fair is a trade asset which may be stimulated by war, but cannot be stolen or impaired by peace. A people so enterprising and spirited may be relied on to do their utmost to hold the pace they set in securing a share of war trade. Will they do it?

"They will have a debt moderate and well within the financial grasp of any Canadian Parliament. They have shown the necessary will and capacity. They will have the wares to sell. A world half-starved and half in industrial paralysis will go to market for the food and raw material essential to life and recuperation. The things which Canada produces from land, water and forest are the necessaries which, at least in the first years in the after-period, will attract commerce, shipping and banking. He would be blind who could not read in the figures of trade a summary of Canada's position and opportunity in the era of commercial reconstruction which is to follow."

COMMERCIAL SALE OF STEEL BANNED

ONE of the radical changes in the iron and steel industry in the United States within recent days has been the regulation prohibiting steel supplies to non-essential industries. Some intimation of the way this will affect Canada could be gathered from the announcement made last week in these columns to the effect that heavy steel sheets were not to be sold to be held in warehouses in Canada.

There has been an embargo on the shipment of steel sheets of No. 10 gauge and heavier for several months past for all except Government work. Dealers perforce were required to bring these stocks forward under license. They had to be disposed of with the sanction of the Government.

The steel trade in the United States is adhering strictly to the new regulation. There is anticipation in certain trade quarters in the United States that the regulation is likely to last for only 60 days. Very much depends upon whether the requirements of the United States Government are satisfied at that time.

Although this will in all probability only be a temporary measure, still the effect will be to cause further delay in shipments of finished goods from that country into Canada. Indications seem to point to further restriction of supplies during 1918.

IN THE PIONEER STAGE

"PEOPLE are sorely tempted to think that pioneering in industry is a thing of the past. They are inclined to bemoan the fact that the romance and adventure, which seemed to be such an essential part of the early pioneering, have gone, never to return. However, they are coming to realize that, magnificent an epoch as the past material conquest has been, the country has entered upon a new conquest far greater than the first. The country is to be reconquered by the resources created by the new knowledge—the application of science to industry."

In these words Dr. Edward R. Weidlin, director of the Mellon Institute for Industrial Research at Pittsburgh, recently gave a glimpse into the "future that is to be." Already a beginning has been made along these lines in our own country. Some of our universities have placed their laboratories at the disposal of business men where they might take their problems and have them investigated.

We have just been nibbling at the edge of real scientific business development in the past. Science will undoubtedly come to the assistance of the retail merchant in the new days that are just ahead. It will help him solve some of the knotty problems that have caused many a good business ship to founder. Progress has been made, but much greater progress remains for the future.

Current Events in Photograph—No. 19

BEFORE THE FRONT LINE

This is a photo of an advanced British artillery observation post situated somewhere out in No Man's Land watching the effect of the fire of batteries miles in the rear. Here a man may surely look in the bright face of danger, and gaze in it alone. He and the birdmen are the eyes of the guns behind. If they fail in a measure at least the guns fail, and that means an added tragedy out there in front. Here you see the observation officer in his steel helmet watching through a new variety of periscope the effect of shell fire.

Discussion in Parliament re Cement Bag

Sir George Foster Made it Plain That Manufacturer Would be Allowed to Work Off All Existing Stocks of Bags—Said Idea Was to Get a Standard Weight For Cement Bag—Discussion in House

THE recent proposal by the Minister of Trade and Commerce to amend the Inspection and Sale Act by making the weight for a standard bag of cement 94 lbs. caused a lot of discussion. Sir George Foster stated there had been a widespread demand for the change from the present weight of 87½ pounds. The measure was introduced largely for the sake of having a recognized standard. As it stands at present there is no recognized standard weight, as custom was the only guide in establishing the weight at 87½ pounds, which was not a standard set by law. In view of the quantity of cement handled by hardware merchants, the discussion which took place on the matter is given in part:

On sections 360, 360A and 360B — Portland cement:—

Sir George Foster: We have had a good deal of correspondence with reference to these three questions in respect to Portland cement. Objections have been taken on several grounds and have been very carefully considered, and the opinions of experts, engineers and others, have been obtained by the department. As a result of all this, I purpose making certain amendments. Section 360 as it stands in the Bill reads:—

"Every bag of Portland cement sold or offered for sale in Canada shall contain ninety-four pounds net weight, and four such bags shall constitute a barrel."

I wish to substitute for that this section:—

"All Portland cement shall be sold by weight, and 94 pounds shall constitute a bag, and four such bags shall constitute a barrel."

That establishes that cement shall be sold by weight, and that the container shall contain 94 pounds. The bag, or something corresponding to the bag, is used as a container, and four of those bags constitute a barrel of 376 pounds. That this principle has, with few exceptions, been practically agreed to. These changes have been recommended by a committee of four of the Council of the Society of Civil Engineers—a cement manufacturer, a cement consumer and two engineers. As a result of their joint deliberations, I have the view of all the members of the committee, with the exception of one, and in accordance with that view, I have introduced this substitute clause. Objection is made that the present bag holds somewhere about 87½ pounds, and that if you now make a 94-pound standard weight, you cause a great deal of trouble and possibly a good deal of waste in connection with bags which are already ordered or which are on hand being used for putting up the cement at 87½ pounds to each bag. There is also a second objection, that other containers than bags are being used. Section 360A in the Bill reads:—

"Every bag in which Portland cement is filled and delivered shall be made of good strong fibrous material closely woven and in good repair when filled, and shall have plainly marked thereon the brand and name of the manufacturer and the net weight."

I think we can get over that difficulty, almost entirely, by substituting a section which I propose, as follows:—

"Every container in which Portland cement is offered for sale shall be made of suitable protective material, in good repair when filled, and shall have plainly marked thereon the brand and name of the manufacturer."

I understand that paper bags are being more and more used as a container for cement. It is also proposed that this Act shall not come into force until one year after it has received the signature of the Governor-General. That will be sufficient time to make any adjustments that are necessary in the way of bags. The present bag, which is running at 87½ pounds to the bag, is in most instances sufficiently large to hold 94 pounds. Only about 6 2-3 pounds would have to be added. That fact, coupled with the year's grace in the coming into operation of this legislation, will almost entirely avoid the waste of the bags.

Section 360B imposes a penalty. It is proposed to leave that penalty out for the present. Cement, I understand, is bagged by machinery, and it is very difficult, in bagging by machinery, to have the exact weight in each bag; there is sometimes more or sometimes less, so that what will be done by the Bill, if it passes as I propose, is to affirm the principle that cement shall be sold by weight; that the bag shall ultimately contain 94 pounds and that the barrel shall comprise four bags. This is in exact accordance with the conditions and the law in the United States. For a number of years the United States standard bag of cement has been 94 pounds, and the barrel four bags or 376 pounds. Taken altogether, that is about the best solution we can find for legislation with regard to cement. I, therefore, beg to move the amendments I have stated.

Mr. Morphy: My information is that the United States standard bag of cement holds 86½ pounds.

Sir George Foster: That statement, which was made to the department, was thoroughly investigated. I have the Act, and I have also the assurance, obtained by wire just the other day of the department at Washington, that that is the Act; that it is in force, and that there is no intention of putting it out of force.

Mr. Morphy: Is section 4 to be dropped from the Bill?

Sir George Foster: Yes.

Mr. Morphy: Then I understand it will be lawful for a man having eight or nine thousand sacks on hand to continue using them until they are worn out?

Sir George Foster: As long as they are usable.

Mr. Morphy: The question is one of sale by weight?

Sir George Foster: Yes. The manufacturer or dealer will find that, in a great many cases, he can easily get 94 pounds into the bag. If so, he comes up to the measure more quickly.

Mr. Thomas Foster: I wish to represent to the minister on behalf of a number of manufacturers that this legislation will mean a very heavy loss on account of thousands of sacks which they have on hand at present. The minister says that, by packing down the cement, you may possibly get 94 pounds into the bag.

I understand that it is not possible to get the quantity of the new standard in the sacks. The old standard was 86½, and the new standard is 94; you are changing from the less to the greater quantity. I do not know that there have been any strong representations, except perhaps from architects and builders, that the standard should be changed. Previously four sacks constituted a barrel but now you have to change the standard of your barrel to meet the difference in the sacks, and that will cause some difficulty until the machinery is set up to turn out the standard-sized barrels. This means considerable to the man manufacturing barrels and to the man manufacturing sacks. The large manufacturers in the West spoke to me about it, and I advised them to have a conference with the minister. Whether they have made representations to him I do not know, but they certainly appeared to have a grievance. It is immaterial to the architect or the builder whether the standard is 87 or 94 pounds, but it is of consequence to the producer who is turning out hundreds of thousands of barrels. We are not so very much concerned about the standard on the other side of the line, because the great majority of the cement we use is our own product, and we should therefore not be guided by the size of the standard sacks or barrels on the American side. I should like to know whether representations have been made to the Government as to the very great loss the manufacturers may sustain.

Sir George Foster: Perhaps my hon. friend did not catch exactly what I said. These representations were all made on the original clauses of the Bill, and the Bill then stood it might have been open to the objections my hon. friend has mentioned. But the Bill, after the amendments that I propose are made, meets every difficulty. They can go on using their 87½-pound sacks until their stock runs out. These sacks will wear out after a time, and then they can get the new 94-pound sacks. There is not the slightest tendency here to cause a loss either to the manufacturers or to the sellers on their present holding of sacks.

Mr. Morphy: The hon. minister has dropped the words "net weight."

Sir George Foster: The difficulty in putting in the net weight is that it is all done by mechanical packing, and it is impossible to have absolute uniformity in the weights. If you are packing the cement by hand in a bag and fill the bag to 94 pounds capacity, put the bag on a scale, and find that there is 94 pounds there, you can mark that weight on it, and you are sure of it. When cement is machine-bagged and bag after bag passes under the machine, sometimes a little less goes in and sometimes a little more; it is impossible to get a uniform weight. You might say: Go over every one of these bags, weigh each one, fill in the deficit of one, and take out the surplus of another so that each will contain 94 pounds, and then mark your net weight. That is mechanically and physically impossible; it cannot be done. But you have the name of the manufacturer on the bag, you have the standard of 94 pounds to a bag and, if it is not a 94-pound bag, you pay the fraction of the price, whatever it may be.

Mr. Morphy: The Minister will realize the position in which he is going to put the public. Cement is sold by the bag.

Sir George Foster: It is sold by the weight.

Mr. Morphy: A farmer comes in to get a bag of cement, and there are two kinds of bags. He does not know about the law making a bag of cement 94 pounds. Such a bag is sold at a certain price. A merchant, with a little quirk, or trick—and there are some of that kind—sells a bag of cement and the farmer thinks he is getting a 94-pound when he is only getting an 87½ pound bag. Is it not a fact that the weight has been stamped on cement bags in the United States at 87½ pounds, and have they not been found in this country? If that be so, where does the difficulty come in? If they have done it once, they can do it again. I think it greatly in the interest of the public that the weight should be put upon a bag of cement, the same as it is put upon a bag of flour. The sacks are stamped with the number of pounds they contain. It is quite true that it may put a little more work on the manufacturer, but supposing it does, the public are assured of proper weights. Will not the Minister look into this and ascertain if the weight is not stamped on the bags in the United States?

Sir George Foster: I do not think they are marked, but I am not certain about that. I will make enquiry, and let my hon. friend know before we pass the Bill.

Mr. Lemieux: Has the Minister consulted the manufacturers of cement on this question?

Sir George Foster: Yes.

Mr. Lemieux: Do they approve of this change?

Sir George Foster: Some of them do. The whole of the opposition offered by the manufacturers of cement has been based on the idea that they would be subjected to loss and particularly to loss in bags.

Mr. Morphy: I wish to bring to the attention of the Minister in a specific and undoubted way certain statements contained in a letter written to me by a gentleman who thoroughly understands the cement business. The first statement is as follows:—

"What is mystifying to those of us in the cement business is the underlying cause for what appears to us a perfectly foolish piece of legislation. Who stirred it up and what actuated it? Where was the demand that Sir George acceded to? It certainly did not come from the manufacturer. It surely could not have come from the consumer, because the 87½ lb. sack comes nearer filling in a rule of thumb way specifications for the use of cement than any other way could possibly do. Why is there to be a 94-lb. sack in Canada and a 87½-lb. sack all over the United States? Are contractors who take contracts here and in the United States to be faced with a different sack weight in making their mix?"

The writer speaks of the matter in other respects. He is a gentleman who is in the cement business in a large way, and his statements are very specific. I would like to ask the Minister where he gets his authority for the statement that the 87½-lb. sack is not the standardized sack in the United States, but that the 94-lb. sack is?

Sir George Foster: I got it from the circular of the Bureau of Standards, which, on inquiry,

was sent to me. I got it also in answer to a telegram sent to the Bureau of Standards, Department of Commerce, in Washington. The answer to that telegram was this:—

"Bureau of Standards, Department of Commerce, advise that the weight of bag and barrel of cement is indicated on page 10 of their circular No. 33, January 18th, 1917; re legal weights at present in United States."

With that was sent a copy of the Bureau of Standards and on page 10 there is the regulation No. 9:

"The cement shall be delivered in suitable bags, or barrels, with the brand and name of the manufacturer plainly marked thereon, unless shipped in bulk. A bag shall contain 94 pounds net. A barrel shall contain 376 pounds net."

There is no doubt at all that that is the legal standard in the United States, and has been for years.

Mr. Morphy: Will the Minister say that it is not the practice throughout the whole of the United States to use 87½ pounds bags?

Sir George Foster: I do not know how far that practice goes.

Mr. Morphy: I will tell the hon. Minister something more about the matter and have it put on Hansard for guidance.

Sir George Foster: If it is as stated by the hon. member it does not affect the principle of the standard being 94 pounds to the bag and 376 pounds to the barrel.

Mr. Morphy: The Minister will readily see the difficulty that will be created by a change in our law, if the cement manufacturers in the United States and in Canada are using an 87½ pound bag. As a matter of fact I understood the Minister to say that one reason for the introduction of the present Bill was to assimilate the standards?

Sir George Foster: Yes.

Mr. Morphy: But this legislation is going to change the practice apparently. If the Bill is merely for the purpose of fixing a standard which is not going to be used, I do not see very much necessity for such legislation. Now, to quote from another letter:—

"When you realize that the consumer has every mix regulated for a 87½ lb. sack and he tells a gang of Dagoes how many sacks to put in a mix, you can see what it will mean to allow for 6½ lb. extra in each sack, particularly if you remember that the 87½ lb. balances the cubic footage upon which all formulas are based better than any other weight, and again remember that the mixers of cement are frequently laborers who come from the United States and, for that matter, go from Canada to the United States, and are used to the 87½-lb. sack all over the continent."

Now, if that is so the Minister is hinging the merits of the Bill upon a practice that does not exist, and taking an academic standard from some Bureau of Standards in the United States which has not been followed by the practical workers in dealing with cement, so his justification for the Bill absolutely falls to the ground. I think, therefore, the Minister ought to consider the suggestion made here and hold the Bill until he finds a little further about the existing practice.

Sir George Foster: I will inquire what the practice is.

Mr. Casselman: Bags have been uniform before.

Sir George Foster: There is no standard with which to compare it.

Mr. Knox: Has the 87½ pound standard not been adopted because in mixing cement that is considered a cubic foot? I have always understood that quantity to be a cubic foot, and that is why it was put at 87½ pounds.

Sir George Foster: There must have been good reason why the Bureau of Standards, which is an institution in the United States which fixes all their standards of weights and measures, has adopted this standard. I do not know much about the mixing of cement, but I am informed that, in proportioning concrete, a bag of cement of 94 pounds net can, for all intents and purposes, be looked upon as a cubic foot. The usual mixture for concrete is one cubic foot of cement, two cubic feet of sand and four cubic feet of gravel.

Mr. Bureau: The Minister says: "For all intents and purposes," but my hon. friend (Mr. Knox) says that 87½ pounds is an actual cubic foot of cement.

Sir George Foster: But it is not.

Mr. Bureau: It is for all intents and purposes. It is not an actual cubic foot. It may answer the purpose of an actual cubic foot. My hon. friend (Mr. Knox) says that 87½ pounds is an actual cubic foot of cement. The Minister says that he wants to standardize this measurement. Who is going to be benefited by this legislation?

Mr. Cahil: The United States.

Mr. Bureau: I do not think it will benefit them all. What does the Customs Department do now? Supposing a bag of cement goes across the border, does the Customs Department charge for 87½ pounds or 94 pounds, to the bag, or is there any standard by the bag, or is the duty charged according to the actual weight?

Sir George Foster: The Customs Department, I suppose, imposes a tax upon the cement which is imported according to its weight.

Mr. Bureau: It will not make any difference whether our bag is 87½ or 94 pounds. If we are going to imitate the United States, we shall just continue a process that has been started. When our cement goes to the United States I suppose it is weighed. I understand from hon. members who have spoken to-night that $2,000,000 has been invested in bags that are marked "87½ pounds."

Sir George Foster: Not marked.

Mr. Bureau: That is the fate which I would like this Bill to have to-night. Let it explode and let us be done with it. If this Bill was to serve any purpose of the consumer, or even if it were to aid the manufacturer himself, we could feel that at least it was going to be of service to somebody. The Minister is asked: Why make the weight 94 pounds? He replies: To make a standard. Why not make the standard 87½ pounds?

Sir George Foster: There is some other business that we want to do to-night. I have listened carefully to everything that has been said and have made notes of the various suggestions. I still am of the opinion that we ought to have a standard weight; I think that would be in the interest of the consuming public. I do not see any force at all in the argument of my hon. friend from Three Rivers and St. Maurice (Mr. Bureau), whom I respect very highly, when he takes as his two premises that there would be a loss of $2,000,000 if this legislation went through, and, secondly, that there would be no gain to the consuming public, who have made no request for this legislation. Two premises like those do not heighten my respect for the conclusion he has drawn, because neither premise is correct. There will be no loss on the bags, and there has been a widespread demand for this change. The idea of having a standard for our products in this country is an absolutely sound one. That was the reason why this clause was inserted in the Bill. I now beg to move that the committee rise and report progress. I shall take into consideration the suggestions that have been made, and in a day or two shall come to the committee with my conclusions.

In the Good Old Springtime. Everybody Should Be At It Now.

Oil Products May Advance

Firm Situation Owing to Advance in Crude Oil of 25c Per Barrel—Gasoline Consumption Starting Heavy—Coal Oil and Lubricating Oils in Strong Market

THERE is a strong market for all petroleum products, including gasoline, coal oil and lubricating oils. The condition in this market has been occasioned through an advance in the crude oil of 25c per barrel which now makes the price of mid-continent oils $2.25. It was quite generally expected the advance in crude oil would amount to 50c per barrel but oil producers were evidently satisfied with an advance of 25c at the present time. "There is a heavy consumption of gasoline at the present time, with a shortage of crude oil for some sections," stated J. F. Shatford, manager eastern Ontario division of Imperial Oil, Limited, to a HARDWARE AND METAL representative. "We do not anticipate there will be any shortage of gasoline so far as our company is concerned during the coming summer. Transportation conditions have not been as good as could be desired, but we have anticipated the needs of the trade and have made provision therefor to the best of our ability. Crude oil in the Oklahoma field is selling at a premium of 50c to 60c per barrel over the quoted price of $2.25 per barrel, which gives some indication of the keenness with which oil men are bidding for the crude product. The situation is one of firmness for gasoline, lubricating oils and coal oil. As I see it at present the tendency in prices during the coming summer will be upward rather than downward. Coal oil has recently advanced in certain sections of the United States."

J. F. Shatford's first start in the oil business was at St. John, N.B. He entered the employ of the Standard Oil Company of New York in November, 1884, being then in his eighteenth year. He travelled for one year from St. John, N.B., covering the Maritime Provinces, when he resigned to go in business for himself, and a partnership was formed between himself and brother, S. S. Shatford, who is now manager of the Imperial Oil, Limited, at Halifax. They did business for some five years when their business was amalgamated with that of the Eastern Oil Company, of which H. A. Hutchins, of 26 Broadway, was president and later manager of the Imperial Oil Company, Limited. J. F. Stratford was appointed manager of the Imperial Oil Company, Ltd., Queen City division, effective first of October, 1914. Marketing of oils is sort of a second nature to Mr. Shatford after the long apprenticeship served in same, covering between thirty-three and thirty-four years. He has formed many friendly and extremely pleasant associations since coming to Ontario, and is glad to count friends in nearly every town of any size in the Province of Ontario.

There is only one thing in his opinion that Ontario lacks to make it the quintessence of perfection to live in, and that is "salt water." He still retains a very kindly feeling for his native province.

To Reduce Lines of Tin and Enamel Ware

In Conserving Materials Such Action Will be Taken — Essential Lines to be Retained and Non-Essentials Cut Out—United States Has Curtailed Manufacture

IN discussing the situation a few days ago as affecting "Wares" Edward Goodwill, manager of the Thos. Davidson Company, Ltd., of Montreal, HARDWARE AND METAL was informed that it has been decided to curtail the manufacture of enamelled ware and tinware to a certain extent. This decision has been made that material may be conserved.

"We are cutting down on the number of lines of tin and enamelled ware in view of the situation in raw materials," said Mr. Goodwill. "There are quite a number of styles and also sizes of manufactured lines that we can eliminate at present. Certain patterns can be done away with for the present at least and by confining ourselves to the essential lines material will be spared for use in the manufacture of goods that are required more urgently.

"In view of the decision across the line in the United States," continued Mr. Goodwill, "to curtail the output of enamelled ware it is quite probable that some such action will be taken here. The United States has been very fair with Canada and if she is conserving supplies we must be fair and show our willingness to do likewise."

"Will this cutting down be as large as in the States?" was asked. "It very probably will be about the same as there," was Mr. Goodwill's reply.

Booklet on Lamps

The Canadian Tungsten Lamp Company, Hamilton, has issued an attractive booklet of 24 pages descriptive of their various kinds of lamps. The pamphlet is well illustrated, giving the different types of lamps manufactured by this company. The opening pages of the booklet contain an historical sketch of tungsten and its uses. Some interesting material is also given on the application of nitrogen gas to incandescent lamps. The booklet is for distribution to the trade.

CATALOGUES and BOOKLETS

Catalogue of Surface Coils

McIntyre & Taylor, 501-3 Queen St. W., Toronto, have issued an eight-page booklet on M. & T. extended surface coils. Illustrations of the various patterns of coils are well printed and complete details are given in connection with their lines. Other lines embodied in this catalogue include asbestos stove lining, asbestos stove cement and stovepipe enamel.

Catalogue on Boilers and Radiators

The Pease Foundry Company, 118 King Street E., Toronto, has issued a new catalogue and price list, No. 85, containing much valuable information with respect to their warm-air furnaces, combination furnaces, registers, hot-water boilers, steam boilers, radiators, fittings, valves, etc. The catalogue is well printed on a high quality calendered paper and is of convenient size to carry in the pocket. It contains in all 154 pages with blue covered cloth-bound back.

Catalogue on Forges and Blowers

The Buffalo Forge Company, Buffalo, N.Y., has recently issued a very neat catalogue of their forges and blowers. The catalogue is well printed with cover of light gray paper stock, printed in artistic design. The catalogue is perforated at the back for the purpose of filing. There are 112 pages in the catalogue, which gives very complete information with respect to the various models manufactured. One of the lines featured is that of agricultural forges, in which the farming community would be interested.

FOLDER ON SCREEN DOOR HARDWARE

"Screen Door Hardware" is the name of a new eight-page folder illustrating a few of the best selling items of screen fixtures and trims made by the Watrous-Acme Mfg. Company of Des Moines, Iowa. The Stanley Works of New Britain, Conn., is the sales agent for all Watrous-Acme products and is the publisher and distributor of this new folder. The folder is designed for retailers to pass out to their customers. A liberal space is left at the bottom of the cover where the dealer's name and address may be prominently printed. All reference to the manufacturer is omitted until the last page.

These folders, imprinted, will be sent in reasonable quantities on request from any hardware dealer who is selling any of the following: Watrous-Acme Screen Door Catch No. 210, Screen Door Latch No. 129, Screen Door Spring Hinge Sets Nos. 1156, 1157, 1158 and 1159, Screen Door Brace Sets No. 27 and Porch Screen Couplings No. 16 and 17, all of which are illustrated and described in the folder.

WHOLESALE FIRM CEASES BUSINESS

One of the oldest business concerns in St. John will disappear on June 1, when I. & F. R. Burpee, wholesale iron and hardware will close their doors and the members of the firm will retire from business. The business was started under the name of I. & F. Burpee and afterwards became I. & E. R. Burpee, which name has been retained until the present. The present owners are John P. MacIntyre and G. W. Ketchum, who grew up with the business and eventually succeeded to the ownership. The property in which the business was conducted was owned by the estate of the late Isaac Burpee and was regarded as one of the most valuable properties in that part of the city, having a frontage of ninety-three feet on Dock street. The property has been sold to the New Brunswick Power Company, and the firm have decided, instead of seeking new quarters, to sell out their stock and retire from business. The name of I. & E. R. Burpee has been prominent in hardware circles for many years and the present members of the firm have taken a prominent place in the life of the city.

MOULDERS ASK FOR MORE PAY

Three hundred iron moulders went on strike in sixteen Toronto shops on Friday of last week to enforce their demand for higher pay. Their present rate of pay is $4.50 and their request was for $6. Moulders in the Hamilton district went on strike the following day for the same purpose, namely, to have their wages increased to $6 per day from $4.50. The employers are reported to have offered $4.95 per day but two large shops were already paying $5.50 per day and the men refused to entertain the offer. About 200 men are involved in Hamilton. Disturbances in the moulding trade may have a serious effect on the production of stoves if an agreement is not reached at an early date. Increase in wages would mean an increase in cost of producing stoves.

BICYCLE AND SPORTING GOODS SHOW

Montreal's first annual bicycle and sporting goods show opened at 2 o'clock on May 4 and will remain open until 10.30 p.m. Saturday, May 11. An orchestral concert is to be given twice daily at 2.15 and 8.15 and the entire proceeds from the sale of tickets will be given to local patriotic and charitable institutions. The Montreal School for Crippled Children have organized a very active campaign for the sale of these tickets and it is expected that their funds will be very largely increased through the show. Great interest is being taken by the many exhibitors and a large number of invitation tickets have been sent out to prospects and visitors. May 4 to 11 is being recognized all over Canada and the United States as Bicycle Week, but Montreal is the only city to celebrate this organized campaign by holding an exclusive exhibition of this sort.

FIRST CONCRETE SHIPYARD

The United States Shipping Board authorizes the following:

Under Government direction, the construction of the first concrete shipbuilding plant on the Atlantic coast—and the first yard in America devoted exclusively to concrete shipbuilding—got under way Wednesday. The site is at Wilmington, N.C., near that of the Carolina Shipbuilding Co.'s plant. The builders for the Government are the Liberty Shipbuilding Co.

SUBSTITUTES FOR TIN PLATE

In the summer of 1917, owing to the shortage of tin plate, steps were taken to find a substitute for packing army jam. After experiment a cardboard container was evolved for the purpose and manufacture was commenced on a small scale in August.

The use of the container was gradually extended to other supplies than jam and manufacture developed till, at the present time, there is an output of more than 3,000,000 containers weekly.

The bulk of these are of 2-pound size, but a proportion are of 1-pound and 5-pound sizes, the three sizes being used as substitutes for tinned packages.

A further great saving of tin plate is anticipated by the use of a large cardboard box, of specially prepared material, for packing biscuits and dried vegetables, an order for 200,000 of which has just been placed for experimental packing. The use of this box is expected to save at least 100 tons of steel for every 1,000 tons of biscuits packed.

TO EXCLUDE COMMERCIAL BUSINESS

The pledge of all the leading steel manufacturers of the country given at New York last week to the Director of Steel Purchases to operate on Government orders to the exclusion of commercial business is the most momentous development of the war as affecting the industry, says *The Iron Age* of May 2.

As with price fixing the action is in the form of an agreement, but back of it is a degree of pressure that has not appeared previously in any of the Government's dealing with the steel trade. The War Industries Board, having tolerated for some time opposing opinions on the question whether there has been a scarcity of plates and some other forms of steel needed by the Government, has now asked for an actual demonstration by the concentration of blast furnaces, steel works and rolling mills upon war work. To every member of the American Iron and Steel Institute a pledge form has been sent which is a promise to subordinate all commercial demands to Government requirements, and a practically unanimous response is expected.

The estimate of the War Industries Board that recent mill deliveries on Government orders have been at the rate of 33,000,000 tons a year, or close to 90 per cent. of production, includes as war work all railroad requirements and those for agricultural implement plants, mines, oil wells and every other essential operation. This broad construction makes the new policy less drastic than some sensational statements have indicated.

POWER FOR ST. LAWRENCE TOWNS

From correspondence between the Brockville Public Utilities Commission and the Ontario Hydro Electric Commission, it is intimated that before the summer is over Brockville will be receiving "juice" from the Cedar Rapids Transmission Company. The power will be generated for the towns along the St. Lawrence from Mille Roches, and Brockville will be the chief distributing centre.

OFFICERS OF THE BICYCLE AND MOTOR CYCLE DEALERS' ASSOCIATION.

Bottom Row reading left to right:—F. G. Holden secretary; Art Ross, President; J. McNiece, treasurer; H. Delanauze, director; I. Herschbain, director; E. Barsalou, director; T. C. Kirby, manager.

EVENTS IN THE TRADE

BUSINESS CHANGES

Carlyle, Sask.—R. F .Cornell, hardware, is out of business.

Lachine, Que.—La Quincaillerie Lalonde, hardware, has sold out.

Carnduff, Sask.—Partridge & Co., hardware, has been sold to Lloyd & Heller.

Kingsville, Ont.—Scratch & MacDonald, hardware, have sold to Kenneth Rae.

OBITUARY

Cookstown, Ont.—Thos. Gollop, hardware merchant, is dead.

FIRE LOSS

Three Rivers, Que.—Labelle, Cyrille & Co., des Trois Rivieres, wholesale and retail hardware, has suffered fire loss.

CORRECTION

The advertisement of the Canada Glue Co., Limited, in last week's issue of HARDWARE AND METAL was indexed as appearing on page 28. The advertisement appeared on page 91.

FIREWORKS ONLY IN BACKYARDS

The city of Toronto will not allow fireworks to be set off in the public streets this year. The chief of police announces that they may be set off in backyards but not on the thoroughfares.

KAMSACK'S AUTO BY-LAW

Owing to the large number of cars coming into town, says *The Kamsack Times*, a by-law has been passed by the council, that all cars shall keep to the right hand side of the road and, when turning, shall drive to either end of the town to do so. Also, when standing, cars must be placed on the west side of the street on an angle, to avoid accidents.

NEW MANAGER FOR GLASS FIRM

J. P. O'Shea & Co., plate glass and mirrors, Montreal, have secured the services of J. L. Taylor as their manager. Mr. Taylor was formerly with the Hobbs Manufacturing Co., first at London, Ontario, and for the past four years or more manager of the Montreal branch. His services with them extended over a period of sixteen years. On the eve of his departure from the Hobbs Company, Mr. Taylor's former associates and friends surprised him at his home in St. Lambert, where he was made the recipient of a gold watch, accompanied by the best wishes of his old staff.

LIEUT. NORMAN HENDERSON
Formerly of Henderson Bros., hardware merchants, Vanguard, Sask., news of whose death in France was recently received and mention of which was made in May 4 issue of Hardware and Metal.

BIG BICYCLE RUN

Bicycle enthusiasts in Toronto made an excellent showing on Sunday, May 5 on the occasion of a bicycle run to High Park. This run was instituted as a forerunner of Bicycle Week. There were some 725 bicyclists present. Many oldtimers were seen in the column which stretched for more than a mile along the streets. In the ladies' section there were eleven cyclists. Local bicycle clubs participated in the run in an enthusiastic manner, one club having no less than 125 members present. Moving pictures were taken of the parade. The run was held under the auspices of the Toronto Bicycle Dealers' Association. Bicycle Week in Toronto and in other parts of the Dominion was carried out with great success.

STANLEY WORKERS BOND BUYERS

The employees of the Stanley Works, New Britain, Conn., subscribed $163,000 to the third Liberty Loan, an average of about $57 worth of bonds for every man and woman in the company's employ. There were over 2,400 individual subscribers; 85 per cent. of the people of the Stanley Works' payroll bought one or more bonds of the third issue.

For the first Liberty Loan the employees of the Stanley Works subscribed $104,000 worth of bonds, and for the second loan $114,000 worth.

MONTREAL NEWS ITEMS

Hon. C. H. Ballantyne made announcement a few days ago at the Catholic Sailors' Club Jubilee that ships made under the Dominion merchant marine program of the Government would be turned out by Canadian shipbuilding plants and would be in operation by January 1, 1919. This will be welcome news to all in that a merchant marine of our own will be viewed with pride by Canadians and the transportation problems will likely be better and more promptly dealt with than otherwise would be possible.

R. S. Higgins, late sales manager for John Millen and Son, Ltd., has joined the new Tank Battalion recently in Montreal. Mr. Higgins has been connected with the motor accessory business, having been a partner in the firm of Higgins and Lee before going with John Millen and Son.

MUNITION PLANT DAMAGED

The plant of the Munitions and Metals Products Co., Ltd., located in Montreal East, was very seriously damaged to the extent of about $25,000 on Saturday last. The cause is not certain but is attributed to that of spontaneous combustion. In the early stages of the fire it was thought that the plant would be a total loss. The fire brigade arrived in time, however, to get the flames under control and to keep the loss within the above figure.

SECOND-HAND MOTORS TAXED

Advice received by H. R. Franklin, collector of Inland Revenue at Toronto, from Ottawa during the week, made it plain that second-hand passenger cars are to be included in the 10 per cent. tax on automobiles. The provision, however, does not apply to motor trucks

CHANGE IN NAME

The Boeckh Bros. Company, Ltd., has advised the trade that they have been granted supplementary letters patent changing the name of company to The Boeckh Company, Limited. The change in name involves no change whatever in the ownership or management of the business, which will be carried on as heretofore.

Saskatchewan Retailers to Meet May 14-16

Fine Program Has Been Prepared for Deliberations at Convention in Saskatoon—Many Important Matters Will be Considered

PLANS are rapidly maturing for the convention of the Saskatchewan branch of the Retail Merchants' Association of Canada to be held in Saskatoon from May 14 to 16. It is expected the convention will be one of the most important in the history of the association. It is expected Dr. W. C. Murray, president of the University of Saskatchewan, wil be one of the speakers. This is an illustration of the closer relations that are to-day springing up between merchandising and education. An interesting and attractive feature of the convention will be addresses by E. B. Moon, director of Community Development and Trade Betterment for the "Farmers' Review" of Chicago. He will address the convention on such subjects as "Business Barometers," ""Advertising Copy," and Jobbers' Co-operation with the Retailer."

The report of the convention will be covered fully in HARDWARE AND METAL. A representative is making a special trip to the West for this purpose in full expectation that many interesting and valuable matters will be discussed and acted upon. A programme of the convention appears in this issue.

Program of the Saskatchewan R. M. A. Convention

To be Held in Saskatoon on May 14, 15, 16

THE first draft of the program of the fifth annual convention of the Saskatchewan Branch of the Retail Merchants' Association gives promise of a very enjoyable and profitable session. E. B. Moon, one of the speakers, is not only an authority on the general principles of the problems he discusses but is a practical authority as well, as he is personally interested in a retail business. It is probable that Fletcher Sparling, general manager of the Hudson's Bay Company, Winnipeg, and H. W. Wood, president of the United Farmers of Alberta, will also be present and deliver addresses, though as this had not been definitely arranged, their names were not added to the program.

There are some matters of considerable importance to come up that makes it desirable that every merchant possible should arrange to be present at the convention. Where there are matters of sectional interest to be considered special conferences will be arranged where these matters may be discussed and dealt with.

The evenings of the second and third day have been left open for the delegates to employ as they may see fit.

The program as arranged is as follows:—

PROGRAM

Tuesday, May 14th

9.00 o'clock—Delegates and visitors will call at the Convention Hall for the purpose of registering and receiving their badges.

9.30 o'clock—Convention Hall—Opening session. Addresses of welcome by His Worship Mayor Young and Dr. W. C. Murray, president of University of Saskatchewan. President's address. Treasurer's report. Secretary's report. Appointing of committees. Announcements.

Tuesday Afternoon

1.30 o'clock—Convention Hall — Receiving resolutions and consideration of same.

4.30 o'clock—Question box and general discussion.

Tuesday Evening

8.00 o'clock—Convention Hall.
Song—selected, Arnold Smith.
Harmonies, Travellers' Quartette.
Address by E. B. Moon, director of the Department of Community Building and Trade Department of the Farmers' Review, Chicago.
Subject, "Business Barometers."
Discussion.
Character Song — selected, Charles Smith.

Wednesday Morning, May 15th

9.00 o'clock—Trade section meetings.

10.00 o'clock—Receiving resolutions and consideration of same.

11.00 o'clock—Question box and general discussion.

Wednesday Afternoon

1.30 o'clock—Convention Hall—Annual meeting of Retail Merchants' Mutual Fire Insurance Company.
Reading of minutes.
President's report, including financial statement.
Election of two directors.
Discussion on future policy of company.

3.30 o'clock—Address by E. B. Moon.
Subject, "Advertising Copy," "Mail Order Competition."
Discussion.

5.00 o'clock—Question box and general discussion.

Wednesday Evening

This evening is left open for the delegates to utilize as they wish. The Convention Hall will be available for Trade Section meetings if desired. Arrangements can be made for such meetings by getting in touch with the Secretary before 6 p.m.

Thursday Morning, May 16th

9.00 o'clock—Convention Hall — Receiving resolutions and consideration of same.

Thursday Afternoon

1.30 o'clock—Convention Hall.
Address by E. B. Moon.
Subject, "Jobbers' Co-operation With the Retailer."

3.00 o'clock—Election of officers.

4.00 o'clock—Discussion of policy for coming year.

5.00 o'clock—New business.

6.00 o'clock—Convention closes.

GOD SAVE THE KING

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

2. **Boot lace tags.**—A Yorkshire (Eng.) firm wishes to hear from Canadian manufacturers of boot lace tags, either with a view to representation or purchase outright. Samples and prices are desired.

3. **Glue.**—The representative of a number of manufacturers in Western Australia desires price lists, small samples and full particulars concerning Canadian glue on the basis of f.o.b. steamer, direct from New York to Freemantle or from St. John, N.B., transhipping at Melbourne.

5. **Wheelbarrows.**—A Bristol firm desires to import wheelbarrows for navvy and general purposes.

6. **Washers and churns.**—Canadian manufacturers of washers and churns are requested to communicate with a firm in Bristol.

7. **Horse buckets.**—A concern in Bristol is prepared to purchase horse buckets.

8. **Lawn mowers.**—A Bristol firm would be glad to get in touch with a Canadian exporter of lawn mowers.

9. **Tree and hand pruners.**—A Bristol firm will buy tree and hand pruners.

10. **Garden tools.**—A firm in Bristol wishes to import rakes, forks, hoes, and general garden tools.

11. **Hay and manure forks.**—Canadian exporters of hay and manure forks are asked to communicate with a Bristol firm.

12. **Hammers and hatchets** are wanted by a Bristol firm.

13. **Fly traps.**—A Bristol firm would be pleased to hear from a Canadian exporter of a good trap for catching flies.

14. **Mouse and rat traps.**—A Bristol firm desires to import mouse and rat traps.

15. **Mincers.**—A Bristol house wants to purchase mincing machines.

16. **Can openers.**—A Bristol concern wants to import can openers.

17. **Scales.**—Canadian manufacturers of a reliable household or kitchen scale or balance are asked to write a Bristol firm.

18. **Pokerettes.**—A Bristol firm desires to import pokerettes.

19. **Lanterns.**—A Bristol firm wishes to purchase lanterns.

20. **Bread and cake knives.**—Canadian exporters should write to a Bristol firm.

21. **Eggbeaters.**—A Bristol firm wishes to purchase eggbeaters.

22. **Clothespegs.** — Turning or spring clothespegs are wanted by a firm in Bristol.

23. **Corn brooms.**—Canadian manufacturers of these brooms are requested to write a firm in Bristol.

24. **Lemon squeezers.**—A firm in Bristol wishes to buy lemon squeezers.

PLEDGE BEING USED IN UNITED STATES PLANTS

April 26, 1918.

For myself, my corporation or my firm, I pledge the prompt production and delivery of the largest possible quantity of material in our departments that is or shall be required by the United States Government for the necessities of itself and its Allies, and agree that all other lines of our business shall be subordinated to this pledge, and all this in accordance with the request of the War Industries Board.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

New Silverware Display Case

The Oneida Community, Limited, Niagara Falls, Ont., have recently put out a new counter or window display case for their Par Plate silverware in attractive green leatherette. The case is capable of holding one and one-half dozen teaspoons, one dozen dessert forks, one butter knife, one-half dozen dessert spoons, one dozen dessert knives, one sugar shell. The case is designed as an effective selling counter display. It is claimed for it that it is a salesman and a stock clerk all in one. The case is furnished in four different patterns and is being distributed through the various wholesale houses. One of the most practical features is the method of showing prices for the goods in each compartment of the case. Prices are quoted on spoons, forks, knives, etc., each as well as in sets of six.

Oneida Counter or Window Display

NEW GLASS PRODUCT

The Canadian Laco-Philips Company, Montreal, Toronto, Winnipeg, Vancouver, is putting on the market a glass product under the trade name of "Laco-dalite." It is asserted "Laco-dalite" is simply glass chemically treated and made to fit standard sizes and shapes of all reflectors on the market. It is equipped with holders permitting it to be easily attached to such reflectors. The manufacturers are of the opinion the glass will be largely used for display purposes in department stores and for industrial lighting where color values or accurate measurements are required. It will be marketed through electrical jobbers.

Laco-Dalite Glass Product

NEW MODEL VULCANIZER

One of the features claimed for the 1918 model Shaler 5-Minute Vulcanizer is its ability to make both round and oblong patches—an exclusive feature. The one-piece patch and heat unit consists of solid fuel, vulcanizing plate and patch of raw rubber, the latter containing no fabric to prevent it from stretching with the tube. It is claimed there is a fresh clean vulcanizing surface for each repair. The rubber and fuel are protected against deterioration while in the dealer's stock or in the tool box of a car. Six each of the oblong and round patch units come with each outfit.

The Shaler 5-Minute Vulcanizer is substantially made of iron and is finished with a coat of rust-proof nickel.

C. A. Shaler Company, Maupun, Wis., the manufacturers, state they are making prompt deliveries and are prepared to supply dealers who carry the Shaler line with ample quantities of advertising matter.

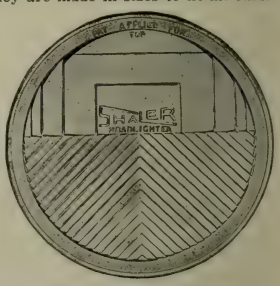
Shaler Vulcanizing Outfit

NEW ROADLIGHTER

Protection of the user against the blinding glare of headlights he meets is the idea which the manufacturers have sought to embody in the Shaler Roadlighter over headlights with clear glass or other fronts. It is claimed it enables the user to comply with laws, where they exist, by eliminating his own glare; it illuminates the full width of the road; it throws a more intense light far ahead than clear glass; it shows the road through fog, rain, or dust; and it lights up the road signs as they are passed.

Instead of considering the light from the lamps as a single beam which must be wholly diffused to eliminate glare, with the inevitable shortening of range, or which must be limited vertically to the legal heights, this device aims to divide the light into three distinct beams. These are distributed on the road so as to produce a long narrow, concentrated distance beam and two other concentrated beams that taken together give the effect of a pair of regular headlights plus two spotlights set to illuminate the foreground and edges of the road.

The trade mark of C. A. Shaler Co., Waupun, Wis., manufacturers of accessories, is carried by this new accessory. They are made in sizes to fit all cars.



The Shaler Roadlighter

ARTIFICIAL FISHING BAIT

The King Bait Company, 4312 Chicago Avenue, Minneapolis, Minn., has recently placed on the market a new artificial fishing bait known as the "King Wiggler," which it is claimed is suitable for either trolling or casting. It is made of brass 3¼ inches long, with a nickel-plated body and red head, and weighs about one ounce. It is asserted the "Wiggler" moves through the water with the tail motion of a live minnow, travels from 6 to 12 inches below the surface of the water at an average speed of reeling and floats when not in motion.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

RAPIDLY advancing markets feature the situation in turpentine during the week, prices going up from 8c to 10c per gallon, with prospects of even higher levels being reached. At primary points the market on this commodity shows increasing strength. Great difficulty in getting shipments through to Canadian points is being experienced, and supplies are within a very small compass.

A further advance in tin of 15c per pound features the metal markets. This, it is intimated, is the result of increased costs, due to advances in primary markets. Stocks are at a very low ebb, and no shipments from Great Britain are reported on the way. Solder has been influenced to higher levels by the increase in tin, and quotations are up about 4c per pound in some quarters, which has served to narrow the range. Stocks are none too heavy, and manufacturers are trying to equalize distribution as carefully as they can.

The outlook for all steel grows more uncertain. The action of the United States Government in taking over the entire output of the mills must result in supplies for commercial requirements reaching a low point. At the present, fair stocks of sheets are reported available, and a very firm undertone exists. Business, however, must be conducted on the basis of a constantly decreasing supply.

A very big advance in China bristles has been put into effect at primary points, and this has resulted in a very firm undertone for brushes. French and Russian bristles are not coming in, and under the exceptional heavy demand for war work in shipbuilding, railroad equipment, etc., there has been some question as to whether bristles available would take care of all requirements. Corn brooms are in a very firm market, and higher prices are not altogether unexpected.

The general tendency of the markets during the week has been upward. Fire-welded coil chain is quoted at higher levels, and other lines similarly affected include small bore rifles, shovel, spade and scoop handles, blow torches, fire pots, nut and chain wrenches, automatic hand drills, spiral screwdrivers, breast drills and alarm tills. An advance in some quarters of 1½c per pound on horse shoe nails has been made, and horse clippers have also gone to higher levels. Ready roofing is another line to make an advance, and asbestos sheathing is also up. Business in spring lines is reported excellent.

MONTREAL MARKETS

MONTREAL, May 9.—Prices during the week have held on a fairly normal basis though changes have been made which represent advances over former quotations. Horse nails are up 1½c per pound as shown by new prices just issued and further advances in solder have been made. The situation in sheets whereas not immediately serious presents a very uncertain outlook for future requirements. With the opening of navigation the movement of spring goods has been greatly accentuated and orders for garden tools, lawn mowers, hose, screen doors, windows and screen wire are going forward freely. Business generally is reported splendid.

Horse Shoe Nails Make Advance Of 1½c

Montreal.

HORSESHOE NAILS.—An advance of 1½c per pound is provided for in the new list established on Capewell horse nails. No change has been made in the prevailing discounts which are 10 per cent. in small quantities and 10 and 5 per cent. for full boxes. The question of further supplies will be very likely influenced to some extent by restrictions on steel output, but so far manufacturers have taken care of the trade throughout Canada very nicely. The new lists adopted appear in current market quotations.

Oil Stoves Moving; Enamelware Firm

Montreal.

STOVES, ENAMELWARE.—The demand for all lines of summer stoves, oil, gasoline, electric and gas continues very heavy and from retail points advices indicate that consuming demand is well under way. There is comparatively little moving in stoves and ranges, and the future must remain uncertain for some little time until the matter of supplies is more decided. Indications are that heaters will advance, and already stove pipe has undergone revision upward, though new prices are not yet available. Enamelware is holding very firm and a good demand continues to be manifest.

Heavy Demand For Gasoline and Oil Prevails

Montreal.

GASOLINE, OILS.—A very heavy demand exists for gasoline and oil. Consumption in gasoline is being influenced by the greater number of cars in use and coal oil is being used to a larger extent as fuel which serves to keep up interest in this line. Quotations have remained unchanged, gasoline selling at 34c. Electroline and Palacine coal oil at 22c, and Royalite coal oil at 19c gallon.

Twines Firm; Rope In Unchanged Market

Montreal.

TWINE, CORDAGE.—A very firm situation exists in all lines of twines. Hemp twines are none too plentiful and it is indicated that higher prices on jute would not be altogether unexpected.

Binder twine is steady and some movement to dealers is in progress. Rope is firm and unchanged with a small demand existing. Prices hold at 27½c base for sisal, 33c base for British manila, and 39c base per pound for pure manila.

Wire Nails Steady; Wire Unchanged

Montreal.

NAILS, WIRE.—No change in the position of nails and wire has been made during the week. Prices are firm and the demand, while fair, does not represent a big volume of trade. Wire nails continue to be quoted $5.25 base, cut nails at $5.60 base per 100 pounds, and smooth steel wire is steady at $6.25 base per 100 pounds.

Active Demand Continues For Machine Tools

Montreal.

MACHINE TOOLS.—The activity in the demand for machine tools has shown an increase owing to the placing of additional orders for American shells. Dealers report that inquiries for medium heavy shell equipment during the past week have been above the average. General service tools are in fair demand, and the requirements for small supplies are still of considerable volume; transportation has been improved, but definite delivery is not yet a pronounced factor, and manufacturers are still handicapped from shortage of certain supplies.

Some Movement In Iron And Steel

Montreal.

IRON AND STEEL.—The opening of navigation has resulted in a fair movement of iron and steel to points served by water routes. The movement has not reached the point where it might be termed heavy, but is more in line with supplies which are none too plentiful. Prices are unchanged as follows:

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Sheets And Plates Becoming More Difficult

Montreal.

SHEETS, PLATES.—The situation in sheets and plates is becoming increasingly difficult. The action of the United States Government in taking over the output of the mills for the next sixty days is bound to affect supplies for commercial use and stocks on hand locally must necessarily become depleted. In some quarters a slightly easier tendency in black sheets is reported, though quotations nominally hold as follows:

BLACK SHEETS—		100 lbs.
10 gauge	$8 75	$9 00
12 gauge	8 85	9 65
14 gauge	8 80	9 00
16 gauge	9 00	9 15
18-20 gauge	9 25	9 25
22-24 gauge	9 40	9 60
26 gauge	9 45	9 75
28 gauge	....	9 90
10¾ oz. (28 English)	10 55	10 75

GALVANIZED SHEETS—	
10¾ oz.	$10 00
28 ga.	9 65
26 ga.	9 25
22 and 24 ga.	9 05
20 ga.	8 85
18 ga.	8 85
16 ga.	8 70

No Developments In Old Materials Yet

Montreal.

OLD MATERIALS.—Nothing of importance has developed in the market on old materials and business in general has been quiet. Dealers report that sales have been light, and consumers are apparently buying only what they require for immediate needs. The better conditions that have recently been granted to dealers in American markets has created renewed interest over there, but so far this tendency has not been shown in the Canadian situation. Business is normal in heavy melting steel scrap, and brass scraps are in good demand, but the general market is quiet. Quotations are unchanged and firm.

Tea lead	$ 0 05	$0 06½
Heavy lead pipe	0 06¼	0 06½
Yellow brass	0 13½	0 14
Red brass	0 22½	....
Light brass	0 08	....
Scrap zinc	0 05½	0 06
Heavy copper	0 22	0 23
Wrought iron, No.1, per gr. ton	27 00	....
No. 1 machinery cast	36 00	38 00
Heavy melting steel	20 00	21 00
Pipe scrap	18 00	20 00
Stove plate, per ton	....	22 00
Old rubbers, boots and shoes	....	0 08½
Overshoes, lumbermen's rubbers boots	0 07	....
Bicycle tires	0 04¼	....
Auto tires	0 04½	0 05½
No. 2 busheling	13 00	14 00

SITUATION IN STEEL ACUTE

Canadian conditions in the steel activity, particularly in connection with the consumption, are becoming more and more acute owing to the conditions that prevail in the industry across the line. The difficulty of obtaining steel from points in the States increases as the demand of the American Government for urgent war requirements continues to grow; the needs at the present time are so abnormal that little material is now available for commercial purposes. This condition is naturally reflected throughout Canada owing to the dependence of Canadian consumers on the production in the States. All the mills in this country are operating to the full extent of their capacity, but the output is more along the lines of lighter shapes and plates and steel for shell-making purposes. The bulk of the material that is required in the construction of the steel vessels must be obtained from the mills in the States. Dealers here are apparently not enthusiastic regarding the early future. The unsettled condition has had the tendency to create a nominal market and quotations remain unchanged and very firm.

Solder Again Features Market; Getting Scarce

Montreal.

LEAD PRODUCTS.—Solder has again featured the markets locally, an advance being put into effect on practically all lines. Some variation is seen in existing quotations, but the average run of prices is about as follows. An advance in sheet zinc has been registered, and new prices will be available next week:

Lead pipe, lb.	....	0 14
Lead waste pipe, lb.	....	0 15
Lead traps and bends	Net list	
Lead wool, lb.	....	0 12
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	....	0 11½
Lead sheets, 4 to 8 lbs. sq. ft.	....	0 11

Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.

Solder (guaranteed)	....	0 68
Solder, strictly, lb.	....	0 57
Solder, commercial, lb.	....	0 53
Solder, wiping, lb.	....	0 53
Solder, wire (8 gauge)—		
40-60	....	0 59½
45-55	....	0 64¼
Zinc sheets, casks	....	....
Do., broken lots	....	....

Miscellaneous Lines Register Advances

Montreal.

MISCELLANEOUS LINES. — Some slight advances are recorded in automobile accessories during the week, bumpers and speedometers being included in the items affected. Spade, shovel and scoop handles are up 25 per cent. Vacuum bottles have gone higher, and tinned tea and dessert spoons have advanced 20c and 40c per gross respectively. Prices on fittings have been withdrawn.

Tin Again Higher; Spelter Firm

Montreal.

INGOT METALS.—Metals generally are developing strength and the demand is apparently increasing in volume. Better transportation has resulted in increased production and delivery to consumers is more regular in character. Copper is steady, with the possibility of a revision in the fixed price. Tin is very strong and also uncertain owing to non-delivery of expected supplies. Spelter is developing strength. Lead has a weaker tendency. Antimony is in good demand and has a better undertone. Aluminum is firm and unchanged.

COPPER.—Activity is normal, with prices firm. The situation in the States is without feature, although the trade is anticipating a slight advance of about ¾c may be allowed to producers to meet the increased cost of production. The situation here is not marked by any special feature, and dealers continue to quote last week's prices—29c and 30c per pound.

TIN.—Uncertainty is the dominating feature in the tin situation, and it is this factor that is tending to place this metal in a relatively impossible position. The indefinite delivery of tin from England

has placed the dealers here in a difficult position, as they are unable to establish a basis for their operations. Dealers' supplies here are gradually being reduced, and sales are made only to those in urgent need, and at present prices it might be said that little buying is done unless the requirements are absolutely essential. The rapid advance on the London market has been reflected on this side; no quotations are obtainable on the New York market, and dealers here have advanced their quotations to $1.25 per pound.

SPELTER.—While the demand has not been pronounced, the market has a strong undertone and the tendency is upward. Dealers here report a very good market and are inclined to think that an advance may be anticipated. Quotations are firm at 10c per pound.

LEAD.—This metal is not active, and the outlook is for easier prices. Local quotations are firm at 9½c per pound.

ANTIMONY.—The market is taking on a firmer tone, due to the better demand. The New York market has advanced ⅝c over the week, but local dealers are holding firm on the quotation of 15c per pound, reporting a stronger situation.

ALUMINUM.—The market is quiet and with a weaker tendency; local quotations are unchanged at 50c per pound..

TORONTO MARKETS

TORONTO, May 9.—Hardware markets have again shown a tendency towards higher levels and advances have been recorded in many lines. Tools have come in for revision; many lines of wrenches, screw drivers, hand drills, breast drills and rules being sold at prices from 7½ to 10 per cent. above those formerly ruling. Some change in fire welded coil chain has been made and other lines to undergo a change upward are horse nails, Stevens rifles, asbestos sheathing, ready roofing, blow torches and horse clippers. The situation in sheets and plates will present greater difficulties than ever in securing for commercial purposes owing to increase in Governmental demands. Tin has soared again during the week and solder has also made substantial gains. Business is reported splendid, though the difficulty in getting goods becomes increasingly apparent.

Blow Torches Make Advance; Alarm Tills Up

Toronto.

BLOW TORCHES, ALARM TILLS. —An advance in Clayton and Lambert blow torches has been made during the week. In some quarters the advance only affects a few lines, while in others the change is general. Increased cost of all materials and further production costs are given as reasons for the new prices. Quotations now being made are: No. 31, $7.75 each; No. 32, $8.25; No. 37, $7.00; No. 50, $7.00; No. 120, $7.15; No. 20, $8.30; No. 28, $2.75. Higher levels have been attained in plumbers' fire pots as well, No. 71 being quoted at $14.00 and No. 72 at $12.75 each.

A new price representing an advance has been established on Tucker alarm tills No. 503 of $3.60 each.

Advance Made in Rifles; Horse Clippers Higher

Toronto.

RIFLES, HORSE CLIPPERS.—New prices named on Stevens rifles are at higher levels than those previously ruling. The lines affected are of 22 cal. principally, quotations being made on the following basis: Little Scout No. 14½, $5.25; Crackshot No. 26, $6.25; Marksman No. 12, $7.75; Favorite No. 17, $9.25; Visible No. 70, $15.75; No. 44, $17.50 each.

A substantial increase in horse clippers has also been made, new prices established running as follows: No. 129, $2.25 each; No. 159, $2.80; No. 179, $1.75.

Higher Prices Named on Wrenches; Rules Up

Toronto.

WRENCHES, RULES.—A change has been put into effect on W. & B. knife handle wrenches and also in Trimo chain wrenches, which provides for an advance in both lines of about 10 per cent. Quotations now ruling follow: W. & B. knife handle wrenches: 6 in., $11.50; 8 in., $13.80; 10 in., $16.10; 12 in., $20.70; 15 in., $27.60; 18 in., $36.80 doz.; Trimo chain wrenches: No. 11, $4.00; No. 12, $5.75 each. It is stated that practically all lines of wrenches are included in this 10 per cent. advance.

Following the advance reported in Stanley rules as recorded in last week's issue, new prices have also been named on Rabone's lines, which are from 10 to 20 per cent. above former quotations. Some of the more familiar lines are now being quoted as follows: No. 1179, $5.50; No. 1375, $3.50; No. 1190, $15.75 dozen.

Coil Chain Goes Up; Shovel Handles Advance

Toronto.

COIL CHAIN, SHOVEL HANDLES. —An advance in prices applying on fire-welded coil chain has been put into effect during the week. New quotations now being made to the trade are as follows per 100 lbs.:

	Proof	BBB
3 16 inch	$16.65	.....
5 16 inch	13.45	$14.95
⅜ inch	12.35	13.85
7 16 inch	11.30	12.80
½ inch	10.75	11.95
⅝ inch	10.45	.....

A heavy increase is shown in new quotations being made on spade, shovel and scoop handles which are up $1.25 per dozen, making present prices read $6.25. Bent D. scoop and shovel handles are quoted at $7.00 per dozen.

Screw Drivers, Hand and Breast Drills Higher

Toronto.

SCREW DRIVERS, HAND AND BREAST DRILLS.—New prices representing an advance of 7½ per cent. have been established on Yankee tools and the lines affected include screw drivers, hand drills and breast drills. Prices on some of the more familiar numbers are enumerated:

Screw drivers—No. 30, $28.00 doz.; No. 31, $37.30 doz.; No. 130, $31.95 doz.; No. 131, $41.60 doz. Hand Drills—No. 41, $26.70; No. 44, $29.55. Breast Drills —No. 555, $8.00 each.

Sheathing and Roofing Up; Tennis Balls Scarce

Toronto.

SHEATHING, ROOFING, TENNIS BALLS.—New prices have been named on asbestos sheathing or paper, which shows an upward tendency. No. 8 is now being quoted at 14c and Nos. 10 and 14, 13½c per pound.

Some lines of roofing have also shown considerable advances in price, 1-ply being quoted at $1.25, $1.45 and $1.90; 2-ply at $1.95 and $2.40; 3-ply at $2.45 and $2.90 per square. The demand for roofing and building papers is reported excellent, business during April aggregating a big volume and orders for May are going forward in liberal quantities.

The question of supplies of tennis balls for 1918 is by no means bright as regards shipments from Great Britain. One small shipment from overseas has reached the local market and manufacturers hold out little hope of being able to take care of orders already at hand. Local agents intimate that anywhere from 25 to 50 per cent. is a fair estimate of what may be expected in the way of deliveries and 50 per cent. is thought to be somewhat high.

Twines May Go Higher; Tarred Marlin

Toronto.

TWINES, TARRED MARLIN. — A very firm situation exists in respect to twines and further advances in jutes would not be unexpected. Hemp twines are high in price and growing scarce. The demand has been very good for all lines.

A new price of 46c per pound has been established in some quarters on tarred marlin.

Gasoline Moving Freely; Lubricating Oils Firm

Toronto.

OILS, GASOLINE.—Gasoline is moving out very freely, the consuming demand showing a continued increase. Prices have held very firm though unchanged at 33c per gallon. Coal oil is also enjoying a splendid sale, the increased use of same for fuel making a big difference in volume of business being done. Prices on this commodity are also unchanged, Royalite being quoted at 18c and Palacine at 21c per gallon.

The position of lubricating oils is one of increasing strength. Many lines are practically unprocurable and the marketing of the small cans will have to be curtailed considerably owing to difficulty in securing the containers. Price changes have not yet become effective, though higher quotations in at least some sizes are looked for.

Heavy Demand Continues For Summer Lines Stoves

Toronto.

STOVES, ENAMELWARE.— The heavy demand for all lines of summer stoves continues practically unabated. Reports from retail sources indicate an increasing interest in stoves burning substitutes for coal and wood. Sales are already being effected which will be largely augmented with the advent of warmer weather.

Enamelware shows no change for the week. Business continues to come along in very good volume and though some lines are scarce, orders are being taken care of fairly well.

No Changes Made In Wire Nails

Toronto.

NAILS WIRE.—There have been no new developments in the wire nail situation during the week. Business continues along normal channels which by no means represents a heavy volume of trade. Quotations on wire nails of $5.20 base and cut nails of $5.65 base per 100 pounds show no change. Smooth steel wire remains firm and unchanged at $6.25 base per 100 pounds. The demand is comparatively light at present.

New Prices Adopted On Screw And Strap Hinges

Toronto.

SCREW HOOKS, STRAP HINGES.—New prices on screw and strap hinges have been adopted by some jobbers on the basis outlined in the announcement which recently appeared in HARDWARE AND METAL, stating that some manufacturers were now selling these by the dozen pairs instead of by the pound. The new lists are given below, and are subject to a discount of 33 1/3 per cent. Prices include straps and hooks.

	Doz. pairs
6 in.	$4 30
8 in.	4 80
10 in.	6 40
12 in.	7 00
14 in.	7 6$
16 in.	9 50
18 in	11 00
20 in.	12 00
22 in.	15 00
24 in	16 00
26 in.	17 20
28 in.	17 85
30 in.	18 50
32 in.	20 00
34 in.	22 00
36 in.	24 00

Little Change In Iron And Steel Situation

Toronto.

IRON AND STEEL.—There has been little change in the situation during the week, the demand holding at about the same level which has prevailed during the past couple of weeks and prices showing no disposition to change. Quotations remain firm at following figures:

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75

Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Corrugated Sheets Firm; Trough In Fair Demand

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—Prices on corrugated sheets are holding firm, and the sheet situation generally is such that there is little chance of any decline being registered. Supplies of sheets are not reaching the local market in very liberal quantities, and even greater restrictions on imports are likely to develop. The demand shows little improvement, sales being within a rather narrow compass.

Some slight improvement in the demand for eavetrough and conductor pipe continues to manifest itself, although it is thought this is being used largely in repair work rather than for new buildings. Prices in current market quotations show no change. Quotations on corrugated sheets are unchanged as follows:

TORONTO—	Per 100 Sq. Feet Galvanized	Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25
No. 26 gauge	9 00- 9 50	7 75- 8 25
No. 24 gauge	13 00-	10 50
No. 22 gauge	16 00-	13 25
No. 20 gauge	19 00-	16 50
No. 18 gauge	23 00-	20 00

Discount 7½%.

Plates Firming Up; Supplies Uncertain

Toronto.

SHEETS, PLATES.— A decidedly firmer tendency is to be noted in plates during the week, and an advance would not come as any great surprise. The future of sheets as regards supplies is decidedly uncertain, and little in the way of shipments for commercial use can be expected for the next two or three months. Stocks in some quarters are in fair shape, but in others again sizes and gauges are being broken into pretty extensively. Prices have a very firm undertone, and though no changes have been made during the week, higher levels may be attained in the near future.

BLACK SHEETS—		Per 100 lbs.	
10 gauge	....	$9 50	$12 00
12 gauge	$7 55	9 60	10 00

14	7 85	8 10	8 35

Wrot. Pipe Firm; Boiler Tubes Scarce

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—The position of wrought iron pipe remains firm and unchanged during the week. There have been no new developments of particular interest, raw material being still scarce and the demand holding within a comparatively narrow range. Prices are shown in current market quotations.

Boiler tubes are scarce, and although a couple of cars have come to hand, distribution of these is being carefully watched by the Government. The supply of skelp is limited, and until this is overcome the shortage will continue acute. Prices show no change, and are as follows:

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Further Advances In Solder Narrow Range

Toronto.

LEAD AND ZINC PRODUCTS.—The continued strength of the tin market and scarcity of this metal has resulted in solder reaching higher levels, to result in a narrowing of the range. Manufacturers are endeavoring to equalize distribution and make supplies, which are becoming depleted, go as far as possible. The present range on guaranteed is 59c to 68c; on strictly, 54c to 66½c, and on commercial, 49c to 62c per pound.

Manufactured lead and zinc products have undergone no change, and prices are being held firm.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼

Solder, wire, lb.	0 64¾	0 65
Zinc sheets, per lb.	....	0 26

Old Materials Unchanged; Scrap Metals Strong

Toronto.

OLD MATERIALS.— The general trend of old materials is along uninteresting lines, and dealers are still awaiting something to crop up which will revive interest in these lines. Scrap metals are very firm and reaching a point where higher values are in sight. A heavy demand for melting steel is anticipated. The interpretation placed on the action of the United States Government in using the entire mill output for sixty days by dealers is that this will mean increases in the scrap trade To give an idea as to the business being done now, one firm dealing in scrap

metals is about concluding an agreement with a munition firm for their cuttings for three months, the amount involved, it is intimated, being in the neighborhood of $200,000.

Tea lead	$ 0 04½	....

No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Cordage Shows No Change; Twine Moving

Toronto.

CORDAGE, TWINE.—There has been no change in the cordage situation. The demand is still limited and prices have held unchanged at 39c base for Manila, 33c base for British Manila, and 27½c base per pound for sisal. In some quarters it is intimated that booked orders for binder twine are now being filled and shipped, though it is thought some little time will elapse before the movement can be termed general.

No Change Made In Waste Or Oakum

Toronto.

WASTE, OAKUM.—There has been no change made in waste or oakum during the week. Business in waste continues in good volume, manufacturers indicating a heavy demand for all lines. The demand in oakum has eased off somewhat and prices are holding steady. Prices on both lines appear in current market quotations.

Tin Reaches $1.25; Spelter Firmer

Toronto.

INGOT METALS. — Higher levels have been reached in prices on tin during the week, and no further supplies are in sight. Spelter is somewhat firmer in tone, and antimony shows some strength. Lead is unchanged, with a poor demand reported. The question of raising prices on copper was discussed in Washington at a meeting held last week, but no decision was arrived at. Business locally continues fairly brisk.

COPPER.—From a commercial standpoint there is nothing to report in this metal, little being used except for war purposes. The War Industries Board and the copper interests met in conference in Washington last Thursday, but adjourned until May 22 without arriving at any decision in regard to revising the fixed price of copper. It is understood that an increase from 23½c to 24½c a pound will be asked, the advance to be used chiefly to offset the higher refinery costs. Prices hold nominally at about 30c per pound.

TIN.—The tin situation is unchanged and the shortage continues acute. There is little spot metal of any grade for sale, and only Chinese tin apparently can now be purchased for future shipment from the Far East. Tin has again advanced locally, and is now quoted at $1.25 per pound. It is intimated that the advance in price is not speculative, but rather due to increased costs following advances in primary markets.

SPELTER.—The market is firmer, due to a report that the United States Government has purchased a large quantity of high grade spelter—9,000 tons, it is said, at around 10c, St. Louis basis. Prime Western spelter continues quiet and the market featureless. The local price of spelter is unchanged at 9c per pound.

LEAD.—The primary market is easier and lower prices would not be unexpected. The weakness in the market is attributed to an increase in Mexican production and lack of buying for domestic account, the latter being probably due to the expectation that the market will go lower. In the meantime local price of lead is unchanged at 8¾c to 9¼c per pound.

ALUMINUM.—The market continues steady. Practically all the aluminum output is being taken by the United States Government at the fixed price of 32c for 98 to 99 per cent., in 50-ton lots. Local price, 50c per pound.

ANTIMONY.—The demand is more active and market slightly firmer. It is understood that the United States Government has asked bids on 1,000 tons of antimony for May-June delivery. Prices here are firm at 16c per pound.

PIG IRON.—There is nothing new to report in the pig iron situation locally Supplies show little, if any, improvement, all pig iron produced going into consumption almost immediately. With the action of the United States Government in commandeering output of steel mills, furnaces will now direct their entire efforts to war work and commercial requirements will receive little consideration.

Horse Shoe Nails Up 1½c; 10c Whip No More

Toronto.

HORSE NAILS, WHIPS.—An advance of 1½c per pound is represented by new list adopted on Capewell horseshoe nails. The discount remains unchanged at 10 per cent. in small quantities and 10 and 5 per cent. in full boxes of 25 pounds. Present list is as follows, per box of 25 pounds:—No. 3, $37.87½; No. 4, $12.87½; No. 4½, $11.62½; No. 5. $4.87½; No. 6, $4.62½; Nos. 7-8, $4.37½; Nos. 9, 10. 11, 12, $4.12½.

During the past few months prices on whips have advanced considerably owing to the difficulty of securing reeds and the high cost of cotton for covering. Whips which used to retail at 10c each will not retail now at less than 25c and higher values show a proportionate advance.

LONDON MARKETS

LONDON, May 9.—Prices are firm, with about the usual percentage of advances, the lines to be affected during the week including horse shoe nails, Stevens' rifles, calf meal, solder, auger bits and turpentine. Business has been real good during the week. The warmer weather has materially increased the sale of garden tools. Paints and house cleaning supplies are also live lines. Lawn mowers are beginning to move, and prospects look fine for a big early summer business. Jobbers report a steady volume of business from the surrounding country. Collections are good, due no doubt to the fact that more goods are being sold for cash in the country districts.

Rifles Register Advance; Shovel Handles, Too

London.

RIFLES, SHOVEL HANDLES.—New prices representing a substantial advance have been named on Stevens' small-bore rifles. The present quotations are being made on the following basis: Little Scout, No. 14½, $5.25; Crack Shot, No. 26, $6.25; Marksman, No. 12, $7.75; Favorite, No. 17, $9.25; Favorite, No. 27, $10.00; Repeater, No. 70, $15.75 each. D spade and shovel handles have undergone revision upward, the new price of $5.00 per dozen representing an advance of 50c over previous quotations.

Solder Goes Still Higher; Auger Bits

London.

SOLDER, AUGER BITS.—The continued strength of the tin market has resulted in higher prices being named for solder and even further high levels would not come as any great surprise. The present basis for quoting is: Strictly half and half, 55c pound; wire solder, 58c; pound tinker solder, 1.75 doz. New discounts established on Irwin auger and car bits and boring machine augers provide for an advance of about 12½ per cent. in this line. Quotations established are: Auger bits, 17½ per cent.; car bits, 25 per cent.; boring machine augers, 20 per cent.

Milk Cans Up; Advance In Calf Meal

London.

MILK CANS, CALF MEAL.—Quotations on milk cans now prevailing represent an increased price and net prices figured at 50 per cent. advance on list, the present selling cost, are: 10 gal., $8.25; 15 gal., $8.85; 20 gal., $9.60; 25 gal., $10 50; 30 gal., $11.70; 40 gal., $14.85 each. Calf meal has gone to higher levels, following a comparatively recent change upward. An excellent demand for this commodity exists; orders representing a good volume of business being reported. New prices are for Royal

Purple: 25 lb. bags, $4.80; 50 lb. bags, $4.75; 100 lb. bags, $4.65 net cash per 100 lbs.

Horse Shoe Nails Show Advance In List

London.

HORSE SHOE NAILS.—Horse shoe nails have undergone a revision in list prices of 37c per 25 lb. box, while the discount now ruling is 5 per cent. in small quantities and 10 per cent. for full boxes. The new list prices are: No. 3, $19.87; No. 4, $9.87; No. 5, $4.87; No. 6, $4.62; No. 7, $4.37; No. 8, $4.37; Nos. 9, 10, 11, 12, $4.12 per 25 lb. box.

Nails, Staples, Rope Hold Steady

London.

NAILS, STAPLES, ROPE.—There has been little of interest develop in respect to either nails, fence staples or rope during the week. A very fair sale of wire nails is reported though this is not in great volume as yet. Prices have held firm and unchanged in each at the following prices:

Nails—Wire, $5.20 base per 100 lbs.; cut, $5.60.
Fence Staples—Bright, $5.50 per 100 lbs.; galvanized, $6.25.
Rope—Pure Manila, 39c per lb., base; British manila, 33c; New Zealand hemp, 33c; sisal, 27½c.

Screen Doors, Windows Moving; Screen Wire

London.

SCREEN DOORS, WINDOWS, WIRE.—The movement in all these lines is showing some improvement and is expected to develop to greater proportions as the month advances and warmer weather with fly time approaches. Prices established some time ago have shown no change, quotations being as follows on some of the lines:

Screen Doors—Grained only, No. 1, $15.15 doz.; with brackets, grained only, No. 2, $18.70 doz.; with brackets, grained, filled and varnished, No. 3, $24.70; Mission style, grained, filled and varnished, No. 21, $22.60; with panel, grained, filled and varnished, No. 8, $26.65; oval and panel, grained, filled and varnished, $31.60.
In less than ½ doz. crates add 20c per crate.
Screen Wire Cloth—Painted black, 100 ft. rolls, $3.50 per 100 sq. ft.; 50 ft., $3.55. Bronze, 14c. sq. ft.
Screen Door Spring Hinges—No. 20, $17.75 gross pr.; No. 7/10, $20.20.

Lawn Mowers Moving; Booking Snow Shovels

London.

LAWN MOWERS, SNOW SHOVELS.—A fair movement of lawn mowers is now in evidence, and prospects are very fair for a good demand developing. Discounts remain unchanged at 40 per cent. for the Daisy, Star, Woodyatt and Empress. Snow shovels are now being booked at prices recently established for fall delivery, and any orders going forward now carry same prices which figure out net as follows: Prince or No. 20, $8.55; Queen or No. 30, $9.50; King or No. 40, $11.40; Moose or No. 50, $14.25 per doz. Furnace scoops, D. H., $9.50; L. H., $9.50 per doz.

Linseed Oil Unchanged; Turpentine Advances

London.

LINSEED OIL, TURPENTINE.—There has been no change made in prices prevailing on linseed oil. Sales are being made in a comparatively narrow range on the following basis:

	Raw Per gal.	Boiled Per Gal.
1 to 2 barrels	$1 95	$1 98
3 to 5 barrels	1 94	1 97
6 to 9 barrels	1 92	1 95

Stocks of turpentine are rather light at present. An improvement in the demand is reported. Prices have registered an advance during the week of 5c per gallon, following a decided firming of quotations at primary points. Present range of prices is: 1 bbl. lots, 75c Imperial gal.; 2 to 4 bbls., 74c Imperial gal.; 5 gals., 85 cts. Imperial gal.

White Lead In Oil Steady; Alabastine Moving

London.

WHITE LEAD IN OIL, ALABASTINE.—A very steady tone has been maintained in white lead in oil, prices showing no change during the week. A comparatively light sale is reported. The basis of quotations is for pure, in ton lots, $16.20 per 100 lbs.; less than ton lots, $16.55 per 100 lbs.; pure Elephant, in ton lots, $16.70 per 100 lbs.; in less than ton lots, $17.05 per 100 lbs. Reports indicate a very good demand for Alabastine, orders going out in splendid volume. Quotations on 5 lb. packages of $7.80 per 100 pounds, and on 2½ lb. packages of $8.00 per 100 pounds show no change.

WINNIPEG MARKETS

WINNIPEG, May 9.—Price changes have again been numerous, all lines showing an upward trend. Among the lines affected are Bernard pliers, Carll wrenches, trace chains, Mrs. Potts' iron handles, Shaw and Hoosier calf weaners, cocoa mats, Redlich faucets, wood and steel tackle blocks, fusible plugs, Irwin car bits, hook and strap hinges, and Newton saw sets. Business for the past week has again shown up well. With gardening in full swing increased sales are recorded on hoes, rakes, spading forks, lawn hose, etc.

Wood and Steel Blocks Up 5 to 10 Per Cent.

Winnipeg.

WOOD AND STEEL BLOCKS.—A further advance is just recorded in wood and steel blocks of between 5 and 10 per cent. This has been brought about by increased production costs. Prices now ruling are as follows:

STEEL BLOCKS—	Single	Double	Triple
3 in., each	$0.70	$1.30	.....
4 in., each	0.85	1.60	2.15
5 in., each	0.90	1.75	2.25
6 in., each	1.10	2.00	2.90
7 in., each	1.30	2.40	3.50
8 in., each	1.90	3.30	4.90
WOOD BLOCKS—	**Single**	**Double**	**Triple**
3 in., each	$0.77	$1.45	.....
4 in., each	0.95	1.75	$2.35
5 in., each	1.00	1.95	.....
6 in., each	1.20	2.20	3.20
7 in., each	1.45	2.65	.....
8 in., each	1.80	3.15	4.65
10 in., each	3.05	4.95	.....
12 in., each	4.90	8.25	11.70

Pliers Advance; Wrenches Up Another 10 Per Cent.

Winnipeg.

PLIERS, WRENCHES.—During the week further advances have been effective on Bernard pliers, the price being advanced to 40 per cent on list. This makes net prices on the No. 102 read as follows: 4½ in., $16.10; 5½ in., $20.30; 6½ in. $24.50 dozen.

Prices on Carrl wrenches again move up approximately 10 per cent. Stocks are generally low and further supplies will be very uncertain as the factory is now running on American munitions work. To-day's prices are as follows: 6 in., $13.20 dozen; 10 in., $20.00 dozen.

Advance in Trace Chains; Faucets 10% Higher

Winnipeg.

TRACE CHAINS, FAUCETS.—A slight revision is recorded on trace chains which again move up in price, and are selling to-day at $8.00 dozen for 6½ foot and $8.75 dozen for 7 foot.

Woodenware prices, which have been advancing of late, due to labor shortage and railway transportation, has this week affected the prices on Redlich faucets, which move up 10 per cent. To-day's ruling prices are as follows: No. 2, $1.50; No. 3, $1.80; No. 4, $2.10; No. 5, $2.40 dozen.

New Prices on Potts' Iron Handles; Saw Sets

Winnipeg.

IRON HANDLES, SAW SETS.—New prices have just been issued covering Mrs. Potts' sad iron handles which move up to $1.55 dozen. Improved and Universal handles remain unchanged at $1.85 dozen and $2.00 dozen respectively.

The price on Janitor saw sets has again moved up, this being the third advance during the year, making to-day's selling price $13.75 dozen.

New Method in Selling Screw and Strap Hinges

Winnipeg.

SCREW HOOK AND STRAP HINGES.—Some manufacturers of screw hook and strap hinges have made a change in the method of selling their output. In the past these have all been sold by the pound, but in future all sizes will be sold by the dozen pairs. To-day's discount is 20 per cent. from the new

list, making net prices as follows: 6 in., $3.45; 8 in., $3.85; 10 in., $5.10; 12 in., $5.60; 14 in., $6.10; 16 in., $7.60; 18 in., $8.80; 20 in., $9.60 dozen.

Car Bits Higher; Fusible Plugs Up 10%

Winnipeg.

CAR BITS, FUSIBLE PLUGS.—Prices on Irwin car bits which have remained firm for the past few months again move up in price, being now quoted at 20 per cent. off the standard list. Net prices on the various sizes on this basis are as follows: 8/16 in., $9.00; 9/16 in., $10.00; 10/16 in., $11.00; 11/16 in., $12.00; 12/16 in., $13.00; 13/16 in., $14.00; 14/16 in., $15.20; 15/16 in., $16.40; 16/16 in., $17.60 dozen.

In sympathy with the advances in all lines of brass goods, prices on fusible plugs show a further increase of approximately 10 per cent. and are quoted to-day as follows: Standard length—½ in., 65c; ¾ in., 80c; 1 in., $1.10; 1¼ in., $1.65; 1½ in., $2.20 each. Extra long—½ in., $1.30; ¾ in., $1.60; 1 in., $2.20 each.

15 *to* 20% *Advance In Calf Weaners*

Winnipeg.

CALF WEANERS, COCOA MATS.—Prices on practically all lines of calf weaners have shown an upward tendency of late, and new prices just now issued show heavy advances on Shaw's and Hoosier amounting to between 15 and 20 per cent. To-day's ruling prices are: Shaw's No. 1, $5.50 dozen; No. 2, $6.40 dozen; Hoosier, $7.00 dozen.

Prices on raw materials entering into the manufacture of cocoa door mats have been instrumental in providing for heavy advances from time to time. The last change shows new prices approximately 15 per cent. above previous quotations, making ruling prices to-day as follows: Cocoa mats, medium brush, No. 1, $13.20; No. 2, $16.95; No. 3, $20.00; No. 4, $24.00 dozen.

Linseed Oil and Turpentine Hold Firm

Winnipeg.

LINSEED OIL, TURPENTINE.—Prices on linseed oil continue firm despite a slight drop in flaxseed and prices still in effect are as follows: Raw, $2.00 gal.; boiled, $2.03 gal.

No change is recorded in the price of turpentine, which remains firm at former quotations as follows: Barrels, 80c; ½ barrels, 83c; 5-gal. lots, 85c gal; 1-gal. lots, 85c gal; plus the usual extras

Mixed Paints Go To Higher Levels

Winnipeg.

MIXED PAINTS.—New prices have been established on ready-mixed paints, representing an advance of approximately 15c per gallon. Stephen's ordinary shades are now being quoted at $3.85; outside and inside white, $3.95; floor paint, $3.30; and silkstone at $3.15 per gallon.

PITTSBURG MARKETS

PITTSBURGH, Pa., May 9. — The grip of the Government upon the steel supply has become complete. All producers have acceded to the demand of the authorities that every available ton of steel be shipped for account of the Government and its Allies. Following the meeting in New York, Friday, April 26, between J. Leonard Replogle, Director of Steel Supplies, and about fifty representative steel manufacturers, Judge Gary, as president of the American Iron and Steel Institute, sent a request to each manufacturer to do his utmost, and asked that a pledge to the effect be signed.

As illustrative of the situation, the Carnegie Steel Company last week made the statement that every ton of open-hearth ingots the company cast, except ingots rejected as not coming up to specifications, was being applied to orders of the Government and its Allies, and the rejections were very few. Apart from the rejected ingots there is left, of course, the crops from ingots intended for shell steel, such crops being available for rolling a limited tonnage of commercial steel, such as light rails, and in addition there is the production of Bessemer steel not taken up by war requirements. Only one-fourth of the total steel output of the country, however, is in the form of Bessemer steel, and the tin plate requirements absorb a great deal of that, while the Railroad Administration apparently intends to take Bessemer rails only, so as to conserve open-hearth steel for purposes which demand that grade of steel. This is the situation as applied to the largest single producer, but it should be noted that there are small producers having a limited range of finished products, and of some of these products the Government cannot possibly use the entire tonnage. In the final line-up, however, there may not be a great deal of such products available for commercial purposes. For illustration, the Government cannot use anything like the normal tonnage of wire produced in the country, and there are some mills that can make little except wire, but the mills that can make wire only may be given the wire orders, and mills that can divert steel from their wire departments to other departments making finished products greatly needed by the Government may be pushed with orders for the other products so that their wire production will be light.

A Complete Change

A restrospective glance shows that the situation and prospects as to supplies of steel for the so-called "commercial" purposes has changed entirely in the past 30 days. At the beginning of April the outlook, in the minds of many observers, and probably the great majority of steel producers, was that there would be an ample supply of steel for war purposes, and a surplus that would perhaps be entirely sufficient for commercial purposes. This expectation was based on the large increase that had occurred in shipments, through the passing of a winter which had so greatly cut down production, but it did not allow sufficiently for the increase in commercial demand that evidently was occurring at the same time nor, more important still in the mind of the Director of Steel supplies, did it allow for the expanding needs of the Government and its Allies. While all producers are probably not converted to the idea that steel is going to be scarce continuously, the philosophy of the remainder is that their duty is to act, and furnish all the steel asked for, and if meanwhile they cherish the theory that a couple of months of such action will result in the authorities relaxing their pressure, no harm will have been done by their entertaining the theory.

War Orders Heavy

It is understood that the orders currently placed by the Government, or placed indirectly for war account, are regularly running ahead of the deliveries. In several important lines the war orders on books are equal to several months of shipments at the present rate. Considering these circumstances, together with the fact that the Allies abroad desire more and more steel, as available, by reason of the shortage of man power at home, and the further fact that the authorities at Washington wish to play safe this summer and fall and accumulate steel if possible against any traffic difficulties next winter, it becomes clear that the war requirements of the next few months are going to prove much heavier, in proportion to productive capacity, than was assumed only recently.

Export Steel

The pledge taken by the steel producers, to divert all possible steel to the war work, has a particular bearing upon shipments of commercial steel for export. Such material does not come under the price agreement, and thus if the producer exercised his choice it would frequently be to ship such steel, on account of the higher price involved. This is prevented by the pledge.

On the other hand the authorities at Washington, as indicated in last report, are taking more interest in the distribution of the so-called "commercial" steel, recognizing clearly that some of it is indirectly very helpful towards winning the war. At one time it was contemplated to take over formally the distribution of all commercial steel. This proposition has been tabled, with the understanding that the mills themselves distribute such steel as may be left, in places where it will do the most good. Without a formal order, the producers have been informed that they should set first in the distribution of commercial steel two classes: (1) Steel involving oil development and transportation; (2) Steel involved in agriculture. Other classes of consumption the steel producers are to serve according to their own judgment.

WEEKLY PAINT DEPARTMENT

Encourage Building Idea This Year

Some Cities and Municipalities Have Realized the Seriousness of the Failure to Build Sufficient Homes for the Working People—Any Encouragement to Building Projects Will Mean Business to Paint Dealer

THIS is a year when the lack of dwellings for workers in the towns has assumed a serious phase in some places. It has become so serious in some cities that organizations have been formed to try and encourage the builders. Again in other cities the boards of trade have taken up the question and are preparing to assist in the launching of companies to carry out this needed work. In the city of Brantford the Board of Trade has decided to give sanction to the launching of a company for the construction of one hundred workingmen's homes. The Town of Welland has felt the need for encouraging building and the Board of Trade has given its sanction to a scheme for building a number of model homes. The demand for houses has been urgently heard from many other districts.

SERIOUS FACTOR IN SOME TOWNS

This dearth of dwellings in some towns has become a serious factor in the development of the town or city. People who go to the town to work are unable to move their families there until they can secure quarters in which to house them. There has been a rapid accretion in the population of cities within the past two or three years on account of the growth of the munition business. Industrial towns that have in any way to do with the manufacture of war materials, such as cloth, hosiery, harness, leather, steel and iron, have all been greatly benefited by the war demand.

Now the worker does not become a real asset to the merchant until he has moved his family into that town. While he is in the boarding-house existence he is not a potential buyer. His landlady or landlord does the buying for him. But when he gets to have a home of his own his spending power enlarges immediately. Much of this business finds its way to the hardware store.

MORE BUILDINGS, MORE PAINT

It naturally follows that with more buildings erected in the town there will be more paint sold. Each building requires its initial coat of paint, and each succeeding season or two requires a renewal of that coat of paint. It follows therefore that anything the hardwareman can do to encourage building projects in his own town will redound to his own benefit. With more buildings being constructed he will find a greater demand for many of his commodities. Not least among these lines would be that of paint.

But while there is need for new buildings in many centres there is also an urgent demand that old buildings should be put into the best possible shape. This can best be accomplished with the aid of paint. Old buildings that need renovating and rebuilding should be a good source of additional trade this year. With the scarcity of dwellings that exists in many towns there will no doubt be a turning to the making over of old buildings that perhaps have hardly been habitable through falling into a state of disrepair.

It should be one of the settled policies of the hardware merchant who deals in paint to see that all these building prospects are followed closely with a view to securing the paint trade. Any building operations that he can in any way be instrumental in getting under way open up prospective paint buyers which he should follow up. When the building permits are issued or permits to renovate are granted it it good policy to canvas those prospects with advertising material or with a personal call.

When there are any signs of building activity that should be a clue to paint trade. It often does not pay to wait until the paint trade comes of its own accord. The other fellow may slip around and get it in the meantime. The present year should be a painting year, primarily because it is necessary to preserve existing buildings and secondly because new dwellings are urgently required in many sections.

MOORE'S

House Colors

Tell Your Customer:—

Practice Thrift — use Moore's Lasting Paints

Moore's ready-to-use paints are appreciated most in these days of thrift because of their **Lasting Qualities.**

Made from the very best and most lasting pigments, combined with Pure Linseed Oil, and the best driers, they give super-satisfaction in drying hard, and yet retaining sufficient elasticity to prevent cracking and peeling. This makes it a paint as yet unbeaten for wear, as well as appearance.

Tell your customer, therefore, to practice thrift by using Moore's. He is sure to appreciate your tip, and it will mean sales for you later on.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 9.—Interest centres around turpentine for the week, prices at primary points registering stiff advances, which have been reflected here to some extent. Supplies are by no means heavy, though some shipments are reported in. A slight improvement in receipts of seed has been reported, but as yet these are not sufficient to relieve the situation materially. Mixed paints continue to move out in very liberal quantities, the new prices having little effect on demand as yet, and they are hardly expected to influence this to smaller limits. White lead in oil and putty are firm and unchanged.

Linseed Oil Firm and Unchanged

Montreal.

LINSEED OIL.—There has been some slight improvement reported in the matter of receipts of seed, but this has not yet reached a satisfactory point. However, better results are anticipated now that navigation is in full swing to relieve the transportation question. The seed market showed considerable fluctuation during the week, and prices on Wednesday of this week for No. 1 N.C.W. are somewhat lower than on the same day last week. This has not made any change in prices of oil, however, as the demand so far exceeds supplies that the firm position may be expected to hold.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.82-$1.86	$1.84½-$1.88½

Turpentine Goes To Higher Levels

Montreal.

TURPENTINE.—The rapid advances made in turpentine at primary points are having an influence on prices here, quotations changing almost daily, and have reached a nominal basis of about 70c in the majority of cases, with even higher prices looked for. Supplies are at a pretty low point, though shipments are rolling, which are expected in the near future, and will take care of requirements.

Turpentine—	Per Imp. Gallon
1 to 4 barrels	$0 70
5 barrels and over	....

Small quantities 10c advance over 1 bbl. prices.

White Lead Steady; Movement Light

Montreal.

WHITE LEAD IN OIL.—This commodity remains steady and unchanged at prices ruling for some time past. The demand is comparatively light. Sales are made on the following basis:—Five-ton lots, per 100 pounds, $15.50; one-ton lots, $16, and small lots, $16.35.

Putty Shows Little Change

Montreal.

PUTTY.—Putty shows little change during the week, and there are no interesting developments to report. Some movement is reported, and prices have held firm on the following basis:

	Per 100 lbs. 5 ton	1 ton	Less
Standard Putty— Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Mixed Paint Enjoys Very Good Sale

Montreal.

MIXED PAINT.—Mixed paint is enjoying a very good sale, and revised prices, as outlined in last week's issue of HARDWARE AND METAL, have as yet had no effect on volume of business coming to hand. Spring orders are all shipped out, and the sale has already been started by retailers, who are already sending in repeat business. Prospects for a good trade look bright.

TORONTO

TORONTO, May 9.—The primary markets on turpentine are firm and show a considerable advance for the week, which has resulted in new prices being established locally at considerably higher figures than those prevailing last week. Supplies are coming in slowly, but some relief has been afforded by shipments just received. Linseed oil shows no change for the week, prices holding firm, with supplies by no means heavy. The demand for mixed paint continues in good volume, and orders are moving forward freely. Nothing new has developed in respect to white lead in oil or putty, prices being unchanged and demand comparatively small.

Situation Shows No Change In Linseed Oil

Toronto.

LINSEED OIL.—Supplies of seed reaching the market show some little improvement during the week, and, as the navigation season progresses, a better movement, it is expected, will develop. However, it is intimated that heavy receipts are needed to clean up orders on hand, and get supplies of oil up to a more normal basis. The seed market in Winnipeg shows some decline for the week, the price on Wednesday of this week for No. 1 N.C.W. being $374½ per bushel, against $3.80 on Wednesday of last week. Even lower prices were reached in the intervening period, and the market shows a tendency towards fluctuating. Supplies of oil are not by any means heavy, but in some quarters it is intimated that orders to retailers are being cleaned up fairly well. New business on oil is not being solicited aggressively, and the demand is within a fairly narrow scope. Prices are unchanged.

	Raw, Imp.gal.	Boiled, Imp. gal.
1 to 2 bbls	$1.86-$1.95	$1.88½-$1.98
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Records Advance Of 8c to 10c

Toronto.

TURPENTINE.—An advance of 8c to 10c per gallon in the price of turpentine has been made during the week. At primary points this commodity shows decided strength and indications are that further advances may be found necessary before the week is out. The present advance is in line with prediction given in HARDWARE AND METAL last week. Some supplies have reached the local market which have served to relieve the scarcity to some extent, and further shipments in transit if received within a reasonable time will further adjust the present scarcity. There is great difficulty being experienced in getting shipments through from the South just now, and no opinion is ventured as to when goods now rolling will reach here. Prices now ruling are as follows, and whereas quantity prices are named, business is not being solicited on this basis to any extent owing to scarcity of supplies.

	Imp. Gal.
1 barrel	$0 70½-$0 75
2 to 4 barrels	0 70½- 0 74
5 gallon lots	- 0 85

White Lead In Oil Steady; Fair Demand

Toronto.

WHITE LEAD IN OIL.—Business in white lead oil shows practically no change for the week, orders being for comparatively small quantities and not such a great number of orders being received. Prices have held firm and show no disposition to change whatever. Quotations now being named are steady at the following figures: Pure, in ton lots, $16.20 per 100 lbs.; smaller quantities, $16.55 per 100 lbs.

Good Demand Continues For Mixed Paint

Toronto.

MIXED PAINTS.—Good business continues to be received for mixed paints, and manufacturers and jobbers are well satisfied with business being handled. It indicates that dealers are going after trade hard, and this should work out to the benefit of all concerned. Spring orders are now all in retailers' hands, and the repeat business coming in is said to be remarkable. The new prices established last week have apparently had no effect on demand. Prices appear in current market quotations.

Glass Steady; Putty Unchanged

Toronto.

GLASS, PUTTY.—No change is reported in window glass during the week, prices holding firm at quotations appearing in current market quotations. No improvement in existing stocks is reported as yet, and supplies are rather badly depleted. No shipments from Southern points are reported in transit as yet.

Putty shows a little movement, but this is by no means heavy as yet, and is expected to be within comparatively narrow limits for some little time. Prices are holding steady and unchanged as follows: Standard bulk in casks is quoted at $4.55; 100-lb. drums at $5.30-$5.40; and bladders in bbls., $5.45-$5.65 per 100 pounds. Prices on pure putty range $2 per 100 pounds higher than above.

Brushes Very Firm; Brooms May Go Up

Toronto.

BRUSHES, BROOMS.—A very firm situation is reported in brushes during the week owing to a very heavy advance which has been made in China bristles. An exceptionally heavy demand exists for brushes of all kinds now and some difficulty in keeping up with orders is being experienced. There are no French or Russian bristles coming to hand, which throws the bulk of the demand on the China and the heavy calls for Government work on shipbuilding, railroad equipment and many other items is taxing supplies very heavily. Supplies of brushes locally are reported very fair and orders are being taken care of in very good time.

Corn brooms are in a very firm position and an advance in prices would not be altogether unexpected. The present high levels for these lines is influencing sales of floor brushes, and manufacturers generally report business in this latter line good.

DISTRIBUTING CALENDARS

The Consumers Cordage Co., Limited, Montreal, are distributing to buyers of cordage some very neat calendars, starting April 1st, 1918, to April 1st, 1919. Any cordage user can obtain one by writing to their head office, Montreal, or branches.

BINDER TWINE MADE OUT OF FLAX STRAW

The Flax Fibre Development Association of Regina, Sask., announces that it has discovered a process for manufacturing flax straw into binder twine, commercial twine and yarns for weaving into heavy sacking and towelling. Heretofore, the flax straw of the three western provinces, amounting to over 1,000,000 tons annually, has been burned after threshing.

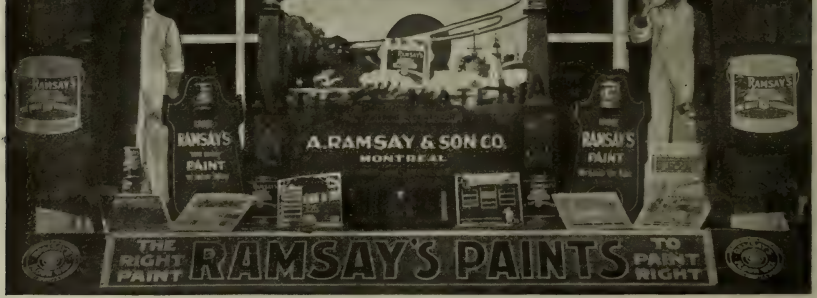
It is said that experiments carried out this autumn with the new binder twine showed that it bound 99 per cent. of the sheaves perfectly, a better result than was obtained with sisal twine. A co-operative company is being formed to manufacture the new twine.

SUPPLYING FERTILIZER AT WHOLESALE

Gerry's Hardware, Fort William, Ont., is out to help production by supplying fertilizer to the farmers and gardeners at wholesale cost. "Farmers and Gardeners. We want to see you raise the very last pound of foodstuffs you can this season. In order to do our bit in this food production we make you the offer of supplying all the fertilizer you want at wholesale cost. The only condition we require is that you order at once and make a small deposit at time of ordering. Prices can be had by calling at our store or phoning."

BOOKLET ON REAMERS

"Drill Chips" is the title of the monthly booklet issued by the Cleveland Twist Drill Company, Cleveland, O., in which Peerless reamers are described in an entertaining and interesting manner. The booklet is nicely illustrated and is printed in two colors.



NOVEL AND ATTRACTIVE PAINT DISPLAY.

C. R. Crowley artists' materials, St. Catherine Street, Montreal, has a mechanical display of paints in his window which is both novel and attractive. Above photo is a reproduction of the window. The background comprises several large colored posters and immediately in front of this are cut-outs, with an effectively-tinted landscape, including farm buildings and a sea with battleships coming through the surf at high speed. In the centre a can of O.G.W. paint is placed, slightly tilted to one side, and when the small electric motor is connected the gallon can of paint in the centre is made to appear as riding on the waves, just as a small boat would do. The effect is very attractive indeed.

Hydro-Electric Grave-Digging in Progress

FOR every Canadian interested in the principles of public ownership that pays there is a regular search-light on the subject in THE FINANCIAL POST of May 4th. On page 10 appears an editorial and a leading article which give financial facts, and business-like principles so intimately connected with the ultimate success of the Hydro that not even the most decided critic of public ownership as expressed in the present management of Hydro-Electric affairs in Ontario can fail to find in them food for thought.

Burial of Hydro Hopes

In the businesslike account rendered from the facts by City Auditor H. T. Jamieson, of St. Catharines, there are warnings which cannot be neglected. They point to the danger that Hydro methods of financing and accounting at present may be the very spade and pick-axe strokes by which the Hydro is digging its own grave as far as financial success goes. Whether you are a supporter of Sir Adam Beck or not, see these articles. They are intensely important to all Ontario to-day, and to all Canada as far as principles of public ownership are concerned. Remember they appear in THE FINANCIAL POST of May 4th, and with them THE POST contains its usual good service of business news under such headings as these:

Canadian Trade Increased Bank Credits in March.
Provincial Commission Forestalls Courts Re Niagara Franchise.
Mystery as to What Britain is Doing With Gold.
Reconstruction of Cabinet is Ottawa Gossip.
Looks like Three Hundred Million Bushels Export Wheat.
Iron Enough for Twenty-five Years' Supply in B.C. Ores.
Claims of British Columbia as to C.N.R. Voiced by Premier.
Underlying Causes of Movement in New York Funds.
April was a Good Month in Toronto Realty Business.
German Banks Amalgamate in Preparation For After War.
Bond Market Has Been Pretty Well Cleared of Issues.
Edmonton Taking Steps to Meet Its Maturing Bonds.
Montreal Asks One Million From Quebec Province.
Fire Insurance Commission Takes Up Fire Prevention.
Jitneys to be Abolished in Winnipeg.
Lord Shaughnessy's Report on Canadian Pacific Railway.
Organizing for Victories to Follow the War.

These titles merely indicate some of the principal subjects of importance to Canadian business men and investors which you will find ably dealt with both as to news facts and comment in THE FINANCIAL POST of May 4th. Remember THE POST is the business newspaper of Canada with not only a high standard staff of its own, but with the specialized attention and work of twelve MacLean business newspaper editors also devoted to making its news columns worth while for every alert man of affairs. For Three Dollars a year you can have THE POST every week. Just fill up this coupon.

Economizing Helps the Sale of Specialties

The nation-wide impulse for economy means that many motor cars will go unfinished this season unless the owners adopt the *"Berry way,"* which makes the cost nominal.

Berry Brothers'
Auto Color Varnishes

are made especially for the unskilled varnisher, and with his garage for a workshop any man can produce a handsome, lasting finish on his car in just the colors he prefers, without any finisher's bill to pay.

We furnish an attractive cutout for counter display, and descriptive folders giving explicit directions for the amateur varnisher, telling how much varnish it takes, and showing in colors how cars look when refinished. A real selling help.

Ready to Ship Assortments

We have all ready put up, well selected assortments of colors that we can ship promptly. Order one to-day and get in the field early. You will sell it quickly and want more. Write for further particulars anyway.

BERRY BROTHERS

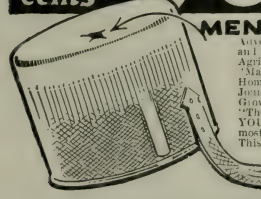
15 cents VOLPEEK
MENDS POTS & PANS



Advertisements in "The Maritime Farmer," "Family Herald and Weekly Star," "Montreal "Weekly Witness," "Le Journal Agriculture," "Everywoman's World," "Rural Canada," "MacLean's Magazine" "Farmers' Magazine." "Canadian Home Journal," "Farmers' Advocate," "The Ottawa Farm Journal," "The Western Home Monthly," "The Grain Growers' Guide," "The Farm and Ranch Review," and "The Nor'West Farmer" and other magazines are telling YOUR customers that VOLPEEK is the cheapest, quickest, most permanent means of mending pots and pans. This means business to merchants who are prepared.

H. NAGLE & CO., Box 2024, MONTREAL

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

Mr. Dealer: Sell This Fence

Establish a trade that will stay with you and at the same time will show a substantial growth. Compare this strong, rustless, unyielding fence alongside flimsy netting, and every poultry raiser will flock to your store. Note the close spaces at bottom that turns the small chicks and keeps out intruders.

SEND FOR LITERATURE

Get our catalogue of fencing for all purposes. Every foot of it guaranteed. Write today for agency in open territory. Our fence in every instance backs up our advertising.

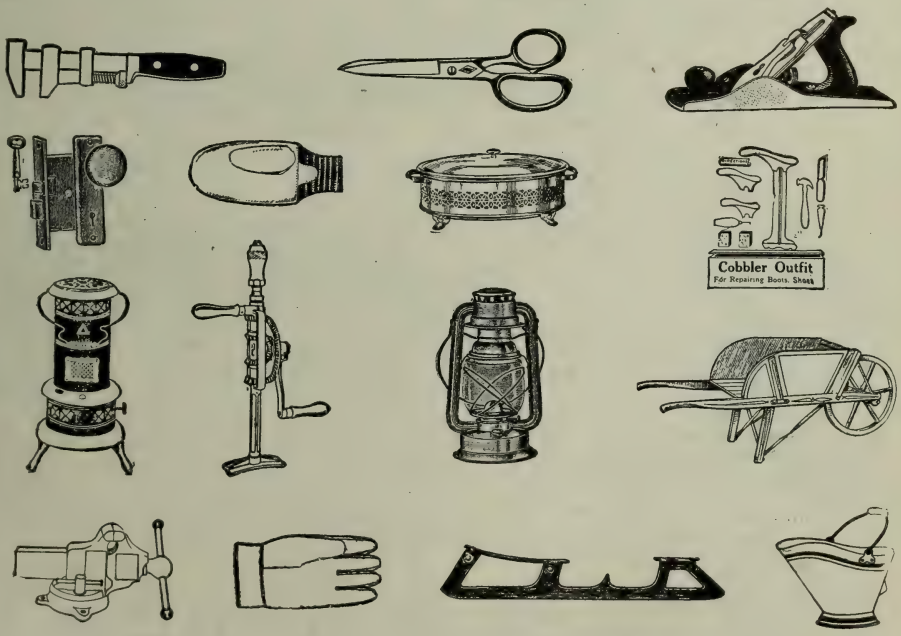
The Life of the Ad

THE retailers who are securing best results from their newspaper advertising are those who are using illustrations in their advertisements. Just as a mail order catalog would be dead without illustrations, so is the average consumer advertisement when illustrations are omitted.

Canadian retail hardware merchants can secure attractive illustrations through HARDWARE AND METAL'S Electro Service. Mounted electros are supplied at a cost of 20c each. Booklet showing 365 electros will be supplied on request. Address below.



HARDWARE AND METAL

CANADA'S NATIONAL HARDWARE WEEKLY

143-153 University Avenue, Toronto, Canada

If interested, tear out this page and keep with letters to be answered.

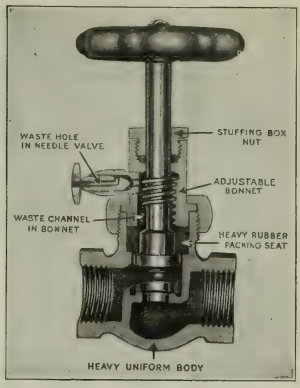
A Real Compression Stop and Waste Cock

Nothing is so annoying as a stop and waste cock that DOES NOT STOP AND WASTE every time it is closed. In introducing this new line of compression stop and waste, we know it will do all that is required of it.

Just look at the accompanying sectional view. Full weight heavy designed, red brass and accurately fitted in every detail.
Needle valve on waste hole. This does away with the little brass tube or ordinary hole that has become more of a nuisance than anything.



Adjustable union fitted bonnet. This permits the waste valve being turned to any direction, no matter what position the stop cock is in.
Waste channel in bonnet is a good size and will not become easily blocked.
Ample sized stuffing box with knurled nut can be tightened easily with a pair of pliers.

Heavy rubber packing seat which prevents any leaking when the stop and waste cock is open. This is a very important feature.

When writing us or ordering from your jobber, ask for the Empire IMPROVED Compression stop and waste cock.

WANTED, AT ONCE — CAPABLE HARDware man to manage retail hardware business in thriving Ontario town. State experience, salary expected, and give references. Apply Box 182, Hardware and Metal.

Men who are capable of managing a retail hardware business are not easy to find. The position requires a high type of ability. Above all, it requires a man who recognizes opportunities and who knows how to make the most of them. That type of man in the hardware business is almost invariably a reader of HARDWARE AND METAL. There were fifteen replies to the advertisement shown here. It was a point in favor of all the applicants that they were in the habit of reading HARDWARE AND METAL.

Stephens

These nice warm days

are veering the minds of the householders around to the paint question. It is on such days that your window should attract with a display of Stephens' Paints. Link up Mr. Householder's own thoughts on Spring Painting with your silent suggestions on the use of Stephens' Paints. The effect of a suggestive display of Paints at this time cannot be overestimated. This has the effect of urging men to do what is in their minds to do, which after all, is the essence of good salesmanship.

If you are not a Stephens' Paint Agent, but wish to be, drop us a card asking for our proposition.

Sales features no other ladders possess

BT

BT Iron Bound Step Ladders with their wide steps, steel-locking device, galvanized steel tops and galvanized iron binding plates exhibit features not seen on other ladders. Built of clear, sound, Sitka Spruce, the same strong light wood used in aeroplane manufacture, and protected by steel and iron where strain and wear are greatest, BT Ladders, for all their lightness, outwear and outlast all others.

Anyone who examines a BT Ladder and its many points of superiority understands at once why they are easily sold, and why each sale reflects with credit on the merchant.

BT Ladders will sell in your store that's certain.

PEERLESS ORNAMENTAL FENCING

A Big Trade Is Waiting for You.

YOUR business will jump to the front the minute you display Peerless Fencing. In price, quality, designs and actual worth you can guarantee every foot of it. We stand back of you.

Open hearth steel wire, crimped springy horizontal wires combine to make the Peerless fence outlast ordinary kinds of fencing. Defies rust, holds unruly animals, can't sag, can't break down and is the last word in economy.

Salesmen Wanted

Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.

If interested, tear out this page and keep with letters to be answered.

John Wanamaker's Dominance

JOHN WANAMAKER surpassed the merchants of the days of his beginning because he had an idea that they didn't have: namely, to multiply sales and customers. John Wanamaker has possessed this identical idea ever since, and it has made him the prince of merchants.

Smaller men among manufacturers and retailers lack this idea: they devote more thought and effort to buying right and running their business trimly. But they are not master merchants.

Now great success cannot come to any firm or any man apart from the Wanamaker idea—which is to multiply sales and customers. Given this idea, and pursue it ardently always, and fortunes and dominance are secured.

The winning and holding of customers and the enlargement of sales call for the employment of advertising. The printed solicitation gets to buyers that flesh-and-blood salesmen cannot get to, and gets to them at right times, and wears down resistance. Printed solicitations produce friendliness, and accelerate the traveller's sales efforts when he calls. Printed solicitations lower the cost of selling. The flesh-and-blood man cannot call on men for much less than $2 a call. The printed solicitation can make calls for as low as a cent a call.

A cent a call! For this very small sum a seller can have access to a very complete list of buyers—the best of them as well as the most of them. A seller can get to this fine company of buyers no matter where they may be—in large cities, in crossroad villages, in off-the-main-line towns. He can get to foreign prospects—in Newfoundland, British West Indies, in South America. A seller can have access to a class of men who have formed the habit of reading advertisements as a necessary part of their day's work; and reading in particular the advertisements which are carried in their specialized business newspaper which they subscribe to, paying cash in advance therefor, and which they rely on for complete news relating to their business, including the news of advertisers—their proposals or statements about their goods.

All this for a cent a call!

Are you a director or official, with a voice in the selling policies of your house? And are you discouraging the use of advertising when advertising proposals come up for consideration? Think of John Wanamaker, Timothy Eaton, Marshall Field, Gordon Selfridge, Sears-Roebuck, Butler Bros., and a score of other firms making a great success. Think of the firms in Canada who have built up tremendous demand for their trade-marked, standardized and advertised product. And analyze the reasons for their great success. You will perhaps then have a new view concerning the function and value of advertising as a sales force or agent.

Then consider the cheapness of advertising to the retailer. You will get help from the table following:

	Cost per page (minimum)	Cost per year for page space	Cost per call
Dry Goods Review	$35	$420	1 2-5 cents
Men's Wear Review	30	360	2 cents
Canadian Grocer	24	1,248	5-11 cents
Hardware and Metal	24	1,248	8-11 cents
Bookseller and Stationer	25	300	1 2-3 cents
Sanitary Engineer	16.70	400	1 3-4 cents

PRINTED solicitation at such low cost ought assuredly to be incorporated into the selling plans of every wholesale or manufacturing firm relying on retailers to distribute their products or merchandise. Will you discuss the matter with us?

ANNOUNCEMENT

For 23 years we have been engaged in the manufacture of incandescent electric lamps. Commencing in 1895 with the Old Style Carbon Lamp, now obsolete, and advancing step by step through the development of tungsten vacuum type units, on up to our present achievement—a nitrogen lamp to be better known as the

"Blue Label Nitro"

No expense has been spared in carrying out the very latest scientific principles of manufacture, including equipment for generating our own nitrogen gas—a facility not possessed by any other lamp factory in Canada. Our experience and reputation are behind these lamps—they must "MAKE GOOD," and all we ask is an opportunity to prove their worth.

Orders now being taken for 75, 100 and 200-watt, 110 to 125-volt sizes.

Write our nearest branch for prices.

The Canadian Tungsten Lamp Co., Limited

Hamilton, Canada

Branches: Winnipeg Toronto Montreal

Play up that Cylinder

—In its principle of operation and method of removing dirt from clothes, the Crystal Washer is absolutely unique.

—Its perforated zinc cylinder revolves continuously in the one direction. There is no jar or rattle, no complicated mechanism and consequently small likelihood of mechanical disorders.

—The cylinder revolves at the rate of 75 R.P.M. forcing water, steam, suds and air through the meshes of the cloth. All the dirt is removed gently but surely without wear and tear on the goods.

In your selling talks dwell particularly on this cylinder. Not only is it a distinctive feature, its effect is readily understood. Your prospect will quickly realize how it does the work and why it does not harm the clothes. Then you can clinch the sale by drawing attention to the convenient swinging reversible wringer attached which can be operated in three different positions either conjointly with or independent of the washer.

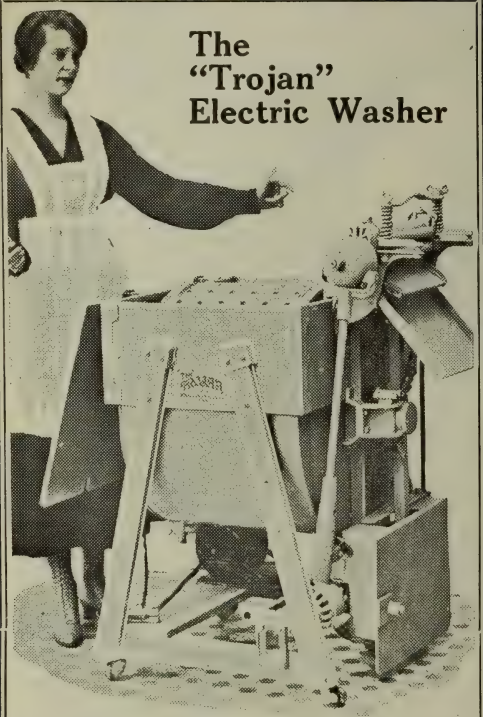
Electrical



The "Trojan" Electric Washer

Secure the agency for the latest improved Electric Appliance

Increase Your Sales

THE Electric Washer has come to stay—women are everywhere demanding them because of the saving they effect in time, money, labor and health—and live dealers are recognizing the wonderful sales possibilities presented and the profit-making opportunity. "TROJAN" agents are doing a large and increasing trade in them, for like every good article each sale makes the next one easier.

The simplicity and efficiency of the "TROJAN" is so easily demonstrated that **agents find no difficulty in convincing customers that it is the Electric Washer they should buy.** For the "TROJAN" will do the washing and wringing in less than half the usual time, and 1c an hour will pay for the electricity to operate it.

We want an agency in every town and city in Canada where one has not already been appointed. If you are interested, WRITE US TO-DAY and we will put the proposition before you or arrange to have one of our representatives call and see you.

SPIRAL CUT GEAR HAND WASHING MACHINE

Where mechanical power is not available, either gasoline, water, wind or electric, the Patriot Spiral Cut Gear Hand Washing machine makes the very best of the circumstances.

The power is transmitted through a balanced fly-wheel, seated on steel ball-bearings. The lever operates on special spiral machine-cut gears, accurately proportioned. The teeth slide into contact without friction, and human labor is reduced to the minimum.

All metal parts that are exposed to water are Electro-zinc coated to prevent rust.

The Patriot is easy for you to sell and easy for your customer to buy.

Better workmanship or better material than that used in the Patriot are simply not obtainable at any price.

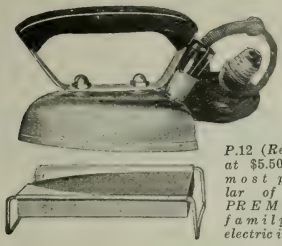
Beauty, strength and utility are all combined in this PREMIER Electric Toaster. Retails at $4.50.



P.12 (Retails at $5.50*) is most popular of the PREMIER family of electric irons.*

P.50, an electric radiator for the small room. A brisk seller in spring and fall. 600 watt.

Sweeping Canada Through Their Merit and Reputation

No quicker or greater success has emerged from the trade in years than that which has greeted the PREMIER line of electrical appliances. The reception already given it has been remarkable. Certainly it has outstripped even our most optimistic expectations.

All over Canada dealers are welcoming the PREMIER line—and adopting it, pushing it, reaping profits.

Two reasons account for this quick success.

The reputation of the men behind the PREMIER organization has naturally been an important factor. They are well known throughout the trade as progressive. They have grown up with the industry. They have studied the dealer's needs quite as sincerely as the public's.

But the chief reason for the wonderful success of the PREMIER line lies in the merit of the appliances themselves.

Their design shows many points of superiority. Their construction is sturdy, long-lasting, efficient. In finish they are more attractive. All in all, they represent a big step forward in manufacture.

Dealers who have seen the PREMIER line recognize these facts at once. They know they can guarantee these goods just as genuinely and unhesitatingly as we do ourselves. And they know the efforts we are making to build up confidence and push sales by our newspaper advertising.

Note the four big sellers illustrated here. Get our prices on them. Then test the "PREMIER" appliances for quick sales — put them in your window and stamp your store as a quality store.

Act on that impulse — write now. Don't let the other live man close up in your territory.

SUPREME AMONG WASHERS

The "1900" Complete Line Pays You Best

For over twenty years we have been making washing machines **exclusively.** The best types of washers have been developed and patented by us in this time.

Recently we have perfected two new models representing the highest development the Washing Machine has ever attained.

"1900"

Cataract Electric Washer

These most modern washers, as well as the other various "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" Dealers as have proven their worth in their different territories.

"1900"

Agitator Electric Washer

Is there a live "1900" Dealer in your district? Would you like to know more about the "1900" line?

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.

The "1900" Washer Company

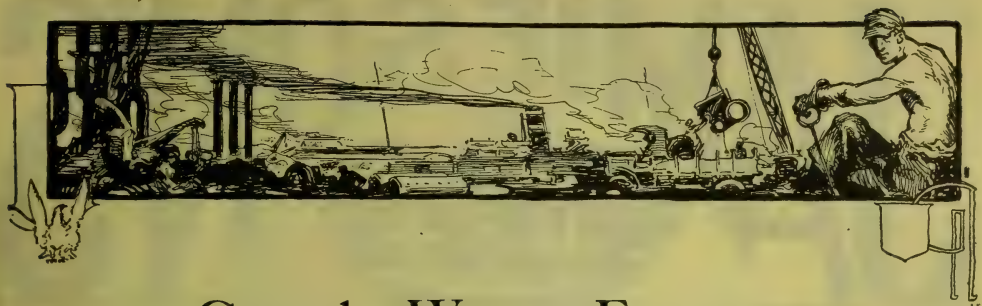
357 Yonge Street
TORONTO

Let Hardware & Metal—the paper most interested in your business—help you in your Want Ad. Problems.

Its circulation is among Business Men, interested in the same way as you are. Consequently, any replies you received would be earnest enquiries after business. You would thus eliminate the curious.

Use the Want Ad. Page of Hardware & Metal frequently to fill your needs. It will pay you.

If interested, tear out this page and keep with letters to be answered.



Canada Wants Export Trade

SINCE the outbreak of the war Canada has made wonderful strides as an exporting nation. Trade returns during the past three years have indicated huge increases in the totals of Canada's export trade—and among the many lines included in the trade returns hardware and allied lines occupy a prominent position.

Canadian industries are to-day in a better position to handle export trade than ever before in the history of the Dominion. It is true that owing to present demands for some lines a great scarcity exists. This, of course, is more or less of a temporary nature. Eventually, when pressing war needs have been supplied, Canada will be in a better position than ever to cater for world trade. Many manufacturers are now seeking new connections, with a view to supplying "Made in Canada" goods following the close of the war. Others are in a position to make shipments almost immediately if transportation facilities were available.

Twelve hundred extra copies of this issue are going to a select list of buyers in foreign lands. These buyers will undoubtedly find in this issue many advertisements of interest to them. Canadian firms solicit inquiries. Many excellent inquiries have been received and new connections formed as a result of previous "Export Numbers" of HARDWARE AND METAL.

Butterfield-

Your customer knows that name

If your customer knows Taps, Dies, Reamers or Twist Drills, he knows that name, "Butterfield." Just to show him that name stamped on the tool is to assure him of a quality tool that will work with speed and accuracy long after an ordinary tool would have been out of commission.

It's of great assistance in selling Taps, Dies, Reamers and Twist Drills to be able to point to the name "Butterfield" stamped on the tool.

Have you tried it?

All orders given prompt attention.

Write for a copy of our catalog.

For Temporary Construction

There is always a strong demand for a thoroughly reliable, waterproof, durable roofing at a low price. Our Standard Mohawk Roofing meets this demand. It has been tested for years and found entirely satisfactory.

Standard Mohawk Roofing

is specially recommended for covering the roof and sides of temporary homes, factories, saw mills, bunk houses, sheds, camp sites, etc.

Standard Mohawk consists of the same grade of felt and asphalt as our famous Brantford Asphalt Roofing but is lighter in weight and sanded on one side only. One weight only—40 lb. per square.

The same grade of roofing with a smooth surface—Mohawk Rubber Roofing—comes in 35 lb., 45 lb. and 55 lb. weights.

Another excellent roofing for the same purposes is our Leatheroid Roofing. Not quite so durable as Mohawk, but lower in price—35 lb., 45 lb. and 55 lb. weights.

We make roofings suitable for every purpose, for covering the humble shack and the costly home, the temporary saw mill and the permanent, fire-proof factory.

Brantford Roofing is a profitable line for the dealer to handle.

Our aim is to hold your business through perfect goods

"RELIABLE"
Door Hangers and Track

are built for permanence. The track is tubular. Malleable iron Hangers reinforced where strain is greatest. The Hanger once on never comes off, the under rollers prevent jumping the track. Track supports are adjustable, can be placed where they will do the most good. Easy to erect, but hard to get out of order.

Round Trolley

Choice of two hangers, one for overlapping doors and one for flush doors. The track is perfectly round —no grooves to hold dirt or water —is stormproof. The Flush Hanger permits door to fit into opening, making it wind, storm and coldproof.

Square Trolley

Two hangers, with or without oiling device. Track is entirely enclosed, weatherproof, adjustable. Rollers are double on single roller bearing, and conform to the round groove of the track, practically eliminating all friction.

We Guarantee Every Reliable Hanger

We make a full line of door hangers, including square and round trolley track and fire door fittings that are labelled under the direction of the National Board of Fire Underwriters. We also manufacture locks and builders' hardware. We invite enquiry.

How many horse owners in your community?

Just think. There are more than a few. And every one of them appreciates the fact that a sore shoulder is a serious discount to the value of a horse.

Right there is where you can get them interested in the TAPATCO BRAND COLLAR PAD—the pad that keeps the horse's shoulders in good working condition all day and every day.

The excellent grade of cotton drill from which the TAPATCO Pad is made and the specially prepared composite stuffing in every one is a guarantee of long wear under the most trying conditions.

Note Exclusive Tapatco Patent

—A new patented staple and felt reinforcing device for attaching the hooks to the pad. This prevents the hooks from pulling off easily, even where the fabric has been weakened by long use. **This form of attachment is found only on pads manufactured by us.**

You'll need a big supply of Tapatco Cotton Gloves this year

Increased activities on the farm and in the field of production generally will boost the demand for TAPATCO Gloves.

These are high-grade, easy-selling gloves that will stand up and satisfy under the most severe service. There are none better for use in field, garden, workshop or factory.

Order through your jobber now and play up TAPATCO—the glove of service and quality. Made in Band Top, Knit Wrist and Gauntlet Styles, light, medium and heavy weight. Jersey gloves and mitts in Oxford, Tan and Slate.

We also make a leatherette-faced glove that is a winner everywhere.

FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's-Unique Ratchet Wrench and come to you for a set.

THE VERY BEST BRUSHES YOU CAN SELL YOUR CUSTOMERS ARE "SIMMS' SET IN RUBBER" BRUSHES, for this process of holding bristles in the ferrule overcomes the most frequent difficulty experienced with brushes, viz.: the shedding of bristles.

In SIMMS' SET IN RUBBER BRUSHES the bristles are securely embedded in Hard, Vulcanized Rubber that is not detrimentally affected when used in any of the following solvents: alcohol, water, turpentine, grease, oil, benzine, naphtha, kerosene, crude oil, banana oil, varnish, paint, enamel, lacquers, boiling water, glue, paste.

Imitations under various proprietary names are offered, but are worthless when used in many of the above solvents.

SIMMS' SET IN RUBBER BRUSHES are made by skilled workmen under expert supervision and the methods and equipment used are unequalled in any other brush factory in the world.

The growing demand for Brushes made in this way is a very evident sign of the appreciation of Brush users.
